Note—Rice (husked)—Oryza Sativa.
Ragi—Eleusine Corocana.
Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests; serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice.	... 10 to 14	6½ to 7	} Seers per rupee.
Ragi	... 25 to 30	16 to 17	

Agricultural operation—Ragi thrashing.

Outturn of ragi from five to six annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Sugar-cane and ragi are being harvested in Hoskote, Doddballapur, Anekal, Nela-mangala and Closepet, and Vaisakhi paddy in Netamangala. Sugar-cane is also being milled in Anekal and Channapatna. Standing crops are in good condition. The average outturn is estimated at 8 annas. Preparations for sowing paddy, etc., are made in Bangalore and Kankanhalli.
10. Prospects of the season moderate.
11. Public health generally good.
12. Cattle healthy. Water and fodder are available.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being sown in Bagepalli, Goribidnur, Srinivaspur and Gudibanda and paddy in Goribidnur. Ragi and kulthi in Srinivaspur and punaji paddy in Kolar are being harvested. Sugar-cane is being milled in almost all the taluks.
10. Prospects of the season depend upon early mungar rain. Food stocks are available.
11. Public health generally good.
12. Water and fodder are available.

TUMKUR.

8. Market well supplied.
9. Sugar-cane in Maddagiri, Sira, Gubbi, Koratagere and Turuvekere; kadale in Maddagiri, Chiknayakanhalli, Sira and Koratagere; and kulthi in Pavagada are being harvested. Sugar-cane in Maddagiri; and paddy in Maddagiri, Kunigal and Koratagere are sown. Standing crops are in fair condition. In parts of Kunigal insects are damaging, kadale crop. The following is the estimated outturn of crops:—

Tumkur	... Paddy	... 4 to 8 annas.
	Sugar-cane	... 4 to 12 "

Maddagiri	...	Sugar-cane	...	8	annas.
		Paddy	...	4	"
		Kadale	...	2	"
Chiknayakanhalli..		Do	..	6 to 8	"
Sira	..	Do	..	4 to 6	"
		Sugar-cane	..	6 to 12	"
Gubbi	..	Ragi, ballar, togari and kulthi	...	4 to 6	"
Pavagada	...	Kulthi	..	2	"
Turuvekere	...	Sugar-cane	..	4 to 8	"

10. Prospects of the season not encouraging. Food stocks are sufficient for the present. Owing to insufficient rainfall supply of water in wells is reported to be diminishing in parts of Sira and Pavagada with the advance of hot weather.

11. Public health generally good, except that small-pox is reported to be prevalent in some parts of Tiptur.

12. Cattle healthy. Date leaves are used as fodder for cattle in some parts of Sira. In parts of Chiknayakanhalli, Sira, Gubbi, Tiptur, Pavagada and Turuvekere water is drawn from wells for cattle to drink.

MYSORE.

8. Market well supplied.

9. Standing crops are fair in parts of Chamrajnagar, Seringapatam, T.-Narsipur, Malvalli and Krishnarajpete, and good in parts of Hunsur, Heggaddevankote, Nanjangud and Nagamangala. Lands in Seringapatam and Gundlupet are being ploughed. Lands under tanks in Krishnarajpete are being sown with sugar-cane. Sugar-cane and ballar are being harvested in parts of Krishnarajpete. The probable outturn of crops during the week is as follows:—

T.-Narsipur	...	...	Kadale, mulberry and sugar-cane.	12	annas.
Hunsur	...	...	Ragi	...	8
		...	Kulthi	...	less than 4
		...	Togari	...	12
		...	Ballar	...	10
Krishnarajpete	...	...	Ragi	...	8 to 12
		...	Paddy	...	12
		...	Togari	...	10 to 12
		...	Kulthi	...	6 to 8

10. Prospects of the season fair on the whole. Food stock sufficient for the present.

11. Public health good, except for small-pox reported to be prevailing in Heggaddevankote and Nanjangud.

12. Cattle healthy in all taluks, except in parts of Chamrajnagar, where they are suffering from "sate" and "chappe" diseases. Water and fodder generally available except in parts of Heggaddevankote, Gundlupet, Mandya and Nagamangala, where they are reported to be getting scanty.

HASSAN.

8. Market well supplied.

9. Land is being ploughed in parts of Manjarabad and Belur and Vaisakhi paddy is being sown in parts of Manjarabad. Standing crops are reported to be in fairly good condition. Kadale is being reaped in Hassan and Belur. The following is the estimated outturn of crops:—

Hassan	...	...	Kadale, sugar-cane, etc.	...	4 to 8 annas.
Arsikere	...	...	Do	...	4
Hole-Narsipur	...	...	Sugar-cane, castor, etc.	...	3 to 10

10. Prospects of the season fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the district.

12. Cattle generally healthy. Fodder and water available generally except in Kankatte hobli of Arsikere, where some difficulty is felt for want of fodder and water. Foot and mouth disease are reported to prevail in Belur and Arsikere.

SHIMOGA.

8. Market well supplied, but prices high.
9. Sugar-cane is being milled in Shimoga, Sagar, Sorab and Kumsi, and it is being planted in Sorab and Kumsi. Kadale is ripe for harvest in Shimoga, and the last instalment of arecanut is being picked up and gathered in Sagar and Tirthahalli. Standing crops are in good condition.
10. Food stocks sufficient for the present. Prospects remain as before. There is no immediate cause for anxiety, but everything depends upon early mungar showers.
11. Public health good.
12. Fodder is available in moderate quantities but the supply of water is running short in Shimoga, Kumsi, Shikarpur and Sorab.

KADUR.

8. Market fairly supplied.
9. Ploughing is carried on in parts of Mudgere. Kar-paddy is being sown in parts of Kadur. Standing crops are in fairly good condition. Coffee, arecanut and sugar-cane in parts of Koppa; kadale and sugar-cane in parts of Kadur; sugar-cane in parts of Yedahalli; coffee and arecanut in Mudgere; sugar-cane and garlic in Chikmagalur are being harvested. The probable outturn of crops is as follows:—

Chikmagalur	... Paddy, kulthi and coriander	... 4 annas in the maidan and 8 annas in other parts.
Kadur	... Paddy, ragi, cholum and kulthi	2 to 8 annas.
Tarikere	... Standing crops	... 8 "
Mudgere	... Paddy and ragi	... 8 "
	... Coffee and cardamom	... 12 "
Sringeri	... Paddy	... 12 "
	... Arecanut	... 10 "

10. Prospects fair. Food stocks are reported to be available and sufficient for the present.
11. Public health generally good.
12. Cattle generally healthy, but foot and mouth disease are reported to prevail in parts of Koppa, Kadur, Tarikere and Mudgere in a mild form. Fodder and water generally available.

CHITALDRUG.

8. Market well supplied.
9. Standing crops are reported to be in fairly good condition, except in some parts where, they are withering for want of rain. The probable outturn of crops during the week is as follows:—

Chitaldrug	.. Kadale, cholum (white) and Cotton	... 4 annas.
		... 2 "
Hiriyur	.. Cholum (white) kadale and tobacco	.. 2 to 4 "
	.. Ballar, navane and ragi	.. 4 "
	.. Savé	.. 2 "
	.. Paddy under wells	10 to 12 "
Holalkere	.. Togari, ballar, cholum (white) kulthi, and kadale	.. 8 "
Davangere	.. Cholum, cotton and castor	.. 6 "
	.. Sugar-cane	.. 8 "
Hosdurga	... Paddy	.. 6 "
	... Castor	.. 8 "
	... Chillies	.. 10 "
Harihar	.. Cotton	.. 4 to 8 "

10. Prospects of the season fair. Food stocks available.
11. Public health good.
12. Cattle are generally healthy, except in parts of Challakere, Chitaldrug, Holalkere and Molakalmuru where they are reported to be suffering from foot and mouth disease. No unusual casualties are reported. Water and fodder procurable in limited quantities.

BANGALORE,
21st February 1906.

B. K. VENKATA VARADA IYENGAR,
Secy. to the Govt. of H. H. the Maharaja of Mysore,
Gen. & Rev. Dept.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} Seers per rupee.
Ragi	... 25 to 30	16 to 17	

Agricultural operation— Ragi thrashing.

Outturn of ragi is from 5 to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Sugar-cane and ragi are being harvested in Bangalore, Hoskote, Channapatna and Devanahalli; potato in Bangalore and paddy in Nelamangala. Standing crops are reported to be in good condition in Anekal. The average outturn is estimated at 8 annas. Lands to the extent of nearly 90,085 acres are being prepared for sowing ragi in Bangalore, Closepet and Channapatna. Sugar-cane and paddy fields are being prepared in Bangalore, Hoskote, Kankanhalli and Closepet.
10. Prospects of the season moderate. Food stocks available.
11. Public health generally good.
12. Water and fodder available. Small tanks are failing.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being sown in Mulbagal, Sidlaghatta, Bagepalli, Goribidnur, Srinivasapur and Gudibanda; sugar-cane is being milled in almost all the taluks. Ragi and kulthi are being harvested in Srinivasapur, Sidlaghatta and Bowringpet.
10. Prospects of the season depend upon early *Mungar* rains. Food stocks are available.
11. Public health generally good.
12. Water and fodder are available.

TUMKUR.

8. Market well supplied.
9. Sugar-cane in Maddagiri, Sira, Gubbi, Koratagere and Turuvekere; paddy in Tumkur and Kunigal, wheat in Maddagiri, kadale in Maddagiri, Sira, Pavagada, Kunigal, Koratagere and Turuvekere and cholum in Sira are being harvested. Sugar-cane in Maddagiri, and paddy in Maddagiri and Turuvekere are sown. Standing crops are in fair condition. In parts of Kunigal insects are damaging the kadale crop. The following is the estimated outturn of crops:—

Maddagiri	... Ragi	... 6 annas.
	Sugar-cane	... 8 "

Maddagiri	...	Kadale	...	2	annas.
		Wheat	...	4	"
Sira	..	Sugar-cane	..	6 to 12	"
		Kadale	..	4 to 6	"
		Cholum	...	4 to 8	"
Gubbi	..	Ragi, ballar, togari and kulthi	...	4 to 6	"
Pavagada	...	Kadale	..	4	"
Koratagere	...	Sugar-cane	...	12	"
		Kadale and cholum	..	2 to 4	"
Turuvekere	...	Sugar-cane	..	4	"
		Kadale	...	12	"

10. Prospects of the season not encouraging. Food stocks are sufficient for the present. Supply of water in wells is reported to be diminishing in parts of Sira, Maddagiri, Tiptur and Pavagada with the advance of the hot weather.

11. Public health generally good, except that small-pox is reported to be prevalent in parts of Tiptur.

12. Cattle healthy except for foot and mouth disease prevalent in parts of Chiknayakanhalli and Tiptur. In parts of Sira and Turuvekere date leaves are used as fodder for cattle. In parts of Maddagiri, Chiknayakanhalli, Sira, Gubbi, Tiptur and Pavagada water is drawn from wells for cattle to drink.

MYSORE.

8. Market well supplied.

9. Standing crops are fair in parts of Chamrajnagar, Seringapatam, T.-Narsipur, Malvalli and Krishnarajpete, and good in Hunsur, Heggaddevankote and Nagamangala. Lands in parts of Seringapatam and Gundlupet are being ploughed. Ballar and kadale in parts of Hunsur, and ballar and sugar-cane in parts of Krishnarajpete are being harvested. The probable outturn of crops is as follows:—

Hunsur	...	Ragi	...	8	annas.
		Kulthi	...	less than 4	"
		Togari	...	12	"
		Ballar	...	10	"
T.-Narsipur	...	Sugar-cane and mulberry	...	12	"
Krishnarajpete	...	Ragi	...	8 to 12	"
		Paddy	...	12	"
		Togari	...	10 to 12	"
		Kulthi	...	6 to 8	"

10. Prospects of the season fair. Food stock sufficient for the present.

11. Public health good throughout, but small-pox is reported to be prevailing in parts of Heggaddevankote and Nanjangud.

12. Cattle healthy. Water and fodder available except in parts of Heggaddevankote, Gundlupet, Mandya and Nagamangala.

HASSAN.

8. Market fairly well supplied.

9. Land is being ploughed and Vaisakhi paddy sown in parts of Manjarabad. Sugar-cane is reported to be in a fair condition in Hassan, Belur, Arsikere, Channarayapatna, Hole-Narsipur and Alur. The following is the estimated outturn of crops:—

Hassan	...	Sugar-cane, etc.	...	4 to 8 annas.
Arsikere	...	Sugar-cane and paddy	...	4
Hole-Narsipur	...	Sugar-cane	...	10

10. Prospects fair. Food stocks sufficient for the present.

11. Public health good. Small-pox is reported to be prevailing in several parts.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur and Arsikere. Fodder and water generally available except in Kana-katte hobli of the Arsikere Taluk, where some difficulty is felt for want of the same.

SHIMOGA.

8. Market well supplied, but prices are high.
9. Ragi, cholum, paddy, kulthi and kadale in Channagiri, and sugar-cane in Sagar and Kumsi are being threshed out. Sugar-cane is being milled in Shikarpur, Sorab and Kumsi, and it is being planted in Sorab and Kumsi. The last instalment of arecanut in Sagar and Tirthahalli and pepper in Sagar are being gathered. Kadale is ripe for harvest in Shimoga. Standing crops are in fairly good condition.
10. Food stocks are sufficient for the present.
11. Public health good.
12. Fodder is available in moderate quantities. Supply of water is running short in Shimoga, Kumsi, Shikarpur and Sorab.

KADUR.

8. Market fairly supplied.
9. Ploughing is carried on in parts of Mudgere and Chikmagalur. Kar-paddy in Kadur and green gram in Tarikere are being sown. Standing crops are in fairly good condition. Sugar-cane, coffee, arecanut and pepper in parts of Koppa, and sugar-cane and garlic in parts of Chikmagalur are being harvested. The harvesting of coffee and arecanut is almost over in Koppa. The harvesting of sugar-cane is to the extent of 15 annas, and that of pepper is about 2 annas in the Koppa Taluk. The probable outturn is as follows :—
- | | | | | | |
|-------------|-----|---|-----|-----|---|
| Kadur | ... | Sugar-cane | .. | ... | 8 annas. |
| | | Other standing crops | | ... | 4 to 8 annas. |
| Tarikere | ... | Standing crops | ... | ... | 8 " |
| Mudgere | ... | Paddy and ragi (harvested) | ... | ... | 8 " |
| | | Coffee and cardamom (harvested) | ... | ... | 12 " |
| Chikmagalur | ... | Paddy, coriander, and kulthi (harvested.) | | | 4 annas in maidan and 8 annas in other parts. |
10. Prospects of the season fair. Food stocks available and sufficient for the present.
11. Public health generally good.
12. Cattle generally healthy, foot and mouth diseases reported to have prevailed in parts of Koppa, Kadur, Tarikere and Mudgere are now subsiding. Water and fodder generally available.

CHITALDRUG.

8. Market well supplied.
9. Standing crops are reported to be in fairly good condition, except in some parts of Challakere. Paddy, sugar-cane, cholum (white) and tobacco were sown in lands under *Kapile* wells in Molakalmuru. The estimated outturn of crops harvested during the week is as follows :—
- | | | | | |
|------------|----|---------------------------------|-----|------------|
| Chitaldrug | .. | Cholum (white) and kadale | ... | 4 annas. |
| | | Cotton | .. | 2 " |
| Hiriyur | .. | Kadale ballar and navane | ... | 4 " |
| | | Tobacco | ... | 2 to 4 " |
| | | Paddy under <i>kapile</i> wells | ... | 10 to 12 " |
| | | Ragi do | ... | 8 to 10 " |
| | | Ragi | ... | 2 to 4 " |
| Hlalkere | .. | Cholum (white) | ... | 4 to 6 " |
| | | Kadale | .. | 8 " |
| Davangere | .. | Cholum (white) | ... | 6 " |
| | | Cotton and sugar-cane | .. | 8 " |
| | | Castor | .. | 6 " |
10. Prospects of the season fair. Food stocks available.
11. Public health good.
12. Cattle are reported to be generally healthy, except in parts of Chitaldrug, Challakere and Molakalmuru, where foot and mouth diseases still prevail. No unusual casualties are reported. Water and fodder are procurable in limited quantities.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Ragi	... 25 to 30	16 to 17	} seers per rupee.
Rice	... 10 to 11	6½ to 7	

Agricultural operation— Ragi thrashing.

Outturn of ragi is from 5 to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Ragi and sugar-cane are being harvested in all the taluks except Doddballapur and Magadi. Paddy in Bangalore, potato in some parts of Hoskote and kadale in Nelamangala have been harvested. The average outturn is estimated at about 8 annas. Ploughing operations are reported to have been commenced in parts of Anekal where there was rainfall.
10. Food stocks are available. Prospects of the season moderate.
11. Public health generally good.
12. Water and fodder are generally available. Small tanks are failing.

KOLAR

8. Market well supplied.
9. Sugar-cane is being sown in Sidlaghatta, Bagepalli, Goribidnur, Srinivasapur and Gudibanda; sugar-cane is being milled in all the taluks except Goibidnur. Ragi in Bowringpet and Srinivasapur, kulthi in Srinivasapur and menthya in Gudibanda are being harvested.
10. Prospects of the season moderately fair. Food stocks are available.
11. Public health generally good.
12. Water and fodder are available. Pasture is getting scarce.

TUMKUR.

8. Market well supplied.
9. Sugar-cane in Tumkur, Sira, Gubbi and Koratagere, kadale in Sira, Gubbi, Pavagada and Turuvekere, and paddy in Pavagada and Kunigal are being harvested. Paddy in Kunigal and Koratagere is sown on lands under kapile wells. Standing crops such as paddy,

sugar-cane, nat-ragi, cholum, kadale and castor are in fair condition. In parts of Kunigal insects are damaging the kadale crop. The following is the estimated outturn of crops:—

Tumkur	...	Paddy and sugar-cane	..	4 to 8 annas.
Sira	...	Kadale	...	4 to 6 "
		Sugar-cane	...	6 to 12 "
		Cotton	...	2 to 4 "
		Tobacco	..	8 to 12 "
Gubbi	...	Ragi, ballar, togari and kulthi	...	4 to 6 "
Pavagada	...	Paddy	...	4 "
		Kadale	..	2 "
Koratagere	..	Kadale	...	2 "
Turuvekere	...	Kadale	..	8 "

10. Prospects of the season not encouraging. Food stocks are reported to be sufficient for the present. Supply of water in wells is reported to be diminishing in parts of Sira, Tiptur, Pavagada and Koratagere with the advance of hot weather.

11. Public health generally good, except that small-pox is said to be prevalent in parts of Tiptur.

12. Cattle healthy, except that foot and mouth disease is prevalent among cattle in parts of Tiptur. In parts of Sira and Turuvekere date leaves are used as fodder for cattle. In parts of Chiknayakanhalli, Sira, Gubbi, Tiptur, Pavagada and Koratagere water is drawn from wells for cattle to drink.

MYSORE.

8. Market well supplied.

9. Standing crops are reported to be fair in parts of Chamrajnagar, T.-Narsipur and Malvalli, and good in parts of Seringapatam, Nanjangud and Nagamangala. Lands in parts of Seringapatam and Gundlupet are being ploughed for sowing black and green grams. Sugar-cane is being sown in parts of Krishnarajpete and kadale is being harvested in parts of Malvalli. The probable outturn of crops is as follows:—

Hunsur	...	Ragi	...	8 annas.
		Kulthi	...	less than 4 "
		Ballar	...	10 "
		Togari	...	12 "
		Kadale	...	6 "
T.-Narsipur	...	Sugar-cane and mulberry	...	12 "

10. Prospects of the season fair on the whole. Food stock sufficient.

11. Public health generally good, but small-pox is prevailing in parts of Heggaddevankote and Krishnarajpete.

12. Cattle healthy. Fodder and water generally available except in parts of Gundlupet, Mandya and Nagamangala. Takavi advances have been made to raiyats in Nagamangala.

HASSAN.

8. Market fairly well supplied.

9. Vaisakhi paddy is being sown in parts of Manjarabad. Sugar-cane in Hassan, Belur, Arsikere, Hole-Narsipur and Alur, and paddy in Hassan, Manjarabad and Arsikere are reported to be in a fair condition. The following is the estimated outturn of crops:—

Hassan	...	Sugar-cane, etc.	...	4 to 8 annas.
Arsikere	...	Sugar-cane and paddy	...	4 "
Hole-Narsipur	...	Sugar-cane	...	10 "

10. Prospects fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the district.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur and Arsikere. Fodder and water generally available except in Kana-katte hobli of the Arsikere Taluk, where some difficulty is felt for want of the same.

SHIMOGA.

8. Market well supplied. Prices high.

9. Sugar-cane is being milled in all taluks, and is being planted in the Sorab Taluk. Vaisakhi paddy is being planted in parts of Sagar. Cotton and castor are reported to be in a fair condition in Honnali. Cholum, black gram and cow gram are being harvested in parts of the Honnali Taluk.

10. Food stocks are reported to be sufficient for the present except in a few parts of Sorab.

11. Public health good. Small-pox prevails in parts of the Sagar Taluk.

12. Fodder is available in moderate quantities. Dry grass is available in all taluks. Want of water-supply is felt in parts of Shimoga, Shikarpur, Honnali and Sorab.

KADUR.

8. Market fairly supplied.

9. Ploughing is carried on in parts of Mudgere and Chikmagalur. Kar-paddy is being sown in Kadur. The standing crops, *viz.*, Bengal gram in parts of Chikmagalur; cholum and sugar-cane in Tarikere; pepper and sugar-cane in parts of Koppa; sugar-cane in parts of Yedahalli are in fairly good condition. Sugar-cane, cholum and garlic in Kadur are fair but in some parts poor. Arecanut, sugar-cane and pepper in Koppa; sugar-cane and garlic in Chikmagalur; cholum in Tarikere; Bengal gram and garlic in parts of Kadur; and sugar-cane in parts of Yedahalli are being harvested. The harvesting of coffee and arecanut in Koppa is over. The probable outturn is as follows:—

Kadur	... Standing crops	..	... 4 annas.
Tarikere	... Standing crops	...	... 8 "

10. Prospects of the season fair. Food stocks are reported to be available and sufficient for the present.

11. Public health generally good.

12. Foot and mouth disease to cattle in parts of Koppa, Tarikere, Yedahalli, Kadur except in one hobli of Mudgere Taluk is reported to be subsiding. No unusual mortality reported on this account. Remedial measures are being adopted. Water and fodder generally available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in fairly good condition, except in some parts of Chalkakere. The probable outturn of crops harvested during the week is as follows:—

Chitaldrug	.. Cholum (white), kadale and cotton	...	4 annas.
Holalkere	.. Cholum (white)	..	4 to 6 "
	.. Kadale	..	8 "
Davangere	.. Castor and kadale	..	6 "
	.. Sugar-cane and cotton	..	8 "
	.. Cholum (white)	...	4 "
Molakalmuru	Cotton	..	4 to 6 "

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle generally healthy, except in parts of Chalkakere where foot and mouth disease still prevails. Water available. Fodder procurable in limited quantities.

* Figures for Tarikere and Koppa were erroneously printed against Chikmagalur and Kadur and vice versa in the last week's report.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Agricultural operation—Ragi thrashing.

Outturn of ragi is from 5 to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Sugar-cane and dry crops have been harvested. The other crops are expected to yield about 8 annas on an average. Paddy and sugar-cane are being sown in the Bangalore Taluk. In some parts of the districts the fields are being made ready for sowing.
10. Prospects of the season ordinary.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being sown in Sidlaghatta, Goribidnur, Bagepalli, Srinivasapur and Gudibanda; and it is being milled in all the taluks. Ragi in Bowringpet and Srinivasapur, and menthya in Gudibanda are being harvested.
10. Prospects of the season moderately fair. Food stocks are available.
11. Public health generally good.
12. Water and fodder are available. Pasture is getting scarce.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri and Pavagada, sugar-cane in Maddagiri, Sira, Gubbi, Koratagere and Turuvekere, kadale in Maddagiri, Gubbi, Tiptur, Pavagada, Kunigal, Koratagere and Turuvekere, wheat in Maddagiri and Sira, cotton in Sira and Pavagada, and cholum in Sira,

are being harvested. Sugar-cane is sown in Maddagiri and Kunigal. Standing crops are in fair condition. The following is the estimated outturn of crops:—

Tumkur	...	Paddy and sugar-cane	..	4 to 8 annas.
Maddagiri	...	Ragi, kadale and wheat	...	4 „
		Paddy	...	2 „
		Sugar-cane	...	8 „
Sira	...	Sugar-cane	...	6 to 12 „
		Wheat and cotton	...	2 to 4 „
Gubbi	...	Ragi, ballar, togari and kulthi	...	4 to 6 „
Pavagada	...	Paddy	...	2 „
		Kadale	...	4 „
		Cotton	...	1 „
Kunigal	..	Kadale	...	2 „
Turavekere	...	Sugar-cane	..	4 „
		Kadale	...	8 „

10. Prospects of the season not encouraging. Food stocks are reported to be sufficient for the present. Supply of water in wells is diminishing in parts of Sira, Maddagiri and Tiptur with the advance of hot weather.

11. Public health generally good, except for small-pox reported to be prevalent in parts of Tiptur.

12. Cattle healthy, except that foot and mouth disease is prevalent among cattle in parts of Tiptur. In parts of Maddagiri, Chiknayakanhalli, Gubbi, Pavagada and Turuvekere, water is drawn from wells for cattle to drink. In parts of Sira date leaves are used as fodder for cattle.

MYSORE.

8. Market well supplied.

9. Standing crops *viz.*, sugar-cane, cotton and mulberry are fair in parts of Chamrajnagar, Malvalli and Krishnarajpete; and good in parts of T.-Narsipur and Nagamangala. Lands in parts of Gundlupet and Seringapatam are being ploughed for sowing *kar* seeds, and sugar-cane is being sown in parts of Krishnarajpete. Kadale in parts of Malvalli is being harvested. The probable outturn of crops during the week is as follows:—

Hansur	...	Ragi	...	8 annas.
		Kulthi	...	less than 4 „
		Ballar	...	10 „
		Togari	...	12 „
		Kadale	...	6 „
T.-Narsipur	...	Sugar cane and mulberry	...	12 „

10. Prospects of the season fair on the whole. Food stocks sufficient for the present.

11. Public health generally good. But small-pox is reported to be prevailing in parts of Krishnarajpete and Heggaddevankote.

12. Cattle healthy. Fodder generally available. Difficulty for water is felt in parts of Hunsur, Gundlupet, Heggaddevankote, Mandya and Nagamangala. Takavi advances to the extent of Rs. 822 have been made in the Nagamangala Taluk.

HASSAN.

8. Market fairly well supplied.

9. Standing crops fair. Sugar-cane is being planted in Channarayapatna. Estimated outturn of crops is as follows:—

Arsikere	...	Sugar-cane and paddy	...	4 annas.
Hole-Narsipur	...	Sugar-cane	...	10 „

10. Prospects of the season fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the district.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur and Arsikere. Fodder and water generally available except in the Kana-katte hobli of the Arsikere Taluk, where some difficulty is felt for want of the same.

SHIMOGA.

8. Market well supplied. Prices high.

9. Ragi in Channagiri, Honnali and Sorab, cholum and kulthi in Channagiri and Honnali, wheat, navane and togari in Honnali, cow gram, green gram, black gram and kadale in Sorab and pepper in Sagar are being harvested. The harvesting of paddy in Sorab and Sagar is almost complete. Sugar-cane is being milked in all taluks. Sugar-cane planting has commenced in Sagar and Sorab. The estimated outturn of harvested crops in Sagar is 15 annas of sugar-cane and 4 annas of pepper, and the estimated outturn of crops sown is 8 annas of Vysakhi paddy.

10. Prospects of the season fair. Food stocks are reported to be somewhat insufficient in the Shikarpur and Sorab Taluks and in the Kumsi Sub-taluk. In other taluks they are sufficient.

11. Public health good.

12. Cattle healthy. Fodder is insufficient in parts of Honnali, Shikarpur and Kumsi. Want of water-supply is felt in parts of Shimoga, Shikarpur, Honnali, Sorab and Kumsi.

KADUR.

8. Market fairly supplied.

9. Ploughing is carried on in Mudgere. Karpaddy in Kadur and green gram in Tarikere are being sown. Standing crops are in fairly good condition. Sugar-cane in Yedahalli and sugar-cane and garlic in Chikmagalur are being harvested. The probable outturn of standing crops in Tarikere is 8 annas.

10. Prospects of the season fair. Food stocks are reported to be available and sufficient for the present.

11. Public health generally good except that small-pox prevails to some extent in the Chikmagalur town.

12. Foot and mouth disease to cattle in parts of Koppa, Tarikere, Yedahalli and Mudgere (except in one hobli) is reported to be subsiding. No unusual mortality is reported on this account. Water and fodder generally available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in fairly good condition, except in Challakere where cholum (white) is reported to be fading. Sugar-cane in Holalkere and cotton and chillies in Jagalur were sown during the week. The outturn of crops harvested during the week is as follows:—

Chitaldrug	.. Cholum (white), kadale, cotton and wheat	..	4 annas.
	Sugar cane	..	10 "
Hiriyur	... Cholum (white) and cotton	..	2 to 4 "
	Navane, ballar and kadale	..	4 "
	Wheat under kapile wells	..	10 to 12 "
	Ragi do	..	8 to 10 "
Holalkere	... Kadale	..	8 "
Davangere	.. Cholum (white)	..	4 to 6 "
	Kadale and cotton	..	8 "
	Sugar-cane	..	8 to 12 "
Molakalmuru	... Wheat	..	4 to 8 "

10. Prospects of the season fair. Food stocks sufficient.

11. Public health good.

12. Cattle generally healthy, except in Challakere where foot and mouth disease still prevails. Water available. Fodder procurable in limited quantities.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Agricultural operation— Ragi thrashing.

Outturn of ragi to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. The crops hitherto harvested are being threshed out. Sugar-cane is being milled in some parts. Sugar-cane is being harvested in Bangalore and Channapatna and sown to the extent of three acres in the Bangalore Taluk; other crops are being harvested in Doddballapur and Nelamangala. The probable outturn of crops is about 8 annas on an average, excepting some parts where it is still less.
10. Prospects of the season moderate. The prices of food stocks are rather high in the taluk kasabas.
11. Public health generally good.
12. Cattle generally healthy. In some parts of Hoskote foot and mouth disease is reported to prevail. Fodder and water available.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being sown in Bowringpet, Sidlagh atta, Bagepalli, Goribidnur, Srinivaspur and Gudibanda; and it is being milled in all the taluks. Harvesting of ragi is going on in all the taluks.
10. Prospects of the season depend upon early rains. Food stocks available.
11. Public health generally good.
12. Water and fodder are generally available, but the supply of water is running short. Pasture in fields and grazing lands is almost exhausted.

TUMKUR.

8. Market well supplied.
9. Wheat in Maddagiri and Sira; sugar-cane in Maddagiri, Sira, Gubbi, Koratagere and Turuvekere; cholam in Maddagiri, Sira and Koratagere; kadale in Maddagiri, Pavagada, Gubbi, Tiptur, Koratagere and Turuvekere; and cotton in Sira and Pavagada are being

harvested. Sugar-cane is sown in Maddagiri. Standing crops are in an indifferent condition. In Chiknayakanhalli water-supply is insufficient for the paddy crop. Sugar-cane crop in Mayasandra in the Turuvekere Sub-Taluk is partly withering. Cotton and wheat crops in Sira are reported to be very bad. The following is the estimated outturn of crops:—

Maddagiri	...	Cholum and kadale	...	4 annas.
		Sugar-cane	...	8 „
		Wheat	...	2 „
Sira	...	Cholum and Sugar-cane	...	4 to 8 „
		Wheat and cotton	...	2 to 4 „
Gubbi	...	Ragi, ballar, togari and kulthi	...	4 to 6 „
Koratagere	..	Cholum	...	4 „
		Kadale and sugar-cane	...	8 „
Turavekere	...	Kadale	..	8 „
Pavagada	...	Sugar-cane	...	4 „
		Castor and kadale	..	4 „
		Cotton	...	1 anna

10. Prospects of the season not encouraging. Food stocks sufficient for the present. Supply of water in wells is diminishing in parts of Maddagiri, Sira and Tiptur with the advance of hot weather.

11. Public health generally good.

12. Cattle healthy, except that foot and mouth disease is prevalent in parts of Tiptur. In parts of Sira date leaves are being used as fodder for cattle. In parts of Maddagiri, Chiknayakanhalli, Gubbi and Turuvekere water is drawn from wells for cattle to drink.

MYSORE.

8. Market well supplied.

9. Standing crops fair in parts of Chamrajnagar, T.-Narsipur, Malvalli and Krishnarajpete, and good in parts of Seringapatam, Nanjangud and Nagamangala. Lands in parts of Seringapatam and Gundlupet are being ploughed. Sugar-cane and paddy are being sown in parts of Krishnarajpete. Kadale is being harvested in parts of Malvalli. The probable outturn of crops is as follows:—

Hunsur	...	...	Ragi	...	...	8 annas.
			Kulthi	...	less than 4	„
			Togari	...	12	„
			Kadale	...	6	„
			Ballar	...	10	„
T.-Narsipur	...	...	Sugar-cane and mulberry	...	12	„

10. Prospects of the season fair on the whole. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be still prevailing in Heggaddevankote and Krishnarajpete.

12. Cattle healthy. Fodder generally available. Difficulty for water is being experienced in parts of Hunsur, Gundlupet, Mandya and Nagamangala.

HASSAN.

8. Market fairly well supplied.

9. Sugar-cane in Hassan, Belur, Arsikere, Hole-Narsipur and Alur, and paddy in Hassan and Arsikere are reported to be in a fair condition. Vysakhi paddy is being sown in parts of Manjarabad. The estimated outturn of sugar-cane crop in Hole-Narsipur is ten annas.

10. Prospects of the season fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to prevail in several parts.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur and Arsikere. Fodder and water generally available, except in the Kana-katte hobli of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.

9. Harvesting of crops is nearing completion in all the taluks. Sugar-cane milling is almost complete in Shimoga and Sagar. Vysakhi paddy is being replanted and sugar-cane is being planted in the Sagar Taluk. The estimate of harvested crops is $15\frac{1}{2}$ annas of sugar-cane and 8 annas of pepper in the Sagar Taluk. The estimate of crops sown is 4 annas of sugar-cane and 12 annas of Vysakhi paddy in the Sagar Taluk.

10. Food stocks are somewhat insufficient in Kumsi, Shikarpur and Sorab. In other taluks they are sufficient for the present.

11. Public health good.

12. Cattle healthy. Fodder is available for the present in all the taluks except Honnali, Shikarpur and Kumsi, where its insufficiency is felt. Want of water-supply is felt in parts of Shimoga, Honnali, Shikarpur, Sorab and Kumsi.

KADUR.

8. Market fairly supplied.

9. Ploughing is going on in Mudgere. Karpaddy is being sown in Kadur. Standing crops are in fairly good condition. Sugar-cane and cotton in Tarikere; garlic and sugar-cane in Chikmagalur, and sugar-cane and pepper in Koppa are being harvested. Pepper has been harvested to the extent of 4 annas in Koppa.

10. Prospects of the season fair. Food stocks are available and sufficient for the present.

11. Public health generally good except that small-pox prevails to some extent in Chikmagalur town and in parts of Yedahalli.

12. Foot and mouth disease for cattle is reported to be subsiding except in parts of Kadur, Koppa, and Mudgere. Water and fodder are generally available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in fairly good condition. Cholum (white) is still fading in Challakere. The probable outturn of crops during the week is as follows:—

Chitaldrug	.. Cholum (white) and kadale	...	4 annas.
	Cotton	...	2 "
	Sugar cane	...	10 "
Hiriyur	... Cholum (white)	...	2 "
	Navane, ballar, togari, kadale and cotton	...	4 "
	Ragi under kapile wells	...	8 "
	Paddy do	...	10 to 12 "
Holalkere	.. Cotton	...	6 "
	Kadale	...	8 "
Davangere	.. Kadale	...	8 "
	Sugar-cane and cotton	...	8 "
Molakalmuru	... Wheat	...	4 to 8 "
	Cotton	...	6 to 8 "
Harihar	... Cotton	...	4 to 8 "

Sugar-cane was sown in the Holalkere Taluk.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Foot and mouth disease is subsiding in Challakere. Water available Fodder procurable in limited quantities.

BANGALORE,
21st March 1906.

B. K. VENKATA VARADA IYENGAR,
Secy. to the Govt. of H. H. the Maharaja of Mysore,

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	16 to 17	
Agricultural operation—Ragi thrashing.			
Prospect and probable outturn of harvests 5 to 6 annas.			
Cattle are in good condition.			
Water and fodder sufficient.			

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Sugar-cane is being harvested as also sown in some parts. About (11+88+60+50+54) or 263 acres of sugar-cane was harvested during the week in Bangalore, Dodballapur, Nelamangala, Channapatna Taluks and Closepet Sub-Taluk; and 11 acres of the same is reported to have been re-sown in the Bangalore Taluk. Also about 10 acres of potato and 47 acres of ragi are reported to have been harvested in the Bangalore Taluk and Closepet Sub-Taluk. The probable outturn is on an average 8 annas worth of crops.
10. Prospects of the season moderate. There have been a few showers of rain in Bangalore, Nelamangala and Devanhalli Taluks. The price of food stocks continues to be high.
11. Public health generally good. Fever is reported to prevail in the Hoskote Taluk.
12. Cattle healthy except in the Hoskote Taluk where food and mouth disease is reported to prevail. Fodder generally available. Small tanks here and there are failing and temporary wells are being sunk in tank beds.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being sown in Kolar, Bowringpet, Sidlaghatta, Bagepalli, Goribidnur, Srinivaspur and Gudibanda; and it is being milled in all the taluks. Harvesting of ragi is going on in all the taluks.
10. Prospects of the season depend upon early rains. Food stocks available.
11. Public health generally good.
12. Water and fodder are generally available, but the supply of water is running short. Pasture in fields and grazing lands is almost exhausted.

TUMKUR.

8. Market well supplied.
9. Sugar-cane in Tumkur, Maddagiri, Gubbi, Koratagere; jola in Maddagiri, Pavagada and Koratagere; kadale in Maddagiri, Gubbi, Tiptur, Pavagada, Kunigal, Koratagere and

Turuvekere; cotton and nat ragi in Pavagada; kulthi and harka in parts of kunigal are being harvested. Sugar-cane is sown in Maddagiri, and Kunigal. Standing crops in Tumkur, Gubbi and Tiptur are in moderate condition; sugar-cane, paddy and kadale in tank beds and under kapile wells are in fair condition in Maddagiri Taluk. In Chiknayakanhalli Taluk water is not sufficient for vaisakhi paddy. Standing crops in Pavagada Taluk on lands under kapile wells are in fair condition. Paddy crop is withering for want of water in parts of Koratagere. Sugar-cane crop in Holiyurdurga in the Kunigal Taluk and in Mayasandra in Turuvekere Sub-Taluk is partly withering. The probable outturns of crops are the following:—

Maddagiri—Sugar-cane 8 annas, jola 5 annas and kadale 6 annas.

Gubbi—Sugar-cane 4 annas and kadale 4 annas.

Pavagada—Nat ragi 4 annas, jola 4 annas, kadale 4 annas and cotton 4 annas.

Kunigal—Nat ragi 2 to 8 annas, kadale 2 annas, kulthi 4 annas, harka 2 annas and paddy 2 to 12 annas.

Koratagere—Jola 4 annas.

Turuvekere—Sugar-cane 4 annas and kadale 8 annas.

In the Sira Taluk cholum (4 to 8 annas), wheat (1 to 4 annas) and cotton (1 to 4 annas) were harvested during the week; and standing crops of sugar-cane, paddy, cholum and nat ragi on lands under wells are in moderate condition and cotton and wheat crops are reported to be very bad. The rainfall in the Taluk of the 21st instant is reported to have been very beneficial to paddy, cholum, sugar-cane and nat-ragi crops in the Kasaba sammat.

10. Prospects of the season not encouraging. Food stocks sufficient for the present. Supply of water in wells is diminishing in parts of Maddagiri, Chiknayakanhalli, Gubbi, Tiptur, Pavagada, Sira and Koratagere Taluks with the advance of hot weather.

11. Public health generally good, except that small pox is reported to be prevalent in parts of Tiptur and Turuvekere Taluks.

12. Cattle healthy, except that foot and mouth disease is prevalent in parts of Tiptur. In parts of Maddagiri, Pavagada and Koratagere water is drawn from wells for cattle to drink. In parts of the Sira Taluk date leaves are used as fodder for cattle.

MYSORE.

8. The weekly markets in all the Taluks are reported to have been well supplied with grain during the week.

9. Standing sugar-cane and Mulberry crops are reported to be fair in parts of Chamrajnagar and Malvalli and good in parts of Seringapatam, Nanjangud and Nagamangala. Lands in parts of Seringapatam and Gundlupet are being ploughed; and jola in parts of T.-Narsipur and Mysore Taluks; and sugar-cane in parts of Krishnarajpete are being sown.

The probable out-turn of crops is as follows:—

T.-Narsipur—Mulberry and sugar-cane 12 annas.

10. Prospects of the season are encouraging. None under relief. Raiyats and merchants are reported to have sufficient stock of food grains for the present.

11. Public health generally good. But Small-pox is reported to be still prevailing in Heggaddevankote and Krishnarajpete Taluks.

12. Cattle are reported to be healthy in all the Taluks except in parts of Chamrajnagar where they are reported to be suffering from mouth and foot disease. Fodder is generally available except in parts of Gundlupet. Difficulty for water is felt in parts of Hunsur, Heggaddevankote, Gundlupet, Krishnarajpete, Mandya and Nagamangala Taluks. Tanks in Bannur Hobli, T.-Narsipur Taluk are reported to have received 2 to 3 months' supply of water.

HASSAN.

8. Market fairly well supplied.

9. Sugar-cane in Hassan, Belur, Arsikere, Channarayapatna, Hole-Narsipur, and paddy in Hassan, Manjarabad and Arsikere are reported to be in a fair condition. No damage is reported to have been done to crops by insects, etc.

The following is the estimated outturn of crops:—

Hassan—Kadale 4 to 8 annas.

Arsikere—Sugar-cane and paddy (if rain falls) 4 annas.

Hole-Narsipur—Sugar-cane 10 annas.

10. Prospects of the season fair. Food stocks sufficient for the present. No grain scarcity and no people under relief.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the District.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur and Arsikere and Arkalgud Taluks. Fodder and water available generally.

SHIMOGA.

8. Market well supplied. Prices high.

9. Harvesting of crops is nearing completion in all taluks. Sugar-cane milling is almost finished in Shimoga, Sagar and Sorab. Sowing of Vaisakhi paddy is finished in Sagar. Sugar-cane is being planted in Sagar and Sorab. Castor and cotton are reported to be in a fair condition in Honnali.

10. Food stocks are reported to be somewhat insufficient in Kumsi, Shikarpur and Sorab. In other taluks they are reported to be enough for the present.

11. Public health good.

12. Cattle healthy. Fodder supply is running short in parts of Shikarpur, Honnali and Kumsi. In other taluks fodder is available in sufficient quantities. Water-supply is failing in parts of Shimoga, Honnali, Shikarpur, Sagar, Sorab and Kumsi.

KADUR.

8. Market fairly supplied.

9. Ploughing is carried on in parts of Mudgere. Sugar-cane is being planted in Tarikere and Yedahalli. The standing crops, viz., sugar-cane and cotton in Tarikere, kar paddy and sugar-cane in Kadur; sugar-cane in Chikmagalur and pepper in Koppa, are in fairly good condition. Sugar-cane and cotton in Tarikere and sugar-cane in parts of Kadur are being harvested. In Chikmagalur the harvesting of Bengal gram and garlic is over.

The probable outturn is as follows :—

Tarikere—Standing crops 8 annas.

10. Prospects of the season fair. Food stocks are reported to be available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur and Yedahalli.

12. Foot and mouth disease to cattle in the district is reported to be subsiding to some extent. No unusual mortality reported on this account. Water and fodder generally available. Sanction has been given for the removal of date leaves from selected groves in two of the hoblis of the Kadur Taluk. Wells are reported to be drying up in parts of Yedahalli and Chikmagalur Taluks.

CHITALDRUG.

8. Market well supplied.

9. The standing dry crops are reported to be in fairly good condition. Navane was sown in parts of the Molakalmuru during the week.

The outturn of crops harvested during the week is as follows :—

Chitaldrug—Cotton 2 annas, wheat 4 annas and sugar-cane 10 annas.

Hiriyur—Navane, avare, togari and cotton 4 annas, wheat, Bengal gram and ragi 2 annas, ragi under kapile wells 8 to 10 annas, paddy 2 annas and paddy under kapile wells 10 to 12 annas.

Holalkere—Cotton 6 annas.

Davangere—Cotton, sugar-cane and Bengal-gram 8 annas.

Jagalur—Cotton 4 to 8 annas.

Molakalmuru—Wheat 4 to 8 annas.

Harihar—Cotton 4 to 8 annas.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water procurable. Fodder procurable in limited quantities.

BANGALORE,
28th March 1906.

B. K. VENKATA VARADA IYENGAR,
Secy. to the Govt. of H. H. the Maharaja of Mysore,
Gen. & Rev. Dept.

BEFORE THE GOVERNMENT OF HIS HIGHNESS THE
MAHARAJA OF MYSORE.

Appeal No. 73 of 1905-06.

Appellants and plaintiffs

Versus

Respondents and defendants

1. Ranga, 2. Timmegowda } Sons of
3. Muddegowda, minor, } Ranganna.
by 1st appellant

1. Gunda, 2. Chikka, sons of Ranga.

Subject.

Appeal against the judgment and decree of the Deputy Commissioner of the Tumkur District, adjudging the pateli office of the Hettanahalli village in the Tumkur Taluk, in favor of the respondents in preference to the appellants.

The facts of the case appear sufficiently from the decision of Government No. 3727-34—Pet. 530, dated the 22nd October 1897, passed in Appeal No. 104 of 1896-97, and from the following decision. The parties are related to each other as below :—

Decision.

Both the parties claim descent from a common ancestor named Mayimuddegowda, the plaintiffs being the great grandsons of his eldest son Timmegowda, and the defendants the great grandsons of his youngest son Chikkanna. In the face of the decision passed by Government in Appeal No. 104 of 1896-97, it is not now open to the plaintiffs to repudiate the relationship of the defendant's father Ranga to the said Mayimuddegowda. Nor has such repudiation been satisfactorily established. The relationship above referred to may therefore be accepted as an unquestionable fact.

2. The dispute relates to a hereditary pateli office. The last male holder of the office by right of succession to Mayimuddegowda was his second son Sambugowda's son Muddegowda, on whose death it devolved upon his brother Ranganna's widow Akkamma. The suit of 1895-96, which terminated in the appeal above adverted to, was between the present plaintiffs represented by their mother and guardian, and the aforesaid Akkamma and the present defendant's father Ranga. It was held that Akkamma's title was unassailable, that the registry should remain in her name during her lifetime and that the defendant's father Ranga (then 2nd defendant) should be declared heir after her death as against the plaintiffs. The reason why the then 2nd defendant was declared entitled to priority over the plaintiffs was that he was one degree more nearly related to the common ancestor than the plaintiffs. That individual subsequently predeceased Akkamma. The declaration in his favor did not consequently take effect; in other words, the contingency contemplated by the Government decision dated the 22nd October 1897, has not as a matter of fact happened. There is thus no question of resjudicata. Irrespective, then, of the previous litigation, the point now for determination, is which of the parties to the present suit is entitled to succeed Akkamma, who died in January 1903. The Assistant Commissioner decreed in favor of the plaintiffs and the Deputy Commissioner in that of the defendants.

3. Both plaintiffs and defendants are, as shown above, Mayimuddegowda's descendents in the fourth degree. As such they stand on a par with each other. The only difference is that the plaintiffs are the progeny of the elder branch, while the defendants belong to the younger branch. As a set-off against this there is the fact that the defendant's father was in office for several years as Akkamma's gumasta and that but for his premature demise before Akkamma, he would in pursuance of the order of 1897-98, have succeeded her in preference to the plaintiffs and thus acquired a right transmissible to his sons, the defendants. In view of past Proceedings, Government are of opinion that the case is an exceptional one in which the ends of

justice could only be met by recognizing the title of both the parties and giving them an opportunity of enjoying the office by rotation.

4. In modification, therefore, of the Deputy Commissioner's decision Government direct that both the 1st plaintiff and the 1st defendant be appointed and registered as patels and that the office be held by them in turns of five years each.

No. R. 12273—R. M. 234-05-4, dated Bangalore, 23rd March 1906.

Copy of the above is forwarded to the Deputy Commissioner of the Tumkur District, together with the records received with his docket No. 546, dated the 7th December 1905.

Appeal No. 104 of 1902-03.

Appellants.

Versus

Respondent

Basve Gowda and others of Jodi Danaikenhalli village in the Belur Taluk.

Kondi Naranachar and other vrittidars of the said Jodi village.

Subject.

Claim of the appellants to exemption from the payment of full assessment on the Gowda Umbli lands in their possession in the Jodi Danaikenhalli village in the Belur Taluk.

The facts of the case appear sufficiently from the following:—

Decision.

The appellants claim exemption from the payment of full assessment on the Gowda Umbli lands in their enjoyment.

2. On the 11th October 1905 Government remitted the case to the Survey and Settlement Commissioner with the following observations:—

"It is admitted that the lands in question are Gowda Umbli lands, that they are entered as such in the Inam Register, that the holders thereof were only paying a jodi both before and after the Inam Settlement that the village was surveyed and settled and taken under Government management in 1884, that full assessment was being levied during the period of such management, and that since the restoration of the village to the Inamdars there has been a dispute as to whether what they are entitled to levy is jodi or full assessment. It is also conceded that one of the appellants continues to do the duties of 'Grama Patel.' The Inamdars (respondents) offer to pay the appellants (or rather the one that does the Grama Pateli duties) a Potgi allowance in the same way as in Government villages. There seem to be more than one kind of Patel in this village as in other malnad tracts. The Gowda Umbli lands were not noticed at the time of the Inam Settlement. (*Vide* Inam Superintendent's docket No. 64, dated the 28th February 1903.) The mere fact that for some time Government had the management of the village and enforced from the Gowdas payment of full assessment, does not seem to prejudicially affect the rights (if any) of the Gowdas as against the Inamdars." "The Survey and Settlement Commissioner and the Inam Superintendent will be requested to favor Government with his opinion as to whether having regard to all the circumstances of the case the appellants (Gowdas) can be compelled to forego their Umbli Hak and to pay full Survey assessment, the Grama Patel alone in return receiving a Potgi allowance from the Inamdars as in Sirkar maidan villages."

3. That officer has now given his opinion in favor of the appellants, as will be seen from the following extract from his report:—

"The village of Danaikenhalli had the Survey Settlement introduced long ago, at the instance of the Inam Superintendent, Colonel Cole. Docket No. 530, dated 17th March 1879."

"The Survey Settlement was introduced by an Assistant Commissioner but no settlement of the particular case under reference was made although in the Pahanisud and in the Putpahani specific mention is made of the Gowda Umbli lands concerned. The remaining settlement papers contain no mention of these lands but the settlement was carelessly carried out, even the Phaisal Patrik not having been prepared."

"So far as can be ascertained by comparing the Pahanisud with the Inam Register, which latter gives the Gowda Umbli (Jodi) as Rs. 33-5-2, the survey assessment of the land comes to very little more than the old jodi."

"The Potgi settlement has also been effected but no land emoluments appear to Patel (sic) and I am not aware whether the Potgi amount has been regularly paid to the officiator or not."

"I think that under the circumstances of this village which has been restored to the Inamdars under circumstances regarding which I have no information, the appellant Gowdas should either pay the old jodi on the lands plus half the difference between the old jodi and the full survey assessment on the principle of Inam. Rule VIII (f), or the Potgi should be revised. I recommend the former alternative. At any rate the appellants cannot, in my opinion, be deprived of their Umbli hak."

4. Government, in concurrence with Colonel Grant, direct that the appellants' Umbli hak be left undisturbed and that their liability be restricted to the old jodi on the lands in question plus half the difference between the old jodi and the full survey assessment on the principle of Inam Rule VIII (f).

No. R. 12145—Mis. P. 41-03-10, dated Bangalore, 22nd March 1906.

Copy of the above is forwarded to the Deputy Commissioner of the Hassan District, together with the records received with his letter No. 913, dated the 27th May 1905.

Review Application No. 3 of 1905-06.

Petitioners (appellants)	<i>Versus</i>	Counter-petitioner (respondent)
1. Dod Basappa, 2. Sidda Lingappa.		Basappa, minor, by guardian Sidda Lingappa.

Subject.

Claim to the Pateli office of Chowdanayakankoppa in the Shikarpur Taluk.

The facts of the case appear sufficiently from the following :—

Decision.

One Neeli Siddaiya was the original Patel of the village in question. On his death some fifty years before the Potgi Settlement of 1886-87 his second son Gurrappa, who was literate, was appointed his successor in preference to his first son Siddaiya, who was illiterate. Gurrappa was confirmed at the settlement above mentioned. The Deputy Commissioner then observed, "he (Gurrappa) combines in himself both the hak and his right as actual officiator. I do not see reason to disturb his possession. He will be confirmed as hakdar and Registerdar. Appellant's (first son's son's) name appears under Registerdar in the Register of 1865. He may perhaps be entitled to get the hak after Gurrappa's death or removal from the appointment." In pursuance of this order of confirmation, dated the 21st January 1887, Gurrappa continued to hold the office until his death, which occurred in 1900. His son Siddappa predeceased him leaving a son (the respondent) who has been appointed his successor. The appellants 1 and 2 who are the son and the grandson, respectively, of the original Patel's eldest son, sued to establish their preferential right and to oust the respondent. The suit failed in the Courts both of the Assistant Commissioner and of the Deputy Commissioner. Hence this appeal, in support of which reliance is placed firstly on the rules of primogeniture and secondly on the observation contained in the Deputy Commissioner's order of 1887. Government hold that the appellant's contention is not entitled to prevail. The younger son was as much a hakdar as the elder. When the office fell vacant, the better of the two had to be appointed and not necessarily the senior in birth. The rule relied on is not literally and invariably enforceable in such cases regardless of other qualifications. The choice fell upon the more competent of the sons, viz., Gurrappa, the grandfather of the respondent. He held the office without interruption for such a long period as sixty to seventy years. His son's son is naturally entitled to take his place in preference to his brother's son or grandson. The Deputy Commissioner's order of 1887 did not make a final pronouncement in favor of the present appellants but only referred incidentally to what might possibly happen in a certain event. That remark was in the nature of an *obiter dictum* which did not bind either Gurrappa or his heirs to the extent of precluding them from contesting its correctness on the occurrence of the event therein contemplated. That being so, it is clear that the authorities below did not err in their estimate of the significance to be attached to the observation. For obvious reasons, the respondent has been rightly preferred to the appellants and Government see no reason to interfere.

The appeal fails and must be dismissed.

No. R. 12359—R. M. 251-04-10, dated Bangalore, 26th March 1906.

Copy of the above is forwarded to the Deputy Commissioner of the Shimoga District, together with the records received with his letter No. 620-452, dated the 14th February 1906.

Appeal No. 96 of 1904-05.

Appellant
Basalingavva (widow of Basalingappa junior)

Versus.

Respondent
Mallappa (son of Basalingappa senior).

Subject.

Appeal against the order of the Deputy Commissioner of the Shimoga District, declining to allow the claim of the appellant urged on behalf of her minor (adopted) son Basavannaiya, to the pateli office of Tadasanahalli village in the Shikarpur Taluk, and directing that the respondent should continue to do the duties thereof until evicted by an order of a competent court.

The facts of the case appear sufficiently from the following:—

Decision.

The village in question had long had two patels apparently unconnected with each other. At the time of the potgi settlement, which took place in 1886, it was found that the two patels both named Basalingappa held the office by turns of two years each. Basalingappa senior, then in actual possession, was confirmed with a direction that on his death he should be succeeded by the other Basalingappa or his rightful heir. The former held the office until 1898, when at his instance it was transferred to his son, the respondent. He survived the transfer for three years and then died in 1901. Basalingappa junior, who was to succeed him under the order of 1886 had predeceased him. His widow, the appellant, claimed the office on behalf of her alleged adopted son Basavannaiya. The Deputy Commissioner, however, rejected the claim on the ground that he was unable to modify his predecessor's order of 1898, giving the pateli absolutely to the respondent. Hence this appeal.

2. Basalingappa junior, had two sons, both of whom died very young. His widow is shown to have adopted Basavannaiya under an authority given to her by him. The Deputy Commissioner finds in favor of the factum and validity of the adoption. In this finding Government fully concur.

3. But for the transfer, of 1898, to which the appellant was not a party and by which therefore neither her husband nor his heir could be prejudicially affected, Basavannaiya would be entitled to step in on the death of Basalingappa senior, which, as observed above, occurred in 1901. The arrangement of 1886 contemplated alternate life-long possession first, by Basalingappa senior, then by Basalingappa junior or his heir, then again by the former's heir and so on. But the trend of recent decisions prefers a periodical rotation to life-term turns; and Government are disposed to follow it in the present case. With this slight modification, Government see no reason why the claims of both the hakdars should not be recognized and given effect to as distinctly decided at the settlement of 1886.

4. In reversal, therefore, of the Deputy Commissioner's order, Government direct that the appellant's son Basavannaiya's right to a participation in the pateli in question be admitted, and that the office be held by both parties by turns of ten years each, Basavannaiya having his first turn as soon as he attains his majority and is found duly qualified.

No. R. 12159—Mis. 328-04-6, DATED BANGALORE, 22ND MARCH 1906.

Copy of the above is forwarded to the Deputy Commissioner of the Shimoga District, together with the records received with his letter No. 618—450, dated the 14th December 1905.

Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Agricultural operation—Ragi thrashing.

Outturn of ragi is from 5 to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Potato is being harvested in some parts. Sugar-cane in Bangalore, Doddballapur, Nelamangala and Closepet and ragi in Closepet are being harvested. Sugar-cane is being sown in Bangalore, Doddballapur and Nelamangala. The probable outturn is on an average 8 annas in the rupee.
10. Prospects of the season moderate. There is no visible change in the price of food stocks.
11. Public health generally good. Fever prevails in Hoskote.
12. Cattle generally healthy. Foot and mouth disease is reported to prevail in Hoskote. Fodder available. Water is supplied with difficulty from temporary wells dug in the bed of tanks.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being sown in the Bowringpet, Mulbagal, Sidlaghatta, Chikballapur, Bagepalli, Goribidnur and Gudibanda; and it is being milled in almost all the taluks. Vysakhi paddy is being harvested in Kolar and Sidlaghatta and kadale in Chikballapur.
10. Prospects of the season depend upon early rains. Food stocks available.
11. Public health generally good.
12. Water and fodder are generally available, but the supply of water is running short. Pasture in fields and grazing lands is almost exhausted.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri and Pavagada, kadale in Maddagiri, Gubbi, Tiptur, Pavagada and Turuvekere; cholum in Maddagiri, Sira and Pavagada, cotton in Sira and Pavagada, sugar-cane in Gubbi, Kunigal and Koratagere; castor and wheat in Pavagada are being harvest-

ed. Paddy in Maddagiri and sugar-cane in Maddagiri and Koratagere are sown. Standing crops in all the taluks except Chiknayakanhalli are in moderate condition. Water is not sufficient for Vysakhi paddy in Chiknayakanhalli. The probable outturn of crops are as follows:—

Maddagiri—Paddy 8 annas, kadale 4 annas, cholum 6 annas.

Sira—Cholum 4 to 8 annas, cotton 2 to 4 annas.

Gubbi—Kadale 4 annas, sugar-cane 4 annas.

Pavagada—Paddy, cotton, castor and wheat 2 annas, kadale 8 annas, cholum 4 annas.

10. Prospects not encouraging. Food stocks are reported to be sufficient for the present. Supply of water in wells is diminishing in parts of Maddagiri, Chiknayakanhalli, Sira, Gubbi, Tiptur, Pavagada, Kunigal and Koratagere. *Mungar* rains are anxiously awaited all over the District.

11. Public health generally good, except that small pox is reported to be prevalent in parts of Gubbi, Tiptur and Turuvekere.

12. Cattle healthy, except that foot and mouth disease is prevalent in parts of Gubbi, Tiptur and Kunigal. In parts of Sira and Tiptur date leaves are used as fodder for cattle. In parts of Tumkur, Maddagiri and in other taluks, water is drawn from wells for cattle to drink.

MYSORE.

8. Market well supplied.

9. Standing sugar-cane, cotton and mulberry crops are good in Chamrajnagar and Nagamangala and fair in Malvalli and Krishnarajpete; cholum in parts of Mysore and sugar-cane in parts of Krishnarajpete have been sown. Lands in Seringapatam are being ploughed and made ready for sowing. The probable outturn of sugar-cane and mulberry crops in T.-Narsipur is 12 annas.

10. Prospects of the season moderately fair. Food stocks available. Rain is wanted throughout.

11. Public health good. Small-pox is reported to be prevailing in parts of Hunsur and Heggaddevankote.

12. Cattle healthy except in parts of Chamrajnagar where they are reported to be suffering from foot and mouth diseases. Fodder is generally available. Difficulty for water for men and cattle is increasing in parts of Chamrajnagar, Seringapatam, Yedatore, Heggaddevankote, Gundlupet, Mandya and Nagamangala.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Arsikere, Channarayapatna, Hole-Narsipur and Alur; and paddy in Hassan, Manjarabad and Arsikere are reported to be in a fair condition. The following is the estimated outturn of crops:—

Arsikere—Sugar-cane and paddy (if rain falls) 4 annas.

Hole-Narsipur—Sugar-cane 10 annas.

10. Prospects fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the district.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur, Arsikere and Arkalgud. Fodder and water generally available except in parts of Arsikere and Channarayapatna, where some difficulty is felt.

SHIMOGA.

8. Market well supplied. Prices high.

9. Sugar-cane milling is finished in all taluks except in small areas of Shimoga, Sorab and Tirthahalli. Vaisakhi paddy is in a fair condition in Sagar and Nagar. Sugar-cane plants are fairly well in Sorab, Sagar and Nagar, but are withering in Shimoga for want of water. Castor is in a fair condition in Honnali and cotton is being harvested there.

10. No rains have yet fallen anywhere. Food stocks are reported to be sufficient for the present except in parts of Shikarpur, Sorab and Kumsi.

11. Public health good.

12. Cattle healthy. Fodder supply is running short in parts of Honnali, Shikarpur Sorab and Kumsi. Wells are being deepened in some parts of Shimoga. Water-supply is failing in Shimoga, Honnali, Shikarpur, Sagar, Sorab and Kumsi.

KADUR.

8. Market fairly supplied.

9. Sugar-cane is being planted in Tarikere and Kadur. The standing crops are in fairly good condition. Sugar-cane and cotton in Tarikere, pepper in Koppa, and kar paddy and sugar-cane in parts of Kadur are being harvested. The probable outturn of standing crops in Tarikere is 8 annas.

10. Prospects of the season fair. Food stocks available and sufficient for the present.

11. Public health good, except that small-pox prevails in parts of Chikmagalur.

12. Foot and mouth disease to cattle in the district is reported to be subsiding. Water and fodder generally available, but with difficulty in some places.

CHITALDRUG.

8. Market well supplied.

9. The estimated outturn of crops harvested during the week is as follows :—

Chitaldrug	Cotton	...	...	...	10 annas.
	Sugar-cane	...	...	...	8 „
	Wheat	...	...	...	5 „
Hiriyur	Ragi	...	...	...	8 „
	Do (under kapile wells)	..	...	...	8 to 10 annas.
	Paddy (do)	...	...	...	8 to 10 „
	Ballar, togari and navane	...	...	...	4 „
Holalkere	Cotton	...	...	...	6 „
Davangere	Sugar-cane, cotton and kadale	...	...	...	8 „
Molakalmuru	Wheat	...	...	...	4 to 8 „
Harihar	Cotton	...	...	...	4 to 8 „

10. Prospects of the season fair. Food stocks sufficient.

11. Public health good.

12. Cattle healthy. Water procurable. Fodder is procurable in limited quantities.

BANGALORE,

4th April 1906.

B. K. VENKATA VARADA IYENGAR,

Secy. to the Govt. of H. H. the Maharaja of Mysore,

Gen. & Rev. Dept.

SALE OF DRUG SHOPS FOR 1906-07.

Notice No. 2215, dated 21st March 1906.

1. Notice is hereby given that the exclusive privilege of selling intoxicating drugs in each of the shops specified in the schedule hereto appended, for the twelve months beginning with 1st July 1906 and ending with 30th June 1907, will be put up to public auction by the respective Deputy Commissioners or by Assistant Commissioners specially authorized by the Deputy Commissioners for the purpose, at the respective taluk or sub-taluk head-quarters, on the dates specified in the annexed statement, subject to the conditions hereinafter set forth.

2. Each bidder at the auction will deposit a sum of Rs. 5, or such other reasonable amount as may be fixed by the officer conducting the sale, previous to bidding, provided that the Government may at any time dispense with such initial deposit. Each shop will be knocked down to the approved highest bidder, subject to formal confirmation by the Deputy Commissioner, who will be at liberty to accept or reject the bid at discretion without assigning reasons for the same. Such formal confirmation will, *unless revised by Government*, be tantamount to an acceptance of the bid. Parties intending to bid must attend either in person or by duly accredited agents. No shop shall be knocked down in the name of more than one person or of more than one company or firm duly represented. The selling officer shall refuse to register as purchaser any one in whose name the bidding has not proceeded.

3. As soon as the auction is completed, the deposits made by the unsuccessful bidders and not forfeited as hereinafter provided, will be returned to them. As the auction proceeds, the person whose bid is accepted for each shop shall at once deposit a sum equal to 3ths of a month's rent for that shop. Should he fail to do so, the deposit made by him under para 2 will be forfeited, the shop will at once be put up again on the above conditions, and he will be debarred from bidding again for the same or for any other shop.

4. The persons to whom the shops have been knocked down, and who have made deposits as provided in paras 2 and 3, shall also be required to leave his address with the sale conducting officer in order that the confirmation of the sale may be communicated to that address by a notice, etc., and he shall, within 7 days, after the service of the said notice by its presentation to the purchaser or any adult male member in the place of the said address or by its being affixed thereto or by its forwarding duly registered by post, pay at the Taluk Treasury concerned such further sum as, with the first and second deposits, will make up an amount equal to two months' rent of each shop knocked down to them; and shall take out licenses and execute a counterpart engagement, in the prescribed forms, on the conditions hereinafter set forth. On the failure of any person to make the deposit or to take out license or to execute the counterpart engagement, as aforesaid, the shop will be re-sold at the risk of such person, or if the auction hereby notified has already been completed, will be otherwise disposed of at the discretion of the Deputy Commissioner. In the case of the purchaser's death after the confirmation of the sale, it will be binding on his heirs or assigns.

5. Re-sales effected under para 4 will be at the risk of the defaulting bidder, who will forfeit all gain; and in the event of a loss by re-sale or other disposal he will make good the deficiency between the total amount payable for the whole period under the terms of the original sale and the total amount payable by the successful bidder at the re-sale or other disposal. In the latter case, the forfeited deposit will be deducted from the loss arising from the re-sale and the remainder, if any, will be recovered from the bidder in the same manner as if it were an arrear of land revenue. Should, however, the forfeited deposit be greater than the loss by re-sale, the whole of such deposit will be credited to Government.

6. The license to be taken out under para 4 above, shall be subject to the following conditions, namely:—

- (1) The amount for which the privilege has been purchased shall be payable into the Taluk Treasury on the prescribed challan in equal monthly instalments, commencing from July 1906; each instalment shall be regarded as the rent for the month in respect of which it is payable.

Each month's rent shall be payable on or before the 20th of the same month on the challan prescribed for the purpose. If such amount be less than Rs. 12, it shall be paid up in not more than three quarterly instalments commencing from 1st July 1906. The deposit of two months' rent made by the licensee, will be taken in payment of the rents due for the last two months of the period of the license. Failing payment by the 20th of the same month or before the end of the quarter for which the instalment is due, the Amildar may, with the sanction of the Deputy Commissioner by record in writing, suspend or cancel the license or order the forfeiture of all deposits made by the defaulter and proceed to re-sell or otherwise dispose of the shop at the defaulter's risk (as soon after the last day of the month or quarter as may be possible) with effect from date of issue of license to the new purchaser or from the date of other disposal. No remission or abatement of the rent shall, on any account whatever, be claimable by the licensee.

- (2) The licensee shall purchase Ganja and Majum from any Bonded Depot at the rates of Re. 0-13-4 and Re. 0-5-4, respectively, per seer of 80 tolas; and shall pay the price to the Mutsaddi in charge of the Depot.
- (3) The rates payable as above, shall be in addition to Excise duty, which shall be prepaid into the Taluk Treasury, or into any other Government Treasury with the permission of the Deputy Commissioner, at Rs. 3-6-8 per seer of Ganja and Re. 0-11-8 per seer of Majum, (including local cess).
- (4) The Ganja sold by the licensee, shall be of good quality and unadulterated, and it shall be sold by him at Rs. 10 for a seer of 80 tolas of Ganja or annas 2 per tola of Ganja and of Rs. 1-10-8 for a seer of Majum; and the whole stock of Ganja and Majum on hand shall be kept in the licensed shop and not elsewhere on any pretext whatever, without special permission.
- (5) The licensee shall use such scales and weights as may from time to time be prescribed by Government, and provide himself with the printed forms of accounts and permits or passes for transport of Drugs, which forms shall be purchased from local Excise Officers.
- (6) The licensee shall be bound to take over any Drugs which may remain as stock in hand belonging to the out-going licensee on the 1st July 1906 in the existing shop, paying to the latter such compensation for the same as may be fixed by the Deputy Commissioner.
- (7) The licensee shall be bound by the rules in force, and by such further rules as may be issued from time to time by Government. He shall not during the term of his license, without the written permission of the Excise Commissioner, have any interest direct or indirect in any intoxicating drug shop outside the Mysore State or in the Civil and Military Station.
- (8) No female shall be employed in the sale of intoxicating drugs.
- (9) The remaining terms and conditions shall be as set forth in the prescribed license.

7. In the case of any breach of the above conditions either by the licensee, or with his connivance and privity, by any person in his employment, or in the event of the licensee neglecting to open his shop or to carry on his business with due care and attention, it shall be competent to the Deputy Commissioner to impose upon the licensee a fine not exceeding Rs. 10 for every such breach or neglect, or at the option of the Deputy Commissioner to declare the money deposited with him forfeited, and to cancel the license and to re-sell or to otherwise dispose of the privilege at the risk of the licensee; and all loss thereby caused, together with the loss accruing to Government in consequence of the licensee not carrying on his business by opening his shop on 1st July 1906, shall be made good by him. When a license is cancelled, the rent for the whole period of the license shall become due at once, which shall be recovered together with all losses as if they were arrears of land revenue.

8. The penalties laid down in the last preceding clause shall not exempt the licensee or his employees from prosecution for any offence committed against the Excise laws or rules in force.

SALE OF COUNTRY BEER TAVERNS IN THE BANGALORE CITY AND IN THE
BOWRINGPET TALUK FOR 1906—07.

Notice No. 2216, dated 21st March 1906.

1. Notice is hereby given that the exclusive privilege of selling Country Beer or Porter in each of the taverns specified in the appended schedule, for the twelve months beginning with 1st July 1906 and ending with 30th June 1907, will be sold by public auction on the dates and at the places mentioned in the annexed schedule by the Deputy Commissioner of the District concerned or other officer authorized by him.

2. The exclusive privilege will be put up to auction at the upset price fixed at Rs. 35 per hogshead of Beer or Porter which will be sold in the taverns at Bowringpet and the Kolar Gold Fields and at the upset price fixed for each of the taverns in the City of Bangalore by the officer conducting the sale with the previous sanction of the Excise Commissioner.

3. The manufacturers of Beer may bid for or purchase the taverns.

4. Each bidder at the auction shall deposit a sum of Rs. 250 for shops in Bowringpet Taluk and Rs. 100 for those in Bangalore or such other reasonable amount as may be fixed by the officer conducting the sale, previous to bidding. Each tavern will be knocked down to the approved highest bidder, subject to the formal confirmation by the Deputy Commissioner, who will be at liberty to accept or reject the bid at discretion, without assigning reasons for the same. Such formal confirmation will, unless revised by Government, be tantamount to an acceptance of the bid. Parties intending to bid must attend either in person or by duly accredited agents.

5. As soon as the auction is completed, the deposits made by the unsuccessful bidders and not forfeited as hereinafter provided, will be returned to them.

6. The persons to whom the taverns have been knocked down, shall be required to leave his address with the sale-conducting officer in order that the confirmation of the sale may be communicated to that address, and within seven days after service by the said notice by its presentation to the purchaser or any adult male member of the family at the place of said address or by its being affixed thereto or by its forwardal duly registered by post, deposit such further sum as, with the first deposit, will make up a total security of Rs. 500 for each tavern knocked down to them or such other reasonable amount as may be fixed by the Deputy Commissioner according to the value of each tavern; and shall take out licenses and execute counterpart engagements, on the conditions hereinafter set forth. On the failure of any person to make the deposit or to take out license or to execute the counterpart engagement, as aforesaid, the tavern will be re-sold at the risk of such person, or if the auction hereby notified, has already been completed, will be otherwise disposed of at the discretion of the Deputy Commissioner. In the case of the purchaser's death after the confirmation of the sale, it will be binding on his heirs or assigns.

7. Re-sales effected under para 6 *supra*, will be at the risk of the defaulting bidder, who shall forfeit all gain; and in the event of a loss by re-sale or other disposal he shall make good the deficiency between the total amount payable for the whole period under the terms of the original sale and the total amount payable by the successful bidder at the re-sale or by disposal otherwise. In the latter case, the forfeited deposit shall be deducted from the loss arising from the re-sale or other disposal, and the remainder, if any, shall be recovered from the bidder in the same manner as if it were an arrear of land revenue. Should, however, the forfeited deposit be greater than the loss by re-sale or other disposal, the whole of such deposit shall be credited to Government.

8. The license to be taken out under para 6 above, shall be subject to the following conditions, namely :—

- (1) The privilege conferred by the license extends to the sale of Country Beer or Porter brewed on the Nilgiris in breweries which may be approved of by the Government or by Messrs. Meakin & Co., Kirkee, or by Messrs. Abraham and Gangadhara Chetty & Co., Bangalore, or in any other Brevery approved by Government.

- (2) Each tavern shall be maintained in or close to the existing tavern as described in the schedule hereto appended.
- (3) The amount payable for each month on account of the number of hogsheads of Beer or Porter sold, shall be paid into the Taluk Treasury in the first week of the following month, on the challan prescribed for the purpose. The security deposit shall be taken towards the amount due for the last two months of the period of the lease. Failing payment as above, the Deputy Commissioner shall at once proceed to recover the arrears together with interest at 6 per cent, under the rules in force for the collection of land revenue. No remission or abatement of the Government dues shall, on any account whatever, be claimable by the licensee.
- (4) The licensee shall further pay a duty of two annas for every gallon of Country Beer or Porter purchased by him, together with local cess at one anna per rupee.
- (5) The consignment of Country Beer or Porter purchased by the licensee, shall be sent direct from the Brewery to the Amildar of the Taluk. The letter of advice covering the consignment shall be in duplicate, the original being sent to the Amildar of the Taluk, and the duplicate to the Excise Commissioner. On the duty together with local cess at the abovementioned rate being paid by the licensee on the prescribed challan, the Amildar shall allow the licensee to remove the consignment to his tavern upon a pass signed by the Amildar or other officer authorized on this behalf.
- (6) The licensee of every tavern at the Bangalore City shall pay a registration fee under the Municipal Regulation, at the rate of Rs. 180 per annum in advance for the period of the license for his tavern.
- (7) The licensee shall use such measures as may from time to time be prescribed by Government, and provide himself with the printed forms of accounts and permits or passes for transport of Beer or Porter, which forms shall be purchased from local Excise Officers.
- (8) The licensee shall be bound to take over any Beer or Porter which may remain as stock in hand belonging to the out-going licensee on the 1st July 1905 in the existing tavern, paying to the latter such compensation for the same as may be fixed by the Excise Commissioner.
- (9) This lease shall not be transferable by sale, gift, mortgage or otherwise without the previous sanction of the Excise Commissioner.
- (10) The Vendor shall equally with the license-holder be responsible in the penalties herein set forth for breach of any of the conditions of the license.
- (11) He shall sell Beer or Porter of approved quality. It may be sold to be drunk on the premises up to one reputed quart bottle at a time. It may be sold to be removed off the premises upon the prescribed special passes up to one Imperial gallon (4 seers).
- (12) He shall not sell or give Beer or Porter in any quantity whatever directly or indirectly to any European or non-commissioned officer or private or soldier, nor to any European or East Indian woman connected with or related to, men of these classes, nor allow him, her, or them, to drink Beer or Porter in his premises or grounds; he shall not permit drunkenness or disorderly behaviour in his shop or premises, and shall not suffer any gambling whatsoever therein, and shall not knowingly permit prostitutes or persons of notoriously bad character to meet or remain therein; he shall not wilfully harbour or conceal therein soldiers or others knowing or having reason to believe such soldiers or others to be deserters; he shall give information of suspicious characters to the Magistrate or Police Officer; and he shall not sell or give Beer or Porter to any Police Officer, Railway servant, or Excise Officer, whilst on duty or to insane person.

- (13) He shall fix in a conspicuous place outside of his shop a board on which shall be legibly painted his name, Vendor's name, the number of his shop, and the article he is licensed to deal in.
- (14) He shall not receive any articles whatsoever in barter or pledge and payment for Beer or Porter shall be made in ready money only at one and a-half rupee per imperial gallon and proportionately for fractions thereof.
- (15) The Beer or Porter sold under this license shall contain 75 per cent of malt or any of the preparations of malt and 3 lbs. of good Kent hops per hogshead, and shall be of the same quality and density as purchased from the Brewer, without dilution or adulteration. The original gravity of the Beer wort shall not exceed 1070 at 60° Fahrenheit. The Beer or Porter sold shall not contain more than 8 per cent alcohol by volume. The licensee will be bound to pay duty, together with local cess, at the prescribed rate per gallon of proof spirit on all alcohol in the Beer or Porter in excess of 8 per cent by volume, besides being liable for prosecution. Samples of such Beer or Porter shall be sent duly bottled from the Brewery or tavern for examination and test whenever required by the Excise Department.
- (16) Any Magistrate having local jurisdiction, or any officer acting under his warrant, or any Abkari or Excise officer shall be allowed entry to the shop at any hour to test the Beer or Porter on the premises, and examine the shop accounts, which it shall be the duty of the License-holder and Vendor to keep and produce. Such accounts shall be true and correct, and written up daily in the prescribed forms. All condemned Beer shall be destroyed.
- (17) He shall close his shop by 9 P.M., and not open it before sunrise except on special permit in cases of Native festivals, etc.
- (18) Beer brought for the Commissariat Department and rejected by the Military or other Departments, shall not, under any circumstances, be forwarded for sale in the tavern.
- (19) The shop shall have only one door, and no window be allowed to the rear or ends of the building; the bar where the liquor is sold from, shall be opposite to the entrance door, and so situated that all persons inside can be seen by any one passing to and fro in the street; and no second room shall be allowed to be kept open for customers.
- (20) The licensee shall be bound by the rules in force, and which may be issued from time to time by Government.

9. In the case of any breach of the above conditions either by the licensee, or with his connivance and privity, by any person in his employment, or in the event of the licensee neglecting to open his tavern or to carry on his business with due care and attention, it shall be competent to the Deputy Commissioner to impose upon the licensee a fine not exceeding Rs. 10 for every such breach or neglect, or at the option of the Deputy Commissioner, to declare the money deposited with him forfeited, and to cancel the license and to re-sell the privilege or to otherwise dispose of it at the risk of the licensee; and all loss thereby caused, together with the loss accruing to Government in consequence of the licensee not carrying on his business by opening his tavern on 1st July 1905 shall be made good by him. When a license is cancelled, the rent for the whole period of the lease shall become due at once, which shall be recovered together with all losses as if they were arrears of land revenue.

10. The penalties laid down in the last preceding clause shall not exempt the licensee or his employees from prosecution for any offence committed against the Excise Laws in force.

SUPPLEMENT TO

The Mysore Gazette.

Published by Authority.

BANGALORE, THURSDAY, APRIL 5, 1906.

REVENUE.

SALE OF SEPARATE ARRACK SHOPS FOR 1906-07.

Notification No. 2213, dated 21st March 1906.

1. Notice is hereby given that the exclusive right of selling arrack in each of the separate shops specified in the appended schedule for the twelve months beginning with 1st July 1906 and ending with 30th June 1907, will be put up to public auction at upset prices, by the respective Deputy Commissioners or by Revenue Assistant Commissioners or by Divisional Officers of the Excise Department or other Officers specially authorized by the Deputy Commissioners for the purpose, on the dates and at the Taluk Head-quarters or other places mentioned below, subject to the conditions hereinafter set forth. If the sales are not completed on abovenamed days, they will be continued on the next following days (close holidays excepted).

2. (a) Each bidder at the auction will deposit a sum of Rs. 60 for shops in the Kolar Gold Fields, Rs. 25 for those in the Mysore and Bangalore Cities and Rs. 10 for those in other places, or such other reasonable amount as may be fixed by the officer conducting the sale, previous to bidding. It will, if offered, be received at any time within three days prior to the date of sale, provided that the Government may, at any time, dispense with such initial deposit. The deposits made by unsuccessful bidders if not forfeited as hereinafter provided, will be returned at the close of the sale. The shops or group of shops will be knocked down to the approved highest bidder, subject to formal confirmation by the Deputy Commissioner, who will be at liberty to accept or reject any bid at his discretion without assigning reasons for the same. Such formal confirmation will, *unless revised by Government for special reasons*, be tantamount to an acceptance of the bid and will be necessary whether the sale be held by the Deputy Commissioner himself or by any other officer appointed by him. Parties intending to bid must attend either in person or by duly accredited agents. Should there be no bid above the upset price, for any shop singly, the officer conducting the sale may, in consultation with the Excise Divisional Officer, if present, club together more than one shop but not more than two in the District Head-quarter taluks and Kolar Gold Fields and six in other places or, if necessary, reserve shops for which there may be no bids, for disposal hereafter. He may, subject to formal confirmation of the Deputy Commissioner, sell the right in any particular case by means of tenders or by private negotiation. He may also lower the upset price at his discretion. The officer conducting the sale may at his discretion, and without assigning any reason, refuse to accept the bid of any person, on the ground that he has been

695
 convicted by a criminal court of such an offence, or has been guilty of such breach of the conditions of the license, or of a contract under the Excise Regulation or Opium Act, as to render him undesirable as a holder of a license, or on the ground that he is insolvent, or in order to prevent arrangements to the detriment of Government interests, or for any other valid reason.

(b) No shop shall be knocked down in the name of more than one person or of more than one company or firm duly represented. The selling officer shall refuse to register as a purchaser any one in whose name the bidding has not proceeded.

3. (a) The successful bidder shall, on the exclusive privilege being knocked down to him, at once, if so required by the selling officer, or otherwise at the close of the day's sale, further deposit a sum equal to one-twenty-fourth part of his bid for the year, that is to say, one-half of the monthly rent unless the initial deposit equals or exceeds two months' rent. Should he fail to do so, the deposit, if any, made by him under clause 2 (a) will be forfeited, and the privilege will be sold again on the above conditions, or otherwise disposed of at his risk, as the Deputy Commissioner or selling officer may determine.

(b) The person to whom a shop or group of shops has been knocked down and who has made deposits as provided above, shall be required to leave his address with the selling officer, in order that the confirmation of the sale may be communicated to that address by a notice, and he shall, within seven days after the service of the said notice by its presentation to himself or to any adult male member of his family at the place of said address or by its being affixed thereto or by its forwardal duly registered by post, pay at the Taluk Treasury concerned, such further sum as, with the former deposits, will make up an aggregate sum equal to two months' rent, and execute at the same time before the Amildar the necessary engagements and take out the necessary licenses, as hereinafter set forth.

4. (a) The deposit made under the preceding para shall be either in cash or in Government of India Securities duly endorsed in favor of the Deputy Commissioner. Provided that in cases where the monthly rent exceeds Rs. 10 (in lieu of a deposit of two months' rent as above), the Deputy Commissioner may, in his discretion, allow any purchaser to deposit one month's rent as above, and to furnish approved personal security for an amount equal to four months' rent. In all cases where the monthly rent does not exceed Rs. 10, a cash deposit equal to two months' rent shall invariably be taken, and no personal security shall be accepted. If, on enquiry subsequent to sale, the purchaser shall be found to be a foreigner having no property in the Mysore State, or to be of doubtful solvency, he may be required to deposit twice the prescribed sum or to get a surety or sureties, residents of and possessing property in the Mysore State, to execute a security bond for the due payment of *all moneys* that may become due by him under the terms of the contract.

(b) Should the initial deposit exceed the sum required to be deposited under clause 3 (b) or clause 4 (a), the excess will be refunded to the purchaser.

5. The purchaser shall execute an agreement in the prescribed form, binding himself and, unless exempted by the Deputy Commissioner by an order duly recorded, so much of his movable and immovable property as may be deemed sufficient by the Deputy Commissioner, to observe the conditions hereinafter set forth, as well as those specified in the license to be issued to him; and his surety or sureties, if any have been accepted, shall also execute a bond in the prescribed form binding himself or themselves and so much of his or their movable or immovable property as may be deemed sufficient by the Deputy Commissioner for the due fulfilment by the purchaser of the terms of the agreement. The agreement and the bond so executed shall be stamped at the expense of the purchaser. They shall also be registered at his expense when the amount secured is Rs. 100 and above.

6. If default is made in making the deposit or deposits or in executing the agreement or the security bond, if any, and in taking out licenses as aforesaid, the exclusive privilege shall be forthwith re-sold or otherwise disposed of by the Deputy Commissioner at the risk of the first purchaser, who shall forfeit to the Government any deposit or deposits already made by him, and shall further be liable to make good any loss caused by such re-sale or other disposal. He shall not be entitled to any gain accruing from the re-sale or other disposal, and he shall be debarred from bidding again for the same or for any other shop or group of shops. In the case of loss the

forfeited deposits will be deducted from it and the remainder, if any, shall be recovered as if it were an arrear of land revenue. In the case of the purchaser's death after the confirmation of the sale, it will be binding on his heirs or assigns.

7. Re-sales or other disposal effected under para 6 will be at the risk of the defaulting bidder, who shall forfeit all gain; and in the event of a loss caused by re-sale or other disposal he shall make good the deficiency between the total amount payable for the whole period under the terms of the original sale and the total amount payable by the successful bidder at the re-sale or other disposal. In the latter case, the forfeited deposit shall be deducted from the loss arising from the re-sale or other disposal, and the remainder, if any, shall be recovered from the defaulter in the same manner as if it were an arrear of land revenue. Should, however, the forfeited deposit be greater than the loss by re-sale, the whole of such deposit shall be credited to Government.

8. The amount of rental, the consumption of arrack in each shop, etc., for several years past are specified in the appended schedule.

9. The license to be taken out under para 3 (b) above, shall be subject to the following conditions but nothing herein contained shall exempt the purchaser of the privilege from liability to the penalties prescribed for breaches of the conditions set forth below though a formal license may not have been issued:—

- (1) The amount for which the privilege has been purchased shall, if it exceeds Rs. 12 per annum, be payable into the local Taluk Treasury in equal monthly instalments commencing from July 1906. But where it does not exceed Rs. 12 per annum, it shall be paid in not more than three equal quarterly instalments. Each instalment shall be regarded as the rent for the month or quarter in respect of which it is payable. The licensee is not required to make any additional payment on account of local cess. Each month's or quarter's rent shall be payable on or before the 20th of the same month, or before the end of the quarter for which the instalment is due. If default is made, the Amildar may, with the sanction of the Deputy Commissioner, suspend, or declare by record in writing that the license is forfeited, and proceed to re-sell or otherwise dispose of the shop or group of shops as soon after the last day of the month or quarter as may be possible with effect from the date of issue of license to the new purchaser or from the date of other disposal. The officer who has power to suspend license may, however, at his discretion, allow sales to continue pending re-sale of other disposal of the privilege.

Note.—The licensee of a Jatra shop shall pay the rent thereof in full before the Jatra begins.

- (2) The deposit made by the licensee shall be taken as security for the due performance of the conditions of the license and if not forfeited, credited or otherwise disposed of, shall be credited in payment of the instalments due in the last two months of the period of the lease. Provided, however, that where the shop or group of shops is re-sold or otherwise disposed of, the deposit shall, at the discretion of the Deputy Commissioner, be either forfeited or be appropriated towards the arrears due by the defaulter as well as towards the deficits, if any, arising from the re-sale or other disposal of the shop or group of shops. The balance of such arrears and deficits, if any, shall be recoverable from the licensee under the rules in force for the recovery of arrears of land revenue. No remission or abatement of the rent or compensation shall, on any account whatever, be claimable by the licensee.
- (3) Interest at 6 per cent per annum shall be recoverable on all arrears from the date of default, and on deficits from the date of re-sale.
- (4) The privilege conferred by the license extends only to the sale of arrack ordinarily of the strength of 20° under-proof and with the special permission of the Deputy Commissioner or other officer authorized by him to the sale of arrack of 30° U. P. In places where there are no shops for the vend of foreign liquors or where the foreign liquor shop-keepers do not undertake to sell double-distilled or rectified country spirits and

697

special liquors such as Brandy, Whisky, Gin, etc., of such strength as may be fixed by the Excise Commissioner, manufactured at the Government Central Distillery, Bangalore, the holder of arrack shop-license of approved character may, with the sanction of the Excise Commissioner, be permitted to sell the same in duly corked sealed bottles not to be drunk on the premises, at such prices as may be fixed by the Excise Commissioner, and subject to conditions otherwise applicable to the sale of arrack.

- (5) The lease shall not be transferable by sale, gift or otherwise or be sub-rented except with the permission of the Excise Commissioner, nor if the Deputy Commissioner so orders may any agent be appointed for the management of any privilege without his previous approval. All engagements entered into by the agent shall be deposited with the Deputy Commissioner within one month from the date of execution.
- (6) Application for resignation of shop or group of shops will be summarily rejected by the Deputy Commissioner.
- (7) The manufacturers of arrack or double-distilled or rectified country spirits or other special liquors as well as the licenses of arrack Bonded Depots are prohibited from holding any interest in the retail vend of the abovementioned spirits or from employing any person who has such interest.
- (8) The sale or transport of arrack by persons suffering from leprosy or any contagious disease and the employment of such persons in the shop are prohibited.
- (9) The license-holder shall purchase from the Bonded Depots established molasses arrack at $8\frac{1}{2}$ annas per gallon of 20° under-proof, jaggory arrack in duly corked sealed bottles at Rs. 1-6-6, and also special liquors referred to above, at such prices as may be fixed by the manufacturers.
- (10) The licensee shall sell molasses arrack to the public at Rs. 6-6-0 per gallon of 20° under-proof (*i. e.*, at annas two per dram which is equal to 1—51st part of a gallon) and jaggory arrack at Rs. 1-3-10 per reputed quart bottle and at proportionate rates for lower strengths.
- (11) The licensee of every shop in the Cities of Bangalore and Mysore shall pay a registration fee under the Municipal Regulations at the rate of Rs. (180) one hundred and eighty per annum in advance for the period of the license for his shop, and he shall pay a surcharge of (4) four annas per gallon on all arrack sold by him in excess of 55 gallons a month in each such shop.
- (12) The above rates to be charged for molasses arrack, jaggory arrack, double distilled or rectified country spirits or other special liquors by the manufacturers and the above fees are in addition to excise duty, which shall be prepaid at the prescribed rate of Rs. 4-12-0 (including local cess) per gallon of 20° U. P. and proportionately for higher or lower strengths, before the removal of the liquor from a Bonded Depot established under the sanction of Government.
- (13) The licensee shall pay the above duty and price into a Taluk Treasury or to a special shroff, if any, appointed on this behalf at the cost of Government, and located at the Taluk Cutcherry to receive such duty and price *daily* including Sundays and holidays or to such other officer as may be appointed by the Deputy Commissioner, and shall obtain a receipt in the prescribed printed form. On production of such receipt and an indent for the supply of the liquor covered by the receipt, the Bonded Depot-keeper shall issue the quantity of liquor equal to the amount of duty and price shown in the said receipt which will be forwarded to the Excise Commissioner's office under the endorsement of the Bonded Depot-keeper aforesaid, as to the date and hour when the liquor was issued. The Depot-keeper aforesaid shall

issue a pass in the prescribed form for the transport of liquor from the Bonded Depot. He shall also issue sample bottles with the consignments in such manner as may be ordered by the Excise Commissioner.

- (14) The licensee shall be bound to take over any liquor which may remain as stock in hand belonging to the out-going licensee on 1st July 1906, in the shop; paying him such compensation for the same as may be fixed by the Excise Commissioner.
- (15) The licensee shall possess or use on any licensed premises only such standard measure as may, from time to time, be prescribed by the Excise Commissioner. The officers authorized to inspect licensed shops are empowered to enter and examine the premises, to test the measures in use and the liquor under sale and to call for and check the accounts kept in the shops.
- (16) The licensee shall be bound by the provisions of the Excise Laws and rules in force and by any additional rules which may, from time to time, be prescribed under the Excise Laws, and if so required, deliver up his license for amendment or issue of a fresh one.
- (17) The Deputy Commissioner may, whenever he thinks fit, direct shops to be closed, or permit transfer of shops from one place to another, provided the distance is not more than 200 yards, or direct new shops to be opened with the previous sanction of the Excise Commissioner.
- (18) Persons who purchase group of shops may, with the special permission of the Excise Commissioner, who is at liberty to refuse it, and under a license by a competent authority open a depot and remove thereto liquor purchased from the Bonded Depot and issue therefrom the requisite supply to their shops.
- (19) The licensee of shop or group of shops shall not, during the term of the license, have any interest in the exclusive privilege of vending toddy or foreign spirits or liquors or both within 5 miles from it, nor permit any person having interest in the exclusive privilege of vending toddy or foreign spirits or liquor or both within the said area, to hold any share or interest in his exclusive privilege of selling country liquor; nor shall he, during the term of his license, without the written permission of the Excise Commissioner, have any interest, direct or indirect, in any arrack farm in any districts of the Madras or Bombay Presidency under the British Government or any other Foreign State or Territory, or Civil and Military Station, Bangalore.
- (20) An Inspection note book with the pages numbered consecutively for inspecting officers to enter their remarks shall be maintained and be handed over to the Excise Inspector in charge of the Range or any officer authorized by him to receive it on a receipt being given therefor.
- (21) If the licensee shall be convicted on prosecution before a Magistrate of any offence against the Excise Regulation, or Opium Act or other law for the time being in force, which in the Deputy Commissioner's opinion renders him unfit to hold the license, it shall be lawful for the Deputy Commissioner to declare his license forfeited and sell or otherwise dispose of the privilege at the risk of the licensee.
- (22) All sums payable by the licensee may be deducted from the amount of his deposit or recovered by attachment and sale of the property of the licensee or his surety, under any law for the time being in force for the recovery of arrears of land revenue.
- (23) The license-holder or vendor or vendors shall not sell nor give any arrack exceeding one reputed quart to any individual to convey out of any licensed shop or premises without a valid permit.
- (24) The shop-keepers shall not sell or give any arrack to any European non-commissioned officer, private or soldier, or to any European or

Eurasian camp follower, or to any member of the families of any of the aforesaid persons, without the permission in writing of the Commanding Officer or of some person duly authorized by him in that behalf; nor to any European sailor, nor to any sepoy, member of the Police force or Excise staff or servant of a Railway Company, whilst on duty; nor to any European vagrant under escort of Police; nor to any child under fourteen years of age; nor to any insane person for consumption on the premises; nor shall they sell any arrack on credit.

- (25) They (license-holder or vendor or vendors) shall not receive any articles whatsoever in barter or pledge. Payment for arrack shall be received by them in ready money only, and they shall be bound to give intimation of the offer of anything other than cash to the nearest Magistrate or Police Officer. They shall have no pecuniary dealings with any Excise Officer.
- (26) The arrack kept in his shop, offered for sale and sold, shall be unadulterated and undiluted; and it shall be of the same quality and strength as issued from the Bonded Depot. With all consignments from the Depot to the shop, sample bottles shall be taken in such manner as may be ordered by the Excise Commissioner.
- (27) No consignments of arrack received at the shop, and which have been transported through British Territory, shall be opened before they have been verified by the officers authorized to do so.
- (28) No water or other beverage, or liquor other than arrack of any quantity whatever shall be kept or sold in the shop in which arrack is sold, or on the person or in possession of the license-holder or vendor or any of his employees in the shop. No ingredients noxious to health shall be added to it either to increase its intoxicating power or for any other purpose. All officers authorized to inspect shops and depots are empowered to detain any liquor found unfit for consumption or use and the Excise Commissioner, all Deputy Commissioners, Deputy Excise Commissioner and Excise Assistant Commissioners are authorized to destroy such liquor.
- (29) No robbers or thieves or disorderly or riotous persons or prostitutes or soldiers or others known or believed to be deserters shall be harboured in the shop, and gaming, disorderly conduct, etc., therein shall be prevented, and information of their resort shall be given to the nearest Magistrate or Police Officer. No person shall be harboured during night in any shop.
- (30) The license-holder shall fix in a conspicuous place outside of his shop a board on which shall be legibly printed in local vernacular his name and the number of his license and the articles he is licensed to deal in and the current rate of sale; the license must be hung up in a conspicuous place within.
- (31) True account of receipts and issues of liquor shall be maintained from day to day in ink in the prescribed form. The accounts and permits shall be in printed books which may be obtained from local Excise Officers on payment of cost price. Permits for liquor received and the counterfoils of permits issued must be carefully filed. The signing of blank permits for subsequent issue is prohibited. The accounts and counterfoils of permits shall be preserved and delivered to the local Excise Officer immediately after the close of the lease. They shall be produced when asked for by the Deputy Commissioner or any officer appointed by him or by an Excise Officer not below the rank of Excise Assistant Inspector. The licensee shall be bound to furnish such returns and information as may, from time to time, be required by the Deputy Commissioner or Excise Officer not below the rank of Excise Assistant Inspector.

- (32) The amount of fees payable for the shops under Condition 11 above, shall, in the Towns of Bangalore and Mysore, be paid to the Officers appointed by the President, Municipal Commission, to receive the same.
- (33) The following stock or such stock as the Excise Divisional Officer may consider sufficient to meet local requirements shall always remain on hand and not be trencched upon:—

	Arrack	Remarks
I. At all District Head-quarters.	2 Gallons	
II At all Taluk and Depot Kasabas ...	1 Gallon	
III Village shops within five miles from Depot ...	$\frac{1}{2}$ Gallon	
IV Village shops more than five miles distant from Depot ...	Stock equal to one day's sale for every ten miles from Depot and not less than the stock fixed for shops within five miles of the Depot.	

The shop shall be kept open during the authorized hours unless its temporary or permanent closure is authorized by the Deputy Commissioner.

- (34) The shop shall be closed by *9 P.M., and not be opened before sunrise except on special permit in cases of festivals, etc. The Deputy Commissioner or Assistant Commissioner in charge of the taluk may direct that all shops for the sale of arrack on or adjacent to the line of march shall be closed whilst a detachment of European or Native soldiers is passing or encamped in the vicinity. The Government reserves the power to terminate the lease on public grounds on giving the licensee fifteen days' notice and awarding a reasonable compensation to the licensee. The licensee will have no claim to compensation or remission on account of any arrangements which may be made by Government in regard to Country Beer or other description of liquor than arrack.
- (35) The sales should be conducted in a suitable building which shall have only one door, and no windows shall be allowed to the rear or ends of the building. The bar where the liquor is sold shall be opposite the entrance door and so situated that all persons inside can be seen by any one passing to and fro in the street, and no second room shall be allowed to or be kept open for customers.
- (36) The right is reserved to the Deputy Commissioner to grant occasional licenses for the sale of liquor on the occurrence of fairs, festivals, etc., in places in the vicinity of which there are no regularly licensed shops. Such licenses shall ordinarily be granted to the shopkeepers who usually supply the locality. Their period shall not exceed fifteen days and the fee to be paid therefor shall be fixed at the Deputy Commissioner's discretion unless he decides to sell the same by public auction.
- (37) If it comes to the licensee's knowledge that any person employed by him in the carriage or sale of arrack, commits any breach of the Excise Laws or of the engagements entered into by him, it shall be his duty to report the matter to the Deputy Commissioner, and comply with the directions of the Deputy Commissioner respecting the continued employment of such person.
- (38) No person who has been convicted of a heinous offence under the Indian Penal Code shall be employed in the carriage or sale of liquor without the Deputy Commissioner's previous permission.

(39) In case of any breach of the above conditions either by the licensee or, with his connivance and privity, by any person in his employment, or in the event of the licensee neglecting to open his shop, or to carry on the business of his shop with due care and attention, it shall be competent to the Deputy Commissioner to impose upon the licensee a fine not exceeding Rs. 50 for every such breach or for such neglect, or, at the option of the Deputy Commissioner, to declare the money deposited with him forfeited, and to cancel the license and re-sell the shop or to otherwise dispose of it at the risk of the licensee, or to place the shop under the management of Government; and all loss thereby caused, together with all losses accruing to Government in consequence of the licensee's neglect to carry on his business with due care and attention and to open his shop on 1st July 1906, shall be made good by him. When a license is cancelled, the rent for the whole period of the shop shall become due at once. All such amounts of penalties and losses shall be recovered in the same manner as if they were arrears of land revenue.

(40) The imposition of a fine or the forfeiture of deposit or the cancellation of the license under the last preceding para, shall not be held to prevent the prosecution of the licensee or his agents or employees for any offence punishable under the Excise Laws or other law for the time being in force.

NOTE.—For continuing breaches of a license, continuing fines may be imposed.

SALE OF TODDY SHOPS FOR 1906-07.

NOTIFICATION No. 2214, DATED 21ST MARCH 1906.

1. It is hereby notified that the exclusive privilege of selling toddy in each shop or group of shops specified in the appended Schedule, for one year, beginning with 1st July 1906 and ending with 30th June 1907, will be put up to public auction at upset prices by the respective Deputy Commissioners or by Revenue Assistant Commissioners or Divisional Officers of the Excise Department or other officers specially authorized by the Deputy Commissioners for the purpose, on the dates mentioned below, and at the respective Taluk or Sub-Taluk Kasabas, and, except as hereinafter provided, will be knocked down to the bidder offering the highest amount of rent above those prices. If the sales are not completed on the abovenamed days, they will be continued on the next following days (close holidays excepted). Should there be no bids for any shops singly, the officer conducting the sale shall be at liberty to revise, when necessary, in consultation with the Excise Divisional Officer, if present, the grouping of shops as specified in the Schedule hereto appended, or, if necessary, to reserve shops for which there may be no bids, for disposal hereafter, or to sell the said privilege in any particular case, by means of tenders or by private negotiation. The privilege in any Coffee Estate may be sold to the planter for a fixed amount not less than Rs. 12 per shop per annum. The shops in alienated villages shall be separately sold, and the amounts connected therewith shall be shown in the accounts under a distinct head. The sale in every case shall be subject to the conditions hereinafter set forth, and shall, *unless revised by the Government*, take effect on formal confirmation by the Deputy Commissioner who shall be at liberty to accept or reject any bid at his discretion without assigning reason for the same. Such formal confirmation will be necessary whether the sale be held by the Deputy Commissioner himself or by any other officer appointed by him. Should there be no bid above the upset price, the officer conducting the sale may lower the upset price at his discretion. The officer conducting the sale may, at his discretion and without assigning any reason, refuse to accept the bid of any person on the ground that he has been convicted by a criminal court of such an offence, or has been guilty of such an infringement of the terms of his license or of a contract under the Excise Regulation or Opium Act as to render him undesirable as a holder of a license, or on the ground that he is insolvent, or in order to prevent arrangements to the detriment of Government interests, or for any other valid reason.

2. (a) Parties intending to bid must attend either in person or by duly authorized agents; and no person shall be permitted to bid either on his own behalf or on account of any one else until he has made a deposit of Rs. 25 for shops in the Kolar Gold Fields and the Cities of Bangalore and Mysore and Rs. 10 for shops in other places, or such other reasonable amount as may be fixed by the officer conducting the sale. Provided that the Government may at any time dispense with such initial deposit. Such deposit will, if offered, be received within three days previous to the date of sale. Deposits made by unsuccessful bidders, if not forfeited as hereinafter provided, will be returned at the close of the sale.

(b) No shops or group of shops shall be knocked down in the name of more than one person or of more than one company or firm duly represented. The selling officer shall refuse to register as a purchaser any one in whose name the bidding has not proceeded.

3. (a) The successful bidder shall, on the exclusive privilege being knocked down to him, at once, if so required by the selling officer, or otherwise at the close of the day's sale, further deposit a sum equal to one-twenty-fourth part of his bid for the year, that is to say, one-half of the monthly rent unless the initial deposit equals or exceeds two months' rent. Should he failed to do so, the deposit, if any, made by him under clause 2 (a) will be forfeited, and the privilege will be sold again on the

above conditions, or otherwise disposed of at his risk, as the Deputy Commissioner or selling officer may determine.

(b) The person to whom a shop or group of shops has been knocked down and who has made deposits as provided above, shall be required to leave his address with the selling officer, in order that the confirmation of the sale may be communicated to that address by a notice, and he shall, within seven days after the service of the said notice by its presentation to himself or to any adult male member of his family at the place of said address or by its being affixed thereto or by its forwardal duly registered by post, pay at the Taluk Treasury concerned, such further sum as, with the former deposits, will make up an aggregate sum equal to two months' rent, and execute at the same time before the Amildar the necessary engagements and take out the necessary licenses, as hereinafter set forth.

4. (a) The deposit made under the preceding para shall be either in cash or in Government of India Securities duly endorsed in favor of the Deputy Commissioner. Provided that in cases where the monthly rent exceeds Rs. 10 (in lieu of a deposit of two months' rent as above), the Deputy Commissioner may, in his discretion, allow any purchaser to deposit one month's rent as above, and to furnish approved personal security for an amount equal to four months' rent. In all cases where the monthly rent does not exceed Rs. 10, a cash deposit equal to two months' rent shall invariably be taken, and no personal security shall be accepted. If, on enquiry subsequent to sale, the purchaser shall be found to be a foreigner having no property in the Mysore State, or to be of doubtful solvency he may be required to deposit twice the prescribed sum or to get a surety or sureties, residents of and possessing property in the Mysore State, to execute a security bond for the due payment of *all moneys* that may become due by him under the terms of the contract.

(b) Should the initial deposit exceed the sum required to be deposited under clause 3 (b) or clause 4 (a), the excess will be refunded to the purchaser.

5. The purchaser of the exclusive privilege shall execute an agreement binding himself and, unless exempted by the Deputy Commissioner by an order duly recorded, so much of his movable and immovable property as may be deemed sufficient, to observe the conditions hereinafter set forth, as well as those specified in the license to be issued to him; and his surety, if any has been accepted under the above para, shall also execute a bond in the prescribed form binding himself and so much of his movable and immovable property as may be deemed sufficient by the Deputy Commissioner, for the due fulfilment by the purchaser of the terms of his agreement. The agreement and bond so executed shall be stamped at the expense of the purchaser. They shall also be registered at his expense when the amount secured is Rs. 100 and above.

6. If default is made in making the deposit or deposits or in executing the agreement or the security bond, if any, and in taking out licenses as aforesaid, the exclusive privilege shall be forthwith re-sold or otherwise disposed of by the Deputy Commissioner at the risk of the first purchaser, who shall forfeit to the Government any deposit or deposits already made by him, and shall further be liable to make good any loss caused by such re-sale or other disposal. He shall not be entitled to any gain accruing from the re-sale or other disposal, and he shall be debarred from bidding again for the same or for any other shop or group of shops. In the case of loss the forfeited deposits will be deducted from it and the remainder, if any, shall be recovered as if it were an arrear of land revenue. In the case of the purchaser's death after the confirmation of the sale, it will be binding on his heirs or assigns.

7. As soon as the agreements and bonds have been executed, the Deputy Commissioner will issue a license in the prescribed form, assigning to the purchaser the exclusive privilege referred to therein, subject to the following conditions; but nothing herein contained shall exempt the purchaser of the privilege from liability to the penalties prescribed for breaches of the conditions set forth below, though a formal license may not have been issued to him:—

(i) The exclusive privilege conferred by the license extends to the sale of Date, Paimyra, Cooanut, Bagani and Dadasal toddy. But in tracts where both Date and Bagani toddy shops exist, the licensee of the Date Toddy shop shall not tap Bagani trees and the licensee of the

Bagani Toddy shop shall not tap Date trees, but both licensees can tap any of the other palm trees named above.

(2) The Deputy Commissioner shall be at liberty to issue license for the sale of foreign liquors, for the manufacture and sale of country beer, and for the manufacture and sale of arrack and other country spirits.

(3) The amount of rent shall be payable into the local Government Treasuries on printed chellans furnished for the purpose by Government, in equal monthly instalments commencing from 1st July 1906. No amount shall be paid to or received by the Excise Officers. In the malnad and semi-malnad taluks, the Deputy Commissioner may permit patels of villages who are not themselves licensees to receive payments not exceeding Rs. 50 from any individual at a time. But if the amount of annual rent for any shop does not exceed Rs. 12, the whole of it shall be paid in not more than three quarterly instalments. Each instalment shall be regarded as the rent for the month or quarter in respect of which it is payable. The licensee will make separate payment on account of local cess. Each month's or quarter's rent shall be payable on or before the 20th of the same month or before the end of the quarter. If default is made, the Amildar may, with the sanction of the Deputy Commissioner, by record in writing, suspend or cancel the license, order the forfeiture of all deposits made by the defaulter and proceed to re-sell or otherwise dispose of the shop or group of shops at the defaulter's risk (as soon after the last day of the month or quarter as may be possible), with effect from date of issue of license to the new purchaser, or from the date of other disposal. Provided, however, that instead of re-selling the same as above the Deputy Commissioner may, in his discretion, direct the Amildar to issue licenses to sub-vendors or vendors under the defaulting licensee for rents, the aggregate of which is not less than the rent the defaulting licensee had agreed to pay. The officer who has power to suspend the license may, however, at his discretion, allow sales to continue pending re-sale or other disposal of the privilege.

NOTE.—The licensee of a Jatra shop shall pay the rent thereof in full before the Jatra begins.

(4) For the supply of toddy to his shops the licensee shall have the privilege of obtaining, subject to tree-tax rules, toddy-yielding trees in the groves assigned to his shops or groups of shops, and he shall be at liberty to manufacture toddy from the trees in private lands, under private arrangements between himself and the owners of such lands. He may purchase toddy from any licensed toddy shop-keeper on application to the Inspector, who will grant the required permits on proof of the necessity for the same. No toddy except the produce of trees marked by a proper officer and tapped under a license shall be kept in the shop or offered for sale or sold.

(5) For all toddy-yielding trees, tree-tapping licenses shall be annual. For the convenience of the licensee, the applications for tree-tapping licenses will be received, trees will be marked, and licenses will be issued during the fifteen days and pots may be attached to such marked trees during the eight days immediately preceding the period to which they relate to take effect from the commencement of such period. Provided that no toddy shall be removed from the trees except during the currency of such license.

(6) (a) Persons applying for the issue of tree-tapping licenses will be responsible to Government for all sums payable as tree-tax on account of the trees licensed therein to be tapped and also for tree-rent in the case of trees on Government unoccupied lands and also for local cess thereon.

(b) On receipt of an application, the Inspector will at once take steps for the marking of the tree by an officer superior in rank to a Sub-Inspector, and for the timely issue of the license. Applicants for date trees shall get the requisite spaces on their stems prepared and point

706

out to the marking officer, when required by the latter to do so, the trees applied for by them. Should they failed to do so, after reasonable notice, the tree-tax and tree-rent paid by them shall be liable to be forfeited at the Deputy Commissioner's discretion.

- (7) No tree shall be tapped, nor shall toddy be drawn from any toddy tree, nor shall any pot be attached to any toddy tree until the tree has been marked by the proper officer. But the removal of leaves for the purpose of making incisions and the preparation of the spathes or incisions for the drawing of toddy is permitted as soon as the application in the prescribed form has been delivered to the Treasury concerned.
- (8) (1) No tree shall be tapped for toddy without a license therefor to be obtained by payment of tree-tax at the following rates:—

Description of trees.	Rates of tree-tax including local cess per tree per annum.		
	Rs.	a.	p.
Date	...	1	1 0
Cocanut	...	2	2 0
Palmyra	...	1	9 6
Bagani or sago	...	1	9 3
Dadasal (Arenga wightii)	...	0	8 6

NOTE.—The licenses will be free of tax to the Mysore Government in the cases specified in clause 15 (1) (b) below.

- (2) In addition to the above tax, tree-rent at annas 4 per tree per annum with local cess at 3 pies thereon shall be paid for all Government trees applied for being tapped for the supply of toddy shops whether within or outside the Mysore territories or in the Civil and Military Station of Bangalore.

NOTE.—No trees upon Government occupied land can be tapped without the consent of the owner. The present arrangement as regards trees on alienated land will hold good subject, of course, to the levy by Government of tree-tax.

- (9) The tree-tax shall be payable in the following instalments, unless the Excise Commissioner shall otherwise direct:—

Period within which license is applied for	Proportion of tree-tax to be paid at the time of application for license	Proportion of tree-tax to be paid on the first of the 3rd month
Between 1st July 1906 and 30th April 1907 ..	One-third	The remaining two-thirds.
Between 1st May 1907 and 30th June 1907 ...	The whole	

- (10) (a) The tree-rent together with the local cess on tree-rent and also the local cess on the tree-tax for trees applied for shall be payable in full at the time of application for tapping license.
- (b) If any instalments are not paid within the time, the license shall be liable to be cancelled or suspended under Section 26 of the Excise Regulation.
- (c) When the licensee makes default and his shop is re-sold, his rights to and claim on Government trees cease and determine.
- (d) In case of default, the Amildar with the Deputy Commissioner's permission will order the suspension of the tapping license till the arrears are paid up and if, after receiving notice of such suspension, the defaulter continue to tap the trees, he will be prosecuted for illicit tapping.
- (11) The deposit made by the licensee will be taken as security for the due performance of the conditions of the license and if not forfeited or credited or otherwise disposed of shall be taken in payment of the instalment due in the last months or month of the period of the license.

707 All arrears and deficits payable by the licensee shall, with interest at 6 per cent per annum, be recoverable from him or his surety under the rules in force for the recovery of land revenue. Interest shall be calculated on all arrears from the date of default and on deficits from the date of re-sale or disposal otherwise. No remission or abatement of the rent or compensation shall, on any account whatever, be claimable by the licensee, nor will he be entitled to any compensation for any trees withdrawn or taken for the public purpose.

- (12) If the Deputy Commissioner does not confirm the re-sale, he may make such other arrangements as may appear advisable for the remainder of the period of the lease, in which case he shall serve a notice on the defaulting licensee informing him of the nature of the arrangements made.
- (13) If the licensee of a group of shops wishes to establish a depot for depositing toddy required for distribution to his shops, he shall obtain a license for it in the prescribed form. The passes issued with the toddy transported, shall be subject to examination and check by the officers authorized in this behalf.
- (14) The tree-tax on toddy produced by trees in the Madras Presidency but consumed in the Mysore State, will be credited to the Mysore Government. The rate of tree-tax to be paid in such cases will invariably be the highest in force on either side of the frontier. Tree-tax on trees in the Madras Presidency for which tapping licenses are about to be taken out by Mysore shop-keepers, must be paid in one instalment to the Amildar of the Taluk concerned in the Mysore State, who will grant a receipt in the prescribed chellan form and certify at the foot that the applicant is a person entitled to take out tree-tapping licenses. The applicant will then make his application to British authorities in accordance with the Madras Government Tree-tapping Rules, and will obtain a transport permit from the Inspector concerned in the Mysore State for the transport of the toddy drawn from the frontier to the shop or depot for which it is intended; after having complied with all requirements of the Madras Government Rules.
- (15) (1) Tree-tapping licenses in the prescribed form shall be issued on the application :—
 - (a) of licensed toddy shop-keepers or of their duly authorized agents,
 - (b) of tree-owners in coffee estates, hittals and kans in the malnad free of the prescribed tree-tax for drawing toddy for *bona fide* domestic purposes as per Government Order No. 11897-906—Excise 485, dated 20th June 1898, for such number of trees as may be found necessary by the Excise Commissioner.
- (2) The licenses may be issued in the name of the applicant himself or of his nominees.
- (16) Applications for the grant of tree-tapping licenses must be made in the prescribed form to the Excise Inspector of the Range concerned through the local Treasury. Forms may be obtained from him or the Assistant Inspectors under him.
- (17) Applications for tree-tapping licenses, for trees in occupied or alienated lands should be countersigned by the owner of the trees intended to be marked, in token of his consent. Applications for tree-tapping licenses for trees in State Forests and plantations should be countersigned by the Forest Range Officer in token of his consent.
- (18) Deputy Commissioners may, subject to the orders of the Excise Commissioner from time to time, prescribe the minimum number of trees for which license will be granted, and the minimum number to be entered in a single application. They may also direct that the trees situated in one village only shall be included in an application.

707 (19) Every person to whom a tapping license is granted for the manufacture of toddy shall observe the following rules in tapping date trees:—

- (a) Date trees shall be tapped only by professional men.
 - (b) Trees tapped one year shall not ordinarily be tapped the next year.
 - (c) Trees shall not be over-tapped or over-worked.
 - (d) In no date trees shall the initial incision be made at any point less than 3 feet from the ground except in places where permission is specially given by the Excise Commissioner.
 - (e) The depth and width of the incision shall not exceed one-third of the diameter of the tree, and the length of it shall not exceed eight inches.
 - (f) Every fresh incision shall not be less than one foot above the last incision except in localities where permission is specially given.
 - (g) The central spike-like clusters shall not be touched. Of the lateral leaves not less than two layers of leaves shall be left, reckoning from the layers immediately next to the central clusters down to the top line of the incision; or in other words, above the top line of the incision not less than eight leaves shall be left excluding the central spike-like clusters, on that face of the tree on which the incision is made.
 - (h) The licensee shall not cut or injure or permit to be cut or injured the trees licensed to him or any other trees.
 - (i) The licensee or his employer will be liable to pay a fine of one rupee for each tree in excess of three per cent of the number of trees marked for him which may die from over-tapping or careless tapping either during the lease or within six months after its expiration.
- (20) The licensee shall not interfere with the persons holding license for cutting date leaves for mat-making, rope-making, basket-making, or for agricultural or other purposes, when they make use of the trees assigned for such purposes, and not received for tapping.
- (21) The licensee of the depot or shop or group of shops will be required to keep true account of the receipts and issues of toddy from day to day in ink in the prescribed form. The accounts and permits shall be in printed books which may be obtained from the local Excise Officer on payment of cost price. Permits for toddy received and the counterfoils of permits issued must be carefully filed. The signing of blank permits for subsequent issue is prohibited. The accounts and counterfoils of permits shall be preserved and delivered to the local Excise Officer immediately after the close of the lease. They shall be produced when asked for by the Deputy Commissioner or any officer appointed by him or by an Excise Officer not below the rank of an Excise Assistant Inspector. Such returns and information as may be required by the Deputy Commissioner or Excise Officer not below the rank of an Excise Assistant Inspector shall be furnished by holders of licenses without delay.
- (22) The sales must be conducted in a suitable building which shall have only one door and no windows or other opening shall be allowed to the rear or at the ends of the building. The bar at which toddy is sold shall be opposite the entrance door and so situated that all persons inside can be seen by any one passing to and fro in the street, and no second room shall be used for the sale of toddy, or be kept open for customers.
- (23) Toddy shall not be sold except in shops duly licensed by the Deputy Commissioner, in the prescribed form and no new shops shall be opened without the previous sanction of the Excise Commissioner. Tree-foot sales or sales in the open, or the disposal of toddy in any other manner unauthorized by the rules, are strictly prohibited. Provided, however,

that in Bagani tracts, the licensee who has purchased the right of vend of Bagani toddy, may permit the tapping of Bagani trees for domestic consumption as well as for sale, within the limits of the village purchased by him.

- (24) The Deputy Commissioner may, whenever he thinks fit, direct shops to be closed or permit transfers of shops from one place to another within two hundred yards of the sanctioned site. A sufficient supply of toddy shall be maintained in all sanctioned shops, the quantity being such as may be fixed by the Excise Divisional Officer.
- (25) The licensee shall place the license granted to him in a conspicuous place in the shops.
- (26) The right is reserved to the Deputy Commissioner to grant occasional licenses for the sale of toddy on the occurrence of fairs, festivals, etc., in places in the vicinity of which, there are no regularly licensed shops. Such licenses shall ordinarily be granted to shop-keepers, who usually supply the locality. Their period shall not exceed fifteen days and the fee to be paid therefor shall be fixed at the Deputy Commissioner's discretion unless he decides to sell the same by public auction.
- (27) A signboard shall be affixed in a conspicuous part of the front of each shop containing, in the local vernacular, the name of the shop-keeper, number of his license and the rate at which toddy is sold by him. The sale or transport of toddy by persons suffering from leprosy or any contagious disease and the employment of such persons in the shop, are prohibited.
- (28) The licensee shall prevent all drunkenness or disorder or gaming within his shops.
- (29) No shop shall be opened before sunrise or kept open after 9-30 P. M. in the City of Bangalore except under special authority. The shops shall be kept open during the authorized hours, unless its temporary or permanent closure is authorized by the Deputy Commissioner.
- (30) The licensee shall not harbour robbers or thieves or disorderly or riotous persons or prostitutes or soldiers or others known or believed to be deserters. No persons shall be harboured in any shop during the night, but, on the contrary, the licensee shall give intimation to the nearest Magistrate or Police Officer as to any such persons who may resort to his shops.
- (31) The licensee shall not receive any grain, jewels, goods, wearing apparel, or other article in barter or in pawn for toddy, but on the offer of any such, shall give information to the nearest Magistrate or Police Officer.
- (32) The licensee, vendor, or vendors shall not sell to any person more than three measuring seers of toddy to be consumed by the person at one time in the shop. He shall not allow any one to take out of his shop without a pass more than two seers or imperial quarts with the exception of bakers who are permitted to purchase and remove the quantity of toddy specified in the pass held by them. Toddy can be removed upon passes for consumption up to the limit of one imperial gallon or four seers.
- (33) The distillation of spirit from toddy is absolutely prohibited.
- (34) Toddy shall be sold pure as drawn from trees, and shall not be adulterated or diluted in any manner in the shops, or depots if any. No ingredient noxious to health shall be put into the toddy either to increase its intoxicating power or for any other purpose. All officers authorized to inspect shops and depots are authorized to detain any liquor found unfit for consumption or use and Excise Commissioner, all Deputy Commissioners and Deputy Excise Commissioner and Excise Assistant Commissioners are empowered to destroy such liquor.
- (35) Toddy shall not be sold to the public at less than the retail rates fixed by Government as per schedule attached.
- (36) The licensee shall possess or use on any licensed premises only such standard measures of capacity as may, from time to time, be prescribed by the Excise Commissioner. The officers authorized to inspect licensed

shops, are empowered to enter and examine the premises to test measures in use and the toddy under sale and to call for and check accounts in the shop.

- 709
- (37) The licensee shall have such measures tested and stamped at his own expense.
 - (38) No toddy shall be sold or given to any European non-commissioned officer, private or soldier, or to any European or Eurasian camp follower, or to any member of the families of any of the aforesaid persons, without the permission, in writing, of the Commanding Officer, or of some person duly authorized by him in this behalf; nor to any European or Eurasian sailor, nor to any sepoy, member of the Police force, Excise officer, or a servant of a Railway Company whilst on duty; nor to any European vagrant under escort of the Police; nor to any child under fourteen years of age, nor to any insane person for consumption on the premises; nor shall any toddy be sold *on credit*.
 - (39) The Deputy Commissioner or Assistant Commissioner in charge of the Taluk may direct that all shops for the sale of toddy on, or adjacent to, the line of march shall be closed whilst a regiment or detachment of European or Native soldiers is passing or encamped in the vicinity. Such soldiers may be supplied with toddy by such persons as the Government may select for the purpose, notwithstanding the licensee's exclusive privilege.
 - (40) The Government reserves the power to terminate the lease on public grounds, on giving the licensee fifteen days' notice and awarding a reasonable compensation to the licensee. The licensee will have no claim to compensation or remission on account of any arrangements which may be made by Government in regard to country beer or other description of liquor than toddy.
 - (41) The license shall not be transferable by sale, gift or otherwise or be sub-rented except with the permission of the Excise Commissioner. Applications for the resignation of shops in whole or in part will be summarily rejected by the Deputy Commissioner.
 - (42) No person shall be appointed by the licensee for the management of any such privilege without the Deputy Commissioner's previous approval.
 - (43) All engagements entered into by agent, shall be deposited with the Deputy Commissioner within one month from the date of execution.
 - (44) If it comes to the licensee's knowledge that any person employed by him in the manufacture, carriage or sale of toddy commits any breach of the Excise Law or of the engagements entered into by him, it shall be the licensee's duty to report the matter to the Deputy Commissioner, and to comply with the directions of the Deputy Commissioner respecting the further employment of such person.
 - (45) The licensee of shop or group of shops shall not, during the term of the license, have any interest in the exclusive privilege of vending arrack within five miles from it nor permit any person having interest in the exclusive privilege of vending arrack within the said area of five miles to hold any share or interest in his exclusive privilege of selling toddy; nor shall he, during the term of his license, without the written permission of the Excise Commissioner, have any interest, direct or indirect, in any toddy shop or farm outside the territories of Mysore, or in the Civil and Military Station of Bangalore.
 - (46) The licensee shall provide himself with printed forms of permits for transport and possession of toddy. Such permits shall be in the form prescribed by the Excise Commissioner, and shall be purchased from local Excise officers. He shall have no other pecuniary dealings with any Excise officer.
 - (47) The licensee shall pay the usual mohatarfa tax on carts used for conveying toddy but such carts shall not be impressed for Government work.

410 (48) In case of any breach of the aforesaid Rules or of the conditions of the license either by the licensee or with his connivance or privity by any person in his employment, or in case of the licensee neglecting to open his shops on 1st July 1906, or to carry on his business with due care and attention, it shall be competent to the Deputy Commissioner to impose upon the licensee a fine not exceeding the sum of Rs. 50 for every such breach or neglect, or at the option of the Deputy Commissioner to declare the money deposited with him forfeited, and to cancel the license, and to re-sell the exclusive privilege or otherwise dispose of it at the risk of the licensee, or to place it under the management of Government. When a license is cancelled, the rent for the whole period of the license shall become due at once; and all loss caused to Government by the cancelment of the license or by the re-sale or other disposal of the privilege shall be made good by the licensee, or his surety in the manner specified in condition 53. All sums due shall be recovered in the same manner as if they were arrears of land revenue.

(49) An Inspection note-book with the pages numbered consecutively for inspecting officers to enter their remarks, shall be maintained and be handed over to the Excise Inspector in charge of the Range or any officer authorized by him to receive it on a receipt being given therefor.

(50) The imposition of a fine, or the forfeiture of a deposit, or the cancellation of the license under the last preceding condition, shall not be held to prevent the prosecution of the licensee or his agents or employees for any offence punishable under the law for the time being in force.

NOTE.—For continuing breaches of a license, continuing fines may be imposed.

(51) No person who has been convicted of any heinous offence under the Indian Penal Code shall be employed in the carriage or sale of liquor without the Deputy Commissioner's previous permission.

(52) If the licensee shall be convicted on prosecution before a Magistrate of any offence against the Excise Regulation or Opium Act or other law for the time being in force, which, in the Deputy Commissioner's opinion, renders him unfit to hold the license, it shall be lawful for the Deputy Commissioner to declare his license forfeited or sell or otherwise dispose of the privilege at the risk of the licensee.

(53) All sums payable by the licensee may be deducted from the amount of his deposit, or recovered by attachment and sale of the property of the licensee or his surety, under any law for the time being in force for the recovery of arrears of land revenue.

(54) The licensee shall be bound by the provisions of the Excise Laws and Rules thereunder for the time being in force and by the terms and conditions of the license. The licensee shall, on requisition by the Deputy Commissioner or other officer duly authorized by him, deliver up his license for amendment or for the issue of a fresh license accordingly.

(55) In every grove where toddy-yielding trees are tapped, a ladder shall always be kept by the tap-men to enable Excise officers to examine incisions or spathes, as the case may be, or to measure the incisions.

711

Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Agricultural operation—Ragi thrashing.

Outturn of harvests is from 5 to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Sugar-cane is being harvested and resown throughout the district. The sweet potato harvest is closing in the Hoskote Taluk. The probable outturn of dry crops is about on an average 8 annas, that of wet crops about 6 annas.
10. Prospects of the season moderate. Rain is anxiously awaited. The prices of food stocks have not risen.
11. Public health generally good. Fever is reported to prevail in Hoskote.
12. Cattle healthy. Foot and mouth disease is reported to prevail in some parts of Hoskote. In some places water is obtained with difficulty from wells sunk in the beds of tanks and streams.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Sugar-cane is being sown in Bowringpet, Mulbagal, Sidlaghatta, Chikballapur, Bagepalli, Goribidnur, Srinivasapur and Gudibanda; and it is also being milled in almost all the taluks. Vysakhi paddy is being harvested in Sidlaghatta and Bagepalli.
10. Prospects of the season depend upon early mungar rains. Food stocks available.
11. Public health generally good.
12. Water and fodder generally available, but the supply of water is running short. Pasture in fields and grazing lands is almost exhausted.

TUMKUR.

8. Market well supplied.
9. Paddy in Tumkur, Maddagiri and Pavagada, kadale in Gubbi, Maddagiri, Tiptur, Kunigal and Koratagere; cholum in Maddagiri, Sira and Pavagada; sugar-cane in Gubbi and

Kunigal, and cotton in Sira and Pavagada are being harvested. Paddy and sugar-cane are sown in Maddagiri. Standing crops in Tumkur, Chiknayakanhalli and Tiptur are withering for want of water; elsewhere they are in a pretty fair condition. The following is the estimated outturn of crops:—

Maddagiri—Paddy 8 annas, kadale 4 annas, cholum 5 annas.

Sira—Cholum 2 to 8 annas, cotton 1 to 4 annas.

Gubbi—Kadale 4 annas.

Pavagada—Paddy and cholum 4 annas, cotton 2 annas.

Kunigal—Kadale 2 annas, sugar-cane 4 annas.

Koratagere—Kadale 6 to 8 annas.

10. Prospects not encouraging. Food stocks sufficient for the present. Supply of water in wells is diminishing in several parts of the district. Mungar rains are anxiously awaited.

11. Public health generally good, except that small pox is prevalent in parts of Gubbi, Tiptur and Turuvekere.

12. Cattle healthy, except that foot and mouth disease is prevalent in parts of Gubbi, and Tiptur. In parts of Sira, Tiptur and Turuvekere date leaves are used as fodder for cattle. Water is drawn from wells in most parts of the District for cattle to drink.

MYSORE.

8. Market well supplied.

9. Standing sugar-cane, mulberry and cotton crops are reported to be fair in parts of Seringapatam, Malvalli and Krishnarajpete; and good in parts of Mysore, Nanjangud, T.-Narsipur and Nagamangala. Lands in parts of Seringapatam are being ploughed and made ready for sowing. The probable outturn of crops is as follows:—

T.-Narsipur—Sugar-cane and mulberry 12 annas.

Krishnarajpete—Sugar-cane 6 to 8 annas.

10. Prospects of the season not bad. Food stocks sufficient for the present. Want of rain is much felt all over the district.

11. Public health good, but small-pox is reported to be still prevailing in Heggaddevankote.

12. Cattle in parts of Chamrajnagar and Malvalli are reported to be suffering from foot and mouth disease. In other parts they are healthy. Fodder is generally available. Difficulty for water is greatly felt in parts of Chamrajnagar, Seringapatam, Heggaddevankote, Mandya and Nagamangala.

HASSAN.

8. Market fairly supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Hole-Narsipur and Alur; and paddy in Hassan, and Manjarabad are reported to be in a fair condition. Sugar-cane and paddy in Arsikere are reported to be withering for want of rain. The outturn of sugar-cane in Hole-Narsipur is estimated at 10 annas.

10. Prospects of the season fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the district.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur, Arsikere and Arkalgud. Fodder and water generally available except in parts of Arsikere and Channarayapatna, where some difficulty is felt.

SHIMOGA.

8. Market well supplied. Prices high.

9. The Vysakhi paddy and sugar-cane plants are in a fair condition in Sagar and Nagar; but the young plants are not thriving well in certain parts of these taluks for want of water supply. The kar-paddy under Sulekere is thriving pretty well. In other taluks there are no agricultural operations in progress at present for want of rains.

10. Food stocks sufficient for the present except in parts of Shikarpur, Sorab and Kumsi.

11. Public health good.

12. Cattle healthy. Fodder supply is running short in parts of Honnali, Shikarpur, Sorab and Kumsi. Water-supply is failing in Shimoga, Honnali, Shikarpur, Sorab, Sagar and Kumsi.

KADUR.

8. Market fairly supplied.

9. Sugar-cane is being planted in Tarikere and Kadur. The standing crops, *viz.*, sugar-cane and cotton in parts of Tarikere; kar paddy in parts of Koppa; sugar-cane and kar paddy in parts Chikmagalur and Kadur are fairly good condition. Sugar-cane and cotton in parts of Tarikere, and sugar-cane in parts of Kadur are being harvested. Ploughing and other agricultural operations are delayed for want of rain.

10. Prospects of the season fair; but rain is needed for standing crops. Food stocks available and sufficient for the present.

11. Public health generally good except that small-pox prevails in parts of Chikmagalur and Mudgere.

12. Foot and mouth disease of cattle in the district is reported to be subsiding. Water and fodder generally available, water-supply is scanty in parts of Chikmagalur, Kadur, Tarikere and Yedahalli.

CHITALDRUG.

8. Market well supplied.

9. The standing crops, *viz.*, chionni, wheat, sugar-cane, navane, onions, garlic and tobacco are reported to be in fairly good condition in Molakalmuru. The estimated outturn of crops harvested during the week is as follows :—

Hiriyur—Kadale, wheat and ragi 2 annas, Navane, togari and cotton 4 annas, Ragi under kapile wells 8 to 10 annas, Paddy under kapile wells 8 to 10 annas.

Holalkere—Cotton 6 annas.

Davangere—Kadale and sugar-cane 8 annas.

Molakalmuru—Kadale 4 annas.

Harihar—Cotton 4 to 8 annas

10. Prospects of the season fair. Food stocks sufficient.

11. Public health good.

12. Cattle healthy. Water and fodder procurable in limited quantities.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	<i>Normal.</i>	<i>Current.</i>	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Ragi thrashing is over. Manure is being collected. Raiyats are anxiously expecting rains.

Outturn of harvested ragi is from 5 to 6 annas.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices steady.
9. Standing crops are in good condition. Potato harvest is almost over in Hoskote. Sugar-cane is being harvested and resown throughout the district. The probable outturn is 8 annas on an average.
10. Prospects of the season moderate. Want of rain is keenly felt throughout the district.
11. Public health generally good. Fever prevails in Kankanhalli and small-pox in Anekal.
12. Cattle healthy. Foot and mouth disease is reported to prevail in some parts of Hoskote. Water is available in wells sunk in the beds of tanks in places where there is no water in tanks. Dry fodder is available.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being planted in Bowringpet, Sidlaghatta, Chikballapur, Goribidnur, Srinivasapur and Gudibanda and it is also being milled in almost all the taluks. Vysakhi paddy is being harvested in Sidlaghatta and Bagepalli.
10. Prospects of the season depend upon early mungar rains. Food stocks are available.
11. Public health generally good.
12. Water and fodder generally available, but the supply of water is running short. Pasture in fields and grazing lands is almost exhausted.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri, Sira and Pavagada; cholum in Maddagiri, Sira and Pavagada; sugar-cane in Gubbi, Kunigal and Koratagere; cotton in Sira and Pavagada and kadale in

Gubbi are being harvested. Sugar-cane is sown in Maddagiri and Koratagere. Standing crops in Tumkur, Chiknayakanhalli, Tiptur and Koratagere are withering. Elsewhere they are in fair condition. The following is the estimated outturn of crops :—

Maddagiri—Paddy 8 annas, cholum 5 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas, cotton 1 to 2 annas.

Gubbi—Sugar-cane and kadale 4 annas.

Pavagada—Paddy 2 annas, cholum 4 annas, cotton 1 anna.

Kunigal—Sugar-cane 4 annas.

10. Prospects of the season not encouraging. Food stocks sufficient for the present. Supply of water in wells is diminishing in several parts of the district. Mungar rains are anxiously awaited.

11. Public health generally good, except that small-pox is prevalent in parts of Gubbi, Tiptur and Turuvekere.

12. Cattle healthy, except that foot and mouth disease is prevalent in parts of Gubbi, Tiptur and Turuvekere. In parts of Tiptur and Turuvekere date leaves are used as fodder for cattle. Water is drawn from wells in most parts of the district for cattle to drink.

MYSORE.

8. Market well supplied.

9. The standing crops *viz.*, sugar-cane, mulberry and cotton are reported to be in a fair condition in Chamrajnagar, Seringapatam, Nanjangud, T.-Narsipur, Malvalli and Krishnarajpete. The lands have been ploughed up, manured and made ready for sowing. The raiyats are very anxiously waiting for rain which is badly wanted throughout the district.

10. Prospects of the season indifferent. A great deal depends upon early showers. Food stocks sufficient for the present.

11. Public health generally good. Small-pox still prevails in Heggaddevankote and Hunsur.

12. Cattle generally healthy except in parts of Chamrajnagar and Malvalli, where they are reported to be suffering from foot and mouth diseases. Fodder is generally available, but want of water is much felt in many taluks.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Hole-Narsipur, Arkalgud and Alur; and paddy in Hassan and Manjarabad are reported to be in fair condition. Sugar-cane and paddy in Arsikere are reported to be withering for want of rain. The outturn of sugar-cane in Hole-Narsipur is estimated at 10 annas.

10. Prospects fair. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in several parts of the district.

12. Cattle generally healthy, but foot and mouth disease is reported to exist in parts of Manjarabad, Belur, Arsikere and Arkalgud. Fodder and water generally available except in parts of Arsikere and Channarayapatna, where some difficulty is felt.

SHIMOGA.

8. Market well supplied. Prices high.

9. Vysakhi paddy in Channagiri, Sagar and Nagar is in a fair condition in areas where water is available. In other parts it is suffering for want of water. Sugar-cane plants are thriving well in parts of Sagar and Nagar where water is available; in other localities the young plants are suffering for want of water-supply.

10. Food stocks are enough for the present except in parts of Channagiri, Shikarpur, Sorab and Kumsi.

11. Public health good.

12. Fodder supply is running short in Channagiri, Honnali, Shikarpur, Sorab and Kumsi. Scarcity of water is being felt in all taluks.

KADUR.

8. Market fairly supplied.

Land is being ploughed in parts of Koppa. Sugar-cane is being planted in parts of Tarikere. Standing crops, viz., kar-paddy and sugar-cane in parts of Kadur are in fairly good condition, while in Chikmagalur they are not flourishing for want of water. Sugar-cane in parts of Kadur and cotton in parts of Tarikere are being harvested. Ploughing and other agricultural operations are delayed for want of rain.

10. Prospects of the season fair, but rain is needed for standing crops. Food stocks are available and sufficient for the present.

11. Public health generally good except that small-pox prevails in parts of Chikmagalur, Mudgere and Yedahalli.

12. Foot and mouth disease to cattle is reported to be subsiding. Water and fodder generally available. Water-supply is scanty in parts of Chikmagalur, Tarikere, Kadur and Yedahalli.

CHITALDRUG.

8. Market well supplied.

9. Paddy is reported to be in fairly good condition under kapile wells in Hiriur. The outturn of crops harvested during the week is as follows:—

Hiriur—Wheat, kadale and ragi on dry lands 2 annas, ragi under kapile wells 8 to 10 annas, paddy under kapile wells 8 to 10 annas and navane, togari and cotton 4 annas.

Holalkere—Cotton 6 annas.

Davangere—Sugar-cane, kadale and paddy 8 annas.

Molakalmuru—Navane, cholum (white) and cotton 4 annas.

Harihar—Cotton 4 to 8 annas.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle are reported to be healthy in all the taluks. Water and fodder are procurable in limited quantities.

GOVT. OF H. H. THE MAHARAJA OF MYSORE, GENL. AND REV. SECRETARIAT,
Dated Bangalore, the 10th April 1906.

By Order,
B. K. VENKATA VARADA IYENGAR,
Secy. to Govt., Gen. & Rev. Dept.

READ—Annual Report for the year 1904-05, submitted by the Agricultural Chemist to the Government of His Highness the Maharaja of Mysore, with his letter No. 674, dated the 4th December 1905.

No. R. 10787-96—AGRI. 76-05-5, DATED BANGALORE, 17TH FEBRUARY 1906.

ORDER THEREON.—Dr. Lehmann having returned from his furlough in October 1904, the working of the Department was in his hands during the greater part of the official year 1904-05.

2. The work done consisted mainly of plot experiments, analysis of agricultural products, such as, coffee, famine food, and of fertilizers, elaborate investigation into improved methods of sugar manufacture and the imparting of information and advice regarding agricultural matters to the public. This last portion of the Agricultural Chemist's work is said to be steadily increasing, thus indicating a gradual awakening on the part of those engaged in agriculture to the advantages of expert guidance and scientific knowledge.

3. An Agricultural Farm at Hebbal in close proximity to Bangalore was opened during the year, and the necessary buildings are approaching completion. The Agricultural Chemist has made arrangements to therein conduct experiments on a more extensive scale for the purpose of studying the various factors upon which agricultural produce depends, with special reference to the influence exerted by the qualities of the soil, manures, agricultural implements, the mode in which the soil is prepared for agricultural operations and the most advantageous methods of realizing the produce. It is too sanguine to expect valuable results within a short period of time; for the conditions of experiments shall have to be varied as much as possible and the results tested by an extensive series of observations with a view to lessening the influence of unknown causes which constantly vitiate the conclusions arrived at. The Government believe that if the continuity of such experiments is kept in view and careful tabulation of the results made, the Agricultural Chemist will be able to make important contributions to agricultural knowledge.

4. For the purpose of obtaining a greater uniformity in the conditions under which agricultural experiments are carried on, a pot-culture house has been constructed. This is said to be the first contrivance of the kind on an improved scale in India, and Government trust that with the facilities now available, progress in agricultural investigation will be more marked in future.

5. As the sugar locally produced, in spite of the exceptional richness of the sugar-cane used in its manufacture, is not able to maintain its position in the market in competition with imported sugar, the Agricultural Chemist has been devoting special attention to the improvement of the industry. As its unfavourable position is due to defective methods of production, Government have read with great interest the elaborate experiments conducted by the Agricultural Chemist as to the most suitable time for cutting the sugar-cane, the interval within which it should be milled, the boiling and treatment of the juice and the best way of clarifying it. There is no doubt that the cost of production will be materially reduced if the waste of a large quantity of the juice which remains unextracted owing to the crude nature of the mills employed, can be prevented. What is, therefore, urgently required is a cheap and efficient mill. The majority of the consumers being satisfied with jaggory, it is doubtful if the practice of each producer converting the sugar-cane raised by him into jaggory will decrease to any material extent. The use of large mills will be confined, at any rate for some time to come, to such wealthy producers and manufacturers as may carry on the operations on a large scale. The enterprise of the Inamdar of Oorgally, however, who has obtained a loan of Rs. 2,500 from Government to get an improved sugar-cane mill, is commendable, and the Government trust that his example will be widely followed, when the undoubted advantages of adopting improved machinery become manifest by the success of the new mill. The Agricultural Chemist has collected information of great commercial value, and Government hope that the sugar industry will materially benefit by it. It will be useful if this information is embodied in a bulletin and issued for the information of the public with Kannada translation.

6. The experiments conducted by individual planters as to the value of manures in the production of coffee have not led to any conclusive results. Government have recently assisted the planters of the Hassan and Kadur Districts in acquiring suitable lands for a coffee experimental farm in the Belur Taluk on favourable terms, and Government trust that the extended observations to be carried on therein will throw more light on the subject and serve to minimise the cost of production either by demonstrating the inutility of excessive manuring or the precise method of increasing the output. Considering the state of the coffee market, Government agree that anything calculated to help planters to increase their profit, will be of great value to a somewhat languishing industry, and Government desire Dr. Lehmann to heartily co-operate with them in carrying on their experiments.

7. The report contains a great deal of useful information as to the composition of manures and Government note with satisfaction the increasing tendency to obtain guarantees of composition both on the part of merchants and agriculturists. The special attention which has been

paid by the Agricultural Chemist to the possibility of using, as manure, some of the waste products in sugar and other manufactories, and the processes to which they should be subjected beforehand, will, it is hoped, lead to results of considerable commercial and agricultural value. Government would be glad to know the results of the experiments concerning the Lantana ash. In the possibility of its use as a manure lies that of effectually overcoming the noxious effects of the growth of Lantana.

8. It is gratifying to note that the analyses of famine foods are being systematically conducted. A list of the sample of famine foods analysed during the year would have been useful, had it been furnished.

9. The Government of India have sanctioned the appointment of Mr. Coleman as Entomologist and Mycologist to investigate insect pests and fungoid disease. He is now undergoing a post-graduate course to qualify himself specially for the work he will be required to do in the State and is expected to join in 1907. Two new Probationary Chemists out of the candidates trained by the Agricultural Chemist were appointed during the year and two more will be selected next year. The Agricultural Chemist has now a full complement of Assistants with whose assistance he should be able not only to carry out experiments on a more comprehensive scale, but tour about more frequently for studying local conditions of agriculture and advising and influencing the agricultural classes in a greater measure.

10. It is desirable to publish, in future, the Kannada translation of the report along with the English version, so that the results achieved during the year may be known as early as possible before the commencement of the next agricultural season. As the work can be completed during the period intervening the receipt of the English report and its review by the Government, the Agricultural Chemist will make proper arrangements for the purpose in future.

SIXTH ANNUAL REPORT OF THE AGRICULTURAL CHEMIST FOR THE YEAR 1904-05.

PART I.

1. This part of the report which treats of the general working of the Department is not intended for distribution. Part II contains all that is of general interest to the agriculturists of the State.

2. Four of the most important items to be recorded in this year's report are the acquisition of about thirty acres of land at Hebbal to be used for an experimental farm, the appointment of Mr. Leslie C. Coleman to the post of Mycologist and Entomologist, the preparation by very simple methods of an excellent sample of raw sugar, and the erection of a pot-culture house in the Laboratory compound.

3. *Experimental Farm.*—The lands of the Experimental Farm have been laid out into plots of one-tenth acre each and a test crop is being grown on them to record the degree of uniformity (or lack of uniformity) existing between the different lots. The details are given in the second part of this report.

4. *Staff.*—The Agricultural Chemist returned from leave on October 16th, 1904, and took over charge of his Department from Mr. Wetherell after the Dasara holidays. Mr. Leslie C. Coleman, B.A., Gold Medalist of the University of Toronto for the year 1904, has been appointed Mycologist and Entomologist to the Government of His Highness the Maharaja of Mysore in this Department. After one year's post-graduate work in Toronto, he worked for five months in the laboratories of the Department of Agriculture at Washington, and after studying in various laboratories in Europe and the Imperial Department of Agriculture at Pusa is expected to take up his work in Mysore in the early part of the year 1907. The scholars in Analytical Chemistry finished their course of training on the 30th of June 1905, and two of them, Mr. Narasimhaiengar, B.A., and Mr. Sampataiengar, passed the prescribed examinations at the close of the course and were appointed Probationary Assistant Chemists. The third scholar, Mr. Seetaramiah, B.A., failed and reverted to the Educational Department. D. G. Ramachandra Rao, who had been sent for a course of instruction to the Bombay Experimental Farms, has been appointed Superintendent of the Experimental Farm at Hebbal.

5. *Experiments in the Laboratory compound.*—The experiments in the Laboratory compound were very similar to those of last year, though somewhat more valuable. Experiments to test the after-effect of manures gave no indications that any of the manures applied last year had had any effect on this year's crop. Regarding cultivation, the improved ploughs and deep digging again showed beneficial results. Ground-nuts were badly diseased and gave poor returns. Sugar-cane gave very promising returns for a ratoon crop.

6. *Coffee experiments.*—The experiments on Mr. Denne's and Mr. Harris's experimental fields of coffee were continued and confirmed previous results, viz., that for some reason or other the fertilizers applied did not act.

7. *Pot-culture house.*—A pot-culture house, which is so very important when investigating problems in agriculture, is in course of erection.

8. *Out-buildings.*—These and the Laboratory compound wall have been practically completed.

9. *Sugar-boiling experiments.*—The attempts made thus far to make centrifugalled sugar instead of jaggory have been very successful indeed, raw sugar of the very best quality having been produced. It is now highly desirable to make experiments on a larger scale with larger machinery. Experiments regarding the effect of lime on the color of jaggory indicate that liming to a slight alkaline reaction *improves* instead of *spoils* the color of jaggory; while if limed short of this point, an increase of lime darkens the jaggory produced.

10. *Analyses.*—The analytical work consisted in 17 samples of fertilizers; 131 samples of sugar, massecuite, etc., 22 samples of coffee; and 83 other agricultural samples principally famine foods. Two of the Assistants were engaged exclusively on work for the Geological Department; of these Mr. Venkata Rao, B.A., devoted practically all his time to gold analyses. The analyses done for the Geological Department consisted of 32 complete gold analyses, 86 assays of gold and silver, and 11 analyses of rocks and minerals. The principal part of the analyses of agricultural samples are contained in Part II of this report. The analyses done for the Geological Department will be published, if published at all, by the Geological Department.

11. *Correspondence.*—The correspondence which consisted principally in the answering of questions on agricultural problems is increasing and requires a very large portion of the time of the Agricultural Chemist. Nine hundred and thirty-seven letters were received and nine hundred and forty-three were sent out. With this correspondence and the other clerical work required in this Department the clerks are often overcrowded with work and frequently the replies to questions are delayed much longer than should be in an office of this kind. Another item occupying considerable time is the answering of questions set by persons seeking information in person.

12. *Tour to Pusa.*—In December 1904, the Agricultural Chemist started on a tour with the principal object of attending the first meeting of the Board of Agriculture at Pusa. On his way he visited the chemical laboratory connected with Messrs. W. Coen & Co.'s Manure Works at Hubli. This laboratory was built at the suggestion of the Agricultural Chemist and fitted up in consultation with him. Mr. W. Coen, senior member of the firm, had received a short course of training in Nitrogen determination in this laboratory, and the object in visiting the laboratory at Hubli was to see that all was in proper working order and to test the apparatus. The Exhibition at Bombay was visited especially with the object of seeing what agricultural machinery and implements were exhibited. And if that exhibition gives any idea of the implements actually in use or likely to be used soon in Bombay, that Presidency is much further advanced in matters of agricultural implements than I had expected. At Pusa many subjects of interest to agriculture were discussed, but an advantage even greater than this was the meeting and the coming into closer touch with the various men interested in agricultural investigations. Outside of the Pusa staff I was interested in and benefited most by the meeting with Dr. Mann, the Scientific Officer of the Indian Tea Association. On the meetings at Pusa and on the Institute itself a separate report has already been submitted with my letter No. 554, dated 10th February 1905, to the Secretary to the Government of His Highness the Maharaja of Mysore. The same report also contains a statement of the impression received at the Samalkot Sugar-cane Experimental Farm.

13. The only publication issued during the year is the Annual Report of the previous year's work; and of that the Kanarese translation is far from being completed. The translation is being made by the Superintendent of the Experimental Farm who should spend *all* his time on the Farm. It is hoped, however, that this work can in future be done either in the office or by some other Agricultural Assistant.

14. All the Assistants and the subordinates have worked faithfully and well, and my thanks are due to each and every one of them for the cheerful way in which they have done all the work entrusted to them.

PART II.

15. This is the only part of the report intended for distribution. Part I does not contain information of general interest to the agriculturists of Mysore.

EXPERIMENTAL FARM.

16. Some years ago lands were selected for an Experimental Farm by the Agricultural Chemist, and were visited by and approved of at the time by Sir P. N. Krishna Murti and Mr. Mollison. But at the time the plan to open an Experimental Farm fell through. These lands were acquired and handed over to this Department in January 1905. They consist of twenty-one acres and nineteen guntas of dry and garden lands and nine acres and twenty-seven guntas of wet land under the Hebbal tank five miles from Bangalore. The dry land which is almost adjoining the wet area, is lying between the Yelahanka road and the Military reserve just south of the Hebbal tank. It is a ferruginous loam representing, as far as can be judged by the eye, fairly well the average soil of the State. The soil is as uniform as could be found in the neighbourhood of Bangalore, but gradually changes a little from the road to the Military reserve, and from the southern boundary to the tank. It slopes gradually and uniformly towards the tank. Enclosed is a map showing the original fields and the plots as laid out at present. These plots are one-tenth of an acre each, being fifty links wide and two hundred links long. The land was previously owned by several raiyats who have

naturally treated it somewhat differently in regard to manuring and cultivation. The various pieces used as garden lands are of course in much better condition than those used for ordinary dry crops. This causes considerable temporary differences to exist in some of the plots in addition to probably slight permanent differences. These temporary differences, it is hoped, will disappear in the course of a year or two. If any permanent differences exist, they will have to be compensated for by a judicious disposition of the duplicate plots. To get a clear insight into the differences actually existing between the various plots intended for experiments, all the plots were treated exactly alike this year. The crop growing on them is ragi. The grain and straw produced by each plot will of course be weighed separately. And if the results are sufficiently uniform over a sufficiently large part of the area, that area will be used for experiments next year. The remainder will be again placed under uniform treatment. Just what the nature of the experiments will be cannot of course be determined until after the present test crop has been reaped and weighed.

17. A part of the dry lands nearest the tank, which is not quite as uniform as the remainder, is already excluded from the experimental ground proper. On part of this, various garden and field crops have been grown this year. The seeds of most of these were kindly sent by the Bombay Department of Agriculture from the Experimental Farm at Manjri. These crops are doing well on the whole; though some of them, notably one otherwise very promising variety of brinjals, have suffered very much from disease. On an apparently even part of this non-experimental area ragi was sown at various times to get a general impression of the effect the time of sowing has on this crop. In this experiment the rain is of course the most important factor. Sometimes there is enough rain to enable ploughing, but the soil gets too dry by the time the ploughing is finished to permit the grain to germinate. After the next rain some time is again required before the sowing is completed. To test if it would be possible to sow as soon as the ploughing is finished, even if the ground is too dry, and thus permit the crop to get the full benefit of the next shower of rain, was one of the objects of these experiments. In addition to the danger that the seed may germinate and afterwards die for want of moisture, there is the draw-back that if the seed does not germinate, it may be eaten by ants or some other pest. To overcome this the grain was covered by a very thin film of kerosene oil. A little of this oil was poured on a heap of seed grain and this was thoroughly stirred so that each grain although appearing dry had a distinct smell of kerosene oil. To test if this thin coating had any injurious effect on the germination or the future growth of the plants a second plot was sown at the same time with seed not treated in this way. Within a week after the first set of two plots had been sown several good showers of rain fell. The grain treated with kerosene oil came up quite as well as that without it, and as far as appearances go at present the crop on the later sown plots is not likely to be as heavy as on those sown earlier. Next year these experiments will be begun earlier.

18. The so-called experimental area, that on which it is hoped to conduct comparative experiments hereafter, was ploughed twice with a one-horse Canadian plough, and as it was fairly weedy in parts, a Planet Junior horse hoe was used instead of a harrow before seeding. No manure of any kind was applied. But the crop looks very much better than that on the adjoining field which received a dressing of cattle manure and was cultivated in the usual way. To what this very considerable difference is due, it is at present impossible to say.

19. The wet area was also divided into one-tenth acre plots. One range is at a considerably higher level than the remainder and on it the soil is decidedly lighter, being a ferruginous loam not much heavier (or stiffer) than that of the dry area. On this range it is intended to conduct experiments with sugar-cane. The remaining ranges are a clay loam gradually becoming a little heavier towards the north-east. The land is the most south-westerly block under the Hebbal tank and slopes gradually towards the north-eastern corner. Each range and each plot can be irrigated and drained independently of the other. The plots are separated by bunds three feet wide and the top of these bunds serves, as a path. The entire so-called experimental area has been put under the same variety of paddy to test the uniformity of the soil in the same way as has been done for the dry lands with ragi. The accompanying map gives the original sub-divisions of these lands and the present experimental plots. The original differences in levels are also given. Care has been taken to have the present boundaries of the plots coincide as nearly as possible with the boundaries of the former fields, especially where any marked difference existed in the levels of the old fields. Still some levelling had to be done, and the effect of this is quite distinctly visible in the crop growing at present. But with the exception of a little filling in, which was necessary in the future sugar-cane range, no earth has been removed from or added to any of the plots. The levelling has been entirely in the plot itself, in fact in each individual one-third or half section of the plot (for all the plots are divided into two or three sections to reduce the amount of levelling required). And the poorer stand due to the removal of part of the surface soil in the higher part of the section is compensated for, to a large extent at least, by the better stand of paddy in the part where this soil has been added. The paddy was all grown in seed beds outside the experimental area and transplanted. Thus far, it has been practically free from disease or insect pests and promises to crop well. Of course no manure of any kind has been used.

20. Temporary buildings have been erected on the Farm which will, it is hoped, last until the permanent buildings which have been sanctioned are built. They are necessarily very small. A rain-gauge, kindly supplied by the Meteorological Department, has been set up, and some other Meteorological instruments such as sunshine recorder, will, it is hoped, be added in time.

LABORATORY COMPOUND.

Ragi.

21. *Ploughing*.—The experiments with ragi were this year a little more satisfactory than last year. Still the results require to be taken with almost as much reservation as was necessary last year. The crop is better all round, on the manured as well as the unmanured plots. On the unmanured soil the difference in favor of the plot cultivated with the Canadian plough has largely disappeared when compared with the plots ploughed with the native implement. But on the land manured with cattle manure (on which practically no difference existed last year) there is this year a decided difference in favor of the Canadian implement. The plots which received cattle manure and were cultivated with the Mysore plough gave at the rate of 975 lbs. of grain per acre, those ploughed with the Canadian implement gave at the rate of 1,437 lbs. of grain per acre.

22. *Manuring*.—Last year, the cattle manure plots gave at the rate of only thirty-one and one-third pounds of grain for every one hundred lbs. produced by the commercial fertilizer plots. This year, they gave relatively much better returns, producing at the rate of eighty-six and a half lbs. of grain for one hundred lbs. grown on the commercial fertilizer plots, but the amount of commercial fertilizer used contained more plant food than the cattle manure. Contrary to expectations there was no indication that any of the manures applied last year had any effect on this year's crop, not even the cattle manure. But owing to the uneven nature of the soil, it is impossible to detect slight improvements in crop due to the after-effect of the manures used last year even if they existed. The already small plots manured last year were divided, one-half remained unmanured, the other half was manured as in the previous year. If the soil had been uniform, any after-effect of last year's manures should have been noticed when comparing these half plots which had received manure last year, but not this year with the plots which had received no manure at all. But while two unmanured plots gave exactly the same amount of grain (at the rate of 1,225 lbs. per acre) the other two plots gave decidedly less (357 lbs. and 712 lbs). With such large difference in duplicate plots it is out of the question to attach much weight to any of the results. The average of these four plots is 879 lbs. of grain per acre, that of the six plots manured last year but not this year is just 800. No after-effect of the last year's manures can therefore be deducted. The average of the corresponding manured plots is, however, 1,393 lbs. per acre.

23. One plot which received a double quantity of commercial fertilizer both last year and this year, showed that too much manure had been applied, as it produced a very heavy crop of straw (nearly five and a half tons per acre) and practically no grain (595 lbs. per acre). The average of the plots dug deep (about two feet) was:—unmanured 1,212 lbs. per acre, manured with commercial fertilizers 1,475 lbs. Apparently ragi favors deep cultivation. But of course all these experiments are only preliminary and conducted on much too small a scale and on too uneven a soil to carry any weight except as indications for future experiments on the Experimental Farm.

24. The maximum crop for the variety of ragi (Halubile) used in this experiments appears for this season, on this soil, to have been about one ton of grain (2,225 lbs.) and a little over five tons of straw (11,375 lbs.) per acre.

25. The variety giving best returns this year was Balepatte, which produced at the rate of about one and two-thirds tons (3,750 lbs.) per acre of grain and nearly six and one-fourth tons (13,800 lbs.) of straw. This variety stood second last year, and the variety which headed the list last year, Jenumuddina ragi, stood third this year. But here too the plots are too small, and possibly too uneven, to draw any reliable conclusions. The crops are, however, very heavy for all the varieties. There is also an indication that the Madayangiri and the Dodda varieties would do relatively better when treated not as liberally as these plots have been treated.

26. *Sweet potatoes*.—The sweet potatoes did not do quite as well as in the previous year. The new Jersey gave exactly the same yield as the year before (at the rate of 14,175 lbs. per acre) and headed the list instead of being second, as last year. The Virginia and the Nansimond gave at the rate of 8,600 lbs. and 8,760 lbs. per acre this year.

27. *Ground-nuts*.—The ground-nuts were all badly diseased this year. The Virginia instead of heading the list as it did last year with 10,100 lbs. per acre came last with only 3,550 lbs. per acre. The Japanese gave 4,100 lbs. instead of 8,750 last year, and the Pondicherry, 4,550 instead of 6,925 last year. The relative positions are therefore exactly reverse to those of the previous year. But of course, when diseased as they were this time, the returns would be of little value even if the soil had been absolutely uniform. The same seed will be sown next year, but that used for one-half the plot will be treated for five minutes with a one per cent solution of copper sulphate to see if such treatment will reduce the disease.

28. *Buildings*.—The out-buildings containing store rooms, implement rooms, godowns for two servants, and a potting room for the pot-culture house are practically completed. A pot-culture house is in course of construction. This is an iron structure which is to be covered on all sides with wire netting

Pot-culture house.

to keep out birds and other small animals which cannot pass through a half-inch mesh. In this pot-culture house will be a light railway track on which small cars can be run. On these cars will be the pots in which the various experiments are made. They are placed on cars so that at times of heavy rains or winds they can be easily run under shelter and at times when there is no danger from birds or other small animals they can be run out into an open yard if such should be desirable. Pot-cultures are quite a new line of experiments for India, or, as far as I know, any other tropical country. Dr. Leather has tried them on a small scale at Dehra Dun last year without a railway track and cars, but found that these appliances are necessary for satisfactory work. It is, at present, impossible to say what kind of shelter will be required here. In Europe and America these shelters are constructed of glass. But it appears likely that such would not answer under a tropical sun. As an experiment, the potting room in the new out-buildings will be used, to begin with, as a shelter for the plants. By replacing some of the ordinary tiles in the roof of this potting room by glass ones it may be possible to get enough light without getting too much heat. After finding out what is likely to answer for this purpose in this climate, it is hoped that the necessary changes or additions can be easily made.

29. In pot-cultures, the soil is all thoroughly mixed before being filled into the pots and thus the inaccuracies arising from an uneven soil are to a very large extent done away with. The other advantages and disadvantages will be explained after the completion of the house and after some work has been actually done in it.

30. *Compound wall.*—The compound wall protecting the small experimental plots in the Laboratory compound is also practically completed.

SUGAR AND SUGAR-CANE.

31. The experiments conducted with sugar-cane were this year confined almost exclusively to the manufacturing side of the sugar industry. Chief of these were the manufacture of raw centrifugal sugar, the determination of the amount of juice left in the cane when milled, as carefully as possible, with a local, three roller, iron bullock mill, and determining the extent of loss sustained by keeping the juice after being milled or the cane after being cut.

32. *Ratoon crop.*—The cane for these experiments was grown in the laboratory compound from the stubble of last year's crop. It is therefore a ratoon crop. The reasons for doing this were many; one of the chief of these was to see how a ratoon crop would grow here, and to find out if there were any very sound or strong reasons for not following in India the general practice of Cuba and other cane-sugar-producing countries. Some of the other reasons were—

- (a) to get, if possible, the next crop in a little over a year's time, the variety grown was, as stated last year, one of the so-called eighteen months varieties;
- (b) to avoid the necessity of planting the cane without the supervision of the Agricultural Chemist who was on leave, and incidentally
- (c) to save the expense of planting.

The previous crop was cut in the latter part of March 1904. The ground was thoroughly dug and manured as in the previous year. Surface irrigation was given whenever necessary. The ratoon crop came up well. As far as could be judged by the eye, there were a larger number of stalks but shorter, thinner and shorter jointed. The white ants did quite as much, if not more, damage than in the previous year. The cane was wrapped as had been done the year before, but notwithstanding this and the fact that the canes were shorter, it did not appear to stand as erect at the time of cutting as the crop before it had done. But as one season's crop cannot be closely compared with an other produced the year before or the year after, these differences as well as the difference in yield can only be taken as indications. They are not experiments and only serve as indications for future experiments. Moreover actual field experiments, no matter how carefully conducted have to be repeated a large number of times before the results obtained can be considered as reliable. When stating, therefore, that this year's ratoon crop was almost exactly three-fourths of the crop produced last year, this does not imply that on this identical piece of ground this particular variety of cane will give as a first ratoon crop three-fourths of the crop it would have given if it had been planted out that season. But it indicated that it is well worth trying experiments with ratoon crops, especially as in this case the difference in the weight of the cane is to a large extent compensated for by the difference in time the "crop" has been occupying the land. The amount of juice obtained from one hundred lbs. of cane was very little more in 1903-04, than it was this year from the ratoon cane; being 67.64 lbs. in 1903-04 and 65.3 lbs. this year from the ratoon crop. The difference in the two years' crops is also influenced to some extent by the fact that this year about one-fourth of the field was purposely allowed to get over-ripe to see what influence this would have upon the composition of the cane and the quantity of the jaggery (or the sugar) boiled from the juice. During these three months probably very little growth took place, but a lot of the canes were destroyed by white ants, and possibly also by rats.

33. *Ripening of Cane.*—To find out when the cane was ready to be cut, and, more particularly, to study the difference in the composition of the cane during the latter stages of its growth, six average canes were cut at different times and analysed. The first sample was taken on January 22nd. To form some idea of the differences which existed in the more mature and the younger canes on the same plot on the same date, three samples of six canes each were taken on that day. One of these samples represented, as nearly as possible, the average of the plot; another, canes which were slightly below the average, and the third was composed of six canes above the average. The composition of the juice of these three samples of cane and that of the juice of the succeeding samples is given, together with the date on which these samples were taken, in the following table No. I:—

TABLE No. I.

Showing composition of juice of canes at various stages of growth.
Ratoon cane—previous crop cut in April 1904.

No.	Date of cutting			Glucose per cent	Sucrose per cent	Total solids per cent	Remarks
270	22	XI	04	3.04	9.5	12.8	From six canes below the average.
269		Do		2.47	10.1	13.4	From six canes of the average.
271		Do		2.17	11.75	14.6	From six canes above the average.
272	6	XII	04	1.33	14.1	16.0	From six average cane.
273	22	XII	04	1.33	14.95	17.0	Do
274	4	I	05	1.16	16.5	18.3	Do

362	9	V	05	.37	...	...	
363	19	V	05	.32	17.5	18.0	
364	26	V	05	.47	17.5	18.8	
365	3	VI	05	.31	16.0	17.0	
366	10	VI	05	1.00	14.9	16.2	
367	17	VI	05	.65	15.6	16.8	
368	24	VI	05	.55	16.0	17.3	
369	1	VII	05	.56	16.0	17.6	

In the above table samples up to No. 280, inclusive, were taken as described above. These show very clearly the decrease in the percentage of glucose and the increase in total solids and sucrose, or cane sugar, in the process of ripening. (Glucose or reducing sugar is a name given to a group of substances which, if present in jaggory, cause it to run or sweat in damp weather in proportion to the amount in which they are present, and are very objectionable from a sugar refiner's point of view. Sucrose, or cane-sugar, is the principal substance next to water found in the juice of sugar-cane. Pure white refined loaf sugar contains practically nothing but this kind of sugar. It is the only substance in sugar-cane which is really wanted. The more of this and the less of every other substance the sugar-cane contains, the better it is, other things being equal, for sugar-making. The total solids mentioned above include everything but the water found in the sugar-cane juice. The nearer the figure given in this column agrees with the figure given in the column headed Sucrose the better). The uniformity of the decrease of glucose and increase of sucrose and total solids as shown in the table above is surprising, considering the difficulties there are in taking representative samples. But when comparing these figures with samples Nos. 281, 302 and 318, which were taken when milling the entire crop, it is evident that the samples No. 280 and those preceding it, though very well taken, are a little

above the average. Samples No. 363 and those following it, were taken two months or more after No. 280 (which is the best sample in the list). These samples are more striking in their decrease in cane-sugar and total solids than in their increase in glucose. This is especially worthy of consideration when noting the composition of the juice extracted when the entire crop of the cane was being harvested. But to this point I shall have to refer again later on. The only sample in which there appears to be a considerable increase in the Glucose is No. 366. As it contains one per cent of this substance or nearly twice as much as any of the other samples under consideration, there is evidently something wrong here. It may have been that this sample was not as promptly milled after the cane was cut as the other samples were. But this is a mere conjecture which is based on the results of some other work. There is no direct indication of any kind to prove that this conjecture is correct.

34. *Boiling of jaggory*.—The chief object of this year's sugar-cane experiments was, as stated before, to produce a raw centrifugal sugar. But as a hand centrifugal is very hard to work and as the centrifugal used this year was made for general laboratory work and not specially for sugar-making, the larger part of the juice was again boiled to jaggory. In the tables given below, the composition of the juice is given first and below it the composition of the jaggory produced. All the liming done was tested with

Liming.

red litmus paper. In the samples marked "fully" limed, slaked lime of the consistency of cream or very thin gruel (canji) was added to the entire mass of the juice intended to be boiled into jaggory. After a little of this slaked lime had been added, the juice was thoroughly stirred and a piece of red litmus paper held into the juice for nearly half a minute. If no change took place in the colour of the litmus paper other than that which would be produced if it were dipped into unlimed juice, more lime was added, again stirred thoroughly and tested with the litmus paper. This was repeated until a faint but *distinct* change of colour could be seen in the colour of the litmus paper by the red having changed into a faint blue. The slight difference in the appearance of the litmus paper caused by the colouring matter in the juice must not be mistaken for this change of colour of the litmus itself when juice is sufficiently limed. To avoid such a mistake, it is necessary to learn by experience the effect produced by dipping a piece of red litmus paper into unlimed juice and to learn to distinguish this from the change produced when just enough lime has been added. Care must also be taken that the litmus paper is fresh and not already partially discoloured by having come into contact with anything containing alkali before use. It must not have the slightest tinge of blue but be quite decidedly red. In the samples marked "half" lime, all the juice required for the boiling was thoroughly mixed, half this quantity was poured into the pan before liming, the remaining half was limed as described for full liming and afterwards also poured into the pan and mixed with the portion previously in the pan before boiling. "Three-quarter" limed means that one-quarter of the juice was poured into the pan and the remaining three-quarters limed as above; and in those marked "quarter" limed, only one-fourth of the total juice required for boiling was limed as already described.

35. *Pan used*.—To prevent the discolouration of the first samples of jaggory from the rust of an iron pan, a copper pan was used this year. It had the ordinary shape used by the raiyats of Mysore and was six feet in diameter at the top, three and a half feet at the bottom and thirteen inches deep.

36. *Furnace*.—The furnace was in the corner of one of the rooms in the new out-buildings of the Laboratory and had proper fire bars, furnace doors, ash pit and chimney. But has no experiments were made in regard to the fuel required, these and some other improvements need not be considered here.

37. *Filtering*.—Before liming, all the juice was passed through a piece of ordinary "long cloth" placed in a basket of wire netting to separate from it all little bits of cane and other suspended matter. And just before the juice came to a boil the scum which had risen to the surface and is technically known as the "blanket" was skimmed off by means of a large copper spoon with a long handle specially made for the purpose. This scum was put in another basket of wire netting lined on the inside with a piece of "long cloth." Through this the juice gradually dripped out and the bulk of the scum remained behind. The skimming was continued from time to time until the juice had been boiled down to nearly half its bulk. On the average 1.82 oz. of scum were removed for each 100 lbs. of juice boiled and 3.12 oz. of foreign matter were removed by straining the juice before liming for the same quantity of juice. On the whole this amounts to very nearly one and a half pounds of foreign matter, or dirt, removed for every 100 lbs. of jaggory boiled, for it took between four and five pounds of juice to produce one pound of jaggory. Of course if the skimmings are not placed on some suitable filter such as a piece of "long cloth" and the juice, which is inevitably removed when skimming, is not saved, the loss will be very great. On the other hand, if an attempt is made to separate the scum from the juice removed with it by either using, as it generally done, a perforated skimmer, or by putting the skimmings into an ordinary basket and letting that which passes through the meshes of the basket run back into the pan, the greater part of the scum is simply broken up and returned to the juice and the attempt to remove the scum has very little practical result. The filter cloths must of course be carefully washed and dried each time they have been used, and on the score of cleanliness no wooden baskets should be used.

Note: (1) 25 Grams of jaggory dissolved in 500 C. C. of water. The figures in column 10 indicate the depth in millimetres of columns of these solutions having the same colour.
(2) The shade of colour was determined in a 2" cell.

38. *Glucose in juice.*—The glucose in the juice is higher than was expected when starting the milling of the cane. For as sample No. 280, taken before milling began, contained less than half per cent, it was hoped that, as time went on, the glucose would drop still lower than that figure, as it actually did in some cases, but the average is decidedly above half per cent. Why this is the case requires further inquiry. It may be that the canes were not milled as soon as should have been done after being cut. It may be that canes which had been killed by white ants but still looked fresh were not carefully enough excluded, or it may be due to some other unknown or unsuspected cause.

39. *Glucose formed during boiling.*—The amount of glucose formed during boiling is also peculiar and inexplicable at present. When leaving out samples Nos. 399 and those following it which (as they were over-ripe, as considerable glucose formed during boiling and as they were nearly all fully limed) it would not be right to include, and No. 314 which is also evidently abnormal, the average per cent of glucose formed during boiling in the samples fully limed was 1.17%. In the three-quarter limed samples 1.37% of glucose was formed in this way, and in the half-limed sample and quarter-limed samples 2.02% and 4.09%, respectively, of glucose were formed in this way. But as the amount of glucose formed during boiling varied in the fully limed samples from nothing to 3.36%, it is evident that some other causes than the extent of liming were at work and that these figures do not indicate simply differences due to liming. The sample in which 3.36% of glucose was formed during boiling was badly charred; but as in the only other sample which was badly charred only 0.3% of glucose was formed in this way, the charring cannot be the only or chief cause of this glucose formation. If the fact that part of the cane used for this jaggory No. 317 had been cut three days before being milled had any thing to do with this abnormal glucose formation, I cannot say. But I shall make experiments in that direction as soon as circumstances permit.

40. *Colour.*—In order to be able to give a numerical value to the depth of colour of the various jaggories, it was decided to dissolve 50 grams (nearly $4\frac{1}{2}$ tolas) of the jaggory in one liter (a little less than a quarter) of water. These solutions were filtered to remove all suspended matter and filled into glass tubes to such a height that the colours in all the tubes were of the same depth. The lighter the colour of the jaggory the thicker of course the layer of this solution had to be to match the depth of the colour of the other solutions of jaggory. The thickness of these layers or the height to which these tubes had to be filled to match each other in colours, were measured and are given in column No. 11 in the tables No. II and No. III above. The higher this number the lighter the colour of jaggory. A popular belief is that jaggories produced from juices which are "heavily" limed are darker, in proportion to the amount of lime added to the juice, than jaggories boiled from juice to which less lime has been added. When studying this problem we must exclude jaggories Nos. 299 and 317 as these were badly charred when boiled and had therefore a much darker colour than would be due to the lime added to the juice. Possibly some of the other samples of jaggory were also slightly charred, and this may account for the comparatively great variations which exist between jaggories apparently treated alike; but if any of the others have been charred, it was not enough to be easily detected. The average of the depth of colours of the jaggories "fully" limed is 81, and leaving out sample No. 314 which was very light in colour but which behaved peculiarly as far as the glucose is concerned, the average is still very nearly 80. The average of the three-quarter limed jaggory is 61 and the half-limed lot had an average of 71. The "fully" and "overlimed" jaggories (for the significance of these terms refer to page 9) were therefore those having the lightest colour, while those limed nearly but not quite to neutrality (the three-quarter limed lot) were the darkest and the half-limed lots were intermediate to the other two. The quarter-limed jaggory is left out of consideration as there was only one of these. These figures confirm last year's impressions as given in para 24, page 8, of the 5th Annual Report of this Department. The colour of the jaggory appears to behave very much in the same way as the colour of the juice of sugar-cane. The more lime is added to this the darker it gets until it is fully neutralised and becomes alkaline in reaction when the colour becomes very much lighter than it was before reaching neutrality. The raiyats who do not lime their juice sufficiently are therefore right in their opinion that the jaggory becomes darker in colour the more lime is added. *But if they add all the lime which is really required, the jaggory will have a brighter colour than that which is now produced, and in addition it will be of much better quality. That is if the experiments made in the Laboratory compound which has a very light red coloured soil, apply to the State as a whole, and I have no reason to believe that they do not do so.*

41. In columns 9 and 10 of the above table are given the results obtained with the Lovibond Tintometer on the solutions mentioned above, viz., 50 grams in one liter. A two-inch cell was used. But these figures, though very valuable in giving a permanent record of the actual colours, are not of much interest except to those using this particular instrument. And as every one using that instrument will understand them without further explanation, no further comments are needed.

SUGARS.

42. A large and greatly increasing quantity of sugar is being imported to India every year. In 1893-94 this quantity was a little over 106,000 tons. Five years later the import had nearly doubled, being nearly 204,000 tons; and last year it was a little over 290,000 tons, which is an increase of over 42% in these last five years. This import amounts to nearly 2 lbs.

per head of population, and must represent a very considerable part of the total sugar consumption of India. These imports now come chiefly from Mauritius and Java, and less than 27,000 tons came last year from beet-sugar-producing countries. That such a large and increasing import of sugar takes place shows conclusively that there is something radically wrong with the Indian sugar industry. As far as Mysore is concerned, this "something" is certainly not to be found in the quality of the cane. For I know of no other country in the world in which sugar-cane is grown which contains 20 and 21% of sucrose as it does in Mysore at times. The quantity of cane per acre should of course be improved. But probably there is no part of the industry which requires greater improvement than the manufacturing side. The milling of the cane, the liming, the removal of scum when boiling and the guarding against loss from fermentation of the juice are factors which require careful attention. But as the sugar imported is either refined or goes to the Indian refineries to be refined before being placed on the retail market, it is evident that in order to compete with this imported sugar we must treat our cane juice in such a way as to produce in the most economic way high grades of sugar. And we are unable to do this as long as we produce jaggory first and send that to the factories to be refined. The fuel used to boil down the juice to jaggory is practically wasted, and the char filters and other parts of the refineries are given infinitely more work than need be if the molasses is not removed from the sugar before the latter is refined. Moreover the best grades of raw, centrifugalled sugar manufactured in the districts could be of a sufficiently high quality to be able to replace directly a part of the imported sugar. Jaggory would be unable to do this. As the universal experience is that refined sugars gradually replace the lower grades of sugars in the market, it is self-evident that as long as jaggory continues to be the chief product of the sugar-cane, the sugar industry is bound to decline unless a jaggory can be manufactured which is eminently suited for refining purposes. And as, for the reasons given above, this is not likely to be the case, it is necessary to replace jaggory boiling by more modern methods and to produce as good a quality of raw sugar as the circumstances will permit if the imported sugar is to be replaced in the Indian market by that produced in the country. India is the home of the sugar industry, and when sugar was first imported into Europe it was known by the name of "Indian salt." But the methods which were eminently successful 700 years, or even 150 years ago, cannot compete with modern appliances in an industry in which such advancement has been made as in sugar-boiling. Sugar has dropped very much in price. When first imported in large quantities into Europe it was sold for a price considerably over Re. 1 per pound. In fact only about 100 years ago it was sold, for a short time, for well over Rs. 2 per pound on the continent of Europe; but this excessively high price was due to great restrictions having been placed on trade with sugar in continental Europe. The present comparatively very low price is in a great measure due to better and cheaper methods of production, and in order to compete even in our own markets with countries employing these cheaper and better methods of productions, we must improve our own methods. If their methods are not applicable here we must make our own improvements; but improvements we must make if we want to keep a sugar industry. It is with a view of finding in how far we can adopt some of the improvements made elsewhere, without completely upsetting our existing industry, that the following experiments were made:—

43. The juice was treated exactly as described under the head of jaggory-boiling, but the boiling was not carried on quite as far, being stopped when the condensed juice on cooling formed a mass of about the consistency of thick mud. Experience alone can tell when the boiling has been carried on far enough, but a good jaggory-boiler will very soon learn this. We had not the slightest trouble in this respect. This mass called *Massecuite* was allowed to stand for three or four days, or longer if more convenient to do so. It was then thoroughly mixed, all hard lumps broken up and put into a small centrifugal in which the molasses was separated from the sugar. In the table below are given the composition of the juice and the *Massecuite*, and the sugar and molasses separated from it. The molasses was boiled a second time, and the amount of so-called second sugars separated from this molasses is also given.

TABLE

Serial No.	Substance	Weight of water (lbs.) used per 100 lbs. of sugar for washing in centrifugal	Percentage of sucrose	Percentage of glucose	Percentage of total solids	Moisture

44. *Centrifugal*.—Last year a regular sugar centrifugal 18 inches in diameter, geared by means of cog-wheels to a speed which was supposed sufficient for hand use was used to separate the molasses from the massecuite and produce centrifugal sugar. But the centrifugal was so difficult to turn at a speed approaching that required for sugar work that all attempts to use it proved a failure. This year an American laboratory hand-centrifugal with a 10-inch basket geared so that it could be run at a speed of about 1,500 revolutions was used. The maximum amount of massecuite which could be centrifugalled at one time was about 11 pounds, which gave roughly speaking about 7 pounds of sugar. But the work required to separate this small amount of sugar was so great that only a comparatively small quantity of the juice was boiled into massecuite, the greater part being used for jaggory. This was no doubt partly due to the fact that the centrifugal was not specially made for sugar work. But our experiments so far give little hope that hand centrifugals can be used to advantage in the production of sugar for the market. But the quality of sugar produced and its outturn when compared with jaggory as given in column No. 12 of the above table are very encouraging, indeed, and make it highly desirable to repeat these experiments as soon as possible with a larger plant driven by steam, or an oil-engine where fuel is very difficult to get.

45. The best sample of sugar given in the above table is No. 372. It is an extraordinary fine sample of raw centrifugal sugar and it received no special treatment except that it was washed in the centrifugal with about $7\frac{1}{2}$ per cent of its own weight of water. In other words after all the molasses which could be easily separated by this small centrifugal had been got rid of, a little water was poured into the centrifugal when in motion and this in passing through the sugar removed the greater part of the remaining molasses. After this washing it was allowed to dry six or seven hours, and after that passed through a sieve to separate the larger grains from the smaller ones. This was done to give the sample a more uniform appearance. It was one of the samples sent to the Bellary Exhibition. In this sample there was less than a half per cent of glucose. Sample No. 371 representing the portion which remained on the sieve when preparing the sample No. 372, is of very nearly the same composition though a little darker in colour. But judging from the results of this year's work it is doubtful if the washing of raw sugars in the centrifugal pays.

46. The molasses separated from all the various samples of sugar was mixed together. After standing for over a month, some very fine-grained sugar separated out. This was removed by passing all the molasses through the centrifugal. The sugar obtained in this way is sample No. 393, which contains, as will be seen, a high percentage of glucose, and is somewhat similar to samples Nos. 452-454. The latter are so-called second sugars, that is, they were obtained as stated above by boiling down the molasses a little further and allowing it to stand for several weeks to permit the sugar to crystallise out of the tarry mass. The quantity of molasses was rather too small to permit of easy boiling. The entire mass charred for some unknown reason, and the second sugars produced were very dark on that account. $64\frac{3}{4}$ lbs. of molasses were boiled down to $52\frac{1}{4}$ lbs. second massecuite, in other words, only 19.3 per cent of water were evaporated. On an average 10 lbs. of second massecuite gave 4.83 lbs. of the second sugars. Or nearly 39 per cent of the original molasses was transformed into second sugars. When we add to this the 4 per cent of sugar separated out of the molasses on standing, we find that every 100 lbs. of the original molasses gave 43 lbs. of sugar. This figure forms the basis for calculating the quantity of second sugars entered in column No. 10. The figures in column No. 12 indicate the amount of centrifugal sugars (first and seconds combined) which were obtained from a quantity of juice which would have given 100 lbs of jaggory of the average composition of the jaggories produced this year, the analyses of which are given in Tables No. II and No. III. The remainder has been separated out in the form of molasses. This, as will be seen by referring to No. 456 and No. 457 in the table above, has 27.7 per cent of glucose and only 32 per cent of cane sugar. This is a very satisfactory result as it shows that but little more sugar-cane has passed into the molasses than the glucose contained in it. This is especially satisfactory for a first attempt. But it is to be hoped that the amount of glucose formed during boiling will be materially reduced in future experiments. This hope is justified by the results of the experiments of previous years. On the whole we have every reason to hope that with a comparatively small expenditure in machinery we will be able to very materially improve the sugar industry of Mysore. Whether it will be advisable or necessary to use pans heated by steam instead of by direct firing, future experiments will have to show.

47. *Milling of cane*.—It is of course in the juice of the sugar-cane in which the cane sugar (the substance for which the sugar-cane is cultivated) is found. The solid structures which form the vessels containing the juice are of comparatively little if any commercial value, but are generally used as fuel for boiling down the juice. It is however practically impossible to completely separate the juice from the solid structure called mark. Even the best mills leave a small proportion of the juice with the mark. This mixture of mark and juice left in it after milling is called begasse, or in some countries meggasse. Begasse from the most powerful nine-roller mills still contains about 5 per cent or a little more of the juice. The proportion of the juice left in the Begasse is of course less when the mills are large and the pressure great. But in addition to the greater pressure which can be exerted by large mills, these large nine-roller

mills have the additional advantage that the cane is sprinkled with water between each set of three rollers. The juice being diluted in this way, the portion left in the cane is also diluted and contains less sugar than it otherwise would. The begasse is similar to a sponge soaked in juice of sugar-cane and squeezed dry. The harder it is squeezed the larger the proportion of the juice which will run out. If it is afterwards soaked in water and again squeezed to the same extent, more diluted juice runs out; and if this process is repeated often enough, the sponge will finally be practically free of juice. By this method of sprinkling the cane with water as it passes from one set of rollers to the other much more juice can of course be extracted than without it. But in addition to the size and construction of the mill, the amount of mark the cane contains will materially affect the amount of the juice lost in the begasse. A small sponge will retain a much smaller weight of liquid (or juice) than a larger sponge subjected to the same pressure. Sugar-cane containing little mark is, therefore, other things being equal, more valuable than cane containing much mark; and this must be taken into account when judging the efficiency of a sugar-cane mill.

TABLE No. V.

Showing percentage of juice left in begasse (refuse cane) when milling with ordinary three-roller iron sugar mill.

Serial No. of juice	Weight of cane used, lbs.	Weight of juice obtained, lbs.	Percentage of extraction (1)	Weight of begasse lbs. (2)	Percentage of extraction (4)	Total solids in juice	Moisture in begasse	Percentage of mark (4) in begasse	Percentage of juice left in begasse

(7)									
409	537	340	63.3	189	64.8	15.1	59.3	9.71	26.2

(1) Extraction calculated by dividing the weight of juice by the weight of cane.

(2) Begasse is the refuse cane coming out of the mill.

(3) Extraction calculated by dividing the weight of begasse by the weight of cane. This is not as accurate as the extraction given in column 4 as the begasse loses weight very rapidly owing to the large surface from which the juice can evaporate.

(4) Mark is what remains when *all* the juice is removed from the sugar-cane.

(5) The cane from which juice No. 292 was obtained was very short in the joints. This accounts for the high percentage of mark and the low extraction.

(6) The cane from which the juice No. 313 was obtained was a hard thin variety known as Chinikabbu.

(7) The begasses corresponding with the sample of juice No. 395 and succeeding samples were sampled, weighed, and dried more rapidly than the others, and the figures given in the columns 9 and 10 for these samples are therefore more accurate than the others in the same columns.

48. The mill used in the experiments this year was a locally made three-roller iron mill. The rollers are placed vertically and are of equal size—9 inches long and $6\frac{1}{2}$ inches in diameter. The figures given in column 4 and column 6 ought to be the same if both were absolutely accurate. But the refuse cane or begasse loses weight very quickly owing to the juice still retained in it evaporating very quickly, for it is spread out in a thin layer over a large surface. As the begasse is really heavier immediately after it is milled than a little later when it is actually weighed, the results calculated from the figures thus obtained give a little higher extraction than that which is actually obtained. But the juice in the pails also evaporates a little before weighing, though not nearly as much, as that in the begasse; the results obtained when dividing the weight of the cane into the weight of the juice as given in column 4 are therefore not quite accurate either. They are a little too low. The truth is somewhere between these two results though nearer those given in column No. 4 than those recorded in column No. 6 in Table No. V above. Nevertheless the latter results are taken for calculating the results given in column No. 10, and these results are therefore too low in exactly the same proportion as the figures in column No. 6 are too high. There is therefore actually a little more juice left in the begasse (refuse cane) than these figures indicate. The mill was set much closer than is usually done by the raiyats. (The begasse was very much cut up when it came out of the mill and was in small pieces so that all of it had to be carried in baskets from the mill to the scales.) And the juice left in the begasse in actual practice is therefore more than it was in these experiments. With these small iron mills which are no doubt a great improvement on the old wooden mills, there is therefore a loss of $\frac{1}{4}$ to $\frac{1}{3}$ of the juice originally contained in the cane. This is a loss much greater than was anticipated. For some time to come the best mills, those extracting all but five per cent to ten per cent of the total juice of the cane, are both too large and too expensive to be used in Mysore except by large firms having a large area under sugar-cane; for they can mill from 500 to nearly 1,000 tons of cane a day and could easily mill 1,000 acres of the best cane in a season. But there is a very large range in sizes of sugar-cane mills between these giants, and the so-called improved sugar-cane mill used in Mysore. And with a mill very much smaller and cheaper than the largest mills in use elsewhere a very much better extraction should be possible than the "improved mills" in Mysore are able to give. Next year it is hoped we shall be able to make experiments with a three-roller mill driven by an oil-engine having rollers eighteen inches long by twelve inches in diameter capable of crushing one ton of cane per hour. The rollers lie horizontally. Such a mill is being imported for Mr. Krishna-iengar, Inamdar of Oorgahalli, and experiments will be made with it after it arrives.

49. *Deterioration of cane after cutting.*—The general impression in cane-growing countries appears to be that cane deteriorates but little after being cut for a day or two at any rate. In Louisiana cane is sometimes preserved in pits for a month or more after cutting for seed. Cane sent for some distance to central factories must of course be cut some considerable time

before being milled, especially if it is sent, as is sometimes done, for fifty miles or so. And when considering the advisability of starting Central Sugar Houses in India, a very important question is to find out how long cane will keep and how far it may be sent without serious loss. For the purpose of studying this question the canes from one plot were divided as evenly as possible into twenty samples. Of these, two were analysed soon after being cut. But as there appeared no special reason for hurrying and as the sorting and sampling took some time, these samples had been cut for some hours—probably four or five—before being analysed. The other samples were analysed from two days to one month later. Some samples were not topped; to see if this would have any effect on their keeping quality. Below are given the results of the analyses together with the dates on which they were made.

TABLE NO. VI.

Table showing the effect of cutting cane before milling it. Analysis of juice of sugar-cane cut April 22nd, 1905, and kept for various lengths of time:—

No.	Date	Weight		Sucrose ; per cent	Glucose ; per cent	Total solids per cent	Calculated to original weight taking ten per cent mark in cane			Remarks
		Original lbs.	When analysed lbs.				Sucrose ; per cent	Glucose ; per cent	Total solids ; per cent

Samples Nos. 338 and 339 have not quite the same composition though they are similar samples. From data found in the analyses of the succeeding samples, No. 338 may be taken to very fairly represent the average composition of all the samples on that date. No. 339 is certainly above the average in sucrose and total solids. But it is especially the glucose which we have to consider in this set of experiments. Both samples contain, as will be seen, .87 per cent of this constituent. As the samples were not milled immediately after they were cut, it is just possible that some change may already have taken place in them when they were analysed; for .87 per cent is rather more glucose than it was expected to find. But as in the case of the experiments made to test the keeping qualities of juice, practically no change took place in some of the samples during the first nine hours. It is not likely that much change has taken place in these samples of cane before the analyses were made, for it is natural to assume that cane

will keep longer than the juice after it has been extracted. In two days' time the change in the cane is however very great. As will be noticed by comparing columns Nos. 3 and 4, there has been some loss in the weight of cane, and the percentage of glucose and the sucrose will, owing to the drying out of the cane, of course appear to be higher than it would have been if the cane had not lost some of its water. But this drying has been allowed for in the results given in columns Nos. 8, 9 and 10. These give, therefore, the actual change which has taken place, for in them the changes produced by the simple drying out of the cane has been eliminated. The change in the first two days has been very much greater than in any of the succeeding two days. Why this should be the case is at present difficult to understand. There is an increase of nearly three per cent in the glucose and a decrease of a similar amount in the sucrose. This denotes a very serious loss indeed, as it will probably represent the loss of over one-third of the total sugar if the product is to be sugar and not jaggery. But of course these experiments will have to be repeated a number of times before they can be taken to represent the actual state of affairs. During the first twenty days or more after cutting, the loss in sucrose was about balanced by the gain in glucose, so that the total solids remained very nearly the same for this period of time. After that the total solids begin to decline showing that other changes than the simple transformation of sucrose into glucose had taken place. Leaving the tops on the cane has apparently not made much difference in these experiments. But that part of the question has not received a fair test this year. The results of these experiments as a whole have indicated that there probably is a very much greater loss by cutting the canes a day or more before milling than is generally believed. The experiments must be repeated as soon as possible, and the time allowed to lapse between the first four of five analyses must be very much shorter than was the case this time.

50. *Deterioration of juice on keeping.*—When visiting the Refinery at Samalkot in January last, I was asked if in my opinion it would be safe to ship carefully limed juice in properly sterilized iron drums for some distance to the factory. As this question is one of general interest, the following experiments were made to test this point. Juice which was protected as carefully as is possible in ordinary milling practice from being infected with ferments was, after being analysed, set aside in clean glass vessels. Half of it remained unlimed, the other was limed as described in para 34 on page 9 of this report. After a specified time both samples were analysed again. The results are given in the following table:—

TABLE No. VII.

Table showing the amount of fermentation of cane juice, as indicated by an increase in the percentage of glucose, on standing.

No. of juice	Treatment			Analysed after standing hrs.	Glucose per cent	Date of analysis
318	Unlimed	...	...	Fresh	67	April 18
	Do	...	...	7	82	Do
	Limed	...	...	7	75	Do
324	Unlimed	...	...	Fresh	80	Do
	Do	...	...	6	91	Do
	Do	...	...	20	29	Do 18
	Limed	...	...	6	83	Do 18
	Do	...	...	20	62	Do 19
332	Unlimed	...	...	Fresh	73	Do 20
	Do	...	...	6	110	Do
	Limed	...	...	6	74	Do
458	Unlimed	...	...	Fresh	61	Do 26
	Do	...	...	14	204	Do 27
	Do	...	...	19	303	Do
	Limed to neutrality	...	...	14	193	Do
	Do	...	...	19	350	Do
	Over-limed	...	...	14	99	Do
	Do	...	...	19	300	Do

51. Taking these results as a whole, there appears to be a slight tendency on the part of limed samples to keep better than the unlimed juice. But as far as these results go, this pre-

serving action is not sufficient to justify any one to rely on it in helping to prevent the juice from fermentation. Further experiments in this direction are given in the following table.—

TABLE No. VIII.

No. of juice	How treated	Fresh juice; glucose per cent	Analysed after standing						Date
			Three hours; glucose per cent	Six hours; glucose per cent	Nine hours; glucose per cent	Thirteen and one-fourth hours; glucose per cent	Seventeen and one-fourth hours; glucose per cent	Nineteen and three-fourth hours; glucose per cent	
452	Unlimed ...	54	56	61	61	...	...	...	April 26
453	Limed to neutrality ...	54	54	58	61	...	...	...	Do
454	Over-limed ...	54	54	56	61	...	...	...	Do
455	Unlimed ...	37	...	...	...	42	62	100	May 8 and 9
456	Limed to neutrality ...	37	...	...	...	40	57	80	Do
457	Over-limed ...	37	...	...	...	37	44	61	Do

In these experiments it was desired to follow the changes taking place in the juice for the best part of a day. To the unlimed and limed samples were added a third into which more than double the amount of lime used for the ordinary "limed" sample had been put. This is described as "over-limed." The first set of three samples were milled one morning and analysed every three hours. The next set of three samples Nos. 455, 456 and 457 were milled in the evening, analysed immediately and allowed to stand overnight. They were analysed again next morning after standing 13½ hours, 17½ hours and 19½ hours. The results show a tendency for the overlimed sample to keep better than the others. But in none of the cases has fermentation been entirely stopped for even twenty hours, and it is doubtful if as satisfactory results as this could be got on an average in general practice. But the experiments are sufficiently encouraging to justify their being continued.

52. *Resume.*—On the whole this year's experiments with sugar-cane and with its manufacture indicate that there is a danger in sending sugar-cane or its juice for distances requiring more than a few hours in transit. The results when making raw centrifugal sugar are so encouraging that it appears likely that even comparatively small houses are likely to help the sugar industry very much.

53. Regarding the opinion that jaggory gets darker in colour the heavier the juice is limed, the experiments show that when the juice is in sufficiently limed the jaggory gets darker with the addition of lime, but that a sufficiently limed sample of juice gives a jaggory lighter in colour than one from juice limed to one-half this extent. The following directions given last year deserve repetition:—

"When boiling jaggory, the greatest care should be taken—

- (1) to lime the juice to neutrality as indicated by litmus paper,
- (2) to use no earthenware pots,
- (3) to wash the mill and all (metal) pots and vessels at least once a day before stopping work,
- (4) to boil the juice as soon after it is milled as possible,
- (5) to see that the rollers of the mill are set as close together as possible," and, added to this,
- (6) mill the cane as soon after cutting as possible.

COFFEE.

54. *Analyses.*—On page 10 of the Fourth Annual Report are given the results of the analyses of six samples of coffee in which it appears that in a general way the price paid for the coffee decreased with the specific gravity, the nitrogen, phosphoric acid and the potash. On page 11 is stated, "So far as the results go they are very satisfactory indeed. But the number of analyses is much too limited for drawing any conclusions." In the Fifth Annual

Report, pages 17 to 24, the continuation of that work has been reported. Fifty-one widely different samples collected by the United Planters' Association of Southern India were tested in regard to their specific gravities. These results bear out the results obtained with the specific gravities the previous year. But the further analyses of the samples indicate no relation existing between the price realized in the London market and the contents of either nitrogen or phosphoric acid or potash, and the sentences quoted above from the Fourth Annual Report have proved amply justified. As the analyses are not quite finished, as some further determinations of some of the organic substances of the coffee are to be made if time permits, and as the analyses so far made are not of any immediate practical value in determining the quality of coffee, the detailed results will not be published until the work has advanced further than it has at present. It is sufficient for the present to note that the total nitrogen, total phosphoric acid and total potash are not an index of quality.

55. *Manurial experiments.*—On pages 6 to 9 in the Fourth Annual Report are given the results of plot experiments with manures on coffee. On experimental fields No. 1 and No. 2 the experiments have been continued for another two years with practically the same results. In both fields an unmanured plot still heads the list when taking the average of all the years the experiments have been going on. Mr. Denne and Mr. Harris who have conducted, very carefully, the experiments referred to above, have kindly consented to continue them. The amount and nature of fertilizers used, the arrangement of the plots and the results obtained up to 1903, are given in the report referred to above; and as the results since 1903 only serve to confirm the previous results, it is not necessary to give them here. They will, however, be published at some future time. The results obtained so far simply indicate that on these plots the manures applied have not acted. It is simply a coincidence that in both cases an unmanured plot has given the best average results. In Mr. Harris's field which contains two unmanured plots the average of the second of these plots is practically the worst. It is fortunate, however, that in all the experiments an unmanured plot heads the list. The results could not have been interpreted nearly as easily if the unmanured plots had given on an average a result which in its turn had been an average, and they might have been absolutely misleading if they had happened to give as persistently the poorest returns as they happened to have given the best. But if these results are taken to indicate that on these particular plots all the manure applied since the experiments were begun have for some at present unknown reason, failed to give any practical results the interpretation is very safe and very conclusive. As these results have been obtained on two fields it is not unreasonable to suppose that there is a chance of a similar thing happening on other fields.

56. But experiments from only two experimental fields even when conducted for five years cannot of course give *conclusive* results. These experiments cannot therefore be taken to show that coffee has been over-manured in the past and do not prove that if these fields had not been manured at all for five years, the results would have been as good as they would have been if they had been very heavily manured. But they *do* indicate that there is still something to learn about the manuring of coffee, and that our present treatment is not necessarily the most economic, and they state as plainly as they can that any one anxious to save unnecessary expenditure, would do well to join in this line of experiments to see if it is not possible to reduce expenditure in manures. That we cannot indefinitely crop any piece of land without returning to it at least part of the plant food removed by the crop appears reasonable to all of us. But if we consider the comparatively small amount of plant food removed in 5 cwt. of cleaned coffee, the comparatively rich nature of the soil required for coffee, the fact that at Rothamsted a continuous crop of wheat has been grown on one field for considerably over half a century and is still producing a respectable crop, and that the only actual experiments made with manures on coffee (experiments where the crop from each individual manured plot has been weighed and compared with that produced on a similar adjoining plot which has not been manured) have shown no marked result in favor of the manures applied, it is, I believe, time to be serious about manurial experiments with coffee, and make sure that the good results we believe to have noticed after the application of some one or other manure applied are really due to the manure used and not traceable to some other unexpected cause. For if it were possible to reduce expenses without injuring in any way the returns, the sooner we knew it the better. I therefore strongly urge that a large number of manurial experiments be started with coffee and continued for a considerable time. It is waste to apply more manure than necessary, especially manures like poonacs which are not retained very long by the soil. On the other hand it would be suicidal to manure less than required; and as practice, no matter how long established, does not necessarily prove a point unless accompanied by experiments, we must make all the experiments possible to test, and if possible, improve our practice. It is reasonable to suppose that in the experiments now carried out, the unmanured plot will drop behind some time. But the fact that this "some time" has not yet arrived ought to make every one interested in coffee anxious to determine whether this is simply due to an accident, or local circumstances, or is caused by some generally existing conditions.

FERTILIZERS.

57. In addition to the analyses made this year, the maximum, minimum and average composition of some of the more important fertilizers, as found in this Laboratory during previous years, has been given to enable those interested in the subject to get a clearer idea of the range in composition which may be expected in those fertilizers in this part of India. The

fertilizers analysed this year were, with the exception of ashes, principally analysed to enable firms dealing in fertilizers to give a guarantee with their fertilizers as to their composition.

TABLE No. IX.

Poonacs.

No.	Substance	Nitrogen analyses of previous years			Analysis, 1904-05		Location
		Average percentage	Minimum percentage	Maximum percentage	Nitrogen percentage	Phosphoric acid percentage	
	White castor	6.53	5.56	8.69			
55	Do				4.76		
69	Do				6.35	2.62	Bangalore
	Kurdi	4.83	3.92	6.43			
206	Do				8.30		
207	Do				4.88		Habli
	Neem (Melia Azadi)	5.01	4.43	5.99			Do
58	Do				4.12		
	Honge (Pongamia glabra)	3.81	3.59	4.01			
70	Do				3.68	.99	Bangalore
	Ippe (Bassia latifolia)	2.97	1.80	4.14			

58. *White castor*.—No. 69 is a white castor poonac taken from a large heap; and as might be expected represents fairly well an average sample of good average white castor. The firm in question excluded as far as possible all samples which appeared adulterated. Sample No. 55 is, I believe, also taken from, "bulk," but is, as will be noticed, very poor, having a lower percentage of nitrogen than any other sample analysed in this Laboratory before. It came from outside of Mysore and indicates the necessity of consumers insisting on a guarantee as to composition.

59. *Kurdi* Samples Nos. 206 and 207 were simply analysed to check the results obtained in one of the laboratories recently established, to enable its owner to guarantee the composition of the fertilizers sold by him. Sample No. 206 is so abnormally rich in nitrogen that I feared there was something wrong with the determination, but it was all right. The minimum percentage of nitrogen given for Kurdi is 3.22 notwithstanding that an old sample of unknown source gave less than 3 per cent of nitrogen. In no other fertilizer does there appear to be so much range in quality as in Kurdi, or safflower cake.

60. The figures connected with the other varieties of oil-cake given above, require no special mention.

61. As to the difference in the intrinsic value of different samples of oil-cakes of the same kind, I refer to page 24 of the Fifth Annual Report, page 15 of the Fourth Annual Report and page 12 of the Third Annual Report of this Department.

62. *Bone and fish*.—The following table giving the composition of dried fish and bone meal require no special comment. A variety of fish called bungara gave the maximum results, and a small variety of fish called by the sender sardines gave the poorest returns. The sample of bone meal giving the poorest results was undoubtedly adulterated.

TABLE No. X.

Bone and fish.

No.	Su b stance	Results of previous years						Analysis, 1904-05		Locality
		Nitrogen			Phosphoric acid			Nitrogen	Phos- phoric acid	
		Average	Minimum	Maximum	Average	Minimum	Maximum

760

FERTILIZERS OTHER THAN THE ABOVE.

63. The number of inquiries received as to whether the acid sulphate of potash formed as a by-product at the Cordite factory at Wellington could be used as a fertilizer, shows that there is a strong desire to make use of any substance likely to be valuable for manurial purposes. Unfortunately the small percentage of lime found in most South Indian soils makes it highly probable that this acid sulphate of potash is not likely to be of much value as a manure. It is more likely to be a poison to plant life. But so far no experiments have been made with it to test these points. Probably if mixed with an equal quantity, or more, of freshly burned lime, it would do very well as a manure; but as lime is rather expensive and as its value as an indirect fertilizer would, to a very large extent, be lost if used in this way, this recommendation has not found favor, and no experiments have, as far as I know, been made to see if such a mixture would be satisfactory. Messrs. Stanes & Co. of Coimbatore have mixed this acid sulphate with bone meal in the hope that the acid sulphate would act on the bone in something like the same manner as sulphuric acid would do. But as both the acid sulphate and the bone meal were in the form of a powder, they did not have much chance to react on each other. However from the analysis of this mixture it is evident that some reaction has taken place, for in this mixture were found 8.09 per cent of phosphoric acid soluble in a neutral solution of ammonium citrate (the re-agent used for determining the "available phosphoric acid" in fertilizers), and as owing to the increase in bulk due to the addition of the acid sulphate of potash, the total phosphoric acid was reduced from about 23 per cent to 13.58 per cent. This mixture had 59.57 per cent of its total phosphoric acid in an available form. As none of the untreated samples of bone meal which had been used for this mixture accompanied it, another sample of bone meal was analysed and found that in it 27.16 per cent of the total phosphoric acid were in an available form. If the two samples of bone are nearly alike, and it is reasonable to suppose this, there can be no doubt that the acid sulphate, even in the form of a powder, had some action on the bone meal; and as the injurious effects of the acid sulphate are reduced in exactly the same proportion as the sulphate acts on the bone meal, it is quite possible that if the acid sulphate is applied in the form of a concentrated solution to finely powdered bone meal, its injurious action as a fertilizer may be turned to good account in making the bone meal more available. Messrs. Stanes & Co. of Coimbatore have kindly promised to make this experiment, and the produced sample will be analysed and some pot-culture experiments made with it in this Department.

64. *Trichi phosphate*.—As a large number of inquiries were received in regard to this phosphate, a sample was analysed notwithstanding that, as it is a rock phosphate, it is not likely to be of much use as a manure unless converted into superphosphate. It was ground very fine and practically all passed through the standard (100 meshes to an inch) sieve. But as will be seen from the table given below, practically none of the phosphoric acid was soluble in a neutral solution of ammonium citrate, and therefore judged by the European and American standard, practically none of it is available.

65. *Bone char*.—The bone char, a refuse from the sugar refinery, contained a comparatively large amount of nitrogen for a substance of this kind. But as bone char is considered to be practically inert unless treated with sulphuric acid and transformed into super-phosphate, the amount of nitrogen cannot make it a fertilizer which could be recommended. Moreover the nitrogen contained in it is likely to be itself very inert.

66. *Aloe fibre refuse*.—A sample of dried aloe fibre refuse sent from the Shevaroy Hills was found to contain 1.64 per cent of nitrogen. This is not sufficient to justify its being carried long distances when it tended to be used as a fertilizer. It is not far short in nitrogen of the poorest of sample of ippe poonac analysed here. But as it is fairly bulky and possibly the nitrogen in it is not quite as available as that in poonacs, it cannot be considered as a commercial fertilizer. Its bulky pithy nature are, however, likely to make it an excellent mulch where such can be applied. And as a mulch is in itself of great value, the aloe fibre refuse will have to be considered as a useful by-product of the aloe fibre industry if used in the neighbourhood of the factory.

67. *Ashes*.—Considerable quantities of wood ashes are used annually for manurial purposes. These are generally prepared specially for that purpose by burning brushwood; and the heat produced by the burning is not utilized in anyway. Some of these ashes are, however, so poor in potash that it cannot possibly pay to make them even if the wood is valueless and there is little other work for the coolies at the time. Nos. 60 and 62 in the following table are of this nature. Both of them contain less than 1 per cent of potash soluble in hydrochloric acid, and of this amount not much more than half is soluble in boiling water, and therefore readily available. A ton of these ashes would therefore be worth less than Rs. 3. Samples Nos. 30 and 32, which are also produced from mixed woods, are very much better in quality, being more than twice as valuable; but even these are low in potash. Both samples Nos. 63 and 64 are, however, valuable samples of ashes. But the best of these analysed thus far is No. 33, a sample of bamboo ashes received from Coorg. But, strange to say, probably owing to the light weight of these ashes, they have generally been considered to be of but little value. Some other wood ashes such as Lantana will be analysed soon. If their percentage of potash should happen to be high it may help in solving the problem of stopping the Lantana invasion. It is a pity, however, to see wood other than Lantana burned solely for the sake of the ashes.

TABLE No. XI.

Ashes and miscellaneous fertilizers.

No.	Substance	Nitrogen	Phosphoric acid	Phosphoric acid soluble in ammonium citrate	Potash	Potash soluble in water	Lime	Loss on ignition	Insoluble residue
188	Bone meal	4.04	28.34	6.34	...	...	...	...	...

MISCELLANEOUS.

68. *Purifying water with alum.*—At the request of the Deputy Chief Engineer, some observations were made in regard to the amount of alum required to clear the water of the Hessarghatta tank. It is of course difficult to state exactly when the settling of the suspended matter began and there is also some difficulty, in a simple observation like this, to find out when the water is practically clear, as a considerable quantity of the fine suspended matter clings to the side of the glass vessel. But for practical purposes the figures given below are accurate enough, and may be of help to those wishing to clear water for domestic purposes. The water was very turbid. But two grains per gallon or about one ounce for 200 gallons was all that was required to practically clear the water in seven hours and was almost as effective as four times that quantity; but it is the minimum quantity which gave good results. One and a half grains per gallon proved to be inefficient unless the water could be allowed to stand quietly for a day or more.

TABLE No. XII.

Alum grains per gallon	Began to settle in hours	Practically clear in hours

69. *Salt.*—Two samples of sea salt were analysed. The one contained 84 per cent of salt, the other 92 per cent. The poorer sample contained, in addition to the salt 1.64 per cent of magnesia, and some lime, potash and sulphuric acid (of course all combined). The better sample contained 0.77 per cent of magnesia, and of the other impurities mentioned above, it contained about half the quantity found in the poorer salt. The remainder of the impurities were sand and other insoluble matter and water.

70. *Famine food.*—Twenty-two other samples of famine foods were sent in, and in all of them the nitrogen has been determined. On the average the nitrogen content is a little higher than that of those analysed last year though both the highest and lowest percentage of nitrogen is very much lower than last year. The highest was 2.70 per cent found in a sample of

Kannay leaves sent by the Amildar of Malur ; but there were several other samples nearly as rich. The poorest contained only 0·05 per cent of nitrogen. It was a sample of Godirasadagadde flour sent by the Deputy Commissioner of Shimoga. But no other sample received had anything approaching this low percentage of nitrogen.

71. As samples of famine foods are still being sent in to the Laboratory, and as some other constituents, for example, crude fibre, fat or ether extracts, and amide nitrogen, have to be determined to judge of the food value of these famine foods, the results obtained this year and those already published last year on pages 26-28 of the Fifth Annual Report will be published together when the analytical work regarding the nutritive value of these foods has been finished. If some senior officer in the Mysore service well acquainted with these famine foods and the peculiarity of the people who might have access to these foods in time of famine could be deputed to write a bulletin on these foods in conjunction with the Agricultural Chemist when the analytical work is finished, that bulletin would doubtlessly be of much more value than the bare statement of the analytical results would make it.

A. LEHMANN,
Agricultural Chemist.

Note—Rice (husked)—Oryza Sativa.
Ragi—Eleusine Corocana.
Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Manure is being collected.

Cattle are in good condition.

Water and fodder sufficient.

Much anxiety is felt among the raiyats for want of rain.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Sugar-cane is being harvested in Bangalore and Channapatna, and resown in Bangalore. Otherwise agricultural operations are at a stand-still.
10. Prospects of the season depend on mungar rains. Rain is badly wanted throughout.
11. Public health generally good.
12. Cattle healthy. Water and fodder available. Temporary wells have been sunk in twenty-one villages of Nelamangala and in two tanks of Kankanhalli to meet the difficulty of water.

KOLAR.

8. Market well supplied.
9. Sugar-cane is being planted in Bowringpet, Chintamani, Sidlaghatta, Chikballapur and Goribidnur. Sugar-cane is also being milled in Kolar and Mulbagal. Vaisakhi paddy is being harvested in Sadali Hobli of Sidlaghatta and in Bagepalli; Kadale in Chikballapur and cholum in Bagepalli.
10. Prospects of the season depend upon early rains. Food stocks are available.
11. Public health generally good.
12. Fodder generally available, but the supply of water is running short, and wells in beds of tanks are sunk to meet the demand. Pasture in fields and grazing lands is almost exhausted.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri, Sira, Pavagada and Koratagere, sugar-cane in Gubbi and Tumkur, cholum in Sira, kadale in Gubbi and cotton in Pavagada are being harvested. Sugar-cane in Maddagiri and Koratagere and nat-ragi in Pavagada are sown. Standing crops in Maddagiri, Sira, Pavagada and Kunigal are in pretty fair condition. Elsewhere they are reported to be withering for want of water. The following is the estimated outturn of crops:—
Maddagiri—Paddy 8 to 12 annas.
Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.
Gubbi—Sugar-cane and kadale 4 annas.
Pavagada—Paddy 8 annas, cotton 4 annas.
Koratagere—Paddy 8 annas.
10. Prospects of the season not very encouraging. Food stocks are available for the present. Supply of water in wells is diminishing in several parts of the district. Mungar rains are anxiously awaited.
11. Public health generally good, except that small-pox prevails in parts of Tiptur, Kunigal and Turuvekere. It is reported that it is subsiding in Gubbi.
12. Cattle healthy, except that foot and mouth disease prevails in parts of Tiptur, Kunigal and Turuvekere. In parts of Sira, Tiptur and Turuvekere date leaves are used as fodder for cattle. Water is drawn from wells in most parts of the district for cattle to drink. Water and fodder are both getting scarce.

MYSORE.

8. Market well supplied. Prices are rising.
9. The standing mulberry, sugar-cane and cotton crops are reported to be fair in Chamrajnagar, Seringapatam, Malvalli and Krishnarajpete, and good in T.-Narsipur and Nagaman-gala. Lands in most parts of the district have been made ready for sowing, but no rain has fallen. Cholum has not been sown till now. The probable outturn of crops is as follows:—
T.-Narsipur—Sugar-cane and mulberry 12 annas.
Krishnarajpete—Sugar-cane 12 annas, black and green grams 8 annas.
10. Prospects of the season not encouraging. The rainfall of the week has been very scanty and confined only to three taluks. Rain is anxiously awaited. Food stocks sufficient for the present.

11. Public health generally good, but small-pox still prevails in Heggaddevankote.

12. Cattle in parts of Chamrajnagar, Heggaddevankote and Malvalli are reported to be suffering from foot and mouth disease. In other parts they are reported to be healthy. Fodder and water are getting scarce in many parts of the district.

HASSAN.

8. Market fairly well supplied, but prices are high.

9. Standing crops, *viz.*, paddy in Hassan, Arsikere and Manjarabad, sugar-cane in Hassan, Arsikere, Channarayapatna, Belur, Arkalgud and Alur, and black and green grams and tadagani in Hole-Narsipur are reported to be withering for want of rain. The probable outturn of standing crops in Hole-Narsipur is estimated at 8 annas. Agricultural operations are retarded owing to want of rain.

10. Prospects of the season not promising, but depend upon early fall of rain. Food stocks are reported to be sufficient for the present. Rain is very badly needed in all parts.

11. Public health generally good. Small-pox is reported to be subsiding in several parts of the district.

12. Cattle generally healthy, but foot and mouth disease is reported to be still prevailing in parts of Hole-Narsipur, Belur, Manjarabad, Arsikere and Channarayapatna, as also the disease known as "*Metrigattu*" in parts of Arkalgud. Fodder and water generally available, except in parts of Channarayapatna and Arsikere, where difficulty is felt for both.

SHIMOGA.

8. Market well supplied. Prices high.

9. Kar paddy under Sulekere in Channagiri, Nagar and Sagar and sugar-cane in Sagar and Nagar are in a fair condition in areas where water is available. Sugar-cane plants are reported to be withering in the Sorab Taluk. In parts of Nagar and Sorab the ground is being ploughed and manure collected in expectation of rains.

10. A very slight shower of rain fell in Shimoga and Sagar. The heat is intense and rain is anxiously awaited everywhere. Food stocks are procurable for the present.

11. Public health generally good. Small-pox prevails in some localities of the Shimoga, Channagiri and Sagar Taluks and fever exists in the Kumsi Sub-Taluk.

12. Except in Sagar, Nagar and Tirthahalli, fodder supply is limited, and the fodder that is available is highly priced. Scarcity of water is on the increase in all taluks.

KADUR.

8. Market fairly well supplied.

9. Sugar-cane is being planted in parts of Tarikere and Koppa. The standing crops, *viz.*, kar paddy and sugar-cane in parts of Kadur and Chikmagalur are in fairly good condition; and sugar-cane in parts of Lakavalli Hobli of the Tarikere Taluk are not flourishing for want of water. Cotton in parts of Tarikere and sugar-cane in parts of Kadur are being harvested. Ploughing and other agricultural operations are delayed for want of rain.

10. Prospects of the season fair, but rain is badly needed throughout. Food stocks available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur, Mudgere, Koppa and Kadur.

12. Foot and mouth disease to cattle is reported to be subsiding, except in parts of Kadur and Koppa, but no mortality is reported. Water and fodder are generally available. Water-supply is scanty in parts of Chikmagalur, Tarikere, Kadur, Koppa and Yedahalli.

CHITALDRUG.

8. Market well supplied.

9. The outturn of crops harvested during the week is as follows:—

Chitaldrug—Sugar-cane 10 annas.

Hiriyur—Ragi, wheat and kadale 2 annas; ballar, togari and cotton 4 annas;
paddy under kapile wells 8 to 10 annas.

Holalkere—Paddy 8 annas

Davangere—Sugar-cane 4 to 8 annas.

Molakalmuru—Paddy 8 annas and onions 6 annas.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder procurable in limited quantities.

Note—Rice (husked)—Oryza Sativa.
Ragi—Eleusine Corocana.
Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 17	

Manure is being collected.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Sugar-cane is harvested in some parts of Bangalore, Doddballapur and Channarayana. The outturn of this crop is reported to be good. Agricultural operations are at a stand-still for want of rains.
10. Prospects of the season depend on the expected rains. Want of rain is felt throughout.
11. Public health generally good.
12. Cattle healthy. Water and dry fodder are available. In (7+22+1+2) or 32 villages of Hoskote, Kankanahalli, Nelamangala and Anekal temporary wells are reported to have been sunk in beds of dried tanks.

KOLAR.

8. Market well supplied, but prices are very high.
9. Sugar-cane is being planted in Bowringpet, Chintamani and Sidlaghatta. Vaisakhi paddy is being sown in Goribidnur under kapile wells. Sugar-cane in Chintamani and paddy in Sidlaghatta, Bagepalli and Gudibanda are being harvested.
10. The long expected mungar rains are still withholding. Food stocks are available.
11. Public health generally good.
12. Cattle generally in good condition, but in parts of Bagepalli and Gudibanda they are reported to be suffering from foot and mouth disease and also from some kind of eruption like small-pox in the former taluk. Pasture in fields and grazing lands has been completely exhausted. Difficulty for water for men and cattle is gradually increasing.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri, Chiknayakanhalli, Sira, Pavagada, Koratagere and Turuvekere, cholum in Sira, sugar-cane in Gubbi and Kunigal and cotton in Pavagada are being harvested. Sugar-cane in Maddagiri and Koratagere and nat-ragi in Pavagada are being sown. Standing Vaisakhi paddy and sugar-cane crops in Maddagiri, Sira, Pavagada, Kunigal and Koratagere are in fair condition. Elsewhere they are withering for want of water. The following is the estimated outturn of crops harvested :—

Maddagiri—Paddy 12 annas.

Chiknayakanhalli—Paddy 2 to 4 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.

Gubbi—Sugar-cane 2 annas.

Koratagere—Paddy 4 to 12 annas.

Pavagada—Paddy 4 annas, cotton 2 annas.

Turuvekere—Paddy 8 annas.

10. Prospects of the season not encouraging. Food stocks are available for the present. Supply of water in wells is diminishing. Mungar rains are anxiously awaited. Some irrigation wells were started in the Maddagiri Taluk by landholders, and they afford labour and handsome wages to the people of those parts. Hence test-works intended to be started are deferred.

11. Public health generally good, except that small-pox prevails in parts of Tiptur, Kunigal and Turuvekere. It is reported that it is subsiding in Gubbi.

12. Cattle are just beginning to decline in condition. Foot and mouth disease prevails in parts of Kunigal and Turuvekere. In parts of Gubbi, Tiptur, Turuvekere, Chiknayakanhalli and Sira date leaves are used as fodder for cattle. Cholum and kadale pretty extensively cultivated in tank-beds provided some fodder for cattle. Temporary wells are being constructed in tank-beds, as also drinking water wells all over the district. Water in State Forests is made available wherever needed.

MYSORE.

8. Market well supplied.
9. Standing sugar-cane in Seringapatam, and Krishnarajpete mulberry and sugar-cane in T.-Narsipur and Malvalli and cotton, sugar-cane and mulberry in Chamrajnagar are reported to be fair. Cholum sown in parts of Mysore, mulberry planted in parts of Malvalli, and sugar-cane sown under tanks in parts of Nagamangala are reported to be withering for want

of rain. Lands have been made ready for sowing in all parts and rains are anxiously awaited. The probable outturn of crops is estimated as follows :—

T.-Narsipur—Sugar-cane and mulberry 12 annas.

Krishnarajpete—Sugar-cane, black and green grams 8 annas.

10. Prospects of the season not good. The condition of things has in no way improved by the rainfall during the week. Food stocks are reported to be small.

11. Public health generally good, but small-pox is still reported to be prevailing in Heggaddevankote.

12. Cattle in parts of Heggaddevankote and Malvalli are reported to be suffering from foot and mouth disease. In other parts they are healthy. Fodder is available only in limited quantities, and difficulty for water for men and cattle considerably felt in most parts of the district.

HASSAN.

8. Market fairly well supplied, but prices increasing.

9. Standing crops, *viz.*, sugar-cane in Hassan, Belur, Arsikere, Channarayapatna, Hole-Narsipur and Alur; paddy in Arsikere and Manjarabad and kar-paddy in Hassan, are reported to be fading for want of rain. Black and green grams and tadagani in Hole-Narsipur are reported to be in fair condition. The probable outturn of standing crops in Hole-Narsipur is estimated at 8 annas. Agricultural operations are delayed for want of rains, but in parts of Arkalgud Taluk seeds are being sown.

10. Prospects of the season not encouraging owing to the Mungar rains having held off till now. Food stocks are sufficient for the present. Rain is very badly needed throughout.

11. Public health generally good, but small-pox is reported to be still existing in several parts.

12. Cattle generally healthy, but for foot and mouth disease which still prevails in parts of Arsikere, Channarayapatna, Arkalgud, Manjarabad, Hole-Narsipur and Belur, as also the disease known as "*Metrigattu*" in parts of Arkalgud. Fodder and water generally available, except in parts of Channarayapatna and Arsikere, where difficulty is felt for want of both.

SHIMOGA.

8. Market well supplied. Prices high.

9. Kar-paddy under the Sulekere tank in Channagiri and in the Taluks of Sagar and Nagar and sugar-cane in Sagar and Nagar are in a fair condition in areas where water is still available. Elsewhere sugar-cane and kar-paddy are withering. Efforts are being made in the Shimoga Taluk to preserve the sugar-cane plants by lifting water from water pits dug up for the purpose and from the river. Paddy seedlings are being raised in some parts of Tirthahalli. The ground is being ploughed and manure collected in some parts of Nagar and Sorab.

10. Food stocks are reported to be somewhat insufficient in parts of Shimoga, Shikarpur, Sorab and Kumsi. Rain is anxiously awaited everywhere.

11. Public health is generally good. Small-pox prevails in parts of Shimoga, Channagiri, Sagar and Tirthahalli, and fever in parts of Kumsi.

12. Scarcity of water is on the increase in all taluks. Fodder supply is limited everywhere except in Sagar, Nagar and Tirthahalli.

KADUR.

8. Market fairly well supplied.

9. Ploughing is carried on in parts of Koppa. Sugar-cane is being planted in Tarikere and kar-paddy is being sown in parts of Mudgere. The standing crops of sugar-cane in parts of Tarikere and Yedahalli; kar-paddy in parts of Mudgere and Koppa, and kar-paddy and sugar-cane in parts of Kadur and Chikmagalur are in fairly good condition. Kar-paddy and sugar-cane are being harvested in Kadur. Ploughing and other agricultural operations are delayed for want of rain. Arecanut gardens in parts of Malnad Taluks require water. The probable outturn of kar-paddy and sugar-cane in Kadur are respectively from 2 to 8 and from 8 to 12 annas.

10. Prospects of the season not encouraging. Rain is badly needed throughout. Food stocks are available and sufficient for the present.

11. Public health generally good; except that small-pox prevails in parts of Chikmagalur, Mudgere and Koppa.

12. Foot and mouth disease to cattle is reported to be subsiding. Water and fodder are generally available, but water-supply is scanty in parts of Chikmagalur, Kadur, Yedahalli and Tarikere.

CHITALDRUG.

8. Market well supplied.

9. The estimated outturn of crops harvested during the week is as follows :—

Chitaldrug—Sugar-cane 8 annas.

Holalkere—Paddy under kapile wells 8 annas.

Davangere—Sugar-cane 4 annas.

It is reported that lands in Harihar have been made ready for sowing.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder procurable in limited quantities.

BANGALORE, }
9th May 1906. }

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage, of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 16½	

Agricultural operation—Collection of manure.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices steady.
9. Standing crops are in good condition. Agricultural operations are almost at a standstill. Sugar-cane is reported to have been harvested in Doddballapur. Manure is being collected in the Nelamangala Taluk. Sugar-cane is being planted in parts of Doddballapur.
10. There has been about an inch of rain in Channapatna, Closepet and Kankanhalli, and very little in the other parts.
11. Public health generally good. Fever prevails in some parts of Hoskote, and small-pox in parts of Doddballapur and Anekal.
12. Cattle healthy. Dry fodder is available. Water is supplied from wells. In the following villages wells are reported to have been sunk during the week:—
Nine wells in Hoskote, nine in Nelamangala, six in Kankanhalli, twelve in Channapatna and two in Anekal. In three hoblis of Kankanhalli kattes are reported to have received about a month's supply of water.

KOLAR.

8. Market well supplied, but prices are very high.
9. Sugar-cane is being planted in Bowringpet and Chintamani. Paddy is being harvested in some parts of Sidlaghatta.
10. Prospects of the season hopeful. Rains are anxiously expected. Food stocks are available.
11. Public health generally good.
12. Cattle generally in good condition, but in parts of Sidlaghatta, Bagepalli and Gudibanda they are reported to be suffering from foot and mouth disease. Pasture in fields and grazing lands has been completely exhausted. Difficulty for water for men and cattle is gradually increasing.

TUMKUR.

8. Market well supplied.
9. Paddy in Tumkur, Maddagiri, Sira, Pavagada and Koratagere, cholum in Sira and sugar-cane in Gubbi and Kunigal are being harvested. Sugar-cane in Maddagiri and nat-ragi in Pavagada are sown. Standing Vaisakhi paddy and sugar-cane crops in Tumkur, Gubbi,

Koratagere and parts of Turuvekere are withering. Elsewhere they are in fair condition. The following is the probable outturn of crops harvested :—

Maddagiri—Paddy 8 to 12 annas, cholum 2 to 4 annas.

Pavagada—Paddy 4 annas.

Kunigal—Sugar-cane 8 annas.

Koratagere—Paddy 4 annas.

10. Prospects of the season not encouraging. Food stocks available for the present. Supply of water is diminishing all over the district. Mungar rains are anxiously awaited. As many as 250 persons in Tumkur, 347 in Maddagiri, 390 in Turuvekere, 110 in Chiknayakanhalli, 243 in Sira, 60 in Gubbi, 250 in Tiptur, 115 in Kunigal and 88 in Koratagere are finding employment in minor tank, Irrigation wells, District Fund wells and other works.

11. Public health generally good, except that small-pox prevails in parts of Tiptur. It is subsiding in Gubbi and Kunigal.

12. Cattle are showing signs of deterioration. Foot and mouth disease prevails in parts of Tumkur and Tiptur. In parts of Gubbi, Chiknayakanhalli, Sira and Tiptur date leaves are used as fodder for cattle. Cholum and kadale pretty extensively cultivated in tank beds provided some fodder for cattle. Temporary wells are being constructed in tank-beds, as also drinking water wells all over the district. Water in State Forests is also made available wherever needed. Permission has been granted to use as fodder, the leaves of avenue trees wherever it is found necessary.

MYSORE.

8. Market well supplied.

9. Standing sugar-cane, mulberry and cotton crops in parts of Chamrajnagar and Nanjan-gud; sugar-cane in parts of Nagamangala and Seringapatam; cholum, castor, togari and tadagani in parts of Gundlupet; mulberry, sugar-cane and kar-paddy in parts of T.-Narsipur; mulberry and sugar-cane in parts of Malvalli; and sugar-cane, black and green grams in parts of Krish-narajpete are reported to be pretty fair. Ragi, cholum, togari, sessamum, castor and tadagani are being sown in most of the taluks, as there was rain throughout the district except Chamrajnagar during the week. The probable outturn of mulberry and sugar-cane is estimated at 12 annas.

10. Prospects of the season encouraging. Recent rains have improved the condition. Food stocks sufficient for the present. There are none under relief.

11. Public health good throughout, but small-pox is reported to be still prevailing in parts of Heggaddevankote.

12. Cattle in parts of Heggaddevankote are reported to be suffering from foot and mouth disease. In other parts they are reported to be healthy. Fodder and water are available in limited quantities.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Channarayapatna, Hole-Narsipur and Alur; and paddy in Hassan and Manjarabad, are reported to be in a fair condition. More rain is wanted for sugar-cane and paddy in Arsikere. Land is being ploughed for sowing seeds. The probable outturn of sugar-cane in Hole-Narsipur is 8 annas.

10. Prospects of the season somewhat hopeful. More rain is, however, wanted in all parts. There are none under relief. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in some parts of the district.

12. Cattle generally healthy, but foot and mouth disease exists in parts of Hole-Narsipur. Water and fodder are generally available except in parts of Arsikere and Channarayapatna where some difficulty is felt for them.

SHIMOGA.

8. Market well supplied. Prices high.

9. Good rain has fallen in Shimoga, Channagiri, Honnali and Kumsi during the week to enable raiyats to commence ploughing operations for raising paddy and dry crops. Kar-paddy

under the Sulekere tank in Channagiri and in the Taluks of Sagar and Nagar is in a fair condition in areas where water is available. The sugar-cane crop is reviving in Shimoga, and it is in a fair condition in areas where water is still available. Sugar-cane is now being planted under the Sulekere tank. The estimated out-turn of kar-paddy is 12 annas for Channagiri, 6 annas for sugar-cane and 8 annas for Nagar.

10. Food stocks are somewhat insufficient in parts of Shimoga, Shikarpur, Sorab and Kumsi, and are being imported from other parts. Rainfall has been insufficient in Shikarpur and other Malnad Taluks.

11. Public health generally good. Small-pox prevails in parts of Shimoga, Shikarpur, Sorab, Sagar and Tirthahalli.

12. Fodder supply is limited everywhere except in Sagar, Nagar and Tirthahalli. The recent rains are expected to help the springing up of pasturage in Shimoga, Channagiri, Honnali and Kumsi. Scarcity of water has somewhat diminished in Shimoga, Channagiri and Kumsi, but it is still on the increase in the malnad.

KADUR.

8. Market fairly well supplied.

9. Ploughing is begun in Koppa and Yedahalli, and it is finished in Mudgere. Ragi is being sown in parts of Chikmagalur, and paddy nurseries are being made in parts of Mudgere. The standing crops, namely, kar-paddy and sugar-cane in parts of Kadur and Chikmagalur, sugar-cane in parts of Tarikere and Yedahalli, and kar-paddy in parts of Koppa and Mudgere are in fairly good condition. Ploughing and other agricultural operations have been delayed for want of rain. There was somewhat copious rainfall on the 12th night which was general throughout the district. This and the rainfall during the week under report are highly encouraging.

10. Prospects of the season fair, but more rain is needed. Food stocks are available and sufficient for the present. There is no need at present for opening test or relief works.

11. Public health good, except that small-pox prevails in parts of Chikmagalur, Mudgere and Kadur.

12. Foot and mouth disease to cattle is reported to be subsiding. Water and fodder generally available. Water-supply in parts of Chikmagalur, Kadur, Tarikere and Yedahalli is scanty. Recent rains have somewhat improved the situations.

CHITALDRUG.

8. Market well supplied.

9. The outturn of crops harvested during the week is as follows:—

Davangere—Sugar-cane 4 annas.

Molakalmuru—Paddy 8 annas, onions 8 annas and navane 4 annas.

Lands are being prepared for sowing.

10. Prospects of the season encouraging. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder are still procurable in limited quantities.

BANGALORE, }
16th May 1906. }

B. K. VENKATA VARADA IYENGAR,
Secy. to the Govt. of H. H. the Maharaja of Mysore,
Gen. & Rev. Dept.
4 B

BEFORE THE GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF
MYSORE.

Appeal No. 78 of 1905-06.

Appellant
Hale Gowda

Vs.

Respondent
Singe Gowda

Subject.

Claim to half the potgi allowance attached to the pateli office of Kadalagere in the French Rocks Sub-Taluk.

Facts of the case.

In 1889, the appellant and the respondent were appointed the Police and Revenue patels, respectively, of the village in question. In 1892, after the pakka potgi settlement, the question of the distribution of the potgi having arisen, the then Sub-Division Officer, Mr. Mahomed Ali, directed that the whole of the potgi allowance be paid to the Revenue patel, the respondent. Thereupon the appellant complained in 1897 and the then Sub-Division Assistant Commissioner, Mr. P. Srinivasa Rao, ordered in 1901 that the potgi should be divided equally between the appellant and the respondent. On appeal the Deputy Commissioner cancelled this order, holding that Mr. P. Srinivasa Rao had no jurisdiction to revise the order passed by his predecessor. On second appeal Government observed that the Deputy Commissioner, in reversing the Sub-Division Assistant Commissioner's order as above, did not adjudicate upon the point at issue, and in their Order No. R. 7451—Mis. 242-04-4, dated the 22nd February 1905, remanded the case to the Deputy Commissioner for disposal on the lines indicated in Government Order No. 10267-75—R. 1055, dated the 3rd January 1894. Thereupon the Deputy Commissioner upheld the order of Mr. Mahomed Ali passed in 1892. Hence this appeal.

Decision.

It is admitted that both are hakdar patels, one being appointed Revenue and the other Police patel. The question of the division of emoluments cropped up in 1892 after the settlement of the pakka potgi. The patels could not come to an amicable arrangement among themselves, and the Sub-Division Officer, French Rocks, directed the payment of the whole potgi to the respondent on the ground that he was the Revenue patel. Apparently there were no materials to decide the question on a consideration of the proportion of their respective shares in the pateli hak. The Revenue patel did not adduce any evidence to prove that he was entitled to the full amount of the potgi to the exclusion of the Police patel. Under the circumstances there is no justification for the order of the Sub-Division Officer of 1892 which was subsequently confirmed in appeal by the Deputy Commissioner Mr. Sparkes. The more equitable decision, having regard to the circumstances of the case, is to divide the potgi equally between the two patels, Revenue and Police. The order appealed against is reversed and the appeal allowed.

No. R. 14564—R. M. 228-05-4, dated 11th May 1906.

Copy forwarded to the Deputy Commissioner of the Mysore District, together with the records received with his letter No. 725, dated 8th January 1906.

B. K. VENKATA VARADA LYENGAR,
Secy. to Govt., Gen. & Rev. Dept.

Cholum—Sorghum Vulgare.

Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	16 to 16½	

Agricultural operation—Collection of manure and ploughing.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Almost throughout the district ploughing operations have commenced. Sessamum is reported to have been sown in some parts of Kankanhalli. Standing crops are in good condition.
10. Prospects of the season moderately good except within a radius of five miles round the Magadi Town, there has been rain throughout the district, and an appreciable quantity in the Closepet group of taluks. The tanks and kattes in this group have received from 2 to 3 months' supply. A general fall in the price of food stuffs is expected.
11. Public health generally good. Fever is reported to prevail in some parts of Kankanhalli, and small-pox in parts of Anekal and Doddballapur.
12. Cattle healthy. Dry fodder is sufficiently available for the time being. Water is available. In places where there has been no appreciable rain, wells are still resorted to. There has been no sinking of fresh wells during the week.

KOLAR.

8. Market fairly supplied, but prices are rising high.
9. There was no sowing during the week throughout the district. Vysakhi paddy is being harvested in some parts of Sidlaghatta.
10. Prospects of the season uncertain rains are anxiously expected. Food stocks are available in moderate quantity. Considerable difficulty is experienced for water for men and cattle.
11. Public health generally good. Small-pox is prevalent in parts of Kolar, Bowringpet, Bagepalli and Goribidnur.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri, Sira, Pavagada, Koratagere; and Turuvekere; cholum in Sira; and sugar-cane in Kunigal are being harvested. Sugar-cane in Maddagiri; cholum in parts of Gubbi, and nat-ragi in Pavagada are sown. Standing Vysakhi paddy, sugar-cane, and

nat-ragi crops in Gubbi and parts of Koratagere and Turuvekere are withering. The following is the estimated outturn of crops :—

Maddagiri—Paddy 4 to 12 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.

Pavagada—Paddy 4 annas.

Kunigal—Sugar-cane 6 annas.

Koratagere—Paddy 4 annas.

Turuvekere—Paddy 8 to 12 annas.

10. Prospects of the season not encouraging. Food stocks available for the present. Supply of water in wells is diminishing all over the district. Some small tanks and kattes in parts of the district have received a small supply of water by the recent rains.

11. Public health generally good, except that small-pox prevails in Tiptur.

12. Cattle are showing signs of deterioration. The older cattle are dying. In parts of Chiknayakanhalli, Sira, Gubbi and Tiptur, date leaves are used as fodder for cattle. Cholum and kadale pretty extensively cultivated in tank beds, provided some fodder for cattle. Temporary wells are being sunk in tank beds, as also drinking water wells all over the district. Water in State Forests is also made available wherever needed. The leaves of avenue trees are used as fodder wherever it is found necessary.

MYSORE.

8. Market well supplied.

9. Standing crops such as sugar-cane and cotton in parts of Chamrajnagar; sugar-cane in parts of Seringapatam and Nagamangala; cholum, castor, togari, tadagani and sessamum in parts of Gundlupet; cotton, mulberry and cholum in parts of Nanjangud; sugar-cane, mulberry and cholum in parts of T.-Narsipur; mulberry, sugar-cane, sessamum, cholum and togari in parts of Malvalli; and sugar-cane, black and green grams in parts of Krishnarajpete are reported to be pretty fair. Cholum, ragi, togari, etc., are being sown in most taluks.

10. Prospects of the season are encouraging. There was rain in all the taluks, but more rain is still required. There are none under relief. Food stock sufficient.

11. Public health good throughout, but small-pox is still prevailing in parts of Heggaddevankote.

12. Cattle healthy in all taluks, except in parts of Heggaddevankote, where they are still suffering from foot and mouth disease. Water and fodder are generally available.

HASSAN.

8. Markety fairly well supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Arsikere, Channarayapatna, Hole-Narsipur and Alur; and paddy in Hassan and Manjarabad and Arsikere are reported to be in a fair condition. Ragi in Hassan, and ragi and paddy in Arkalgud and Alur are being sown. Land is being prepared for sowing seeds. The probable outturn of standing crops in Hole-Narsipur is 8 annas.

10. Prospects of the season somewhat hopeful. More rain is wanted in all parts. There are none under relief. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in some parts of the district.

12. Cattle generally healthy, but foot and mouth disease exists in parts of Hole-Narsipur. Water and fodder generally available except in parts of Channarayapatna and Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.

9. Ploughing operations have commenced in all the taluks. More rains are necessary for seeds to sprout. Sugar-cane plants have revived.

10. Drinking water is available with difficulty. Men and cattle are suffering much on account of the failure of the monsoons.

11. Public health is generally good. Small-pox prevails in Sagar, Nagar and Tirthahalli, and cholera in Shikarpur.

12. The supply of fodder is limited. Cattle generally healthy.

KADUR.

8. Market fairly well supplied.

9. Ploughing is generally carried on in the district. Ragi in parts of Chikmagalur, and paddy in parts of Yedahalli are being sown. The standing crops of sugar-cane in parts of Tarikere and Yedahalli; kar-paddy in parts of Chikmagalur and Mudgere; and kar-paddy and sugar-cane in parts of Kadur and Koppa are in fairly good condition. The raiyats have in some parts commenced sowing seeds, but further operations are retarded for want of more showers.

10. Prospects of the season fair, but more rain is needed. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur, Kadur and Mudgere.

12. Cattle generally healthy. Water and fodder generally available.

CHITALDRUG.

8. Market well supplied.

9. The estimated outturn of crops harvested during the week is as follows:—

Challakere—Paddy 4 annas.

Hiriyur—Wheat and kadale 2 annas, cotton, cholum and togari 4 annas.

Paddy under kapile wells 8 to 10 annas.

It is reported that raiyats continue to be busy in preparing their lands for sowing purposes.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder procurable in limited quantities.

BANGALORE,

Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	15 to 16	

Agricultural operation—Ploughing.

Cattle are in good condition.

Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Manure is being collected on the fields. About 106 acres are reported to have been sown in Doddballapur and about five acres to have been harvested during the week. Vysakhi paddy is harvested in Anekal. There have been no agricultural operations in the other taluks.
10. Prospects of the season not very encouraging. Rain is badly wanted throughout the district. The price of food stocks continues to be steady.
11. Public health generally good. Fever prevails in parts of Hoskote and Kankanhalli and small-pox in parts of Doddballapur and Anekal.
12. Cattle generally good. Dry fodder and water are sufficiently available for the present. It is reported that in Doddballapur well sinking is stopped for the present in expectation of rain.

KOLAR.

8. Market fairly supplied, but prices are rising high.
9. There was no sowing during the week throughout the district. Vysakhi paddy is being harvested in some parts of Sidlaghatta and Bagepalli and cholam in the Bagepalli Taluk.
10. The prospects of the season are by no means encouraging. Rains are anxiously expected. Food stocks are available in moderate quantities.
11. Public health generally good.
12. Cattle healthy except in some parts of Bagepalli where they are suffering from foot and mouth disease. Considerable difficulty is experienced for water for men and cattle.

TUMKUR.

8. Market well supplied.
9. Paddy in Maddagiri, Sira, Pavagada, Kunigal, Koratagere and Turuvekere; cholam in Sira; and sugar-cane in Gubbi, Tiptur, and Kunigal are being harvested. Nat-ragi and cholam are sown in Pavagada. Standing sugar-cane crop in Tumkur; sugar-cane, paddy, nat-

ragi and cholum in parts of Sira ; paddy and sugar-cane in Gubbi, and in parts of Tiptur are withering. Elsewhere they are fair. The following is the estimated outturn of crops :—

Maddagiri—Paddy 4 to 12 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.

Pavagada—Paddy 4 annas.

Kunigal—Paddy 4 annas, sugar-cane 6 annas.

Koratagere—Paddy 4 annas.

Turuvekere—Paddy 2 to 8 annas.

10. Prospects of the season not encouraging. Food stocks are available for the present. Supply of water in wells is diminishing all over the district. Some tanks and kattes in parts of the district have received a small supply of water by the recent rains. 139 coolies are engaged in tank works started as ordinary expansions of public works in the Maddagiri Taluk.

11. Public health generally good, except that small-pox prevails in parts of Tiptur. It is subsiding in Gubbi.

12. Cattle are deteriorating in condition and the older ones are dying. In Maddagiri, Chiknayakanhalli, Gubbi and Tiptur, date leaves are used as fodder for cattle. The leaves of avenue trees also are used as fodder wherever it is found necessary. Foot and mouth disease reported to prevail in the Tiptur Taluk is subsiding in Honnavalli and is still raging in Nona-vinkere.

MYSORE.

8. Market well supplied.

9. Standing crops such as cholum, sessamum, togari, castor and sugar-cane in parts of Chamrajnagar ; sugar-cane in parts of Seringapatam and Nagamangala ; cholum, castor, togari and sessamum in parts of Gundlupet ; castor, mulberry, sugar-cane, cholum, togari and sessamum in parts of Nanjangud ; sugar-cane, mulberry and cholum in parts of T.-Narsipur ; sugar-cane, black and green grams in parts of Krishnarajpete are reported to be fairly good. They are reported to be withering for want of rain in parts of Hunsur, T.-Narsipur, Yedatore and Gundlupet. Cholum in parts of Seringapatam, T.-Narsipur and Mandya ; cholum, sessamum, togari, tadagani and castor in parts of Krishnarajpete, and cholum and sessamum in parts of Nagamangala are being sown.

10. Prospects of the season have improved, but the standing crops are in urgent need of rain which is anxiously awaited. Food stocks are sufficient for the present.

11. Public health generally good, but small-pox is still prevailing in parts of Heggaddevankote.

12. Cattle healthy in all parts except Heggaddevankote and Malvalli where they are reported to be suffering from foot and mouth disease. Water and fodder are available for the present.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Channarayapatna, Hole-Narsipur and Alur, and paddy in Manjarabad are in a fair condition. Paddy and sugar-cane are withering in Arsikere for want of rain. Ragi, paddy, etc., sown in Arkalgud, Hole-Narsipur and Hassan are just springing up. The outturn of Vysakhi paddy in Hassan is estimated to be from 8 to 12 annas and of standing crops in Hole-Narsipur to be 8 annas.

10. Prospects of the season somewhat hopeful. More rain is wanted in all parts. Food stocks sufficient for the present.

11. Public health generally good. Small-pox is reported to be prevalent in some parts of the district.

12. Cattle generally healthy, but foot and mouth disease exists in parts of Manjarabad and Hole-Narsipur. Water and fodder are generally available except in parts of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high. Rice is being imported from the Madras Presidency to meet the insufficiency in Shimoga and Kumsi.

9. Ploughing is in progress in tracts where rain fell. Kar-paddy under the Sulekere tank in Channagiri, and in the Sagar and Nagar Taluks, and sugar-cane in Sagar and Nagar are fair where water is still available. In other localities they are withering, especially in the malnad. Paddy seedlings in the malnad require rain. Arecanut trees are reported to be affected in parts of Sagar for want of moisture.

10. Rainfall is insufficient in Shikarpur and the malnad.

11. Public health generally good. Small-pox and cholera prevail in parts of Shikarpur and Sorab.

12. Supply of fodder is limited everywhere except in Nagar and Tirthahalli. Pasture that has newly sprung up is eaten up by white-ants in some parts of Shimoga. The small supply of water received by some tanks during the recent rains is drying up, and the scarcity of water is increasing.

KADUR.

8. Market fairly well supplied.

9. Ploughing continues in Tarikere, Kadur and Koppa. Sugar-cane in parts of Tarikere and paddy and ragi in parts of Mudgere are being sown. Standing sugar-cane crops in parts of Tarikere, Yedahalli, Chikmagalur, Kadur and Koppa and kar-paddy in parts Koppa are in fairly good condition. Kar-paddy in parts of Chikmagalur is being harvested. Ploughing and sowing are much delayed for want of rain in the district, and the ragi seedlings in parts where they have sprung up are badly in need of rain. In several parts of the malnad taluks paddy is not sown for want of sufficient water.

10. Prospects of the season fair, but more rain is urgently needed. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur, Tarikere and Mudgere.

12. Cattle generally healthy, but their condition is poor. Anthrax is reported to prevail in some villages of the Amrithapura hobli in the Tarikere Taluk. Water and fodder are generally available. Water-supply is scanty in parts of Chikmagalur, Kadur and Tarikere and date leaves are used as fodder in parts of Kadur.

CHITALDRUG.

8. Market well supplied.

9. Harvesting operations are going on a very small scale. The outturn is as follows:—

Challakere—Paddy under kapile wells 8 annas.

Hiriyur—Cotton, ballar, togari 4 annas; ragi 2 annas; Ragi under kapile wells 8 to 10 annas; Paddy under kapile wells 8 to 10 annas.

Davangere—Paddy 8 annas.

Further ploughing operations have been stopped. More rain is anxiously looked for throughout the district.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder procurable in limited quantities.

BANGALORE, }
30th May 1906. }

B. K. VENKATA VARADA IYENGAR,
Secy. to the Govt. of H. H. the Maharaja of Mysore,
Gen. & Rev. Dept.

Table showing the Monthly and Annual Rain-fall at Rain-fall Recording Stations in the State of Mysore during the year 1905.

LIST OF PRIZES TO BE AWARDED AT THE HORTICULTURAL SHOW TO BE HELD AT THE LAL-BAGH ON 2ND AUGUST 1906.

CLASS I.—PERENNIAL FLOWERS IN POTS.

No.	Description	Rs.
1.	Best Standard Roses, in six varieties and six pots	8
2.	Second best do in do do	5
3.	Best Dwarf Roses in do do	6
4.	Second best do in do do	4
5.	Best General Collection of Roses not including the above; not less than twelve pots and not exceeding twenty	15
6.	Second best do do do	10
7.	Third best do do do	5
8.	Best new Roses, exhibited for the first time	8
9.	Second best do do	5
*10.	Best General Collection of Foliage Plants, without duplicates	25
*11.	Second best do do	15
*12.	Best General Collection of Ferns, without duplicates	25
*13.	Second best do do	15
14.	Best Collection of Palms, one plant of each species	8
15.	Best Group of Aralias and Panax, one plant of each species	6
16.	Best Caladiums, including only one plant of each variety	7
17.	Second best do do do	5
18.	Best Collection of Gladioli, not less than six varieties	6
19.	Second best	4
20.	Best Collection of Anthuriums including only one plant of each variety	8
21.	Best Collection of Dracenas do do do	8
22.	Best New Geraniums, exhibited for the first time; one pot of each	7
23.	Best Double Geraniums, in six or more varieties, not exceeding 25 pots	6
24.	Second best do do do	4
25.	Best Single Geraniums, in eight or more varieties, not exceeding 25 pots	6
26.	Second best do do do	4
27.	Best Ivy-leaved Geraniums, double or single, not exceeding 25 pots	5
28.	Best Dahlias	7
29.	Second best Dahlias	5
30.	Best Achimenes, not less than twelve varieties	6
31.	Second best do do	3
32.	Best Tuberous-rooted Begonias, not less than eight varieties	8
33.	Second best do do	5
34.	Best Perennial Phlox, in three or more varieties	5
35.	Second best do do	3
36.	Best Pansies, in eight or more varieties, but not exceeding 25 pots	6
37.	Second best do do do	3
38.	Best Carnations, in three or more varieties	5
39.	Second best do do	3
40.	Best Cyclamen	6
41.	Best Gloxinias	5
42.	Best Fuchsias in four or more varieties	6
43.	Best Double Petunias, in four or more varieties	4
44.	Second best do do	5
45.	Best Verbenas, in six or more varieties, but not exceeding 15 pots	3
46.	Second best do do do	7
47.	Best Chrysanthemums, in eight or more varieties, but not exceeding 25 pots	5
48.	Second best do do do	7
49.	Best Cannas in twelve or more varieties	5
50.	Second best do do	6
51.	Best Novelties in Perennials, exhibited for the first time, one plant of each	
Total		353

CLASS II.—ANNUAL FLOWERS IN POTS.

*1.	Best General Collection of Annuals in flower	8
*2.	Second best do do	5
3.	Best Double Sunflower	3
4.	Best Asters, in six or more varieties	6
5.	Second best do do	4
6.	Best Nasturtiums, in six or more varieties	4
7.	Second best do do	2
*8.	Best Balsams, in six or more varieties	4
9.	Second best do do	2
10.	Best Phlox Drummondii, in ten or more varieties limited to fifty pots	6
11.	Second best do do	4
12.	Best Single Petunias, in six or more varieties	5
13.	Second best do do	3
14.	Best Lobelia	3
15.	Best Salpiglossis	4

36.	Best Budi Kumbalakayi	2
37.	Best Collection of Country Vegetables in varieties other than those mentioned above	5
Total		146
Grand Total		735

General Conditions.

1. Prizes marked by an asterisk are open to the whole Province, as also to the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 p. m. on the day previous to the Show.

3. Cut Flowers may be delivered up till 2 p. m. on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name are disqualified.

11. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 p. m. on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show Executive, subject to the approval of the same.

*The following Rules for awarding Medals at the Horticultural Shows
are hereby notified to the public:*

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half yearly horticultural shows, subject to the following conditions:—

- (1) The medals will consist of a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.
- (2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.
- (3) The following exhibitors will be qualified for the award of a medal:—
 - (a) The exhibitor of the best all-round exhibit in the appropriate class or classes taking the two shows of the calendar year together.
 - (b) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.
 - (c) The exhibitor of any specially meritorious novelty.
- (4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.
- (5) No exhibitor will be qualified to receive a medal who is not the *bona fide* cultivator of his exhibit, or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor, who has merely purchased fruit or vegetables exhibited will be eligible.
- (6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

J. CAMERON,
Supt., Govt. Gardens.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	15 to 16	

Agricultural operation—Ploughing, but this is not progressing for want of rains.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition, except that sessamum in some parts of Kankanhalli and sugar-cane in some parts of Devanhalli are reported to be suffering for want of water. In parts of Nelamangala, Kankanhalli and Anekal, ploughing is begun. In parts of Anekal Vysakhi paddy is reported to be harvested, and in some parts of Closepet sowing is commenced. Sugar-cane and paddy in Doddballapur and sugar-cane in Bangalore are harvested.
10. Prospects of the season moderate. Rain is wanted throughout the district.
11. Public health generally good. Fever prevails in Hoskote town, and small-pox in some parts of Hoskote, Anekal and Devanhalli.
12. Cattle generally healthy. Dry fodder and water are available for the present. A well is reported to have been sunk in the tank bed of Thimmasandra in the Doddballapur Taluk.

KOLAR.

8. Market fairly supplied, but prices are high.
9. There was no sowing during the week throughout the district. Vysakhi paddy is being harvested in some parts of Sidlaghatta and Bagepalli and cholam in the Bagepalli. Sugar-cane is reported to be withering in Kolar, Mulbagal, Bagepalli and Gudibanda.
10. Prospects of the season not encouraging. Rains are anxiously expected. Food stocks are available in moderate quantities.
11. Public health generally good.
12. The condition of cattle is generally poor. The supply of fodder is considerably diminishing, and pasture is not available except in very few parts. In some parts of Bagepalli, foot and mouth disease is subsiding in parts of Bagepalli. Difficulty for water is experienced.

TUMKUR.

8 Market well supplied.

9. Sugar-cane in Tumkur and Gubbi; paddy in Maddagiri, Sira, Pavagada, Koratagere and Turuvekere, and cholum in Sira are being harvested. Cholum in Gubbi and nat-ragi in Pavagada are sown. Standing sugar-cane crop in Tumkur; sugar-cane and paddy in parts of Maddagiri, Sira, Gubbi, Koratagere and Turuvekere are withering. Elsewhere they are in fair condition. The probable outturn of crops harvested is as follows:—

Maddagiri—Paddy 4 to 12 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.

Pavagada—Paddy 2 annas.

Turuvekere—Paddy 4 to 8 annas.

10. Prospects of the season are not encouraging. Food stocks are available for the present. Supply of water in wells is diminishing all over the district. In Maddagiri and Turuvekere the number of people employed on ordinary expansion of public works is 139 and 40 respectively.

11. Public health generally good, except that fever is prevalent in parts of Kunigal.

12. Cattle are deteriorating in condition. In Maddagiri, Chiknayakanhalli and Sira, date leaves are used as fodder for cattle. The leaves of avenue trees also are used as fodder wherever it is found necessary.

MYSORE.

8. Market well supplied.

9. Sugar-cane and cholum in parts of Seringapatam; cholum, til, togari, castor, ballar, mulberry, cotton, ragi, kar-paddy, sugar-cane, black gram, and kulthi in parts of Nanjangud; cholum, castor, til, ragi, togari and ballar in parts of Gundlupet; sugar-cane, mulberry, cholum, til and togari in parts of Malvalli; sugar-cane, black and green grams, cholum, til, tadagani and togari in parts of Krishnarajpete, and sugar-cane in parts of Nagamangala are reported to be fair. The standing dry crops are reported to be withering for want of rain in parts of Chamrajnagar, Yedatore, Heggaddevankote, T.-Narsipur and Hunsur. Harka is being sown in parts of Malvalli. In some villages of the Krishnarajpete Taluk locusts are reported to be damaging the crops.

10. Prospects of the season not bad. But standing crops are in urgent need of rain, which is anxiously awaited. Food stocks are sufficient for the present.

11. Public health generally good, but small-pox still prevails in parts of Heggaddevankote.

12. Cattle healthy in all parts, except in parts of Heggaddevankote and Malvalli, where they are reported to be suffering from foot and mouth disease. Water and fodder are available for the present.

HASSAN.

8. Market fairly supplied. Prices high.

9. Sugar-cane in Hassan, Belur, Channarayapatna, Hole-Narsipur and Alur, and paddy in Manjarabad are reported to be in fair condition. Paddy and sugar-cane are withering in Arsikere for want of rain. The outturn of standing crops in Hole-Narsipur is estimated at 8 annas.

10. Prospects of the season somewhat hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox is reported to still exist in parts of Hassan, Manjarabad, Arsikere, Channarayapatna and Arkalgud.

12. Cattle generally healthy, but foot and mouth disease exists in parts of Manjarabad and Hole-Narsipur. Water and fodder are generally available, except in parts of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.
9. Kar-paddy is being harvested under the Sulekere tank and in parts of Sagar. Paddy is sown in parts of Shimoga, Sorab, Sagar and Nagar, but the young plants are much in need of rain. Sugar-cane is in a fair condition in parts of Sagar, Nagar and Sorab, where water is still available; elsewhere it has withered. Arecanut trees are reported to have withered in parts of Sagar for want of moisture. Agricultural operations are slow in Shikarpur and over a great part of Honnali.
10. Rain is anxiously awaited everywhere. Insufficiency of food stock is not yet perceptibly felt in all the taluks. Rice is being imported to Shimoga and Kumsi from the Madras Presidency.
11. Public health is generally good. Small-pox prevails in parts of Shimoga, Tirthahalli, Sagar, Sorab and Kumsi, and cholera in parts of Shikarpur, Honnali and Shimoga.
12. Supply of fodder is very limited in Honnali, Shikarpur and Sorab. In other taluks it is available to some extent. Scarcity of water is on the increase everywhere.

KADUR.

8. Market fairly well supplied.
9. Ploughing is carried on in Koppa and Tarikere. Standing sugar-cane in parts of Tarikere, Chikmagalur, Kadur and Koppa, and kar-paddy in parts of Koppa are in fairly good condition. Arecanut in Koppa is in poor condition for want of rain. Kar-paddy is being harvested in Chikmagalur. Ploughing and sowing are much delayed for want of rain, but the rainfall on the 3rd and the 4th instant at Chikmagalur has somewhat improved the condition and enabled the raiyats to sow their fields, and the seeds already sown have germinated.
10. Prospects of the season fair, but more rain is needed throughout. Food stocks are available and sufficient for the present.
11. Public health generally good, except small-pox prevails in parts of Chikmagalur, and Mudgere. Plague has re-appeared at Chikmagalur.
12. Cattle generally healthy. Anthrax reported to prevail in some villages of the Amrathapur hobli is now reported to be subsiding. Water and fodder are generally available. Fodder is reported to be wanting in parts of the Bidare hobli in the Kadur Taluk, and on that account the condition of cattle there is said to be very poor. Date leaves are being used as fodder. Supply of water is scanty in parts of Chikmagalur, Kadur and in the malnad.

CHITALDRUG.

8. Market well supplied.
9. There have been no harvesting operations during the week. More rain is anxiously awaited in all the taluks.
10. Prospects of the season fair. Food stocks available.
11. Public health good.
12. Cattle healthy. Water and fodder is procurable in limited quantities.

BANGALORE,
6th June 1906.

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Dept.

LIST OF PRIZES TO BE AWARDED AT THE HORTICULTURAL SHOW TO BE HELD AT THE LAL-BAGH ON 2ND AUGUST 1906.

CLASS I.—PERENNIAL FLOWERS IN POTS.

36.	Best Budi Kumbalakayi	2
37.	Best Collection of Country Vegetables in varieties other than those mentioned above	5
Total		146
Grand Total		735

General Conditions.

1. Prizes marked by an asterisk are open to the whole Province, as also to the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 P. M. on the day previous to the Show.

3. Cut Flowers may be delivered up till 2 P. M. on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name are disqualified.

11. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 P. M. on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show Executive, subject to the approval of the same.

*The following Rules for awarding Medals at the Horticultural Shows
are hereby notified to the public.*

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half yearly horticultural shows, subject to the following conditions :—

- (1) The medals will consist of a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.
- (2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.
- (3) The following exhibitors will be qualified for the award of a medal :—
 - (a) The exhibitor of the best all-round exhibit in the appropriate class or classes taking the two shows of the calendar year together.
 - (b) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.
 - (c) The exhibitor of any specially meritorious novelty.
- (4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.
- (5) No exhibitor will be qualified to receive a medal who is not the *bona fide* cultivator of his exhibit, or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor, who has merely purchased fruit or vegetables exhibited will be eligible.
- (6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

J. CAMERON,
Supt., Govt. Gardens.

Note—Rice (husked)—Oryza Sativa.

Ragi—Eleusine Corocana.

Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare.

Kadale—(Bengal gram) Cicer Arietinum.

* Report not received.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	15 to 16	

Agricultural operation—Ploughing.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition, except in Closepet where sugar-cane is reported to be drying for want of sufficient water. Ploughing is carried on throughout the district. In Channapatna and Closepet the red soil lands are reported to be still hard to plough. In Doddballapur about three acres of sugar-cane are reported to have been harvested, and Vysakhi paddy in some parts of Hoskote. Haraka is reported to have been sown in some parts of Hoskote. The outturn of harvests is estimated to be between 4 and 8 annas.
10. Prospects of the season hopeful. Though the rainfall gauged in the Hoskote and Doddballapur stations is small, pretty good rains are reported to have fallen in these taluks, and the tanks have received some supply of water. In Kankanhalli three to four months' supply of water is reported to have been received in big tanks and about a month's supply throughout the Channapatna Taluk. Insufficiency of rainfall is complained of only in the Magadi Taluk. More rain is wanted in Channapatna and Closepet.
11. Public health generally good. Fever prevails in some parts of Hoskote and Doddballapur, and small-pox in some parts of Anekal and Devanhalli.
12. Cattle generally healthy, except in Devanhalli and Closepet, where they are reported to be not in a satisfactory condition. Fodder is sufficiently available throughout the district except in Devanhalli and Closepet, where green leaves are used as fodder to a certain extent. Water is available. Two wells are reported to have been sunk in Doddballapur.

KOLAR.

8. Market well supplied. Prices high.
9. Same is being sown in Mulbagal. Maize is being harvested in Kolar and paddy in parts of Sidlaghatta and Bagepalli.
10. Prospects of the season are somewhat hopeful. Food stocks are available in moderate quantities.
11. Public health generally good.
12. The condition of cattle is generally poor. Supply of fodder is considerably diminishing. The recent showers may help the springing up of pasture. Difficulty for water is still felt.

TUMKUR.

8 Market well supplied.

9. Vysakhi paddy in Maddagiri, Sira, Kunigal, Koratagere and Turuvekere; cholum in Sira, and sugar-cane in Gubbi are being harvested. Irrigated ragi in Maddagiri and Pavagada; cholum in Sira, Gubbi and Turuvekere; green gram, paddy and haraka in Gubbi are sown. Sugar-cane crops in Tumkur; paddy and sugar-cane in Maddagiri; paddy, cholum, irrigated ragi and sugar-cane in Sira; irrigated ragi in Pavagada, and paddy and sugar-cane in Kunigal, Koratagere and parts of Turuvekere are in fair condition. In Gubbi, Tiptur and in parts of Turuvekere they are withering. Coconut trees in parts of Tiptur are said to be withering. The probable outturn of crops harvested is as follows:—

Maddagiri—Paddy 8 to 12 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.

Kunigal—Paddy 8 annas.

Turuvekere—Paddy 4 to 8 annas.

10. Prospects of the season are not encouraging. Food stocks are available for the present. Supply of water in wells is diminishing all over the district. In Maddagiri and Turuvekere the number of people employed on ordinary expansion of public works is 126 and 105, respectively.

11. Public health generally good, except that small-pox is prevalent in parts of Gubbi and fever and small-pox in parts of Tiptur.

12. Cattle are deteriorating in condition. Foot and mouth disease prevails in parts of Tiptur. In Maddagiri, Chiknayakanhalli, Sira and Tiptur date leaves are used as fodder for cattle. The leaves of avenue trees also are used as fodder wherever it is found necessary. The recent rains have provided some water for men and cattle in parts of the district.

MYSORE.

8. Market well supplied.

9. Standing crops, such as cholum, til, togari, castor and sugar-cane in parts of Chamrajnagar; sugar-cane, cholum, til, black and green grams in parts of Seringapatam; ragi and cholum in parts of Yedatore; cholum, castor, til, ragi, togari and ballar in parts of Gundlupet; cholum, togari, ballar, castor and cotton in parts of Nanjangud; cholum and til in parts of T.-Narsipur; sugar-cane, mulberry, cholum, til and togari in parts of Malvalli, and sugar-cane and black and green grams in parts of Krishnarajpete, are reported to be pretty fair. They are reported to be withering for want of rain in parts of Heggaddevankote, T.-Narsipur and Nagamangala. Black and green grams are being harvested in parts of Seringapatam.

10. Prospects of the season not bad. But standing crops are in urgent need of rain, which is anxiously awaited. Food stocks are sufficient for the present.

11. Public health generally good, but small-pox still prevails in parts of Heggaddevankote.

12. Cattle healthy in all parts, except in parts of Heggaddevankote, where they are reported to be still suffering from foot and mouth disease. Water and fodder generally available. In Kowlandi Hobli of Nanjangud, cattle are fed on date and other leaves for want of fodder.

HASSAN.

8. Market fairly supplied. Prices high.

9. Sowing is going on in all parts. Sugar-cane in Hassan, Belur, Channarayapatna, Hole-Narsipur and Alur, and paddy in Manjarabad are reported to be in fair condition. The outturn of standing crops in Hole-Narsipur is estimated at 8 annas.

10. Prospects of the season hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox is reported to still exist in parts of Hassan, Manjarabad, Arsikere and Channarayapatna.

12. Cattle generally healthy, but foot and mouth disease exists in parts of Manjarabad and Hole-Narsipur. Water and fodder are generally available except in parts of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.
9. Kar-paddy has been completely harvested under the Sulekere tank in the Channa-giri Taluk, and harvesting is going on in Sagar and Nagar. Agricultural operations are in progress in all parts where rainfall is sufficient. Paddy is being sown in Sorab, Sagar, Nagar and Tirthahalli. Some good has been done to sugar-cane by the recent rains in Sorab, Sagar and Nagar, and the arecanut gardens in Sagar are reviving in some localities. Sugar-cane in Shimoga requires rain.
10. More rain is wanted in all the taluks. Food stocks are somewhat insufficient in Shimoga, Shikarpur, Sorab, Honnali and Kumsi. Rice continues to be imported from the Madras Presidency into the several parts of the district.
11. Public health is generally good. Cholera prevails in parts of Shimoga, Shikarpur Honnali and Sorab, and small-pox in parts of Sagar, Sorab and Kumsi.
12. Supply of fodder is limited in Honnali, Shikarpur and Sorab. Pasture is springing up in parts where there has been rain and in the *malnad*. Scarcity of water has not yet materially diminished.

KADUR.

8. Market fairly well supplied.
9. Ploughing is carried on throughout the district. Ragi, paddy and black gram in Chikmagalur; paddy in Koppa and Yedahalli; paddy and gingelly in parts of Tarikere, and coriander and gingelly in a few villages of Kadur are being sown. Standing sugar-cane crops in parts of Chikmagalur, Yedahalli, Kadur, Tarikere and Koppa, and kar-paddy in parts of Koppa are in fairly good condition. Sugar-cane is being harvested in Kadur.
10. Prospects of the season fair, but more rain is needed. Food stocks are available and sufficient for the present.
11. Public health generally good, except that small-pox prevails in parts of Chikmagalur and Tarikere.
12. Cattle generally healthy. Water and fodder generally available.

CHITALDRUG.

8. Market well supplied.
9. It is reported that the raiyats are busy in preparing lands for sowing in all taluks.
10. Prospects of the season fair. More rain is anxiously looked for throughout the district. Food stocks available.
11. Public health good.
12. Cattle healthy. Water and fodder procurable in limited quantities.

BANGALORE,
13th June 1906. }

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Dept.

Grand Total		735

General Conditions.

1. Prizes marked by an asterisk are open to the whole Province, as also to the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned, four days prior to the Show, what number of pots they intend to enter and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 p. m. on the day previous to the Show.

3. Cut Flowers may be delivered up till 2 p. m. on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes, and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona fide* the produce of, or have been raised by, the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name are disqualified.

11. Exhibitors will not be permitted to remove their exhibits until the Show is closed, and gardeners and others found offering articles for sale before 6 p. m. on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show Executive, subject to the approval of the same.

*The following Rules for awarding Medals at the Horticultural Shows
are hereby notified to the public.*

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half yearly horticultural shows, subject to the following conditions :—

- (1) The medals will consist of a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.
- (2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.
- (3) The following exhibitors will be qualified for the award of a medal :—
 - (a) The exhibitor of the best all-round exhibit in the appropriate class or classes taking the two shows of the calendar year together.
 - (b) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.
 - (c) The exhibitor of any specially meritorious novelty.
- (4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.
- (5) No exhibitor will be qualified to receive a medal who is not the *bona fide* cultivator of his exhibit, or the actual occupant of the garden in which the exhibit was raised, *e.g.*, no contractor, who has merely purchased fruit or vegetables exhibited will be eligible.
- (6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

J. CAMERON,
Supt., Govt. Gardens..

1887ம் வருஷத்திய பெங்களுர் வாடகைவண்டி ரெகுலேஷன் 3வது பாறாவின்படியும் பின்னும் மைசூர்சர்காரால் 1906(ஸ்) ஜனவரியி 20உய 759 (181-05)-4ம் நம்பர் ப்ரெசிடிங்ஸ்தால் மஞ்சு ரூப்யிருக்கிறபடியும் கிடைத்திருக்கும் அதிகாரத்தினால் முனிசிபல் கமிஷனவர்கள் பெங்களுர் சிடி முனிசிபாலிடி எல்லைக்குள்ளாக இருக்கும் வாடகைவண்டிகள் விஷயமாய் ஏற்பாடும் நிபந்தனையும் செய்வதற்காக அடியில்கண்டிருக்கும் புதுப்பித்தியருல்களின் மசூதாலை 1871ம் வருஷத்திய பெங்களுர் முனிசிபல் ரெகுலேஷன் 227வது செக்ஷன்படி எல்லாருக்கும் தெரிவிப்பதற்காக விளம்பரம் செய்திருக்கிறது—என்னவென்றால் இந்த ரெகுலேஷன் 1906(ஸ்) சூலைமீ 1உ முதல் ஜாரியில் வற்ப்படும்.

1. ஒவ்வொரு வாடகைவண்டி சொந்தக்காரரும் அந்த வண்டிக்காக முனிசிபாலிடியிலிருந்து ஒரு லைசென்சு பெற்றுக்கொள்ளவேண்டியது.

2. அவ்வித லைசென்சை கொடுப்பதற்குமுன்னே வண்டியையும் குதிரை அல்லது குதிரைகளையும் ப்ரெசிடெண்ட்ராவது வைஸ் ப்ரெசிடெண்ட்ராவது அவர்களால் இந்த வேலைக்காக நேமிக்கப்பட்ட மற்றொரு ஆபீசராவது பரீக்ஷித்துப்பார்த்து பசந்து செய்தாகவேண்டும். அவர்கள் அந்த வண்டி எந்தக்களாசுக்கு சேர்த்துத்தென்றும் தீர்மானிப்பார்கள்.

3. லைசென்சுபெற்ற வாடகைவண்டிகளுக்கு மூன்றுக்கிளாசுகள் ஏற்பாடாயிருக்கிறது.

முதல்களாசு—ஜட்காக்களும் மாடுகளாவது தட்டுக்குதிரைகளாவது கட்டப்படும் வண்டிகளும் தவிர மற்றவிதமான எல்லா வாடகை வண்டிகள்.

ரெண்டாம்களாசு—தட்டுக்குதிரைகள் கட்டப்படும் ரெண்டிசக்ரவண்டிகள்.

மூன்றாம்களாசு—மாடுகள் இழுக்கும் வண்டிகள்மற்றும் இந்தரூல்களின் நிபந்தனைகளுக்கும் இதுனடியிலிருக்கும் உடன்படிக்கைகளுக்கும் உட்படத்தகுந்ததாய் சொந்தக்காரர்களுக்கு லைசென்சுகள் கொடுக்கப்படும்.

(1) வண்டி நல்ல ஏற்பாடாயும் எல்லாபாகங்களிலும் பழுது பார்த்ததாயும் இருக்கவேண்டும்.

(2) முதல்களாசு ரெண்டாம்களாசு வண்டிகளுக்கு ரெண்டிலாந்தர்களும் மூன்றாம்களாசு வண்டிக்கு ஒரு லாந்தரும் வைக்கப்பட்டு லாந்தர்களுக்கு வண்டி லைசென்சின்ரம்பரைப் போட்டிருக்கவேண்டும்.

(3) வண்டியை எந்தக்களாசில்சேர்த்து லைசென்சு கொடுக்கப்பட்டிருக்கிறதோ அந்தக்கிளாசுக்காக ஏற்பட்டிருக்குர் உயரத்துக்குக்குறைவில்லாத குதிரைகள் கட்டப்பட்டிருக்கவேண்டும். அதாவது 14-2, பிடி உயரம் முதல்கிளாசுக்கும் 11-3, பிடி ரெண்டாம்கிளாசுக்கும் இருக்கவேண்டியதல்லாமல் மூன்று வயதுக்குக்குறைவாயிருப்பதை உபயோகப்படுத்தக்கூடாது.

4. வாடகைவண்டிகளுக்கும் ஓட்டுகிறவர்களுக்கும் கொடுக்கப்படும் லைசென்சுகளை இந்த ரூல்களுக்குப்பின்னால் சேர்த்திருக்கும் நமூனாபற்காரம் கெட்டிக்காகித்ததன்பேரில் அச்சப்பதிப்பிக்கப்படும்.

5. ஒவ்வொருவண்டி லைசென்சுக்கும் வருஷக்கணக்காய் செலுத்தவேண்டிய பணத்தொகை என்னவென்றால் முதல்கிளாசுக்கு ரூபாய் 9 ரெண்டாம்கிளாசுக்கு ரூபாய் 4 மூன்றாம்களாசுக்கு ரூபாய் 2.

ஒவ்வொருவண்டி ஓட்டுகிறவனும் அவனுடைய பில்லைக்காக ரூபாய் 1 வரிசெலுத்தவேண்டும்.

ஓட்டுகிறவனுடைய லைசென்சை புதிதாய் கொடுப்பதற்கும் பிற்பாடு திரும்பிமாற்றிக்கொடுப்பதற்கும் சார்ஜவரியில்லை.

6. முனிசிபல் ஆபீசிலிருந்து லைசென்சை பெற்றுக்கொண்டஉடனே, லைசென்சுக்காற்றர் ஒரு பலகையில்தன்னுடைய பேரையும் லைசென்சு நம்பரையும் அச்சப்பதித்து, தன்னுடைய ஸ்தலத்தில் மாட்டி வைக்கவேண்டும்.

7. லைசென்சு பெற்றவண்டிகளுக்கு உபயோகிக்கப்படும் குதிரைகள் வண்டி இழுக்கப்பூர்த்தியாய் பழக்கப்பட்டும் நல்லஸ்திதியாயும் எல்லாஜனங்களுக்கும் உபயோகத்துக்குத் தகுந்ததாயும் காயங்கள் இல்லாமலும் இருக்க வேண்டும். குதிரை சாமான்கள் சம்பூர்ணமாயும் உபயோகித்ததகுந்ததாயும் இருக்கவேண்டும். ஆனால் மூன்றாவதுக்களாசு வண்டிகளுக்கு இந்த நிபந்தனை இல்லை. கோச் வண்டிக்காரர்கள் சாதாரணமாய் வைத்திருக்கிறமாதிரி ஒவ்வொரு வண்டி ஓட்டுகிறவனுக்கும் ஒரு கொரடா இருக்கவேண்டும். கோல்களையாவது தோல் வார்களையாவது உபயோகிக்கக்கூடாது.

8. முதல்களாச வாடகை வண்டிகளுக்கு சாதாரணமாய் உபயோகிக்கப்படும் காண்டில் வத்திகளை ஏற்றிய ரெண்டு லார்தர்களை வைத்திருக்கவேண்டியது. ரெண்டாவது மூன்றாவதுக்ளாச வண்டி லார்தர்களுக்கு காண்டில் வத்திகளுக்கு பதிலாய் எண்ணையை உபயோகிக்கலாம். ஆனால் வெளிச்சம் பிரகாசமாயிருக்கவேண்டும் லார்தர்கள் தகுந்தவழிபாடாயும் காற்றடைக்கமாயும் இருக்கவேண்டும் மூன்றாவதுக்ளாச வாடகை வண்டியை ஓட்டும்போது வண்டிக்கு வலதுகைக்கமாயும் மற்றவாடகை வண்டிகளுக்கும் கட்டும் வெளிச்சங்கள் மாதிரியாகவும் ஒத்தை லார்தரைக்கட்டியிருக்கவேண்டும்.

9. வண்டிகளை நன்றாய் பழுது பார்த்து மகமான்கள் கதவுகள் சென்னல்கள் பத்திரமாயும் வைத்திருக்கவேண்டும். ப்றெசிடெண்டருக்கு வைச்சுப்றெசிடெண்டருக்கு அல்லது அவர்கள் இந்தக்காரியத்திற்காக நியமித்திருக்கும் உத்யோகஸ்தருக்கு அவசியமாய் தோன்றும் சமயங்களில் வண்டிகளுக்கு புது வன்னம் போடவேண்டும்.

10. இந்தநூல்களின் நிபந்தனைகளை நடப்பிக்கிறதற்காகப்றெசிடெண்டராவது வைச்சுப்றெசிடெண்டராவது இந்தவேலைக்காக அவர்களால் நியமிக்கப்படும் வேறே எந்த ஆபீசராவது எச். பி. சி. ஏ. இலாகா ஆபீசர் லாவது போலீஸ் இன்ஸ்பெக்டர்களாவது சூர்யோதயம் சூர்யாசம்மயத்துக்கு நடுவில் எந்தகாலத்திலாவது லைசென்சு பெற்ற வண்டிகள் ப்றாணிகள் சாமான்கள் அத்துடன் உபயோகிக்கப்பட்ட வஸ்துக்கள் வைத்திருக்கும் ஸ்தலங்களில் ப்றவேசிக்க அதிகாரமுண்டு. அவர்கள் வந்துபார்க்கும்போது எஜமானர் அல்லது அவர் ரஜென்டி எல்லா அனுகூலமும் செய்யவேண்டும்.

11. இந்தநூல்களின்படி குடுக்கப்படும் லைசென்சு அதில் கண்டிருக்கும் ஸர்கார் வரஷம்முடிய அம் செல்லக்கூடும். ஆனால் எஜமானராவது அவர் எஜெண்டாவது லைசென்சு உடன்படிக்கைகளை மீறிநடந்ததாய் ப்பு ருசு வானபோது முனிசிபல் கமிஷன் ப்றெசிடெண்டருடைய அல்லது வைச்சுப்றெசிடெண்டருடைய பத்திரவின்பேரில் லைசென்சை அந்த வருஷத்துக்குள்ளாகவே பூர்த்தியாய் ரத்து செய்யலாம் அல்லது சில நாட்களுக்கு நிறுத்திவைக்கலாம்.

12. லைசென்சு பெற்றவர் தன்னுடைய இருப்பிடத்தை மாற்றும்போதெல்லாம் ப்றெசிடெண்டருக்கு லாவது வைச்சுப்றெசிடெண்டருக்காவது இந்தவேலைக்காக அவர்களால் நியமிக்கப்படும். எந்த ஆபீசருக்காவது அந்தசங்கதியைப்பற்றி தானேகையெழுத்துவைத்து எழுத்துமூலமாய் நோடசு சூடுத்துதெரிவிக்கவேண்டும். இருப்பிடத்தை மாற்றினபிற்பாடு ஒருவாரத்துக்குள்ளாக நோடசு குடுக்காமல் தப்பினால் அதற்காக இருபது ரூபாய் அபராதத்துக்கு உட்படவேண்டும்.

13. ஒவ்வொரு லைசென்சுக்கும் வரிசைப்பறகாரம் நம்பர்போடப்படும். அந்தநம்பரை (முதல்களாச வண்டிகளில்) பைரங்கமான இடத்தில் இங்கிலீசிலும் ரெண்டு மூன்று க்ளாச வண்டிகளில் இங்கிலீசும் அல்லா கன்னடம் அல்லது இந்துஸ்தானியிலும் வன்னம் போடப்பட்டிருக்கவேண்டும். முனிசிபல் கமிஷன் ப்றெசிடெண்டராவது வைச்சுப்றெசிடெண்டராவது அரிக்கையின்பேரில் உயர்ந்த மாதிரியான வாடகைவண்டிகளை நம்பர்போடாமல் அனுப்பிவிடும்படி செய்யலாம். முனிசிபல் ஆபீசில் நம்பர்போடப்படவேண்டும். அந்தசெவை லைசென்சு வரியுடன் சேர்க்கப்படவேண்டும்.

14. லைசென்சு பெற்ற வண்டி ஓட்டுகிறவன் அல்லது எஜமானர் வண்டி பப்ளிக்ஸ்டாண்டில் காத்திருக்கும்போதும் அல்லது பப்ளிக்காய் வாடகைக்குப் போகும்போதும் ருத்திரியில் அல்லது பகலில் எந்தவேளையும் அந்த வண்டியை வாடகைக்குக் கேழ்கும் எந்தமனிதருக்கும் வாடகைக்குக்கொடுக்கவேண்டியது கட்டாயம். அப்படிக்கொடுக்காமல்போனால் அதற்குத்தகுந்த பூர்த்தியான காறணத்தை ருச்செய்யவேண்டியது எஜமானர் அல்லது ஓட்டுகிறவனுடையகடமை.

15. லைசென்சு வாடகை வண்டிகள் நிற்பதற்காக அப்போதுக்கப்போது முனிசிபாலிட்யால் ஸ்தலங் ள் ஏற்பாடு ஆகவேண்டும். அப்படி ஏற்பாடு ஆன ஸ்தலங்களைத்தவிர மற்ற இடங்களில் வாடகைக்காக கா திருந்ததாலாவது ஒருவரிடத்திலும் கைவசமில்லாமல் வண்டி விட்டிருந்தாலாவது அந்தவண்டி ஓட்டுகிறவனுடைய லைசென்சை ரத்துசெய்யக்கூடும். ஸ்டாண்டில் வரிசைக் கிறமமாய் வண்டிகளை நிறுத்தவேண்டிய ஏற்பா ளானது போலீசுக்காரர் அதிகாரத்துக்குள்பட்டதாய் இருக்கும்.

பிரயாணிகள் அவர்களுக்கு இஷ்டமான வண்டிகளைப்பார்த்துப் பேசிக்கொள்வதைக்குறித்து இதி கண்டிருக்கும் சங்கதியால் அட்டிசெய்ய அபிப்ராயமில்லை.

இப்போது ஏற்பாடு ஆயிருக்கும் ஸ்டாண்டுகளின் ஜாபிதா இந்தநூல்களின் கடைசியில் காட்டப்பட்டிருக்கிறது.

16. வேறேவேறே விதமானக்ளாசுகளின் வாடகைவண்டிகளுக்காக காலக்கணக்காயும் தூரக்கணக் காயும் இதனடியில் வாடகை நிர்ணயம் செய்யப்பட்டிருக்கிறது.

குறிப்பு—காலக்கணக்காய்வாடகை

	ஒருமணி அல்லது அதற்கு குறைவாய்.	பாதிராத்திரத்திற்கு முன் அதிக ஒவ்வொருமணிக்கு அல்லது அதின் பாகத்திற்கு.	பாதிராத்திரத்திற்குப் பின் அதிகமான ஒவ்வொருமணிக்கு அல்லது அதின் பாகத்துக்கு.	ஷர.
1	2	3	4	5
1ம் களாக ஒருகுதிரை கட்டினது	ரு. அ. பை. 1 0 0	0 4 0	0 6 0	ஒதுக்கப்பட்டிருந்திருக்கிற கட்டி சாரஜ்.
2ம் களாக ஜட்கா டிடோ	0 6 0	0 3 0	0 4 0	
3ம் களாக எருதுவண்டி	0 4 0	0 2 0	0 3 0	

குறிப்பு.—இந்தவாடகைகள் களாஸ்வாரியாய் காலமே 5 மணி முதல் பாதிராத்திரத்தின் வரையில் பன்னிரெண்டு மணிக்கு ரூ. 3-0-0, 2-4-0, 1-4-0, இதற்கு அதிகப்படாமலும் பன்னிரெண்டு காலத்துக்கு மேலப்பட்டால் அனுகூலமாய் ரூ. 4-0-0, 2-8-0, 1-8-0, இதற்கு அதிகப்படாமலும் இருக்கவேண்டியது கட்டாயம்.

தூரக்கணக்காய்வாடகை

	1ம் களாக	2ம் களாக ஜட்கா	3ம் களாக	எருதுவண்டி.
1	2	3	4	5
மூன்று மையிலுக்கும் அதற்குள்ளாகவும் பிறிதி ஒரு-ஜாஸ்கதி மையிலுக்கும் அல்லது அதனுடைய யாகத்துக்கும்.	ரு. அ. பை. 0 12 0 0 3 0	ஒரு மைல் அல்லது அதின்பாகத்திற்கு	ரு. அ. பை. 0 2 0	ரு. அ. பை. 0 1 6

மேல்கண்ட வாடகைகளை தூரக்கணக்காய் கொடுப்பதாக பிரயாணி முதலிலேயே அபிப்பிராயத்தை தெரிவித்து சொல்லியிருந்தாலொழிய காலக்கணக்காகவே வழக்கமாய் வாங்கவேண்டும்.

குறிப்பு.— 1. தண்டில் அனேகஸ்டாண்டிகளிலிருந்து பேட்டைக்கு முதல் ரெண்டாவது மூன்றாவது வண்டிகளுக்கு ஏற்பட்டிருக்கும் வாடகையே, பேட்டையிலிருந்து அந்தந்த, தண்டின், ஸ்டாண்டிகளுக்கு ஏற்பட்டாய் வாங்கவேண்டும்.

2. தண்டிலிருந்து பேட்டைக்கு ஒருவர் உட்கார்ந்து வருவதற்கு கொடுக்கவேண்டிய வாடகையே ரெண்டாவது அல்லது மூன்றாவது களாக வண்டியில் உட்கார்ந்து தண்டிக்குப்போக ஒருவருடைய சார்ஜாய் ஏற்படுத்திக்கொள்ளவேண்டும்.

17. இதில் 16வது ரூலின் ஏற்பாட்டுக்கு அதிகமாய் வாடகை வண்டிக்கு சார்ஜ் கேழக்கக்கூடாது.

குறிப்பு.—ரூல்களில் ஏற்பாடு செய்திருக்கும் நிர்ணயத்துக்குக்குறைவாய் ஒத்துக்கொண்டு உடம்படி கட்டி நடந்தால் அப்படியே வாடகை வாங்கிக்கொள்ள கட்டாயப்படவேண்டும்.

18. காலக்கணக்காய் வாடகை பேசின 1 வது அல்லது 2 வது களாக வண்டிகள் ஓட்டும் வேகம் ஒருமணிக்கு பனுக்கிரமமாய் ஆறம் ஐந்தாம் மைல்களுக்குக்குறைவில்லாமல் 3 வது களாக வண்டிக்கு மணிக்கு மூன்று மைல்களுக்குறைவில்லாமல் இருக்கவேண்டும்.

19. ஒவ்வொரு விதமான வாடகைவண்டியிலும் ஏற்றவேண்டிய மணிதர்களுடைய மொத்தக்கணக்கு இதனடியில் கண்டிருப்பதற்கு அதிகமாயிருக்கக்கூடாது.

நாலு சக்கிரவண்டியில் உள்ளே நாலுமனிதரும் வெளியில் ஒட்டுகிரவனும் ஒரு பையனும்.

ஒரு குதிரை இழுக்கும் வாக்கன் என்னும் பெறியவண்டியில் குதிரைக்காரன் ஒட்டுகிரவன் இவர்களுடன் சேர்ந்து ஆறுமனிதர்

ஒரு வண்டியில் ஒட்டுகிரவனுடன் சேர்த்து ஐந்துமனிதர்.

பத்துவயதுக்குள்ளான இரண்டு குழந்தைகளை வயது அடைந்த ஒருமனிதனாய் கணக்குசெய்யப்படும்

20. ஒவ்வொரு விதமான வண்டியில் ஏற்றக்கூடிய சாரமான் மூட்டை பாரம் மாத்திரம் அல்லது மூட்டையும் பிரயாணிகளும் இதனடியில் கண்டிருப்பதற்கு அதிகமாயிருக்கக்கூடாது.

ஒரு குதிரை இழுக்கும் முதல்க்காசு வண்டியில் 8 மணுகு அதாவது 672 பெளண்டு.

இரண்டு..... 15 மணுகு அதாவது 1260 பெளண்டு.

3 வதுக்காசு மாட்டுவண்டியில் 5 மணுகு அதாவது 420 பெளண்டு. பறயாணிகள் அல்லது மூட்டை ஏற்றுப்போது ஒருவயதடைந்த மனிதர் 1½ மணுகு அதாவது 126 பெளண்டு பாரமாயும் பத்துவயதுக்குள்ளான ஒரு குழந்தை ¾ மணுகு அதாவது 63 பெளண்டு பாரமாயும் கணக்குசெய்யப்படும்.

21. ஒவ்வொரு லைசென்சு பெற்றவாடகை வண்டிக்கும் இதனடியில் ரூல்களில் ஏற்பட்டிருக்கிறபடி ஒரு வாடகை லீஸ்ட் காதிதம் ஒட்டிவைத்திருக்கவேண்டும் அந்தலீஸ்ட் இங்கிலீஷ் கன்னடம் இந்துஸ்தானி இந்த மூன்றுபாஷையிலும் அச்சிடப்படவேண்டும்.

லைசென்சு கொடுக்கும்போது முனிசிபல் ப்ரெசிடெண்டு அல்லது வைச்ப்ரெசிடெண்டு வருஷந்தோறும் லீஸ்ட் நக்கல்கொடுக்கவேண்டும். ஆனால் ஒருலீஸ்ட் தேயப்பட்டு அல்லது சூசப்பட்டுப்போனால் வேறே லீஸ்ட் உடனே பெற்றுக்கொள்ளவேண்டியது சொந்தக்காரனுடையகடமை.

இந்தநக்கல்கள் முனிசிபல் ஆபீசிலும் ஹெட் போலீசு ஸ்டேஷனிலும் கிறயத்துக்குக் கொடுக்கப்படும்.

22. ஒவ்வொரு லைசென்சு பெற்ற ஒட்டுகிரவனும் அவன் ஸ்டாண்டில் இருக்கும்போது அல்லது வாடகை வண்டி ஒட்டும்போதும் அல்லது வாடகைக்காகத்திரிந்து கொண்டிருக்கும்போது அவன் பெயரும் லைசென்சு நெம்பரும் நமூதாயிருக்கும் ஒரு பித்தளை பில்லையை வலதுகைமேல் கட்டியிருக்கவேண்டியது. வாடகை வண்டி லைசென்சுகளை எல்லாம் எந்தபோலீஸ் ஆபீசராவது அல்லது முனிசிபல் எஸ். பி. சி. ஏ. ஆபீசராவது கேழ்க்கும்போது பார்க்கக்கொடுக்கவேண்டும்.

23. முனிசிபல் கமிஷன் ப்ரெசிடெண்டராவது வைச்ப்ரெசிடெண்டராவது அந்தக்காரியத்துக்காக ஒட்டுகிரவன் லைசென்சு கொடுத்திருந்தாலொழிய ஒருவாடகை வண்டியை ஒட்ட எந்தமனிதனுக்கும் உத்திரவில்லை.

24. ஒரு ஒட்டுகிரவன் லைசென்சை மற்றொருவனுக்குக்கொடுத்துவிட அதிகாரமில்லை ஒருசர்கார் வருஷக்கணக்காய் அதைக்கொடுக்கப்படும்.

25. பதினெட்டுவயதுக்கு உட்பட்டவனுக்காவது ப்ரெசிடெண்டர் அல்லது வைச்ப்ரெசிடெண்டர் அல்லது அவர்களால் இந்தவேலைக்காக நியமிக்கப்பட்ட வேறே ஆபீசராவது பார்த்து ஒப்புக்கொள்ளப்படாதவனுக்கு ஒட்டுகிரவன் லைசென்சு கொடுக்கப்படமாட்டாது.

26. லைசென்சுபெற்ற வாடகைவண்டிகளில் அகப்பட்ட சொத்தை அந்தவண்டிகளின் சொந்தக்காரனாவது ஒட்டுகிரவனாவது சம்பத்திலிருக்கும் போலீசு ஸ்டேஷனில் கொண்டுபோய் ஆஜர்செய்யவேண்டும். அந்த சொத்தின் ஒரு லீஸ்டை முனிசிபல் ஆபீசிலும் ப்ரெசிடெண்டர் அல்லது வைச்ப்ரெசிடெண்டர் உத்திரவு செய்யும் மற்ற இடங்களிலும் ஒட்டிவைக்கப்படும்.

27. லைசென்சுபெற்ற ஒருஷம் முடிவுக்குமுன் ஒரு மாதத்துக்குள்ளாக அந்த லைசென்சை புதிதாய் த்திரும்பியும் கொடுக்கும்படி கேட்டுக்கொள்ளவேண்டும். முதல்லை சென்சுக்கு என்னவரியோ அதேபணம் கட்டி 1 வது ரூலில் கண்டிருக்கும் அநே ஆபீசரிடத்திலிருந்து அதேவிதமாய் புது லைசென்சைப்பெற்றுக் கொள்ளவேண்டும்.

28. லைசென்சு செல்லும் வருஷத்துக்குள்ளாக ஒரு லைசென்சான வாடகைவண்டியை புதுசொந்தக்காரனுக்கு மாற்றிக்கொடுத்தபோது லைசென்சில் (சார்ஜில்லாமல்) அவசியமான திருத்துதல் செய்வதற்காக முனிசிபல் ஆபீசுக்கு சொந்தக்காரன் உடனேமாற்றினசங்கதியைத் தெரிவிக்கவேண்டும்.

29. லைசென்சான வண்டியின் சொந்தக்காரனாவது சொந்தக்காரன் ஏஜெண்டாவது அல்லது ஒட்டுகிரவனாவது லைசென்சில் கண்டிருக்கும் குதிரைகளுக்குக் குறைவு கணக்கான குதிரைகட்டி புத்தி பூர்வமாய் இழுக்க வைத்தாலாவது ரூல்களில் கண்டிருக்கும் ப்ரயாணிகள் அல்லது பாரத்துக்கதிகமாய் வண்டியில்

ஏற்றவிட்டாலாவது அந்தத்தப்புக்காக ரூபா 50 வரைக்கும் அபராதம் செலுத்தவேண்டியதுமல்லாமல் லைசென்சும் ரத்து செய்யப்படும்.

30. லைசென்சான் வண்டிக்குக்கட்டிய குதிரையை ஒட்டுகிறவன் அதைகுரூர்மாய் அடித்து தெ திரவு செய்து அதிகதூரம் ஒட்டி யல்லது வேறேனிதமாய் வருத்தப்படுத்தினால் இந்தத்தப்புக்காக அமலில் க்கும் எந்த சட்டப்படியாவது உட்படவேண்டிய சிட்கை ஆவதுமல்லாமல் லைசென்சும் ரத்துசெய்யப்படு

31. வாடகை வண்டியின் சொந்தக்காரன் அல்லது ஒட்டுகிறவனுக்குக் கொடுக்கப்பட்ட எந்த சென்சையும் ஒருமாசத்துக்குள்பட்ட காலம் வரைக்கும் உபயோகப்பட்டாமல் நிருத்துவதற்கு அல்லது பூர யாய் ரத்துசெய்வதற்கு எழுத்துமுலமாய் ப்றெசிடெண்டர் உத்திரவுசெய்யலாம்.

32. ப்ரயாணிபாவது போலீஸ் ஆபீசராவது இந்தவேலைக்காக ப்றெசிடெண்டரால் அல்லது ப்றெசிடெண்டரால் நியமிக்கப்பட்ட வேறே ஆபீசராவது இந்தநூல்களுக்கு வி்றேதமாய் நடந்த சங்க்தினை குறித்துப்றசிக்கியுஷன் செய்யலாம்.

ஸ்டாண்டிகளின் லீஸ்டு

1. லிடி ரைல்வே ஸ்டேஷன்.
2. மூங்கில் கடைக்கு எதிராய் கோட்டை ரோட்டுக்குப்பக்கமாயிருக்கும் காலி பூமி.
3. எலவங்கா வாசலின் காலி பூமி.
4. நகரதுபேட்டையின் காலி பூமி.

President, Municipal Commission,
Bangalore City.

சொந்தக்காரன் லைசென்சு.

வாடகைவண்டி லைசென்சு நட்பர்

களாசு

1887 ம் வருஷத்திய பெங்களுர் சிடி வாடகை வண்டி ரெகுலேஷனும் 1905 ம் வருஷத்திய ரு னினாலும் நாம் அடைந்திருக்கிற அதிகாரபலத்தினால் இதனடியில் கண்டிருக்கிறபடி இந்தத்தேதிமுதல் 19 வருஷம் சூன்மாசம் 30 வது தேதிவரைக்கும்.....விதி.....ஆன நீர் உம் இந்தலைசென்சு கொடுத்திருக்கிறோம்.

1 வது அதற்கு கட்டவேண்டியது.

2 வது அதில்.....அதிகமில்லாமல் ப்ரயாணிகளை நியமிக்கப்படி ஏற்றிக்கொள்ளவேண்டி வாடகையிலாமல் ப்ரயாணிகளுடைய யுத்தமான சாமான்களையும் ஏற்றிக்கொள்ளவேணும்.

3 வது அதை பெங்களுர் லிடியில் வாடகைக்கு ஒட்டவேண்டியது

4 வது நாம்செய்யும் உத்திரவுப்படி அதை நேமித்த காலத்திலும் ஸ்தலத்திலும் பார்வைக்காக ர்செய்யவேண்டும்.

5 வது அதுசேதப்பட்டிருக்கும்போது நம்முடைய எழுத்துமுலமான உத்திரவு முன்னதாய் பெ கொண்டு கொஞ்சகாலம் வரையில் வேறே வண்டியை உபயோகப்படுத்தலாம். அந்தவண்டிக்கு இந்த லை சன்சு நம்பரை சராஜ இல்லாமல் போட்டுக்கொடுக்கப்படும்.

6 வது அதையும் அதற்கு உபயோகப்படுத்தும் குதிரையும் குதிரைசாமான்களையும் தகுந்த சிர் ஸ்திதியில் வைத்திருக்க வேண்டும்.

7 வது இந்தவண்டியை வைத்திருக்கும் ஸ்தலத்தையாவது இருப்பிடத்தைபாவது மாற்றும் தெல்லாம் அப்படி மாற்றின ஒருவரத்துக்குள்ளாக அதைப்பற்றி எழுத்துமுலமாய் நமக்குத்தெரிவிக்கவே ணும் மேலும் அவசியமான மாருதல் செய்வதற்காக இந்த லைசென்சையும் அப்போதே ஆஜர்செய்யவேண்டு

8 வது ஒருவாடகைக் கணக்கு லீஸ்டை (இங்கிலீஷிலும் கன்னடத்திலும் இந்துஸ்தானியிலும் தியிருக்கும்) வண்டியில் ஒட்டவைத்திருக்கவேண்டும். அந்த லீஸ்ட்டில் கண்டிருப்பதற்கு அதிகமாய் வ கை கேழுகக்கூடாது. ஆனால் நூல்களில் ஏற்பட்டிருக்கும் கணக்குக்குறைவாய் வாடகைவாங்க ஒத்துக் ண்டிருந்தால் அந்த ஒப்புதலை ப்படி நடக்கவேண்டியது.

9 வது நம்முடைய எழுத்து மூலமான உத்திரவில்லாமல் இந்த லைசென்சை வேறேயாருக்கும் மாற்றக் கொடுக்கக் கூடாது.

10 வது மேல்கண்ட நிபந்தனைக்காவது அல்லது வாடகைவண்டி ரூல்களுக்காவது விநோதமாய் நடவடிக்கை எடுக்காமல் வேறே கெட்ட நடத்தைக்காகவும் இந்த லைசென்சை பூர்த்தியாய் அல்லது சிலகாலத்துக்கு ரத்து செய்யக் கூடும்.

மாசம்..... தேதி..... நம்முடைய கை எழுத்தும் முத்திரையுமுடன் கொடுக்கப்பட்டிருக்கிறது.

பெங்களூர் சிடி முனிசிபல் கமிஷன் ப்றெசிடெண்டர்.

ஒட்டுகிரவன் லைசென்சு நம்பர்.....

1887 ம் வருஷத்திய பெங்களூர் சிடி வாடகைவண்டி ரெகுலேஷனாலும் 1905 ம் வருஷத்திய ரூல்களாலும் நாம் அடைந்திருக்கிற அதிகார பலத்தினால் இதனடியில் எழுதியிருக்கும் உடன்படிக்கைகளுக்கு உட்பட்டதாய் இந்தத்தேதிமுதல் 19.....ம் ஆண்டுக்குள் 30 வது தேதிவரைக்கும்..... நம்முடைய கை எழுத்தும் முத்திரையுமுடன் கொடுக்கப்பட்டிருக்கிறது. ஆனால்..... நம்பர் வாடகை வண்டி சொந்தக்காரர் வசத்தில் பெங்களூர் சிடி எந்தவித சந்திலும் ஒட்டுகிரவன் உத்தியோகம் பார்க்கவும் வாடகைக்கு ஒட்டவும் உனக்கு இந்த லைசென்சு கொடுக்கப்பட்டிருக்கிறது.

1 வது அந்த உத்தியோகம் செய்துக்கொண்டிருக்கும்போதெல்லாம் இடைவிடாமல் ப்றெசிடெண்டர் உத்திரவு செய்கிறபடி தேகத்தின் ஒருபாகத்தின் பேரில் பைரங்கமாய் மேல்கண்ட நம்பருள்ள ஒரு லோக் லையை தரித்துக்கொண்டிருக்கவேண்டும்.

2 வது உன்னுடைய அந்த உத்தியோகம் செய்துக்கொண்டிருக்கும் போதெல்லாம் இந்த லைசென்சை செய்துக்கொண்டிருந்து எந்தப் ப்ரயாணியாவது ட்யூடியின் பேரிலிருக்கும் போலீஸ் ஆபீஸராவது வாடகைவண்டி இலாகா எந்த உத்தியோகஸ்தனாவது கேட்டபோது இந்த லைசென்சை ஆஜர் செய்யவேண்டும்.

3 வது வாடகைக்கு ஒட்ட ஒப்பிக்கொண்டபோது பெங்களூர் சிடி முனிசிபல் எல்லைகளுக்காக எந்தவிதத்துக்கும் (ப்ரயாணிகேட்டுக்கொள்ளும்படி)..... அவருடைய வண்டியை ஒட்டவேண்டியது.

4 வது வாடகைக்கு ஒட்ட ஒப்பிக்கொண்டபோது ப்ரயாணியின் அனுமதியில்லாமல் வண்டியை ஒப்போகக்கூடாது. மேலும் ப்ரயாணி அவ்வதற்கு முன்னதாய் வாடகை வேலையைவிட்டு புத்தி பூர்வமாக ஒட்டிக்கொண்டு போகக்கூடாது.

5 வது.....

6 வது.....

7 வது இந்த வண்டியின் சொந்தக்காரர் நம்மைக்கேட்டு உத்திரவு பெற்றுக்கொண்டாலே அல்லாமல் இந்த லைசென்சையாவது அதுதான் கொடுக்கப்படும் பில்லையையாவது வேறே யாருக்கும் மாற்றிக் கொடுக்கக் கூடாது. மாசம்..... தேதி நம்முடைய கையெழுத்தும் முத்திரையுமுடன் கொடுக்கப்பட்டிருக்கிறது.

பெங்களூர் சிடி முனிசிபல் கமிஷன் ப்றெசிடெண்டர்.

இதனடியில்க ண்டிருக்கிற படி மசாணங்களை அதிகார முறைமைக்குள்படுத்தவதற்காக புதுப்பித்திய பைலாவை 1906 ம் வருஷம் மார்ச்சு மீ 19 தேதிய 9873 Mis. (177-05)-6 நம்பர் ப்றெசிடிங்ஸில் கௌன்மெண்டார் காயம்செய்திருப்பதினால் எல்லாஜனங்களும் அறிவதற்கு விளம்பரம் செய்திருக்கிறது. 1906 வருஷம் ஜூலை மீ முதல்தேதியிலிருந்து இந்த பைலாவை ஜாரிசெய்யப்படும்.

1. பிணத்தைப் புதைப்பதற்காக அல்லது சடுவதற்காக உபயோகப்படுத்துவதற்கு எந்த இடத்துக்கு சொந்தக்காரன் அல்லது அதிகாரமுள்ளமனிதன் அந்த இடத்தையும் சொந்தக்காரனுடையவும் அதிகாரமுள்ள மனிதர்களுடையவும் போகலையும் முனிசிபல் ஆபீசில் அதற்காக வைக்கப்பட்டிருக்கும் ஒரு ரிஜிஸ்டரிடாக்ஸ் செயலிக்கவேண்டியது ரிஜிஸ்டர்செய்யும்காலத்தில் அந்த இடத்தினுடைய விஸ்தீரணத்தையும் எல்லைகளையும் காட்டும் ஒரு பளாளை ஆஜாசெய்யவேண்டியது ஒவ்வொரு ரிஜிஸ்டரேஷனுக்கும் ரூ. 2 வரிசெய்தவேண்டும்.

2. அப்படிப்பட்ட எந்த இடத்துக்காகவாவது சொந்தக்காரனே ஆகிலும் அதிகாரமுள்ளவனாகிலும் இல்லையென்றும் ரெசிடெண்ட்ருக்குத் தெரியவந்தால் அந்த இடத்துக்குப் ரெசிடெண்டர்தானே அதிகாரத்தை வகித்து அதை ரிஜிஸ்டர்செய்விக்கலாம் அல்லது அதை முடிவிடும்படி செய்விக்கலாம்.

3. அப்படிப்பட்ட இடங்களுக்கு சம்பமர்ய பைரங்கமான இடத்தில் ரிஜிஸ்டரேஷன் ஆன் நோட்டீசை இங்கிலீஷிலும் இரண்டு இததேசபாஷைகளிலும் ஒட்டிவைக்க வேண்டியது.

4. ரெஜிஸ்டரேஷன் ஆனபிற்பாடு அப்பேரப்பட்ட இடத்துக்கு யாறாவது தாயாதிமுறையாய்வுகைமாற்றலாய்வு வேறே எவ்விதமாய்வு சொந்தபாத்தியத்து அல்லது அதிகாரத்தை அடைந்தால் அந்தசங்கதியை பாத்தியம் கிடைத்த ஒரு மாசத்துக்குள்ளாக எழுத்துமுலமாய் ப்றெசிடெண்டருக்குத் தெரிவிக்கவேண்டும்.

5. ப்றெசிடெண்டர் அப்படி உத்திரவுசெய்யும்போது அப்படிப்பட்ட இடத்தின் சொந்தக்காரன் அல்லது அதிகாரியானவன் அடியில்கண்ட விஷயமாப் எல்லாசமாசாரமும் உத்திரவுப்படி கொடுக்கவேண்டும் அதாவது வேலையில்லாதிருக்கும் ஸ்திரீ பக்காரர்கள் அந்தபிடித்தில் நடத்தும் நாட்டாமை முறைமை மேலும் அதில் அதிகாரம் செலுத்துவதற்கு சம்பந்தமான எந்தவிதமானசங்கதி.

6. ப்றெசிடெண்டருக்குத் திருப்திகரமாகும்படி அப்படிப்பட்ட இடத்தின் சொந்தக்காரன் அல்லது அதிகாரியானவன் அதைஎல்லாகாலத்திலும் பரிசுத்தமான ஸ்திதியாயும் கெட்டபூண்டு செடிகளிலலாமலும் வைத்திருக்கும்படி ஏற்பாடு செய்யவேண்டும் மேலும் ப்றெசிடெண்டர் எழுத்துமுலமான் நோட்டீசு கொடுத்தால் அதை தகுந்த செவார்அல்லது வேலியினால் சுற்றும் மரைவாய் வளைவுகட்டவேண்டியது.

7. அப்படிப்பட்ட ஒவ்வொரு இடத்தின் அதிகாரியும் எல்லாப்புதைப்புக்களையும் தகனங்களையும் பற்றி ப்றெசிடெண்டர் இந்தவேலைக்காக நேமிக்கும் உத்யோகஸ்தருக்கு இருவத்தி நாலு மணிக்குள்ளாக சமரம் கொடுக்கவேண்டும்.

8. பிணத்தையாவது பிணத்தின் பாகத்தையாவது வெட்டினகுழியிலும் கட்டடமான சமாதியுடையானதிலும் பிணப்பெட்டியின் மேல் பாக பிணப்பெட்டியை உபயோகிக்காவிட்டால் தேகத்தின் மேல்பாகத்திலும் மேல் நிலத்திலிருந்து 5 அடிக்குக்குறைவான ஆழத்தின் கீழ் இல்லாமல் புதைக்கவும் புதைப்பிக்கவும் கூடாது மேலும் ஒரேகுடும்பத்தாரான ரெண்டு அல்லது அதிகப்பேர்களுடைய பிணங்களை ஒரேகாலத்திலும் புதைக்கும்போதும் அல்லது ஒரு பழங்குழியையாவது குடும்ப சமாதியையாவது வெட்டித்திறக்கும்படி 10வது பாராவின பிரகாரம் அனுமதி உத்திரவு அடைந்தபோதும் மாத்திரமே தவிர மற்றகாலத்தில் ஒரு சமாதிகுழியில் ஒரு பிணத்துக்கு அதிகமாய் புதைப்பதற்கு குழியை உபயோகிக்கக்கூடாது.

9. முன்னுதாயிருக்கும் ஒரு ஸமாதிகுழியின் ஓரத்திலிருந்து இரண்டு அடிக்குக் குறைந்த தூரத்தில் எந்த மசாணத்திலும் மற்றொரு ஸமாதிகுழியை யாரும் கட்டவாவது வெட்டவாவது கட்டிவிக்கவாவது கூடாது.

10. முன்னுதாய் புதைத்திருக்கும் எந்த சமாதியையாவது ப்றெசிடெண்டருடைய எழுத்து முலமான அனுமதி உத்திரவில்லாமல் யாரும் திரும்பி திறக்கக்கூடாது.

11. யாவாவது ஒரு பிணத்தை அல்லது பிணத்தின்பாகத்தை ஒரு மசாணத்துக்கு கொண்டுவந்தாலும் அனுப்பிவித்தாலும் அது அந்த இடத்துக்குவந்துசேர்ந்த பிற்பாடுபன்னிரெண்டு மணிக்குள்ளாக அதை புதைப்பிக்க வேண்டும்.

12. எந்த சடுகாட்டிலாவது ஒரு பிணத்தை அல்லது பிணத்தின் பாகத்தை யாராவது தகனம்செய்
ம்போது அல்லது செய்விக்கும்போது அதை முழுமையும் சாம்பலாயடிக்காமல் அதையாவது அதின்பாகத்
தயாவது மீந்திருக்கும்படி விட்டுவிடக்கூடாது.

13. ஒரு முனிசிபல் மசாணத்தில் வெட்டியானாவது குழிவெட்டுகிரவனாவது ப்றெசிடெண்டரு
டய லைசென்சை அடையாமல் அந்தவேலையை செய்யக்கூடாது அந்தவேலைக்காக இதனடியில் கண்டிருக்
ம் நமூனாப்றகாரம் லைசென்சுகளை கொடுக்கவேண்டும் அவைகளைப்றெசிடெண்டர் இஷ்டானு சாரமாய் பின்
யுக்கு வாங்கிக்கொண்டும் ரத்தாயும் செய்யலாம்.

குழிவெட்டுகிறவர்களுக்குக் கொடுக்கப்படும் லைசென்சு நமூனா:—

Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	15 to 16	

Agricultural operation—Ploughing.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices steady.
9. Ploughing is vigorously carried on throughout the district. Sowing has begun in some parts. Twenty acres are sown with punaji paddy in Bangalore. In Hoskote 20 acres are sown with cholum, 75 acres with haraka and some parts with sessamum. In Channapatna 430 acres are sown with sugar-cane and some parts with haraka and cholum. In Anekal haraka, punaji paddy and sessamum are reported to have been sown in some parts. There has been no harvest during the week. Standing crops are in good condition, except in Closepet where the sugar-cane crop is reported to be suffering from want of sufficient water.
10. Prospects of the season are slightly better. There has been rain throughout the district. Insufficiency of rain is reported only in Closepet. Tanks have received from two to four months' supply of water, except in Magadi and Closepet where they have received from one to two months' supply and in Channapatna one to three months' supply.
11. Public health generally good.
12. Cattle healthy. Water and dry fodder are sufficiently available. Difficulty of fodder is still reported to continue in Closepet.

KOLAR.

8. Market fairly supplied. Prices high.
9. Samé in Kolar, Bowringpet and Mulbagal; haraka in Kolar and Mulbagal, and paddy in Kolar are being sown. Paddy is being harvested in parts of Sidlaghatta and Goribidnur.
10. Prospects of the season are encouraging, more especially in Gudibanda range. Food stocks are available in moderate quantities.
11. Public health generally good.
12. Cattle now find some water and pasture. Their condition is improving and may be expected to be bettered by the recent rains.

TUMKUR.

8. Market well supplied.

9. Sugar-cane in Tumkur, Gubbi and Kunigal; paddy in Maddagiri, Sira, Kunigal and Turuvekere; and cholum in Sira are being harvested. Black and green grams, til and cholum in Chiknayakanhalli and Tiptur; haraka, castor, togari and til in Sira; cholum, green gram, paddy and haraka in Gubbi; castor, haraka, togari and ragi in Pavagada; til, cholum, castor and haraka in Kunigal; castor in parts of Koratagere; and cholum, paddy, and haraka in Turuvekere are sown. Standing Vysakhi paddy, sugar-cane, cholum and nat-ragi are in fair condition in all the taluks. Coconut trees in Tiptur are said to be withering. The estimated outturn of crops harvested is as follows:—

Maddagiri—Paddy 8 annas.

Sira—Paddy 4 to 8 annas, cholum 2 to 4 annas.

Kunigal—Paddy 4 to 8 annas.

Turuvekere—Paddy 4 annas.

10. Prospects of the season are looking better. Food stocks are available for the present. The recent rains have provided some water for men and cattle all over the district, except some few miles round Maddagiri.

11. Public health generally good, except that small-pox and fever prevail in parts of Tiptur.

12. The condition of cattle is improving. In Maddagiri, Chiknayakanhalli and Sira, date leaves are still used as fodder for cattle.

MYSORE.

8. Market well supplied.

9. Standing crops, such as sugar-cane, cholum, til, black and green grams in parts of Seringapatam; ragi, cholum and black and green grams in parts of Yedatore; cholum and til in parts of T.-Narsipur; and sugar-cane, mulberry, cholum, til and togari in parts of Malavalli are reported to be pretty fair. They are reported to be withering for want of rain in parts of Heggaddevankote, T.-Narsipur, Mysore, Chamrajnagar, Gundlupet and Nanjangud. Lands in parts of Hunsur are being ploughed and sown with ragi. Paddy is being sown in lands under channels in Krishnarajpete.

10. Prospects of the season not bad. But standing crops are in urgent need of rain, which is anxiously awaited. Food stocks are sufficient for the present.

11. Public health generally good, but small-pox still prevails in parts of Heggaddevankote.

12. Cattle healthy in all parts, except in parts of Heggaddevankote, where they are reported to be still suffering from foot and mouth disease. Water and fodder available in limited quantities. In Kowlandi Hobli of Nanjangud, cattle are fed on date and other leaves for want of fodder.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Sowing is going on in all parts. Sugar-cane in Belur and Hole-Narsipur; and paddy and ragi in Manjarabad and Arkalgud are reported to be in fair condition. But they are withering in other parts. The outturn of standing crops in Hole-Narsipur is estimated at 8 annas.

10. Prospects of the season hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox is reported to still exist in parts of Hassan, Manjarabad, Arsikere and Channarayapatna.

12. Cattle generally healthy, but foot and mouth disease exists in parts of Manjarabad and Hole-Narsipur. Water and fodder are generally available except in parts of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.
9. Kar-paddy has been completely harvested in Sagar and it is being harvested in Nagar. Paddy is being sown in Sagar, Nagar and Sorab. Paddy and sessamum are sown in a few tracts of Shimoga and ragi and cholum in parts of Channagiri. Sugar-cane is in a fair condition in parts of Shimoga, Sorab, Sagar and Nagar, where rain has fallen, and in a good condition under the Sulekere tank in the Channagiri Taluk. Ploughing is going on in Shimoga, Honnali, Shikarpur and Tirthahalli.
10. More rain is wanted in all the taluks. Food stocks are somewhat insufficient in Shimoga, Shikarpur, Sorab and Honnali. Rice continues to be imported from the Madras Presidency into the several parts of the district.
11. Public health is generally good. Cholera prevails in parts of Shimoga, Shikarpur, Sagar, Nagar, Honnali, Sorab and Kumsi and small-pox in parts of Sagar, Sorab and Channagiri.
12. Supply of fodder is limited in Honnali, Shikarpur and Sorab. Pasture is springing up in parts, where there has been rain. Scarcity of water has not yet materially diminished.

KADUR.

8. Market fairly well supplied.
9. Ploughing is over in parts and is in progress in other parts. Paddy and ragi in parts of Mudgere; paddy and gingelly in parts of Tarikere; cholum, gingelly, coriander, castor, black and green grams and tadagani in parts of Kadur, and ragi, paddy and coriander in Chikmagalur are being sown. Standing sugar-cane crops in parts of Chikmagalur, Yedahalli, Kadur, Tarikere and Koppa, and kar-paddy in parts of Koppa are in fairly good condition. Sugar-cane is being harvested in Kadur.
10. Prospects of the season fair, but more rain is needed. Food stocks are available and sufficient for the present.
11. Public health generally good, except that small-pox prevails in parts of Chikmagalur, Mudgere, Yedahalli and Tarikere.
12. Cattle generally healthy but poor in condition in parts of Tarikere and Kadur. Water and fodder generally available. Green grass is springing up in parts where there were good showers.

CHITALDRUG.

8. Market well supplied.
9. The rains have been very beneficial during the week, and it is reported that ploughing operations are being pushed on. Sessamum, cholum, castor and black and green grams have begun to be sown in several parts of the district.
10. Prospects of the season fair. Food stocks are available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

BANGALORE, }
20th June 1906.

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Dept.

89 1

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	15 to 16	

Agricultural operation—Ploughing.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices high.
9. Standing crops are in good condition, except in Closepet where sugar-cane is reported to be fading. Ploughing is still carried on throughout the district. 200 acres of paddy and 170 acres of ragi in the Bangalore Taluk, 15 acres of ragi and 8 acres of gingelly in Hoskote, paddy and haraka in some parts of Channapatna, and punaji paddy in Anekal were sown during the week. There was no harvest anywhere.
10. Prospects of the season not bad. Rainfall has been insufficient in Magadi and Closepet. Food stocks available.
11. Public health generally good. Small-pox prevails in some parts of Devanhalli.
12. Cattle generally healthy. In Closepet they are not in a satisfactory condition. Water is sufficiently available. Pasture is just beginning to be available except in Closepet, where difficulty for fodder still continues.

KOLAR.

8. Market fairly supplied. Prices high.
9. Samé and haraka are being sown in Kolar, Bowringpet and Mulbagal. Paddy is being harvested in parts of Sidlaghatta and Goribidnur.
10. Prospects of the season uncertain. Food stocks are available in moderate quantities. Rains have withheld.
11. Public health generally good.
12. Cattle now find some water and pasture. Their condition is yet far from satisfactory.

TUMKUR.

8. Market well supplied.

9. Sugar-cane in Tumkur and Gubbi and paddy in Maddagiri and Koratagere are being harvested. Navane, cholum and nat-ragi in Maddagiri, castor in Chiknayakanhalli, haraka, castor and togari in Sira, cholum, ground-nut, punaji paddy, haraka, castor, til and green gram in Gubbi; haraka, paddy, castor and cholum in Tiptur; sajji, togari, ballar and cholum in Pavagada; cholum, haraka, castor and punaji paddy in Koratagere; and paddy in Turuvekere are being sown. Standing crops, *viz.*, sugar-cane, nat-ragi, paddy, black and green grams, cholum, til, haraka and castor are in fair condition.

10. Prospects of the season are hopeful. Food stocks are available for the present. The recent rains have provided some water for men and cattle all over the district.

11. Public health generally good, except that fever and small-pox prevail in parts of Tiptur.

12. The condition of cattle is improving except in parts of Gubbi and Tiptur, where old ones are losing condition entirely for want of sufficient fodder. In Chiknayakanhalli, Sira, Tiptur and Kunigal date leaves are used as fodder for cattle.

MYSORE.

8. Market well supplied.

9. Standing crops are reported to be fair in parts of Chamrajnagar, Seringapatam, Hunsur, Yedatore, Haggaddevankote, Gundlupet, Nanjangud; T.-Narsipur, Malvalli and Krishnarajpete, while they are withering in parts of Chamrajnagar, T.-Narsipur, Mandya and Nagamangala. Togari and ballar in parts of Heggaddevankote and paddy in lands under channels in Krishnarajpete are being sown. The gingelly crop in parts of Nanjangud are reported to have been attacked with "*mari*" insect.

10. Prospects of the season have slightly improved. The recent rains have done good to the standing crops to some extent in a few taluks and more rain is urgently wanted. Food stock sufficient for the present.

11. Public health good throughout.

12. Cattle healthy. Water and fodder generally available. Fodder is reported to be scanty in parts of Gundlupet and Heggaddevankote.

HASSAN.

8. Market fairly well supplied Prices high.

9. Standing crops, *viz.*, sugar-cane in Hassan, Belur, Hole-Narsipur and Alur and paddy in Arkalgud, Manjarabad and Alur are reported to be in good condition. Other crops, *viz.*, gid ragi, cholum and castor in Hassan; gingelly, togari, cholum, tadagani and castor in Arkalgud; and togari and gingelly in Alur are in fair condition. Agricultural operations are somewhat retarded in Arsikere and Channarayapatna. The outturn of standing crops in Hole-Narsipur is estimated at 4 to 8 annas, and of black and green grams and tadagani under harvest, at 6 to 8 annas.

10. Prospects of the season hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox is reported to be subsiding in parts of Hassan, Manjarabad, Arsikere and Channarayapatna.

12. Cattle generally healthy. Foot and mouth disease is subsiding in parts of Manjarabad and Hole-Narsipur. Water and fodder are generally available except in parts of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.

9. Ploughing and sowing operations are in progress in all the taluks. Ragi and cholum, in Channagiri; green gram, sessamum, cholum, ragi, baragu, togari, ballar and paddy in Honnali; and paddy in Shimoga, Sorab, Nagar, Tirthahalli and Sagar are being sown. Sugar-cane is in a fair condition in Shimoga, Sagar, Nagar, Sorab and under the Sulekere tank in Channagiri. The estimated outturn of paddy sown in Sagar and Tirthahalli is 8 and 12 annas respectively.

10. More rain is wanted in all the taluks. Food stocks are insufficient in Shikarpur, Sorab and Kumsi. Rice continues to be imported from the Madras Presidency into the several parts of the district.

11. Public health is generally good. Cholera prevails in parts of all taluks except Channagiri and Tirthahalli and small-pox in parts of Sagar, Sorab and Channagiri.

12. Supply of fodder is limited in Honnali, Shikarpur and Sorab. Pasture is springing up in all taluks. Scarcity of water still exists to some extent in the maidan parts of the district.

KADUR.

8. Market fairly well supplied.

9. Ploughing operations are in progress in parts of the district. Ragi, paddy, cholum and gingelly in parts of Tarikere, and ragi, cholum, gingelly, coriander, black and green grams in parts of Kadur are being sown. The standing sugar-cane crops in Chikmagalur, Kadur, Yedahalli, Koppa and Tarikere are in fairly good condition. Sugar-cane in Kadur and karpaddy in Koppa are being harvested. In several parts of Kadur there was not enough of rain-fall to commence sowing.

10. Prospects of the season fair, but more rain is needed. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur, Mudgere, Yedahalli and Tarikere.

12. Cattle generally healthy but poor in condition in parts of Tarikere and Kadur. Water and fodder generally available. Green grass is springing up in parts where there were good showers.

CHITALDRUG.

8. Market well supplied.

9. There were light showers of rain during the week, and ploughing and sowing are being pushed on in all the taluks.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water available. Difficulty for fodder continues in some parts.

BANGALORE, }
27th June 1906.

P. G. D'SOUZA,

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	14 to 15	

Agricultural operation—Ploughing.

Want of rain is much felt.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices steady.

9. Standing crops are in good condition. Ploughing is carried on, and the fields are made ready for sowing. About 40 acres are reported to have been sown with sessamum and 20 acres with groundnut in Hoskote, and 325 acres with dry crops in Doddballapur. Rain is wanted throughout the district, both for further sowing and for the crops already sown.

10. Prospects of the season depend on immediate rainfall.

11. Public health generally good. Small-pox is reported to prevail in parts of Hoskote.

12. Cattle generally healthy. Water is sufficiently available in tanks and wells. Dry fodder is available. Green fodder also is beginning to be available.

KOLAR.

8. Market fairly supplied. Prices high.

9. Paddy in Chintamani, Mulbagal, Goribidnur and Malur; ragi and ballar in Sidlaghatta and Gudibanda; samé in Mulbagal, Chintamani and Gudibanda; and cholum and kambu in Sidlaghatta are being sown. Paddy is being harvested in parts of Goribidnur.

10. Prospects of the season uncertain. Food stocks are available in moderate quantities. Rains have withheld.

11. Public health generally good.

12. Cattle now find some water and pasture.

TUMKUR.

8. Market well supplied.

9. Sugar-cane in Gubbi and paddy in Koratagere are being harvested. Castor, haraka, gingelly and ragi in Maddagiri; cholum, haraka, castor and togari in Sira; cholum, gingelly and paddy in Tiptur; and cholum in Koratagere are being sown. Standing sugar-cane crop in Tumkur, Maddagiri, Sira and Kunigal; nat-ragi in Maddagiri and Sira; paddy in Maddagiri; navane and cholum in Maddagiri; black and green grams, gingelly and cholum in Chiknayakanhalli; and cholum in Sira and Kunigal are in fair condition. They are withering in Gubbi, Tiptur, Koratagere and Turuvekere.

10. Prospects of the season are hopeful. Food stocks are available for the present. The recent rains have provided some water for men and cattle all over the district.

11. Public health generally good, except that fever and small-pox prevail in parts of Tiptur.

12. The condition of cattle is improving except in parts of Gubbi and Tiptur, where they are declining in condition and old ones are dying for want of sufficient fodder. In Chiknayakanhalli, Sira, Tiptur and Kunigal date leaves are used as fodder for cattle.

MYSORE.

8. Market well supplied.

9. Standing crops such as cholum, til, togari, etc., are reported to be good in parts of Mysore, Hunsur and Nagamangala; and fair in parts of Seringapatam, Gundlupet and Nanjangud. They are withering for want of rain in parts of Chamrajnagar, Yedatore, Haggaddevankote, T.-Narsipur, Malvalli and Mandya. Paddy is being sown in lands below channels in Seringapatam and Krishnarajpete.

10. Prospects of the season though indifferent not bad. Rain is urgently needed for the standing crops. Food stock sufficient for the present.

11. Public health generally good. Some cases of cholera are reported in the Mysore Town and one village of Nagamangala.

12. Cattle generally healthy except in Heggaddevankote where they are reported to be suffering from foot and mouth disease. Both pasture and fodder are reported to be scanty.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Standing crops, *viz.*, paddy and ragi in Manjarabad and sugar-cane in Belur are reported to be in fair condition. They are reported to be withering in other parts owing to want of rain. Caterpillars are reported to be damaging standing crops to a small extent in Hole-Narsipur.

10. Prospects of the season hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox exists in parts of Manjarabad and Channarayapatna.

12. Cattle generally healthy. Water and fodder are generally available except in parts of Arsikere.

SHIMOGA.

8. Market well supplied. Prices high.

9. Sowing operations are in progress in all the taluks. Sugar-cane is in fair condition under the Sulekere tank in Chaanagiri, under Solur channel in Shikarpur and in Shimoga, Sagar, Sorab and Nagar. Sowing of paddy is nearing completion in Sorab and Nagar, and is

completed in Tirthahalli. Transplanting of paddy seedlings has commenced in the malnad in areas where there has been sufficient rainfall. Standing crops, viz., paddy, ragi, sessamum, cholum and ballar, are in fair condition.

10. Rainfall is scanty during the week. More rain is wanted everywhere. Insufficiency of food stocks is reported in parts of Kumsi, Sorab and Shikarpur. Elsewhere food stocks are sufficient for the present. Rice is being imported into several parts of the district from the Madras Presidency.

11. Public health is generally good. Cholera prevails in some parts of the district and small-pox in parts of Channagiri, Shikarpur, Sorab, Sagar and Nagar.

12. Supply of fodder is limited in Honnali, Shikarpur and Sorab. Scarcity of water still exists in the maidan parts.

KADUR.

8. Market fairly well supplied.

9. Ploughing operations are in progress in parts of Yedahalli and Koppa and delayed in parts of Kadur for want of rain. Ragi, paddy, cholum and gingelly in parts of Tarikere, and ragi, cholum, gingelly, coriander, black and green grams in parts of Kadur have already been sown. The young plants of cholum, black and green grams and kulthi are fading for want of rain in the Kadur Taluk. The standing sugar-cane crop in Chikmagalur, Kadur, Yedahalli, Koppa and Tarikere is in fairly good condition. Sugar-cane in Kadur and karpaddy in Koppa are being harvested. In parts of the Ajjampur hobli of the Tarikere Taluk, the young gingelly and cholum plants are reported to be slightly damaged by locusts.

10. Rainfall is insufficient in the maidan parts. In the malnad also the rains have been much less than in the past year. Prospects of the season are not quite encouraging. More rain is urgently needed. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur, Mudgere, Tarikere and Yedahalli.

12. Cattle generally healthy. They are in poor condition in parts of Kadur and Tarikere owing to the insufficiency of fodder and pasture. Owing to the monsoonish weather, some old and infirm cattle have died in parts of Kadur and Tarikere.

CHITALDRUG.

8. Market well supplied

9. Ploughing and sowing are in progress in the several parts of the district. More rain is anxiously looked for by the raiyats.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water available. Difficulty for fodder still continues in some parts.

BANGALORE, }
4th July 1906.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	14 to 15	

Agricultural operation—Ploughing.

Want of rain is much felt.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices high.
9. Standing crops are in good condition, except in Closepet, where sugar-cane is reported to be withering for want of rain. In Bangalore, 67 acres of punaji paddy, 43 acres of ragi and cholum and 2 acres of haraka; in Doddballapur, 5 acres of sugar-cane and 20 acres of paddy, were sown during the week. Thirty acres of paddy are reported to have been harvested in Bangalore. Fields are made ready for sowing and are being still ploughed in some parts.
10. Prospects of the season not bad for the present. Rain is badly wanted throughout the district.
11. Public health generally good. Small-pox is reported to prevail in parts of Hoskote.
12. Cattle generally healthy except in Closepet. Fodder is available and pasture is beginning to be available except in Closepet. Water is available.

KOLAR

8. Market fairly supplied. Prices high.
9. Paddy in Mulbagal and Malur; ragi in Chintamani, Sidlaghatta, Chikballapur, Goribidnur and Gudibanda; ballar in Sidlaghatta and Gudibanda; same and haraka in Mulbagal; cholum, turmeric, potatoes and onions in Sidlaghatta are being sown. Paddy is being harvested in parts of Goribidnur.
10. Prospects of the season uncertain. Food stocks are available in moderate quantities. Rains have withheld.
11. Public health generally good.
12. The condition of cattle is reported to be generally good. Fodder is available in all parts, although running short, and the recent rains have provided some pasture.

TUMKUR.

8. Market well supplied.

9. Sugar-cane in Gubbi and Kunigal and paddy in Kunigal are being harvested. Ragi and ballar in Tumkur; cholum, haraka, castor and nat-ragi in Maddagiri; cholum, haraka, castor and togari in Sira; ragi, togari, ballar, haraka, castor and paddy in Gubbi; cholum and haraka in Tiptur; kambu, togari, ballar and cholum in Pavagada; ragi, ballar, togari, castor, and punaji paddy in Kunigal; and ragi, ballar, cholum and togari in Koratagere are being sown. Standing crops, *viz.*, sugar-cane in Tumkur, Maddagiri, Sira, Gubbi, Kunigal and Koratagere; ragi in Maddagiri, Sira, Gubbi, Pavagada and Koratagere, castor, cholum, haraka, gingelly, black and green grams and navane in parts of Maddagiri, Chiknayakanhalli, Sira, Gubbi, Pavagada, Kunigal and Koratagere are in a pretty fair condition. In parts of Maddagiri, Gubbi, Tiptur, Koratagere and Turuvekere, they are withering for want of rain.

10. Rains are insufficient and the prospects of the season are not encouraging. Food stocks are available for the present. The rains have provided some water for men and cattle.

11. Public health generally good, except that fever and small-pox prevail in Tiptur.

12. The condition of cattle is improving, except in Gubbi and Tiptur, where they are declining in condition and old ones are dying for want of sufficient fodder. In Turuvekere they are attacked with "Carlu roga." In Maddagiri, Chiknayakanhalli, Sira, Koratagere and Turuvekere, date and other leaves are used as fodder for cattle.

MYSORE.

8. Market fairly well supplied.

9. Standing crops, such as cholum, til, togari, etc., are reported to be pretty fair in parts of Seringapatam, Haggaddevankote and Nanjangud. They are withering for want of rain in parts of Mysore, Chamrajnagar, Hunsur, Nagamangala, Gundlupet, T.-Narsipur, Malvalli and Mandya. Paddy is being sown in lands below channels in Seringapatam, Krishnarajpete, Hunsur and Yedatore. Til crops in parts of Krishnarajpete are damaged by insects.

10. Prospects of the season not encouraging. Rain is urgently needed for the standing crops. Food stock available only in limited quantities.

11. Public health generally good. Some cases of cholera are reported in the Seringapatam Town and in parts of Nagamangala.

12. Cattle generally healthy, except in parts of Gundlupet, where they are reported to be much reduced for want of water and fodder. Water and fodder available to some extent except in parts of Nanjangud and Nagamangala, where date and other leaves are used as fodder.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Standing crops, *viz.*, paddy and ragi in Manjarabad and Alur, and sugar-cane in Belur and Hole-Narsipur, are reported to be in fair condition. They are reported to be withering in other parts owing to want of rain.

10. Prospects of the season uncertain. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox still exists in parts of Hassan, Manjarabad and Channarayapatna.

12. Cattle generally healthy. Water and fodder are generally available, except in parts of Arsikere and Hassan.

SHIMOGA.

8. Market fairly well supplied. Prices high.

9. The sowing of paddy has been finished in Sorab and is in progress in Sagar, Nagar, Shimoga Channagiri, Honnali and Kumsi. Transplanting of paddy in Tirthahalli, Sagar and Nagar has commenced. Ragi is being sown in Sagar and Sorab. Standing crops, viz., paddy, ragi, cholum, sessamum, and ballar require rain especially in the maidan parts to thrive well. Sugar-cane is in a fair condition in Shimoga, Sagar, Sorab and Nagar, and under the Sulekere tank in Channagiri and the Solor anikat in Shikarpur. The estimated outturn of the transplanted paddy in Sagar and Tirthahalli is 2 annas and of the ragi sown in Sagar is 12 annas.

10. Rainfall is scanty during the week. More rain is wanted everywhere. Insufficiency of food stocks is reported in parts of Kumsi, Sorab and Shikarpur. Elsewhere food stocks are sufficient for the present. Rice is being imported into several parts of the district from the Madras Presidency.

11. Public health is generally good. Cholera prevails in a less virulent form in parts of Shimoga, Channagiri, Honnali, Shikarpur, Tirthahalli and Kumsi, and small-pox in parts of Channagiri, Shikarpur, Sorab, Sagar and Nagar.

12. Supply of fodder is limited in Honnali, Shikarpur and Sorab. Scarcity of water still exists in the maidan parts and is on the increase in Shikarpur. Pasture is available in moderate quantities.

KADUR.

8. Market fairly well supplied.

9. Ploughing operations are in progress in parts of Yedahalli, Mudgere, Sringeri and Koppa and delayed in parts of Kadur for want of rain. Ragi, paddy, cholum and castor in parts of Tarikere are being sown. The young plants of cholum, black and green grams, coriander and gingelly are fading for want of rain in the Kadur Taluk. The standing sugar-cane crop in Chikmagalur, Kadur, Yedahalli, Koppa and Tarikere is in fairly good condition. Sugar-cane in Kadur is being harvested. In the malnad "Makkiguddes" require more rain. The low-lying paddy fields are in good condition.

10. Prospects of the season are not quite encouraging. More rain is urgently needed. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Mudgere and Yedahalli, and plague in Chikmagalur town.

12. Cattle generally healthy. They are in poor condition in parts of Kadur and Tarikere owing to the insufficiency of fodder and pasture. Green grass is springing up and may be soon available. Water generally available.

CHITALDRUG.

8. Market well supplied.

9. Ploughing and sowing are continued in Hiriyur, Holalkere, Davangere and Jagalur. More rain is anxiously looked for by the raiyats.

10. Prospects of the season fair. Food stocks available.

11. Public health good.

12. Cattle healthy. Water available. Difficulty for fodder still continues in some parts.

BANGALORE,
11th July 1906. }

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Depts.

Nos. 3917—3937-10.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

COMMERCIAL EXHIBITIONS.

RESOLUTION.

Simla, the 23rd May 1906.

The following papers relative to the Exhibition, which will be held at Christ Church in New Zealand in November 1906, are published for general information. The Government of India have decided not to participate in the Exhibition.

Notice.

The Government of New Zealand has decided to hold, during the summer of 1906-07, an

International Exhibition

at Christ Church, Canterbury, New Zealand, in which all the nations of the world have been invited to participate. The object of the Exhibition is educational, and it is intended to demonstrate the resources and possibilities of the Colony as one of the world's food-producing factors; its vast mineral resources; and to draw attention to its unrivalled and varied scenery, thermal wonders; and also the exceptional opportunities offered to sportsmen;

And, further and specially

To bring under the notice of the more industrial nations of the world the great field the Colony of New Zealand offers as an outlet for enterprise and for the use and consumption of all manner of up-to-date appliances, manufactures, etc.

New Zealand's imports.

Such an Exhibition should command the support and attention of all the manufacturing nations of the world, and, if taken advantage of, must accomplish tangible and satisfactory results. The Colony of New Zealand, being essentially a producing country, offers a splendid outlet for the manufactures of other countries which pay more attention to the development of manufacturing industries and whose industrial conditions and facilities are better adapted to the promotion and development of manufacturing.

The imports of the Colony for the past year (at least three-fourths of which are manufactured goods) amounted to £13,292,000, received from the following countries:—

	£
Great Britain	7,982,000
Commonwealth of Australia	1,893,000
United States of America	1,528,000
Fiji Islands	157,000
Germany	309,000
India	290,000
Ceylon	173,000
Belgium	120,000
Canada and British Columbia	113,000
Japan	85,000
France	55,000
Singapore	37,000
Pacific Islands	30,000
Holland	29,000
China, including Hongkong	21,000
Italy	19,000
Asia Minor	17,000
Sweden	16,000
Greece	14,000
Phillipine Islands	10,000
Java	5,000
Other Countries	29,000
Total	13,292,000

When it is considered that this immense expenditure on imports is required for the use and consumption of a colony with a population of 850,000 persons, it can be readily understood what a rare opportunity there is for exploiting this Colony with up-to-date manufactures.

The prosperous condition of New Zealand and the equal distribution of wealth, places every one in a position to indulge in a fair degree of comfort, and anything in the way of an improvement in the existing conditions is welcomed and substantially supported. The sparsity of the population provides an exceptional market for all labour-saving machinery in every department of agricultural, pastoral, and domestic life.

These features of the possibilities of Exhibition are confidently placed before the more industrial nations of the world. Therefore manufacturers are urged to appoint representatives and to send such exhibits as will show the nature and finish of their work, and which are suitable for a colony which is progressing with almost unparalleled rapidity, and which has the keenest desire to adopt the most modern ideas and conveniences of advanced civilisation.

New Zealand as a food-producing country.

The resources and possibilities of the Colony of New Zealand as a food-producing country promise so much that it is without any apology that the Government desire to bring it under the notice of those interested in transporting, importing, and otherwise handling the food stuffs of the world.

It is only necessary to instance the rapid growth of the development of the NEW ZEALAND FROZEN-MEAT INDUSTRY and the splendid service of mammoth refrigerator steamers dependent thereon; the DAIRYING INDUSTRY, which has now reached proportions beyond the most optimistic expectations, and which is still only in its infancy. The fortnightly shipments of Butter and Cheese to London during the past season ranged from 1,500 to 2,000 tons, carried in one bottom

New Zealand's raw materials.

As a market in which to procure supplies of raw materials, of quality unequalled in the world, our annual export of wool, hemp, skins and hides, kauri-gum and coal have only to be mentioned to induce purchasers of these staples to attend and investigate the sources of production:

	£		£
Wood ...	4,673,826	Hemp ...	710,281
Kauri-gum ...	501,817	Coal ...	139,890
Skins ...	444,821	Hides ...	53,431

New Zealand's mineral wealth.

The mineral wealth of this naturally endowed Colony is demonstrated by the continuous and increasing output of GOLD, which during the past fifty years has totalled in value

The immense sum of £65,000,000.

In this industry alone there is an opening for investment which is not offered by any other part of the world under such secure conditions.

The surfaces of the gold-bearing parts of the Colony have only been "scratched over," and there are immense possibilities and discoveries awaiting enterprise combined with scientific and up-to-date methods of prospecting with a view to tracing the supplies of GOLD to their original sources.

LARGE DEPOSITS OF IRON-SAND AND IRON-ORE are available within the Colony, and these await the enterprise and attention necessary to development; and, in convenient proximity, are THE COAL-MINES OF NEW ZEALAND, producing coal of quality equal to the best in the world, and for which an over-sea trade has yet to be initiated and developed.

New Zealand as a tourist resort.

As a resort for tourists and sportsmen, the Colony of New Zealand offers an interesting opportunity at a cost which compares favourably with similar opportunity in any other part of the world.

Deer-stalking,	Trout-fishing,	Alpine-climbing,
Geysers,	Hot and Cold Lakes,	Superb Mountain
Scenery,	Sounds, Shooting,	Road and River Scenery,

unsurpassed in the world, are available to every one who can find time to visit the Colony; and not necessarily only to wealthy people, because every attraction is available to people of ordinary means, on account of the moderate charges for travelling and accommodation, and for participation in the available sport.

Duty and freight.

Special arrangements will be made with the steamship companies trading to New Zealand whereby exhibitors will obtain special rates of freight on exhibits, and complete arrangements will be made for the reception and installation of exhibits on such lines as will protect exhibitors from any excessive charges.

The Exhibition buildings will be constituted a bonded warehouse for the time being. All goods sold will be *plus duty*, whilst all over-sea exhibits that may be returned can be reshipped free of duty.

The Exhibition grounds and buildings.

The grounds and buildings will be lighted by ELECTRICITY AND GAS, and as electricity and lighting in almost every form will be a prominent feature of the exhibition, every facility will be extended to exhibitors to display the latest developments and designs.

Each nation participating will be allotted a special court, irrespective of the class of exhibits shown, except in the case of artificial manures in bulk, and machinery in work requiring to be supplied with motive power.

These classes will be allotted separate buildings.

Arts and crafts.

Particular attention will be devoted to arts and crafts in actual operation, and every reasonable facility will be given to exhibitors who desire to MANUFACTURE GOODS IN THE EXHIBITION.

Awards.

Awards in the form of diploma of gold and silver medals, according to merit, in each section, to exhibitors who desire to compete. These awards should prove of great value to successful firms, as care will be taken to select competent and unbiassed judges.

Railway and steamer concessions.

Special rates for coastal, over-sea, and railway passenger fares will be arranged, so as to encourage the presence of visitors, and popular excursions will be promoted continuously to all the principal places of interest in the Colony. Every facility will be provided, not only to attend the Exhibition, but at the same time to visit the scenic, thermal, and other attractions in various parts of the Colony.

Contests and games.

International Band Contests,
Bowling Tournaments,
Race Meetings and Regattas,
Volunteer Encampments and Military
Sports,

Athletic Sports.
Aquatic Sports,
Cricket Matches.
Polo Matches,

Fire Brigade Demonstrations and Sports, Football Matches,
Agricultural and Pastoral and Stock Shows, Golf Tournaments,

will be arranged in suitable continuation during the progress of the Exhibition.

Educational competitions will also be instituted with a view to promote and illustrate progress in *music and art*.

RULES AND REGULATIONS.

Opening date.

1. The exhibition will be open to the public from the 1st November, 1906, to the first Thursday in Easter week (April, 1907), from 10 A.M. to 10 P.M. daily.

Exhibits in order.

2. All exhibits must be in the building and every arrangement complete by 10 P.M. on 20th October, when the buildings and grounds will be cleared of all workmen and others, any exhibits not properly placed will have to be removed.

Date of installation.

3. Exhibits may be sent in (at owner's sole risk) and exhibitors may commence fitting up and arranging on and from 1st October, or earlier if necessary, at the discretion of the Executive.

Date of removal.

4. All exhibits will have to be removed from the buildings and grounds by 30th April.

Prohibition of subletting.

5. Exhibitors will not be permitted to sublet the whole or any portion of the space allotted to them.

Supply of electric current, gas, and water.

6. Provision will be made where practicable (at exhibitor's risk and expense) for supplying power for exhibits to be shown in motion, and for the supply of electric current, gas, or water, if required, if duly entered on the application for space. Exhibitors must indicate on their application for space the probable extent of electric power they will require. The charges for electricity must be taken as correct, and paid for by the exhibitors weekly. Exhibitors will not be permitted to interfere in any way with the gas or water fittings or electric light without an approval in writing from the Executive, whose requirements must in all respects be complied with.

Indemnity.

7. If any damage or injury shall be occasioned during the progress of the Exhibition by any exhibited machinery, implement, or article to any visitor or other person (or to any officer, servant, or other person there and then employed by the Exhibition Executive), then the exhibitor to whom such machinery, implement, or article may belong shall be responsible for such damage or injury in the first instance, and shall besides indemnify and hold harmless the said Executive from and against all actions, suits, expenses, and claims on account and in respect of any such damage or injury which may be caused.

Forfeiture of deposit.

8. In case the balance due on space is not paid on the due date, the first deposit of 50 per cent will be forfeited and the space reallocated.

Admission for exhibitors and assistants.

9. Tickets (non-transferable) to admit exhibitors, attendants, and workmen will be supplied free of cost to the exhibitors; and no exhibitor, attendant, or workman will be admitted without such ticket being produced to an official on entering the grounds. In the event of any such ticket being transferred or otherwise disposed of, the same will be immediately cancelled, and no further ticket will be issued. The number of passes issued to workmen and attendants will be limited at the discretion of the Executive of the Exhibition.

Entrance for goods.

10. All goods must enter and leave only at the goods entrances, the location of which will be duly notified.

Directions for forwarding goods.

11. All goods must be forwarded consigned to

The New Zealand International Exhibition, Christ Church, New Zealand,

and in every instance carriage must be prepaid, otherwise the exhibits cannot be received. All goods will be received at the Exhibition and deposited on the space taken by the exhibitor at a reasonable charge, but without responsibility on the part of the Exhibition Executive or any of its officials. All charges for transport to the Exhibition grounds must be borne by the exhibitor. The total charge for transport from the ship's slings Lyttelton, to the Exhibition grounds, including wharfage, railage, receiving, and delivering, will not exceed 8s. 6d. per ton on ordinary goods, charged on the same basis as the freight. Heavy lifts will be transported at special rates.

Erection of stands.

12. Exhibitors in fitting up their stands must comply with the orders and Regulations of the Christ Church City Council or other local authority.

Sign-Boards.

13. Name-boards, show-cards, tablets, or the like, or any part thereof, will not be allowed to be of greater length than the frontage of space allotted to the exhibitor, nor to be placed at a greater height than 2 ft. from the top of stall (excepting only in special positions where permission in writing has been first obtained), nor in any way to interfere with or be a nuisance to other exhibitors. The decision of the Executive in this respect shall be final and binding.

Interference with flooring.

14. When fixing to the floor is necessary, no nails, but screws only, may be used, and exhibitors desirous of taking up the floor, or in any way altering the structure, must obtain the necessary permission from and comply with the requirements of the Executive, and must employ the Exhibition workmen. Exhibitors are responsible and must pay for all damage caused by their exhibiting.

Removal of exhibits.

15. No Exhibitor will be permitted to remove his exhibit until the close of the Exhibition, and not then without the consent in writing of the Executive being previously obtained, and until all charges due are paid. The Exhibition Executive shall have a lien upon all goods exhibited for any moneys due by exhibitors, and shall be entitled to realize such lien by sale, public or private, or by forfeiture.

Non-obstruction of gangways.

16. Gangways must at all times be kept clear and free and fully available for passage.

Invitation tickets.

17. Exhibitors will be entitled to invitation admission tickets, available any day, for the purpose of inviting their customers to visit the Exhibition and view their exhibits. Such tickets will be supplied at special rates and under certain conditions determined by the Executive.

Non-responsibility and insurance.

18. Every article exhibited will be at the sole risk and responsibility of the exhibitor, but every precaution and care will be taken by the Executive for the prevention of loss or damage to any exhibit or exhibits. Exhibitors are recommended to insure their exhibits against fire. In the event of the buildings being unavailable in consequence of fire or other agencies over which the Executive have no control, all contracts are null and void from the date of such occurrence.

Allotment of position.

19. No particular position can be guaranteed, but the Executive will endeavour to meet the wishes of exhibitors in respect thereto as far as possible. Spaces selected will be allotted unless previously let, or unless the exhibit is unsuitable for such position.

Decorating stands.

20. Exhibitors requiring plants or shrubs for adorning their stands may obtain the same for a moderate fee on application to the management, who reserve to themselves the right to supply or withhold the supply of such articles.

Stand numbers.

21. Each exhibitor must place prominently upon his position the number of his stand.

Machinery in motion.

22. Exhibitors showing heavy machinery or machinery in motion must only do so in special building set aside for that purpose. Notice should be given in writing when engaging space where an exhibit is likely to be of exceptionally heavy character, all risk in connection therewith must be taken by exhibitors.

Display of exhibits.

23. Every exhibit must be open to the public view from 10 A.M. to 10 P.M. on all the days the Exhibition is open to the public; and in the event of any exhibitor failing to comply with this rule, the Executive are hereby authorised and empowered to remove any covering and expose the exhibit, at the risk and cost of the exhibitor, who shall in addition be liable for £10 per day as liquidated damages.

Naked lights.

24. Under no circumstances must naked lights or dangerous oil-lamps be used within the buildings. All such lamps or lights will be removed by the Exhibition officials.

Supply of fire and gas.

25. Special regulations will be made in cases where fire and gas is used by exhibitors, and a responsible officer will be appointed to carry out the injunctions of the Executive in this respect. A deposit will be required in all cases where gas or electricity is required.

Prohibition of explosives, etc.

26. No explosives or any substance, which in the judgment of the Executive is dangerous will be admitted, but may be represented by models.

Objectionable exhibits.

27. Spirits, oils, corrosive substances, and generally all substances which might spoil other articles or inconvenience the public, and any other articles which in the opinion of the Executive are objectionable, can only be permitted to be exhibited in solid and suitable vessels.

Catalogue.

28. The Executive reserves to itself the sole right of compiling and printing a catalogue of exhibits, under regulations which will be duly notified.

Rules binding exhibitors.

29. All who come exhibitors shall be held by so doing to signify their compliance and practically to subscribe to the whole of these regulations, together with such other regulations and the Executive may issue from time to time.

Applications for space.

30. Applications for space, with full particulars, are invited as early as possible, and in the allotment of space precedence will be given, as far as possible to priority of application. No application will be received later than the 31st March 1906.

Applications for space may be lodged with the High Commissioner for New Zealand, Westminster Chambers, 13, Victoria Street, London, S. W., or with the Secretary, New Zealand International Exhibition, Christchurch, New Zealand, on the official printed form attached hereto and notice of allotment (if space is allotted) will be promptly mailed to the applicant.

The latest date for receiving applications may be determined earlier, if the number of applications promise to exceed the accommodation provided.

Charge for space.

31. The ordinary charge for space will be from 2s. per square foot, the minimum charge being £1-1s.—25 per cent payable on application, 25 per cent on allotment, and the balance one month before the opening date of the Exhibition. End spaces, etc., at special rates.

Press private view.

32. Press private view will take place, if desired, on the day before the opening, when it is requested that exhibitors will be present to supply full particulars, and so help the members of the Press.

Arrangement of stands.

33. Exhibitors occupying stands with two or more frontages must arrange their exhibits on each frontage, and any bare woodwork and backs of signboards, etc., must be covered.

Unpacking.

34. All cases must be unpacked on arrival, and empties removed at the exhibitor's expense to the space provided by the Executive.

Photographic rights.

35. No articles or buildings may be photographed, drawn, copied, or reproduced without the permission of the Executive.

Advertisements and handbills.

36. Exhibitors will not be allowed to exhibit advertisements in any part of the Exhibition, nor to give way nor cause to be given away any handbills, etc., except at their own respective stands.

Regulations for stands and selling.

37. Exhibitors, must keep their exhibits and stands in good order and will displayed during the hours of the Exhibition being open. Exhibitors shall be permitted to have attendants, and such attendants may take orders, but shall not be permitted to annoy the public or other exhibitors by solicitations; and any exhibitor or assistant breaking these rules may be expelled by the Executive, and not allowed to re-enter the Exhibition without the written permission of the Executive.

Those desirous of giving away samples, or selling samples, must have the written permission of the Customs Department and adhere to its rules, and such permission must be indorsed by the Executive.

The Executive may, without giving any reason for doing so, remove any person or persons acting improperly or annoying the public, and may prevent any such person or persons from again entering the grounds.

Special terms and conditions for retailing can be made with the Executive.

Address on cases and goods.

38. All cases and goods for the Exhibition must bear the distinctive mark

NEW ZEALAND

INTERNATIONAL EXHIBITION,

together with the name of the exhibitor and the number of his allotted stand.

Power to make additional rules.

39. Should any question arise not provided for in the above rules, regulations, and conditions, the decision of the Executive shall be final. The right to alter, amend, add to, or cancel any of these rules, and to grant relaxation from them in individual cases, is reserved to the Executive, who also reserve to themselves the right of postponing or abandoning the Exhibition, provided that due notice be given to all intending exhibitors not later than 6th January 1906. If any dispute or difference shall arise between any exhibitor, whether a private individual, company, corporation, or Government, and the Commission for the Exhibition concerning any matter or thing in any way connected with these Articles and Regulations of the rights, duties, or liabilities of the exhibitors and the Commission, respectively under or in connection therewith, or the Exhibition, then and in every such case the dispute or difference shall be referred to a single arbitrator to be nominated by the Chairman for the time being of the Christchurch Chamber of Commerce in accordance with and subject to the provisions of the Arbitration Act in force in the Colony of New Zealand.

EXHIBITORS' APPLICATION FOR SPACE.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	14 to 15	

Agricultural operation—Sowing of ragi, cholam and ballar.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices high.
9. Standing crops are in good condition, except sugar-cane in Closepet. Sowing is carried throughout. 5,000 acres in Bangalore, 288 acres in Hoskote and 150 acres in Devanahalli are sown with paddy, ragi, sugar-cane and other sundries.
10. Prospects of the season (fair) for the present. Excepting in Nelamangala and Closepet there has been good rain throughout the district.
11. Public health generally good. Small-pox is reported to prevail in the Vadigenahalli hobli of the Devanahalli Taluk.
12. Cattle healthy. Fodder is available and pasture is beginning to be available except in Closepet. Water is available.

KOLAR.

8. Market fairly supplied. Prices high.
9. Ragi, ~~car~~, togari, samé, cholam, haraka and wild gingelly are sown throughout the district. Paddy is being harvested in parts of Goribidnur.
10. Prospects of the season encouraging. Food stocks are available in moderate quantities. Rains have withheld.
11. Public health generally good, except for 3 attacks and 3 deaths from cholera in Bagepalli.
12. The condition of cattle is reported to be generally good. Fodder is available in all parts, and pasture is fast growing.

936

TUMKUR.

8. Market well supplied. Prices are high and steady.

9. Paddy and sugar-cane were harvested in parts of Gubbi; ragi, togari and ballar in Chiknayakanhalli, Sira, Tiptur, Kunigal, Koratagere and Turuvekere; castor and til in Chiknayakanhalli, Tiptur and Kunigal; paddy in Sira, Kunigal, Gubbi and Koratagere; ragi and haraka in Sira and Gubbi and ragi in Tumkur are being sown. Standing crops, *viz.*, sugar-cane, paddy and ragi in Maddagiri, Sira, Gubbi, Kunigal, Kortagere and Turuvekere; cholam and til in Maddagiri, Chiknayakanhalli, Sira, Kunigal, Koratagere and Turuvekere are fair, but want more rain.

10. Prospects of the season are less discouraging. Food stocks are available and sufficient. The general though light showers that fell during the week have helped the sowings to sprout up and have benefited the standing crops. Ploughing and sowing are in progress, but more rain is wanted throughout especially in Maddagiri and parts of Gubbi, Tiptur, Pavagada and Turuvekere.

11. Public health generally good, except for fever in Tiptur town and a few adjoining villages.

12. The condition of cattle is improving, except in parts of Gubbi, Tiptur and round the Nelhal hobli in Tumkur Taluk, where they are declining in condition and old ones are dying. Date leaves are still used as fodder in parts of Chiknayakanhalli, Sira and Tiptur. Drinking water is available for men and cattle.

MYSORE.

8. Market well supplied

9. Standing cholam, togari, castor and other crops are reported to be withering in parts of Mysore, Chamrajnagar, Hunsur, Heggaddevankote, Gundlupet, Nanjangud, T.-Narsipur and Mandya. They are reported to be fair in parts of Seringapatam, Malvalli and Nagamangala. Paddy in parts of Seringapatam, Hunsur, Yedatore and Krishnarajpete and ragi in parts of Malvalli are being sown.

10. Prospects of the season have slightly improved. Standing crops are still in need of rain which is anxiously awaited. Food stocks are available in limited quantities.

11. Public health generally good. But cholera prevails in Nanjangud, Seringapatam and Mandya and in parts of Nagamangala Taluk and in the Mysore Town. Plague cases still occur in Mandya.

12. Cattle healthy in most taluks, but they are reported to be in a poor condition in Gundlupet for want of sufficient fodder and water. Difficulty for fodder and water is still felt in parts of Chamrajnagar, Nanjangud, T.-Narsipur and Nagamangala. In parts of Nagamangala and Nanjangud cattle are reported to be fed on the leaves of date and other trees.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Standing crops, *viz.*, paddy and ragi in Manjarabad and Alur, and sugar-cane in Hole-Narsipur, are reported to be in fair condition. They are reported to be withering in other parts owing to want of rain. Caterpillars are damaging crops in Hassan.

10. Prospects of the season not favorable. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox still exists in parts of Hassan, Channarayana and Alur.

12. Cattle generally healthy. Water and fodder are available in Manjarabad, but are getting scarce in other parts.

SHIMOGA.

8. Market well supplied. Prices high.

9. The transplanting of paddy is going on in parts of Sagar, Nagar and Tirthahalli, where there is good supply of water. In other parts of these taluks and in Sorab transplanting has not yet commenced. Sowing of ragi is nearing completion in Sagar and Sorab. Paddy in parts of Sorab and some dry crops in parts of Honnali are attacked by insects. Arecanut trees in Tirthahalli are suffering in some areas from "*Kole roga*". Sugar-cane is in a fair condition in Sagar, Nagar and Sorab and under the Sulekere tank in Channagiri and the Solur anikat in Shikarpur. Standing crops in Shimoga, Channagiri, Honnali and Shikarpur are much in need of rain.

10. Rainfall is very poor during the week. More rain is anxiously expected everywhere. Insufficiency of food stocks is reported in parts of Kumsi, Sorab and Shikarpur. Elsewhere food stocks are sufficient for the present. Rice is being imported into several parts of the district from the Madras Presidency.

11. Public health is generally good. Cholera is slowly disappearing and exists only in parts of Shimoga, Channagiri, Honnali, Shikarpur and Kumsi, and small-pox in parts of Channagiri, Shikarpur, Sorab, Sagar and Nagar.

12. Supply of fodder is limited in Channagiri, Honnali, Shikarpur and Sorab. Pasture is available in moderate quantities. Cattle are reported to be in poor health in parts of Shimoga, Channagiri, Shikarpur and Nagar. Scarcity of water is felt in Shikarpur and is likely to increase in the other maidan taluks if rains hold off.

KADUR.

8. Market fairly well supplied.

9. Ploughing is going on in Sringeri. In parts of Kadur, paddy, ragi, ballar, cholum and kulthi are being sown. The standing sugar-cane crop in Kadur, Chikmagalur, Tarikere and Yedahalli is in fairly good condition and is being harvested in parts of Kadur. The young plants of cholum, black and green grams are fading in parts of Kadur and Tarikere for want of rain. In a few villages of the Kadur hobli, the young plants are said to have been damaged by locusts to a certain extent. *Makkigaddes* in the mainad are in need of more rain. Elsewhere the crops are in good condition.

10. Prospects of the season are not quite encouraging. More rain is urgently needed throughout. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Yedahalli, Tarikere, Chikmagalur and Mudgere.

12. Cattle generally healthy, but some old and infirm cattle are reported to be dying in parts of Kadur and Tarikere, partly on account of deficient fodder and partly by their inability to bear the blast of the monsoonish weather. Green grass is springing up in several parts of the district. Water is generally available.

CHITALDRUG.

8. Market well supplied.

9. Castor, navane and togari in Challakere, cotton and navane in Hiriur, ragi, ballar and togari in Holalkere; ragi and cholum in Davangere and castor, sessamum, navane and kambu in Molakalmuru were sown during the week. More rain is urgently needed for the standing crops such as ragi, cholum, kambu, castor, sessamum, black gram and togari in Chitaldrug; ragi, ballar, togari, cholum, sessamum, green gram and castor in Hiriur and ragi, ballar, kulthi, black and green gram and togari in Jagalur.

10. Prospects of the season fair. Food stocks sufficient.

11. Public health good.

12. Cattle healthy. Water is sufficient for the present. Difficulty for fodder still continues in certain parts of the district.

BANGALORE, }
18th July 1906.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11½	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	12 to 13	

Agricultural operation—Sowing of ragi, cholam and ballar.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Ballar, ragi, maize, harka, gingelly and paddy are sown over a large area in the taluks of Bangalore, Hoskote, Nelamangala, Kankanhalli, Channapatna. Standing crops are reported to be in good condition in Hoskote, Closepet and Kankanhalli Taluks. Raiyats are busy with ploughing in the Hoskote Taluk.
10. Prospects of the season good. There has been very good rainfall throughout the district. Still the prices of food stocks continue high.
11. Public health generally good. Small-pox is reported to prevail in the Devanhalli and Vadigenahalli hoblis of Devanhalli Taluk and Nandagudi hobli of the Hoskote Taluk.
12. Cattle healthy. Fodder and water available throughout.

KOLAR.

8. Market fairly supplied. Prices high.
9. Ragi, ballar, samé, cholum, harka and wild gingelly are being sown throughout the district. Paddy is being harvested in parts of Goribidnur.
10. Prospects of the season encouraging. Food stocks are available in moderate quantities.
11. Public health generally good.
12. Condition of cattle generally good. Fodder is available in all parts

TUMKUR.

8. Market fairly well supplied. Prices high and steady.
9. Paddy and sugar-cane were harvested in parts of Gubbi Taluk. Standing crops such as ragi, avare, togari, castor, pulses, paddy and sugar-cane are in good condition and are much benefited by the rains during the week. Ragi, avare, togari and castor are being sown in parts of all the taluks in the district.
10. Prospects of season are fair and more hopeful. Rains have been light though general. Kunigal reports 3—85 during the week, the heaviest being 1—53 on the 18th. But more rain is generally wanted especially in parts of Maddagiri, Tiptur, Chiknayakanhalli and Turuvekere. Ploughing and sowing operations are in progress.
11. Public health generally good. Fever is reported to still prevail at Tiptur and in a few villages, and small-pox in Honnavalli hobli of the Tiptur Taluk.
12. The condition of cattle is improving. It is still poor in parts of Gubbi, Tiptur and Turuvekere. Date leaves are yet used to supplement fodder in parts of Chiknayakanhalli, Sira, Tiptur and Turuvekere. Drinking water is available.

MYSORE.

8. The weekly markets in all the taluks are reported to have been well supplied with grain during the week.
9. The standing jola, togari, ballar and other crops which were reported to be withering during the past week have improved by the recent rains. They are reported to be fair in Seringapatam and Gundlupet and good in Hunsur and Nagamangala Taluks. Ragi in parts of Mysore, Seringapatam, Hunsur, Yedatore, Malvalli, Mandya and Nagamangala Taluks. Ragi, paddy and ballar in parts of Krishnarajpete and Chamrajnagar Taluks. Paddy in parts of Heggaddevankote and Malvalli; ragi and ballar in parts of Gundlupet and T. Narsipur, and green gram in the Kowlandi hobli of the Nanjangud Taluk are being sown.
10. Prospects of the season are good. The standing crops have been improved by the recent rains. Food stocks are available in limited quantities.
11. Public health generally good, but cholera still prevails in Mysore, Yedatore and Nanjangud Taluks and it is reported to be subsiding in Nagamangala Taluk.
12. Cattle are reported to be healthy throughout. The recent rains have made pasture available. Fodder and water are generally available though in limited quantities in a few parts.

HASSAN.

8. Market fairly well supplied. Prices high.
9. Standing crops, *viz.*, paddy, ragi, togari, jola, etc., in Hassan, Arkalgud, Channarayapatna, Hole-Narsipur and Alur; paddy and ragi in Manjarabad, sugar-cane, paddy and ragi in Belur are reported to be in fair condition.
10. Prospects of season hopeful. More rain is wanted in all parts of the district. None are employed on relief works, and food stocks are sufficient for the present.
11. Public health generally good. Small-pox exists to a small extent in parts of Channarayapatna, Manjarabad and Alur.
12. Cattle generally healthy. Fodder and water available generally except in parts of Arsikere and Hassan Taluks.

SHIMOGA.

8. Market well supplied. Prices are high.
9. The rains during the week have been very helpful to the standing crops in all the taluks. The transplanting of paddy in the Sagar, Nagar and Tirthahalli Taluks is going

on. Ragi and cholum in the Sorab Taluk; paddy in the Kumsi Sub-Taluk; paddy, choiam and sessamum in the Channagiri Taluk are being shown in areas which had remained unsown hitherto for want of rains. Crops in the Honnali Taluk are reported to be free from insects owing to the timely rains this week. Arecanut trees in the Tirthahalli Taluk are reported to be suffering from 'koleroga' in some tracts

10. Good rain has fallen in all the Taluks during the week. Prospects of the season are hopeful. Food stocks are reported to be somewhat insufficient in parts of Shikarpur and Sorab Taluks and the Kumsi Sub-Taluk. In the Shimoga and Channagiri Taluks food stocks are reported to be moderate. Elsewhere they are enough for the present. Rice from the Madras Presidency is being imported into several parts of the District.

11. Public health is generally good. Cholera is slowly disappearing and it exists in parts of the Shimoga, Channagiri, Honnali and Shikarpur Taluks and Kumsi Sub-Taluk. Small-pox prevails in parts of Shimoga, Channagiri, Sorab, Sagar and Tirthahalli Taluks and Kumsi Sub-Taluk.

12. Fodder supply is limited in Channagiri, Honnali, Shikarpur and Sorab Taluks. Pasture is available in moderate quantities. Cattle are reported to be in poor condition in parts of the Channagiri, Shimoga and Shikarpur Taluks.

KADUR.

8. Market fairly well supplied generally, but the supply is poor in the Chikmagalur shandy owing to plague.

9. Ploughing is in progress in Sringeri. Ragi, cholum, ballar, togari, castor in parts of Tarikere; ragi, paddy, cholum, ballar, togari castor and gingelly in parts of Kadur are being sown. Transplantation of paddy is almost over in Koppa. The standing crops of sugar-cane, ragi, and paddy, gingelly, cholum and coriander in Chikmagalur; arecanut, coffee, cardamum, sugar-cane and paddy in Koppa; ragi and paddy in Mudgere; sugar-cane and paddy in Tarikere are in fairly good condition. The rainfall in the week has done much good to all standing crops generally and particularly to the withering crops in parts of Kadur and Tarikere. Sugar-cane in parts of Kadur and kar-paddy in parts of Mudgere are being harvested.

10. Prospects of season encouraging. There has been sufficient rain fall generally throughout the district and more is needed in parts of Kadur. Food stocks available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Chikmagalur and Mudgere.

12. Cattle generally healthy, but in poor condition, yet in parts of Kadur. 'Metre roga' is reported to prevail in Goribid Hobli of the Mudgere Taluk. Green grass is springing up in all parts and will be soon of use. Water available throughout.

CHITALDRUG.

8. Market well supplied.

9. The rainfall during the week has benefited the standing crops such as ragi, avare, jola and enabled the sowing of haralu, haraka, navane, sajje and cotton in Challakere; ragi, avare, navane, sajje, horse gram and chillies in Hiriyur; ragi, avare, togari, navane, sajje and chillies in Holalkere; ragi, avare, togari, horse gram, jola and chillies in Davangere; and cotton, navane and sajje in Molakalmuru Taluk.

10. Prospects of the season improving. Food stocks sufficient.

11. Public health good.

12. Cattle healthy. Water sufficient for the present. Fodder scarcity still continues but the present rains promise some improvement in the near future.

BANGALORE,
25th July 1906.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee
Ragi	... 25 to 30	12 to 13	

Agricultural operation—Sowing of ragi, cholam and ballar.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Ragi, ballar, etc., are reported to have been sown in about 869 acres in Bangalore; 2,680 acres in Dodballapur; 2,000 acres in Kankanhalli; and paddy over 350 acres in Bangalore and over 250 acres in Nelamangala.
10. Prospects of the season good. Tanks have received from 2 to 4 months' supply of water throughout the district.
11. Public health generally good.
12. Cattle healthy. Water available. Fodder is available, except in Magadi and Closepet.

KOLAR.

8. Market fairly supplied. Prices high.
9. Ragi, ballar, samé, cholam, togari and paddy are being sown throughout the district. Paddy is being harvested in parts of Goribidnur.
10. Prospects of the season are encouraging. Food stocks are available in moderate quantities.
11. Public health generally good.
12. Cattle generally good. Fodder and pasture are available in all parts.

TUMKUR.

8. Market well supplied. Prices of food grains, except that of kadale, show a very slight decline.

9. Paddy and sugar-cane were harvested in parts of Gubbi and Tiptur. Standing crops, such as ragi, ballar, togari, castor, pulses, kambu, navane, paddy and sugar-cane are in fair condition. Ragi, ballar, togari, castor and punaji paddy are being sown.

10. There has been no appreciable rain throughout the District during the week. The sowings have sprouted up well, but rain is wanted especially in parts of Maddagiri, Pavagada, Chiknayakanhalli and Turuvekere.

11. Fever still prevails in Tiptur town and small-pox in some villages of the Tiptur Taluk.

12. The condition of cattle is still poor in parts of Gubbi, Tiptur, Turuvekere and Koratagere. Date leaves are still being used as fodder in parts of Chiknayakanhalli, Sira, Tiptur and Turuvekere. Drinking water is sufficient for the present, except in some villages of the Turuvekere Sub-Taluk.

MYSORE.

8. Market well supplied.

9. Standing cholum, til, togari, castor, ballar and other crops are reported to be fair in parts of Mysore, Chamrajnagar, Seringapatam, Gundlupet, Nanjangud, T.-Narsipur and Malvalli; good in parts of Hunsur, Yedatore, Heggaddevankote and Nagamangala Taluks. Ragi, ballar and paddy in parts of Chamrajnagar; ragi, ballar, kulthi and coriander in parts of Gundlupet; ragi and ballar in parts of T.-Narsipur, and ragi in parts of Malvalli and Mandya are being sown. Paddy seedlings in parts of Seringapatam, Hunsur, Yedatore, Nanjangud and Krishnarajpete are being transplanted.

10. Prospects of the season are encouraging. Rains are still needed for the standing crops in Gundlupet and Mandya. Food stocks are available.

11. Public health generally good, but cholera prevails in parts of Seringapatam, Yedatore, Nanjangud and Nagamangala.

12. Cattle are reported to be healthy, except in parts of Doddakowlande hobli in the Nanjangud Taluk, where they are reported to be poor in condition for want of sufficient fodder. Water is generally available. Fodder is still scarce in certain parts.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Standing crops, *viz.*, sugar-cane, paddy, ragi, togari, cholum, etc., in Hassan, Arkalgud, Channarayapatna, Hole-Narsipur and Alur; and paddy and ragi in Manjarabad and Belur, are reported to be in fair condition. Dod ragi, ballar, etc., are being sown in Hassan, Arsikere, Channarayapatna and Hole-Narsipur.

10. Prospects of the season hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox exists here and there in parts of Manjarabad and Channarayapatna.

12. Cattle generally healthy. Water and fodder are generally available.

SHIMOGA.

8. Market well supplied. Prices high.

9. The standing crops are in good condition, having been benefited by the rains which fell during the week. Ragi and paddy in Shimoga, ragi and cholum in Channagiri and Sorab, and paddy in Kamsi are being sown. The transplanting of paddy seedlings is progressing in Nagar and Tirthahalli. The paddy crop in Honnali and Shikarpur needs more rain. The arecanut trees in parts of Tirthahalli are suffering from *Kole-roga*.

10. Prospects of the season are hopeful. Food stocks are reported to be somewhat insufficient in parts of Shikarpur, Sorab and Kumsi. Rice is still being imported into the several parts of the district from the Madras Presidency.

11. Public health generally good. Cholera prevails in parts of Shimoga, Channagiri, Honnali, Shikarpur, Sagar and Kumsi. Small-pox prevails in parts of Shimoga, Channagiri, Sorab, Sagar and Kumsi.

12. Fodder and pasture are available. Cattle are reported to be poor in condition in parts of Channagiri and Shikarpur. Their condition has improved in other taluks.

KADUR.

8. Market fairly well supplied, except in Chikmagalur, where the supply is poor owing to the prevalence of plague.

9. Ploughing is still going on in parts of Sringeri and Yedahalli. Transplantation of seedlings is in progress in parts of Mudgere, Koppa, Yedahalli and Sringeri. Paddy, ragi, ballar and castor in parts of Tarikere; dod-ragi in parts of Chikmagalur, and ragi, togari, ballar and cholum in parts of Kadur are being sown. The standing crops of sugar-cane, paddy, arecanut, coffee and cardamom in Koppa; paddy and ragi in Mudgere; sugar-cane, ragi, paddy, gingelly, coriander and cholum in Chikmagalur; sugar-cane in parts of Tarikere, Kadur and Yedahalli and the young plants of ragi, paddy, ballar, gingelly, black and green grams, castor and cholum in parts of Kadur, and that of paddy, cholum and ballar in parts of Tarikere are in good condition. Arecanut crop in some parts of Koppa is affected by *Kole-roga* but artificial covers are used to protect the branches and thus prevent damage.

10. Prospects of the season are encouraging. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Tarikere, Chikmagalur and Mudgere.

12. Cattle generally healthy. Green grass is springing up in all parts and will soon be available. Water is available throughout.

CHITALDRUG.

8. Market well supplied.

9. The standing crops are reported to have been benefited by the continued rainfall of the week. Dod-ragi, castor, navane and paddy in Challakere; navane, same, kambu and haraka in Hiriyyur; ragi, ballar, togari, navane, and kambu in Holalkere; cholum, ragi, togari, castor and navane in Davangere; kambu, navane and cotton in Jagalur; navane, castor, kulthi and cotton in Molakalmuru, and cholum, togari and kulthi in Harihar were sown during the week.

10. Prospects of the season are improving. Food stocks sufficient.

11. Public health good.

12. Cattle healthy. Water is sufficient for the present. Scarcity of fodder still continues, but will be alleviated to a certain extent by the rains that are now being had.

BANGALORE,
1st August 1906. }

GOVT. OF H. H. THE MAHARAJA OF MYSORE, GENL. AND REV. SECRETARIAT,
Dated Bangalore, the 28th July 1906.

By Order,
K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

Proceedings of the Government of His Highness the Maharaja of Mysore.

READ—

Para 9 of Government Order No. Fl. 404-48—Gen. Fin. 335-05-4, dated the 18th July 1906, sanctioning the budget estimates for 1906-07.

No. Fl. 1208-17—S. & A. 100-06-1, DATED BANGALORE, 1ST AUGUST 1906.

ORDER THEREON.—The Government of His Highness the Maharaja have had under their consideration the question of granting travelling allowance to Amildars and Deputy Amildars for tours within their jurisdiction. This measure is calculated to improve the efficiency of this important branch of the subordinate executive service. The Government are convinced that the comparatively small additional cost entailed will be more than repaid by greater attention being paid by Taluk Officers to out-door work and all temptation for drawing supplies from the raiyats being removed. The state of the finances has hitherto prevented effect being given to this small measure of improvement in administrative efficiency. It has, however, been found possible when dealing with the current year's budget to set apart the sum required to meet the probable charges on this account.

2. The Government are therefore pleased to direct that, with effect from the 1st August 1906, an allowance of one rupee be given to Amildars and Deputy Amildars for every day on which they camp out or travel within their respective jurisdictions, beyond a radius of five miles from their head-quarters; journeys on duty outside the taluk or sub-taluk limits being regulated by the Mysore Service Regulations, as heretofore.

3. The Comptroller is requested to submit a draft addendum to the Mysore Service Regulations, embodying the above direction.

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	12 to 13	

Agricultural operation—Sowing of ragi, cholum, ballar and gram.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices continue high.
9. Sowing is being continued. Ragi, ballar, etc., are reported to have been sown in Bangalore, Dodballapur and Kankanhalli; and paddy over 50 acres in Bangalore and 170 acres in Dodballapur. Standing crops are in good condition. In some parts weeding is reported to be going on.
10. Prospects of the season good. The largest quantity of rainfall measured in the district during the week was in the Closepet Sub-Taluk, where it was most required.
11. Public health generally good.
12. Cattle healthy. Water and fodder available. All the tanks contain from two to five months' supply of water. Water is still reported to be insufficient in Closepet.

KOLAR.

8. Market well supplied. Prices almost stationary.
9. Standing crops are in good condition. Ragi, ballar, samé, cholum, togari and kar-paddy are being sown throughout the district. Vaisakhi paddy is being harvested in parts of Goribidnur.
10. Prospects of the season are encouraging. Food stocks are available in moderate quantities.
11. Public health generally good.
12. Cattle generally good. Fodder and pasture are available in all parts.

TUMKUR.

8. Market well supplied.

9. Nat-ragi is being harvested in Sira. The standing crops, such as ragi, ballar, togari, paddy, sugar-cane, castor, etc., are fair. Punaji paddy, ragi, castor and ballar are being sown in parts.

10. Prospects of the season are hopeful, but more rain is needed throughout the district, especially in Pavagada and parts of Maddagiri, Chiknayakanhalli and Turuvekere.

11. Fever continues in Tiptur town, and small-pox prevails in the Yediyur Hobli of Kuni-gal Taluk and in a few villages of Tiptur.

12. The condition of cattle is still poor in Gubbi, Tiptur, Koratagere and Turuvekere. Date leaves are used as fodder in Chiknayakanhalli, Sira, Tiptur and Turuvekere. Drinking water is sufficient for men and cattle.

MYSORE.

8. Market well supplied.

9. Standing cholum, til, togari, castor, ballar and other crops are reported to be pretty fair in parts of Mysore, Chamrajnagar, Seringapatam, Gundlupet, Nanjangud, Krishnarajpete and Malvalli; good in parts of T.-Narsipur, Nanjangud, Hunsur, Yedatore, Heggaddevankote and Nagamangala Taluks. Paddy seedlings in parts of Seringapatam, Hunsur, Yedatore, Nanjangud and Krishnarajpete are being transplanted. Crops in a few Survey numbers in Nagamangala are reported to have been attacked by insects.

10. Prospects of the season are fair. Rains are still needed for the standing crops in Chamrajnagar, Hunsur, Nanjangud, T.-Narsipur, Nagamangala and Gundlupet. Food stocks are available in limited quantities.

11. Public health generally good, but cholera still prevails in parts of Seringapatam, Yedatore, Nagamangala, T.-Narsipur, Mandya, Heggaddevankote and Mysore.

12. Cattle are reported to be healthy, except in parts of Gundlupet and Nanjangud, where they are reported to be poor in condition. Water and fodder are available in limited quantities.

HASSAN.

8. Market fairly well supplied. Prices high.

9. Standing crops, viz., sugar-cane, paddy, ragi, togari, cholum, etc., in Hassan, Arkalgud, Hole-Narsipur and Alur; and paddy and ragi in Manjarabad and Belur are reported to be in fair condition. In Arsikere and Channarayapatna crops are in need of more rain.

10. Prospects of the season hopeful. More rain is wanted in all parts. Food stocks are sufficient for the present.

11. Public health generally good. Small-pox exists here and there in parts of Manjarabad and Channarayapatna.

12. Cattle generally healthy. Water and fodder are generally available.

SHIMOGA.

8. Market well supplied. Prices high.

9. Transplanting of paddy seedlings is going on in Nagar and Tirthahalli. Ragi and cholum are being sown in Channagiri. Standing crops, viz., paddy in all taluks; sugar-cane in Shimoga, Shikarपुर, Sorab, Sagar, Tirthahalli and Kumsi; ragi in Shimoga, Sorab, Channagiri, Honnali and Sagar are in good condition. In parts of Tirthahalli arecanut trees are reported to be suffering from *Kole-rcga*.

10. Prospects of the season are improving. Food stocks are sufficient for the present in Shimoga, Channagiri and Nagar. They are reported to be somewhat insufficient in parts of Shikarपुर and Sorab. Rice still continues to be imported from the Madras Presidency.

11. Public health generally good. Cholera prevails in a sporadic form in parts of Channagiri, Shikarpur, Tirthahalli and Kumsi.

12. Cattle are improving in condition. Fodder and pasture are available.

KADUR.

8. Market fairly well supplied, except in Chikmagalur, where the supply is poor, owing to the prevalence of plague.

9. Ploughing is still going on in parts of Mudgere, Kadur, Sringeri and Yedahalli. Transplantation of seedlings is still in progress in parts of Mudgere, Koppa, Yedahalli and Sringeri. Paddy, ragi, cholum, kulthi, ballar and togari in parts of Tarikere; dod-ragi in parts of Chikmagalur; and ragi, togari, kulthi, ballar and cholum in parts of Kadur, are being sown. The standing crops of sugar-cane, arecanut, coffee and cardamom in Koppa; paddy and ragi in Mudgere; sugar-cane, ragi, paddy, gingelly, coriander and cholum in Chikmagalur; sugar-cane, paddy, kulthi, togari and wheat in parts of Tarikere; sugar-cane in Yedahalli; and the young plants of ragi, paddy, ballar, gingelly, black and green grams, castor and cholum in Kadur, are in good condition.

10. Prospects of the season are encouraging. Food stocks are available and sufficient, for the present.

11. Public health generally good, except that small-pox prevails in parts of Tarikere, Chikmagalur and Mudgere.

12. Cattle generally healthy, but "*Metre-roga*" is said to prevail in some parts of Mudgere. Green grass is available. Water is available throughout.

CHITALDRUG.

8. Market well supplied.

9. The standing crops are reported to be in good condition in all the taluks. Navane, kambu, cotton and ragi in Challakerē; cholum, ragi, chillies and cotton in Davangere; and cholum and kulthi in Harihar were sown during the week.

10. Prospects of the season improving. Food stocks sufficient.

11. Public health good.

12. Cattle healthy. Water available. Scarcity of fodder still continues to some extent.

BANGALORE,
8th August 1906

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Depts.

READ AGAIN—

Government Order No. R. 16591-629—L. R. 741-05-2, dated the 30th June 1906, laying down definite conditions for admission to the grade of Probationary Amildars (or Revenue Probationers).

1. The appointment of Probationers for the grades of Deputy Amildars and Amildars not being governed by any well defined principles, the Government of His Highness the Maharaja of Mysore think it desirable for the future to lay down some definite conditions for admission to the grade of Probationary Amildars.

2. With a view to reconcile the claims of officials already in the service with the exigencies of giving a proper start to young men who have a claim on the public service on the ground of the services rendered by their ancestors, it is ruled that Probationers, whose appointments will be as few as possible, shall, in future, ordinarily start on Rs. 50, and be attached to the offices of Deputy Commissioners for learning their duties. After a period of two years on probation and after they have passed the tests qualifying for Amildari and Deputy Amildari, they will occasionally be sent out to act as Deputy Amildars and Amildars, and when they have given satisfactory proofs of their eligibility for these executive appointments during a further period of one year, they will be appointed as Deputy Amildars or Amildars according to vacancies.

No. R. 1638-76—L. R. 104-06-1, DATED BANGALORE, 6TH AUGUST 1906.

ORDER THEREON.—The publication of the recent order of Government regarding appointments of Revenue Probationers has led to the receipt of numerous applications from young men who consider themselves eligible for appointment as such. As there is evidently some misconception of the object with which the order in question was framed, the Government deem it necessary to make the following further remarks by way of explanation.

2. As a rule candidates desiring entrance into the lower grades of the public services must make application to the heads of the offices in which they desire to be entertained. Rules will shortly be published laying down the qualifications required for admission to ministerial appointments in the Revenue Department; and these will be followed later on by rules applicable to other Departments of the State where none already exist. It will be for the head of the office concerned to select the man whom he considers best qualified under the rules for a vacancy within his power of filling up.

3. There are, however, certain very rare cases in which a young man has to be started in life in a special manner, otherwise than by way of a footing in the clerical line; cases, namely, of young men who, besides being in all other respects duly qualified, have also a claim on the public service by reason of their high birth or the distinguished services rendered to the State by their ancestors. It is to meet such exceptional cases that the grade of Probationary Amildars, otherwise called Revenue Probationers, was intended, and not as a regular method of recruitment to the service open to all. All appointments to this grade, it should be understood, are made entirely at the pleasure and discretion of His Highness the Maharaja; and solicitations on the part of applicants not eligible as above will not receive attention.

4. The above remarks apply also to appointments of Judicial Probationers.

By Order,

K. S. CHANDRASEKHARA AIYAR,
Secy. to Govt., Gen. & Rev. Depts..

Agricultural operation—Sowing of ragi, ballar and gram.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.

9. Sowing was carried on in some parts of the district. About 509 acres of ragi and other grains and about 200 acres of paddy and about 1,056 acres of all sorts are reported to have been sown in the Bangalore and Doddballapur Taluks. The weeding operation was commenced during the week. The standing crops are all in good condition. Only in the Bangalore Taluk about 2 acres of Vaisakhi paddy and 1½ acres of maize are reported to have been harvested during the week.

10. There has been good rain throughout the district during the week. The tanks received from two to three months' water. The prices of food stocks continue high.

11. Public health generally good.

12. Cattle healthy. Fodder available. Water available throughout.

KOLAR.

8. Market well supplied. Prices almost stationary.

9. Standing crops are in good condition. Ragi and avare in Kolar; horse gram in Chikballapur, Goribidnur and Gudibanda; and Kartika paddy throughout the district are being sown.

10. Prospects of season are encouraging. Food stocks are available in moderate quantities.

11. Public health generally good; but small-pox is reported to prevail in a few villages of the Goribidnur Taluk.

12. Cattle generally healthy. Fodder and pasture are available in all parts.

TUMKUR.

8. Market well supplied. Prices high and stationary.

9. *Nat-ragi* in Sira and sugar-cane in Gubbi are being harvested. Standing crops, such as paddy, ragi, sugar-cane, ballar, castor, togari, etc., are all in good condition. Sowing operations are in progress and weeding has commenced in many parts.

10. Prospects of the season are encouraging. The good rain of the 11th instant was general throughout the district and was very welcome in Maddagiri and Pavagada Taluks and Turuvekere Sub-Taluk.

11. Public health generally good, excepting for fever in Tiptur town and small-pox in a few villages of that taluk.

12. Cattle are improving, except in parts of Gubbi, Tiptur, Koratagere and Turuvekere, where fodder is still scarce, while date and other leaves are used in Chiknayakanhalli, Sira, Tiptur and Turuvekere. Foot and mouth diseases have re-appeared in the Honnavalli hobli of the Tiptur Taluk and *kattu roga* in the Kasaba hobli. Drinking water is available and sufficient.

MYSORE.

8. The weekly markets in all the taluks are reported to have been well supplied with grain during the week.

9. Jola, ballar, castor and other standing crops have been reported to be good in all the taluks. Paddy is being transplanted in parts of the Chamrajnagar, Seringapatam, Hunsur, Nanjangud and Krishnarajpete Taluks.

10. Prospects of the season good. Rain still needed in parts of Chamrajnagar, Hunsur and Nanjangud Taluks. Food stocks available in limited quantities.

11. Public health generally good. Cholera still prevails in parts of the district.

12. Cattle in Kowlande hobli of the Nanjangud Taluk are reported to be still in a poor condition for want of sufficient fodder. In other parts they are reported to be healthy. Water and fodder available.

HASSAN.

8. Market fairly supplied.

9. Agricultural operations are briskly going on. Standing crops, *viz.*, ragi, paddy, sugar-cane and togari are reported to be fair in Manjarabad, Arkalgud, Belur, Hole-Narsipur Taluks and in Alur Sub-Taluk. Sowing of paddy is retarded in Hassan and Channarayapatna Taluks owing to want of water in the tanks. Standing crops have improved in all taluks by the recent rains.

10. Prospects are improving. More rain is wanted throughout the district. Food stocks are available in fair quantities.

11. Public health generally good. Fever and small-pox in Manjarabad and small-pox in Channarayapatna are still prevalent.

12. Cattle are in fair condition. Grass has begun to sprout in most taluks. Water and fodder are generally available in all the taluks.

SHIMOGA.

8. Markets are well supplied. Prices of food grains have fallen but slightly.

9. Transplanting of paddy is going on in the Shimoga, Sorab, Nagar and Tirthahalli Taluks. Ragi and cholum have been sown in the Channagiri Taluk. The ground is being ploughed in portions of the Sorab Taluk for sowing horse gram and castor. Standing crops, *viz.*, paddy in all the taluks; sugar-cane in the Shimoga, Channagiri, Shikarpur, Sorab, Sagar and Tirthahalli Taluks and the Kumsi Sub-Taluk; ragi and cholum in the Channagiri, Honnali, Sorab and Sagar Taluks and ragi and sessamum in the Shimoga Taluk, are in good condition. In portions of Sagar and Tirthahalli Taluks arecanut trees are suffering from *Kole-roga*.

10. Prospects of the season are fair. Food stocks are reported to be somewhat insufficient in parts of Shikarpur and Sorab Taluks and Kumsi Sub-Taluk. Rice from the Madras Presidency continues to be imported into several parts of the district.

11. Public health is generally good. Cholera prevails in a sporadic form in portions of Channagiri, Shikarpur and Tirthahalli Taluks and Kumsi Sub-Taluk. Small-pox prevails in parts of Shimoga, Channagiri and Shikarpur Taluks and the Kumsi Sub-Taluk.

12. Fodder and pasture are available. The condition of cattle is improving.

KADUR.

8. Market fairly well supplied, but supply is poor in Chikmagalur market owing to plague.

9. Ploughing is still in progress in parts of Sringeri. Transplanting is still going on in parts of Koppa, Yedahalli and Mudgere. Cholum, ragi, horse gram, togari and ballar in parts of Tarikere and horse gram and ballar in parts of Kadur are being sown. The standing crops of sugar-cane, ragi, paddy, gingelly, coriander and cholum in Chikmagalur; horse gram, togari, paddy, wheat and sugar-cane in Tarikere; paddy and ragi in Mudgere; sugar-cane, arecanut, coffee, cardamom and paddy in Koppa; ragi, togari, cholum, baliar, coriander, castor, paddy, sugar-cane and garlic in parts of Kadur are in fairly good condition. The probable out turn of the standing crops in parts of Kadur is reported to be as follows :—Ragi 8 annas; ballar 8 annas; castor 8 annas; cholum 12 annas; togari 8 annas; paddy 8 annas; coriander 8 annas; sugar-cane 10 annas and garlic 10 annas.

10. Prospects of season are encouraging, but more rain is needed throughout and particularly in parts of Kadur and Chikmagalur. Food stocks available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Mudgere.

12. Cattle generally healthy. *Metre-roga* is reported to prevail in some parts of the Mudgere Taluk. Green grass is available. Water is available throughout.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in a fairly good condition. Sajje, ballar, tuvar in Chitaldrug and Hiriur; navane, horse gram and cotton in Chitaldrug, Hiriur and Davangere; jola and ragi in Chitaldrug and Davangere and paddy in Davangere Taluks were sown.

10. Prospects of the season promising. Food stocks available.

11. Public health good.

12. Cattle are improving in condition as grazing is available in pasture lands as well as water.

BANGALORE, }
15th August 1906.

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Depts.

OFFICIAL MEMORANDUM.

A compilation of "Retail Prices of some principal articles of food in Mysore" was first issued in March 1901, for 1900 and previous years. In the subsequent issues which were published, from time to time, in the *Mysore Gazette*, opportunity was taken to correct the errors, if any, in the previous editions and the present issue is the fourth of its kind. This contains figures for 1905 and those for previous years. It differs from the third issue in Table D "Variations in the annual average" being omitted and the opening of a new column in Table B. "Average fortnightly Prices" to show ten years' average of fortnightly prices ending with 1905.

2. Though this is a compilation from the Prices Current returns relating to thirteen

- 1 Wheat
- 2 Barley.
- 3 Rice, best sort.
- 4 Rice, common.
- 5 Javar or cholam
- 6 Bajra or kambu.
- 7 Ragi.

- 8 Italian millet.
- 9 Bengal gram.
- 10 Maize.
- 11 Arhar or Thurcadjou pea.
- 12 Arhar dal.
- 13 Salt.

kinds of marginally noted food-stuffs, the publication is confined to the six principal articles of food, viz., rice first sort, rice second sort, ragi, cholam, Bengal gram or chenna and salt.

3. The prices given herein relate to retail prices and are based upon the returns furnished every fortnight by Deputy Commissioners as being the average of the prices which prevailed in the several Taluk head-quarters of the District. Should there be more than one market in a Taluk, the Taluk return will be the average of the prices that ruled in those markets.

4. The prices quoted are expressed in seers and decimals of a seer (the standard seer of eighty tolas per rupee).

5. This compilation consists of 4 parts, viz., A, B, C(1) and C(2). Part A shows the annual and quinquennial averages for forty-five years (since 1861) in the case of Bangalore and Mysore, and for twenty years (since 1886) in the case of Kolar, Tumkur, Hassan, Kadur, Shimoga and Chitaldrug. Part B gives the fortnightly averages for a series of years from 1886.

6. Part C (1) exhibits the variations in value, the prices for 1871-75 being represented by 100 in Mysore and Bangalore and Part C(2) similarly shows the variations in value in the other Districts, the prices for 1886 being again represented by 100.

7. A set of districtvar diagrams illustrating the variations in the average annual prices of rice second sort, ragi, Bengal gram and salt are appended to the compilation. The charts illustrate the course of prices since 1886.

BANGALORE,

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests; serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	12 to 13	

Agricultural operation—Weeding in ragi fields.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Sowing was conducted in most parts of the district. Wet cultivation has commenced under tanks. Too much of rain has prevented weeding in some parts.
10. Prospects of the season good. There has been good rain throughout the district. The tanks are almost full.
11. Public health generally good.
12. Cattle healthy. Water and fodder available in sufficient quantities.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Ragi, ballar, horse gram, togari, same and Kartika paddy are being sown throughout the district.
10. Prospects of the season are encouraging. Food stocks are available in moderate quantities.
11. Public health generally good.
12. Cattle healthy. Fodder and pasture are available in all parts.

TUMKUR

8. Market well supplied.
9. *Nat-ragi* in Chiknayakanhalli, ragi in Pavagada and paddy in Gubbi are harvested. Standing crops are in good condition, excepting for some fungoid disease to ragi in a small tract of Maddagiri. Sowing and weeding are in progress. Ragi is reported to be slightly damaged by heavy rain in parts of Sirā and Kunigal.

10. Prospects of the season fair. More rain is yet needed in Maddagiri and Pavagada.
11. Public health good, excepting for fever in Tiptur and cholera in Kunigal and small-pox in a few villages of the Tiptur Taluk.
12. The condition of cattle is generally improving, "*kattu roga*" prevails in Madihalli of the Tiptur Taluk. Drinking water and pasture are available. Date leaves are still used in parts of Tiptur and Chiknayakanhalli.

MYSORE.

8. Market well supplied.
9. Cholum, til, paddy, sugar-cane and other standing crops are reported to be good in all the taluks. Paddy in parts of Mysore, Seringapatam, Heggaddevankote, Nanjangud and Krishnarajpete are being transplanted. Kulthi in parts of Seringapatam and Gundlupet is being sown. Til is being harvested in parts of Krishnarajpete. The standing castor crop in parts of Nanjangud is reported to have been attacked with insects.
10. Prospects of the season good. Rainfall is sufficient in all the taluks. Food stocks are available in limited quantities.
11. Public health generally good. Cholera still prevails in Mysore, Yedatore, Mandya, Seringapatam, Heggaddevankote, Nanjangud and T.-Narsipur.
12. Cattle healthy. Water and fodder are generally available. Tanks in most taluks have received a fair supply of water. Two tanks in the Malvalli Taluk have breached by the rains of the 14th instant.

HASSAN.

8. Market fairly well supplied.
9. Standing crops, *viz.*, ragi, paddy, sugar-cane, ballar, togari and castor in all taluks, gingelly in Arsikere, Hole-Narsipur and Alur are in a fair condition. Paddy is being sown and transplanted under tanks. Mungar crops are being harvested in Channarayapatna, but the yield is reported to be poor, owing to failure of rains.
10. Prospects of the season are improving. More rain is wanted in Manjarabad. Food stocks are available.
11. Public health generally good. Small-pox and fever still prevail in some parts of Manjarabad. Cholera appeared in four villages of the Channarayapatna Taluk.
12. Cattle are reported to be in a fair condition. Water and fodder are generally available. Tanks have received from 2 to 6 months' supply of water in most taluks.

SHIMOGA.

8. Market well supplied.
9. Transplanting of paddy is going on in Sagar, Sorab, Nagar and Tirthahalli. Ragi, cholum and kulthi are being sown in Shimoga. The ground is being prepared in portions of Sorab for sowing kulthi and castor, and in Kumsi for sowing kulthi and ragi. Standing crops are in good condition. Arecanut trees are suffering from *kole-roga* in portions of Sorab, Sagar and Tirthahalli.
10. Prospects of the season fair. There were good rains in Shimoga, Channagiri, Honnali and Kumsi. More rain is needed in Shikarpur, Sorab, Sagar, Tirthahalli and Nagar. Food stocks are somewhat insufficient in parts of Shikarpur, Sorab and Kumsi. Rice continues to be imported from the Madras Presidency into the several parts of the district.
11. Public health is generally good. Cholera prevails in a sporadic form in some parts of Channagiri, Shikarpur and Kumsi; and small-pox in parts of Shimoga, Channagiri, Shikarpur and Kumsi.
12. Fodder and pasture are available. The condition of cattle is improving. Tanks in Shimoga, Channagiri and Honnali have received a supply of water.

KADUR.

8. Market fairly well supplied, except in Chikmagalur owing to the prevalence of plague there.

9. Agricultural operations are almost over in Sringeri. Transplanting is still in progress in parts of Koppa and Mudgere and also in the malnad parts of Chikmagalur Taluk. Kulthi is being sown in parts of Tarikere. The standing sugarcane, ragi, paddy, gingelly, coriander and cholum crops in Chikmagalur; paddy and ragi in Mudgere; kulthi, togari, paddy, wheat and sugar-cane in Tarikere; sugar-cane, coffee, arecanut, cardamom and paddy in Koppa; and ragi, togari, cholum, ballar, coriander, caster, paddy, garlic and sugar-cane in Kadur are in fairly good condition. The rainfall of the week has done much good to the standing crops.

10. Prospects of the season encouraging. There was abundant rainfall during the week in Kadur and Tarikere, by which several tanks and kattes have received a full supply of water and a few tanks have even breached. Food stocks are available and sufficient for the present.

11. Public health generally good, except that small-pox prevails in parts of Mudgere and Tarikere.

12. Cattle generally healthy. Green grass is available. Water available.

CHITALDRUG.

8. Market well supplied.

9. Cotton and navane in Hiriur, Holalkere and Davangere; and kulthi in Hiriur and same in Davangere were sown.

10. Prospects of the season are favourable and have taken a decided change for the better. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.

BANGALORE,
22nd August 1906. }

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen & Rev. Depts.

READ—

The following Proceedings of the Government of Madras, publishing revised rules for the sale of quinine at Post offices :—

No. 610, REVENUE, 2ND JULY 1906.

GOVERNMENT OF MADRAS.
REVENUE DEPARTMENT.

READ—the following papers :—

I

G. O., No. 1387, Revenue, dated 20th December 1904.

ABSTRACT.—Introducing the system of sale of quinine in 7-grain pice powders from 1st February 1905.

II

*Letter—*from W. M. STANDEN, Esq., Director of Government Cinchona Plantations, the Nilgiris.

*To—*the Secretary to Government, Revenue Department.

*Dated—*Ootacamund, the 14th May 1906.

*No.—*26.

With reference to the rules for the sale of quinine at Post offices, sanctioned by Government in G. O. No. 1387, Revenue, dated 20th December 1904, I have the honour to enclose a copy of a letter from the Postmaster-General, Madras, bringing to notice that the stock of quinine held by Postmasters of small offices is unduly large, and suggesting that the number of packets held as a permanent advance at branch offices should be reduced from 7 to 3.

2. I agree with the Postmaster-General's views, and enclose for the approval of Government a revised set of rules, drawn up by the Postmaster-General, embodying the above suggestion.

ENCLOSURES.

*Letter—*from the Superintendent of Post offices, Trichinopoly division.

*To—*the Postmaster-General, Madras.

*Dated—*the 20th January 1906.

No— 2769.

I have the honour to state that it seems to me that the stock of quinine that is now allowed to remain in Post offices is much too large. It may be necessary to keep such a large stock in malarious districts, but in Trichinopoly and Salem districts, there is absolutely no need to keep so much. On the average only about half a dozen powders are sold by a sub-office in this division in a month, and the number sold by a branch office during the same period is only one or two. The powders that remain in stock are not as carefully kept, as they ought to be, and especially in extra departmental branch offices where all the records have to be crammed in a small box, the quinine powders get crushed and damaged. The stock that is now kept (*viz.*, 714 powders) would probably be sufficient to meet the demands in an average extra departmental branch office for 15 years, and it seems to me that it would be desirable to reduce the stock at least in extra departmental branch offices to 306 powders (three packets).

*Letter—*from the Postmaster-General, Madras.

*To—*the Director of Government Cinchona Plantations, the Nilgiris.

*Dated—*the 12th April 1906.

*No.—*M. 818-45.

In forwarding herewith copy of a communication No. 2769, dated the 20th January 1906, from the Superintendent of Post offices, Trichinopoly division, to my address, I have the honour to say that the stock of quinine held by Post offices at present are much too large, and that I quite agree in thinking that three packets is an ample stock for small offices. Further, there is danger of the drug losing all its efficacy if retained for more than a year exposed to the atmosphere. In these circumstances I beg to enquire whether you have any objection to the present stock of quinine being reduced from seven to three packets, in all the branch offices, except those in the Shimoga division.

Order—No. 610, Revenue, dated 2nd July 1906.

Miscellaneous.

In Rule 1, the Native States of Sandur and Banganapalle will be included.

2. The Rules, as amended, will be published in the *Port St. George Gazette* and in the District Gazettes in English and the chief vernacular languages.

(True Extract.)

A. G. CARDEW,
Ag. Secretary to Government.

To—The Director of Government Cinchona Plantations.

Editors' Table.

NOTIFICATION.

Rules for the sale of Government Quinine at Post offices.

1. Government quinine manufactured at the Nedivattam factory will be kept for sale at all Post offices in the Madras Presidency (with the exception of those noted in the margin) and in Coorg and also at all the Imperial Post offices in the Native States of Sandur, Banganapalle, Cochin, Hyderabad, Travancore and Mysore.

NOTE.—It must be understood that these Rules do not apply to Post offices in the Native State of Pudukkottai.

2. The Director of the Government Cinchona Plantations, Nilgiris, will arrange for the supply of the quinine direct to each Post office in small packets each containing 102 seven-grain powders, to be sold at the rate of 3 pies per powder.

3. The amount to be accounted for by the Post office on each packet will be Rs. 1-8-0 and the one-and-a-half anna in excess which will be realized by the sale of the 102 powders will be the vendor's commission on the sales effected by him.

4. Seven packets each containing 102 powders will be issued to each of the head and sub-offices in the Circle and to each of the branch offices in the Shimoga division and the value of those packets, viz., Rs. 10-8-0, at the rate of Rs. 1-8-0 per packet, is to be considered as a permanent advance for quinine in those offices. Three packets each containing 102 powders will be issued to each of the other branch offices in the Circle and the value of those packets, viz., Rs. 4-8-0, at the rate of Rs. 1-8-0 per packet, is to be considered as a permanent advance for quinine in those offices.

5. All head and sub-postmasters in the Circle and branch postmasters in the Shimoga division must replenish their stock of quinine as soon as they have sold five packets by indenting on the Director of the Government Cinchona Plantations, Ootacamund, while other branch postmasters must replenish their stock in the same manner as soon as they have sold two packets. It will be the postmaster's duty to see that his stock is regularly replenished in time before the supply is exhausted.

6. Each indent for a fresh supply of quinine must be accompanied by a remittance made by money order for the value of the packets indented for, at the rate of Rs. 1-8-0 per packet, less the money order commission on the total value of the remittance.

7. Any quantity of quinine may be indented for at a time, provided that the indent is for not less than five packets of 102 powders each in the case of Post offices whose permanent advance is Rs. 10-8-0, and not less than two packets of 102 powders each in the case of Post offices whose permanent advance is Rs. 4-8-0; and that it does not include a fraction of a packet.

8. The indent for a fresh supply of quinine must always be written on the coupon of the money order, in the form given below :—

“Please send by return post two, five or six packets (as the case may be), of quinine powders.”

Name.

Postmaster.
Date _____ Name stamp.

The amount remitted as well as the commission for the money order should be met by the postmaster from the sale-proceeds of quinine held as a permanent advance. The money order should be made payable to the Director of the Government Cinchona Plantations, Ootacamund. The postmaster should clearly impress the name stamp of his office at the bottom of the coupon containing the indent in order that the name of the office to which the quinine is to be forwarded may be readily ascertained.

9. When the charge of an office is transferred, the full amount of the permanent advance of 714 powders of quinine in the case of head and sub-offices, and branch offices in the Shimoga division and of 306 powders of quinine in the case of the other branch offices must be made over to the relieving official and it may be either in quinine or in cash or partly in quinine and partly in cash; but for every four annas thus made over in cash, 3 pies may be deducted (being the commission on the sale of 16 powders) from the permanent advance. No commission is allowed on the sale of any number less than 16 powders. The transfer of the permanent advance in the manner described above on account of quinine must be entered at the foot of the charge report forwarded to the Superintendent.

10. Communications on the subject to the Director of the Government Cinchona Plantations, Nilgiris, may be sent on postal service, but, with this exception, everything relating to the transmission of quinine and the remittance of money to pay for it will be at the charge of the Government Cinchona Department.

11. The packets containing the powders of quinine must not be exposed to damp, as otherwise the quinine may deteriorate.

12. Superintendents and Inspectors when verifying the accounts of first-class head offices and inspecting other post offices authorised to vend quinine should examine the permanent advance for quinine and see that it is correct. They should also make careful inquiries as to the manner in which the instructions conveyed in Rule 11 are carried out, and make notes in their verification or inspection reports on the progress of the scheme and of any matters of interest or importance in connection therewith, furnishing at the same time statistics of sales effected during the period to which the verification or inspection relates.

No. G. 958-998—G. M. 39-06-3, DATED BANGALORE, 3RD AUGUST 1906.

ORDER THEREON.—Ordered that the foregoing Order of the Government of Madras be communicated to the Senior Surgeon and Sanitary Commissioner with the Government of Mysore in continuation of Government Order No. G. 4497-4536—G. M. F. 324-2, dated the 2nd February 1905, and that copies thereof be forwarded to the Deputy Commissioners of Districts and Heads of Departments.

S. K. CHANDRASEKHARA AIYAR,

Secy. to Govt., Gen. & Rev. Depts.

To—The Senior Surgeon and Sanitary Commissioner with the Government of Mysore.
Other Heads of Departments.
The Deputy Commissioners of Districts.

Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare.

Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets now supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	12 to 13	

Agricultural operation.—Weeding in ragi fields.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. In the Bangalore, Anekal and Devanhalli Taluks the dry crops are reported to have been affected by the excess of rain, especially in sundry soil where water is stagnant. Weeding is being done. Sowing of kulthi and wild gingelly is reported from Bangalore and Doddballapur.
10. There has been good rain throughout the district. Two tanks breached in Magadi owing to excessive rain and caused some damage to the lands below.
11. Public health generally good.
12. Cattle healthy. Water and fodder are available.

KOLAR.

8. Well supplied.
9. Standing crops are reported to be in good condition. Kulthi and Kartik paddy are being sown in almost all the taluks of the district.
10. There has been good rain throughout the district. Prospects of season are encouraging. Food stocks are available.
11. Generally good.
12. Cattle healthy. Fodder and pasture are available in all parts.

TUMKUR.

8. Market well supplied.
9. *Nat-ragi* in parts of Sira and til in parts of Tiptur are being harvested. The condition of standing crops is good, but ragi has been damaged by excessive rain in Kunigal and Sira, and attacked by insects in parts of Maddagiri. Castor crop in parts of Sira is damaged by insects. The damaged ragi fields in Sira are being re-sown. Weeding is going on.
10. Prospects of the season fair. Food stocks are available. Maddagiri Taluk requires some more rain.
11. Public health generally good, excepting for fever in Tiptur and cholera in Kunigal and Pavagada.
12. Cattle healthy. Green grass is available. Many of the tanks have filled.

MYSORE.

8. Market well supplied.
9. The standing dry and wet crops are reported to be good in all the taluks. But ragi and cholum crops in Nanjangud are reported to have been slightly damaged by the continuous rains. Paddy and kulthi in parts of Chamrajnagar; kulthi in parts of Seringapatam, Yedatore and Krishnarajpete; tobacco in parts of Hunsur; coriander in parts of Gundlupet, and paddy in parts of Malvalli are being sown. Transplanting of paddy seedlings is being carried on in parts of Seringapatam, Heggaddevankote and Krishnarajpete. Til has been harvested in Krishnarajpete and the outturn is estimated at 4 annas.

10. Prospects of the season good. Rainfall is sufficient in all the taluks and a break in the weather is much desired. Food stocks are available in limited quantities.

11. Public health generally good. cholera still prevails in Yedatore, Mandya, Seringapatam, Heggaddevankote, T.-Narsipur, Hunsur and Nagamangala.

12. Cattle healthy. Water and fodder are generally available. Green grass has sprung up.

HASSAN.

8 Market fairly well supplied. Prices of good grains have gone down a little.

9. Paddy is being transplanted in Arkalgud, Belur and Alur. Weeding is going on in Channarayapatna. Standing crops, viz., ragi, paddy, sugar-cane, cholum, ballar, togari, etc., in Hassan, Arsikere, Hole-Narsipur, Arkalgud and Alur are in good condition. Gid-ragi is ripe for cutting in parts of Hassan and Belur. Munger crops are being harvested in Channarayapatna.

10. Prospects have improved. A break in the rains is now desired in Hassan and Arsikere tanks are almost full in Hassan and Belur, and they have received a good supply of water in all the other taluks. Food stocks are fairly available.

11. Public health generally good. Small-pox and cholera have decreased in the Channarayapatna Taluk.

12. Cattle are reported to be in fair condition. Pasture and water are available.

SHIMOGA.

8. Market well supplied.

9. Transplanting of paddy is going on in Sagar, Sorab, Nagar and Tirthahalli. Ragi, cholum and kulthi in Shimoga, and castor and kulthi in Sorab are being sown. Standing crops are in good condition. Arecanut trees are suffering from *kole-roga* in portions of Sorab, Sagar and Tirthahalli.

10. Prospects of the season good. There were good rains throughout the district except in Shikarpur and portions of Sorab. Food stocks are somewhat insufficient in parts of Shikarpur, Sorab and Kumsi. Rice continues to be imported from the Madras Presidency into the several parts of the district.

11. Public health is generally good. Cholera prevails in a sporadic form in some parts of Channagiri, Tirthahalli, Shikarpur and Kumsi; and small-pox in parts of Shimoga, Sagar and Kumsi.

12. Fodder and pasture are available. Cattle healthy. Tanks in Honnali have received from 4 to 5 months supply of water.

KADUR.

8. Market fairly well supplied, except in Chikmagalur owing to the prevalence of plague there.

9. Transplanting is over in Sringeri, and is still in progress in parts of Yedahalli, Koppa and Mudgere and also in the malnad parts of Chikmagalur Taluk. Kulthi, black and green grams are being sown in parts of Tarikere. The standing sugar-cane, ragi, paddy, gingelly, coriander and cholum crops in Chikmagalur; paddy and ragi in Mudgere; paddy, wheat and sugar-cane in Tarikere; sugar-cane, coffee, arecanut, pepper, cardamom and paddy in Koppa; and ragi, cholum, ballar, castor, paddy and sugar-cane in Kadur are in good condition.

10. Prospects of the season encouraging. Food stocks are available and sufficient for the present.

11. Public health generally good. Small-pox reported to prevail in parts of Mudgere and Yedahalli is subsiding.

12. Cattle generally healthy. Green grass is available. Water available.

CHITALDRUG.

8. Market well supplied.

9. Ragi, navane and kulthi in Challakere and Davangere; cotton in Davangere and paddy in Davangere and Molakalmuru were sown.

10. Prospects of the season are favourable. There are complaints of too much rain in some parts and more sunshine is now wanted for the standing crops. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.

BANGALORE, }

Cholum—Sorghum Vulgare.

Kadale—(Bengal gram)—Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	13 to 14	

Agricultural operation—Weeding in ragi fields.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Wet cultivation is continued under tanks. About 116 acres in Bangalore, and 480 acres in Doddballapur, are reported to have been sown with dry crops. In Bangalore, Kankanhalli and Closepet, the dry crops are reported to have been affected by too much of moisture. In other places weeding is conducted. Standing crops are in good condition. In Hoskote the til crop is attacked by insects. In Closepet the castor crops are infested with caterpillars.
10. Prospects of the season good. The small tanks are all full to overflowing. The large tanks have received from 8 to 9 months' supply of water.
11. Public health generally good. A few cases of cholera are reported from two villages in Kankanhalli.
12. Cattle healthy. Water and fodder are available.

KOLAR.

8. Market well supplied.
9. Standing crops are reported to be in good condition. Kulthi and Kartik paddy are being sown in almost all the taluks of the district.
10. Prospects of the season are encouraging. Food stocks are available.
11. Public health generally good.
12. Cattle healthy. Water, fodder and pasture are available in all parts.

TUMKUR.

8. Market well supplied.
9. Nat-ragi and cholum in Sira, til, black and green grams in Tiptur, Sasi ragi in Pavagada, til and cholum in Turuvekere are being harvested. Paddy and kulthi are being sown in many parts. The condition of standing crops is good. Castor crop in parts of Sira is damaged by insects. Ragi in Turuvekere is weakly poor owing to too much of water. Weeding is going on.
10. Prospects of the season fair. Food stocks are available. Maddagiri Taluk requires more rain.
11. Public health generally good, excepting for fever in Tiptur and cholera in Kunigal, Pavagada, and a few villages of the Turuvekere Sub-Taluk.
12. Cattle healthy, except in two villages of Hagalvadi Hobli in the Gubbi Taluk, where they are reported to be dying from pneumonia (*Yade Higgalu roga*).

MYSORE.

8. Market well supplied.
9. Standing crops are reported to be good in all the taluks. There has been a break in the weather during the week, and this has done much good. Paddy and kulthi in parts of Chamrajnagar, and kulthi in parts of Krishnarajpete and Hunsur are being sown. Transplanting of paddy seedlings is being carried on in parts of Heggaddevankote, Malvalli, Seringapatam and Krishnarajpete. Cholum is being harvested in parts of Krishnarajpete and Mysore. Wet lands under Doddakowlande tank are being ploughed. Castor crops in parts of Belegere Hobli in Nanjangud are reported to have been attacked by insects.

10. Prospects of the season good. Rainfall has been sufficient all over the district. Food stocks are available.

11. Public health generally good. But cholera still prevails in parts of Mysore, Channarayana, Seringapatam, Hunsur, Heggaddevankote, Nanjangud, T.-Narsipur, and Malvalli.

12. Cattle healthy. Water and fodder are generally available.

HASSAN.

8. Market fairly well supplied.

9. Transplantation of paddy continues in Manjarabad, Arkalgud, Belur and Alur. Dod-ragi is being harrowed in Channarayana and Arsikere; kulthi is being sown in Channarayana. Chillies are reported to have been damaged in parts of Arsikere by excessive rain. Gid-ragi is ripe for harvest in Hassan and Belur, but the reaping is delayed owing to the rains. The outturn is estimated from 4 to 8 annas. Standing crops, viz., ragi, paddy, sugar-cane, cholum, ballar, togari and castor are in good condition in Hassan, Arkalgud, Arsikere and Hole-Narsipur.

10. Prospects of the season have improved. Food stocks are available in fair quantities.

11. Public health generally good. Small-pox exists in four villages of the Manjarabad Taluk.

12. Cattle healthy. Water and pasture sufficient.

SHIMOGA.

8. Market well supplied. Prices high.

9. Transplanting of paddy is going on in Sagar, Sorab and Nagar and has been completed in Tirthahalli. Kulthi in Shimoga, and castor and kulthi in Sorab are being sown. Standing crops are in good condition. Arecanut trees are suffering from *kole-roga* in portions of Sorab, Sagar and Tirthahalli. Paddy in parts of Shikarpur and Sorab requires more rain. Baragu is being harvested in Honnali.

10. Prospects of the season good. Food stocks are somewhat insufficient in parts of Shikarpur, Sorab and Kumsi. Rice continues to be imported from the Madras Presidency into the several parts of the district.

11. Public health is generally good. Cholera prevails in a sporadic form in some parts of Channagiri, Honnali, Tirthahalli, Shikarpur, Sagar and Kumsi; and small-pox in parts of Shimoga, Sagar and Kumsi.

12. Fodder and pasture are available. Cattle healthy, except in portions of Shikarpur and Sagar where they are reported to be poor in health.

KADUR.

8. Market fairly well supplied, except in Chikmagalur owing to the prevalence of plague there.

9. Transplanting is still in progress in parts of Yedahalli, Koppa and Mudgere. Kulthi is being sown in parts of Tarikere. The standing sugar-cane, paddy and gingelly crops in Chikmagalur; paddy and ragi in Mudgere; paddy, ragi, wheat and sugar-cane in Tarikere; sugar-cane, coffee, arecanut, pepper, cardamom and paddy in Koppa; and ragi, cholum, castor, paddy and sugar-cane in Kadur are in good condition. Gid-ragi, coriander and garlic in parts of Chikmagalur and gingelly, black and green gram, and coriander in parts of Kadur are being harvested.

10. Prospects of the season good. More rain is needed in parts of Mudgere. Food stocks are available and sufficient for the present.

11. Public health generally good. Small-pox is reported to prevail in parts of Mudgere.

12. Cattle generally healthy. Green grass is available. Water available.

CHITALDRUG.

8. Market well supplied.

9. There has been a partial cessation of rain this week, which has benefited the standing crops. Kulthi in Chitaldrug, Holalkere, Davangere and Molakalmuru; cotton in Chitaldrug and Davangere, ragi and paddy in Molakalmuru were sown. Gid-ragi, cholum on lands below saguvalikattes are reported to have been harvested in Hiriya, the yield varying from 4 to 8 annas.

10. Prospects of the season favourable. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available in all the taluks.

BANGALORE,
5th September 1906. }

P. G. D'SOUZA,

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	40 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	13 to 14	

Agricultural operation—Weeding in ragi fields.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Four acres of land were sown with paddy in the Bangalore Taluk, and about 40,395 acres with kulthi in the Bangalore, Kankanhalli and Doddballapur Taluks. The dry crops are reported to be in good condition. In Bangalore til is reported to have been harvested over an extent of 5 acres. Weeding is continued in Anekal. The outturn of the til crop in Anekal is estimated at 4 annas.
10. Prospects of the season good. Tanks have received a fairly good supply of water. Food stocks are available.
11. Public health generally good. Cholera is reported from two villages of Kankanhalli and from Closepet.
12. Cattle healthy. Water and fodder are available throughout.

KOLAR.

8. Market well supplied.
9. Standing crops are reported to be in good condition. Karthika paddy and kulthi are being sown in almost all the taluks.
10. Prospects of the season good. Food stocks are available.
11. Public health generally good.
12. Cattle healthy. Water, fodder and pasture are available.

TUMKUR.

8. Market well supplied.
9. Nat-ragi in Pavagada; til and cholum in Tiptur and Turuvekere; and sugar-cane in Turuvekere are being harvested. Paddy and kulthi are being sown in many parts. The condition of standing crops is good. Castor crop in parts of Sirai and Gubbi is damaged by Weeding is going on.
- Prospects of the season fair. Food stocks are available. Maddagiri Taluk requires
- Public health generally good, excepting for fever in Tiptur and cholera in the village of Kunigal Taluk.
12. Cattle healthy. Water and fodder available.

MYSORE.

8. Market well supplied.
9. The standing dry and wet crops are reported to be good in all the taluks. Paddy seedlings are being transplanted in parts of Seringapatam, Heggaddevankote, Malvalli and Krishnarajpete. Kulthi in parts of Mysore, Hunsur, Yedatore, Heggaddevankote, Gundlupet and Krishnarajpete; paddy and kulthi in parts of Chamrajnagar; and kulthi, Bengal gram and coriander in parts of Nanjangud are being sown. Gid-ragi, cholum and til in parts of Mysore; ragi and til in parts of Hunsur; til in parts of Heggaddevankote; and cholum in

parts of Gundlupet and Nanjangud are being harvested. The outturn of the ragi crop in parts of Hunsur is estimated at 12 annas and that of cholum in Gundlupet at 8 annas. The castor crop in parts of Chamrajnagar and Nanjangud are reported to have been attacked with insects.

10. Prospects of the season good. Rainfall is sufficient all over the district. Food stocks sufficient.

11. Public health good. Cholera still prevails in parts of Mysore, Chamrajnagar, Seringapatam, Heggaddevankote, Nanjangud, T.-Narsipur and Malvalli.

12. Cattle are healthy. Their condition have much improved by the growth of green grass everywhere. Water and fodder generally available.

HASSAN.

8. Market fairly well supplied.

9. Kulthi is being sown in Hassan. Transplantation of paddy continues in Manjarabad and Alur and harrowing and transplanting of dod-ragi in Channarayapatna. Gid-ragi is ripe for harvest in Hassan and is being harvested in Arkalgud, Belur, Hole-Narsipur and Alur. Gingelly is being harvested in Arkalgud and Hole-Narsipur. The outturn of the latter is estimated at 4 annas. Standing crops are thriving well in all the taluks.

10. Prospects of the season are fair. Food stocks are available in moderate quantities.

11. Public health generally good. Small-pox still exists in parts of Manjarabad.

12. Cattle are in fairly good condition. Supply of water and pasture is sufficient.

SHIMOGA.

8. Market well supplied. Prices high.

9. Transplanting of paddy is still going on in Sagar and Nagar and has been completed in Sorab and Tirthahalli. Kulthi in Shimoga and castor and kulthi in Sorab are being sown. Standing crops are in good condition. Arecanut trees are suffering from *kole-roga* in portions of Sorab, Sagar and Tirthahalli. Paddy and sugar-cane in parts of Shikarpur and Sorab require more rain. Baragu is being harvested in Honnali.

10. Prospects of the season fair. Food stocks are somewhat insufficient in parts of Shikarpur, Sorab and Kumsi. Rice continues to be imported from the Madras Presidency into the several parts of the district.

11. Public health is generally good. Cholera prevails in a sporadic form in some parts of Channagiri, Honnali, Tirthahalli, Shikarpur and Kumsi; and small-pox in parts of Shimoga, Sagar and Kumsi.

12. Fodder and pasture are available. Cattle generally healthy.

KADUR.

8. Market fairly well supplied, except in Chikmagalur owing to the prevalence of plague there.

9. Transplanting is still in progress in parts of Yedahalli, Koppa and Mudgere. Ragi and kulthi in parts of Tarikere and kulthi in parts of Kadur are being sown. The standing sugar-cane, paddy and gingelly crops in Chikmagalur; paddy and ragi in Mudgere; paddy, ragi, wheat and sugar-cane in Tarikere; sugar-cane, coffee, arecanut, pepper, cardamom and paddy in Koppa; and ragi, cholum, castor, ballar, black and green grams, paddy and sugar-cane in Kadur are in good condition. Gid-ragi, coriander and garlic in parts of Chikmagalur and gingelly, black and green gram, and coriander in parts of Kadur are being harvested.

10. Prospects of the season good. More rain is needed in parts of Mudgere. Food stocks are available and sufficient for the present.

11. Public health generally good. Small-pox is reported to prevail in parts of Mudgere and Kadur.

12. Cattle generally healthy. Green grass is available. Water available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are flourishing except in parts of Chitaldrug and Hosdurga they are reported to have slightly suffered from excess of moisture. Kulthi in Chitaldrug, Hiriyur, Holalkere and Davangere, and ragi and paddy in Molakalmuru were sown. Green gram was harvested in Davangere, the average yield being 8 annas.

10. Prospects of the season favourable. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder are available.

Note—Rice (husked)—Oryza Sativa.
Ragi—Eleusine Corocana.
Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient; areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	13 to 14	

Agricultural operation—Weeding in ragi fields.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Weeding is going on in parts. Standing crops are in good condition. Til, potato, onion and other crops in parts of Hoskote are reported to have been damaged by insects. Til was harvested in some parts of Kankanhalli. Kulthi, wild gingelly and paddy were sown in Bangalore.
10. Prospects of the season good. More rain is wanted in the Magadi and Channapatna Taluks.
11. Public health generally good. Fever prevails in parts of Hoskote and Kankanhalli Taluks. Small-pox in Hoskote and Devanhalli Taluks, and cholera in Closepet Sub-Taluk.
12. Cattle healthy. Water and fodder available throughout.

KOLAR.

8. Market well supplied. There is no appreciable fluctuations in the prices of food grains.
9. Standing crops are reported to be in good condition. Wet crops under the tanks of Bagepalli Taluk are in much need of water. Karthika paddy is being sown in Kolar; Bowringpet and Goribidnur; and kulthi in Bagepalli.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water, fodder and pasture available.

TUMKUR.

8. Market well supplied.
9. Til in Sira; til and cholum in Tiptur; ragi and cholum in Pavagada; til and cholum in Turuvekere were harvested. Paddy in Tumkur, Sira, Tiptur and Pavagada; wild gingelly in Gubbi and Tiptur; kulthi in all the taluks except Tumkur, Sira and Koratagere are sown. Standing dry crops in Maddagiri, Sira, Pavagada and Koratagere are in need of rain. Elsewhere standing crops are in good condition. Castor crop in parts of Sira and Gubbi is being somewhat damaged by insects. Ragi crop in Kunigal is looking poor, on account of excess rain for sometime past. Weeding is going on.
10. Prospects of the season fair. Food stocks are available. Maddagiri, Sira, Pavagada and Koratagere require more rain.
11. Public health generally good. Cholera still prevails in parts of Pavagada and Kunigal.
12. Cattle healthy. Water and fodder available.

MYSORE.

8. Market well supplied.
9. Standing dry and wet crops are reported to be good in all the taluks. Transplanting of paddy seedlings is still being carried on in parts of Chamrajnagar, Heggaddevankote, Malvalli and Krishnarajpete Taluks. Horse gram in parts of Nanjangud and Krishnarajpete Taluks is being sown. Jola and til in parts of Mysore, Chamrajnagar and Gundlupet Taluks; til and ragi in parts of Hunsur and Heggaddevankote; and jola in parts of Nanjangud, T.-Narsipur and Krishnarajpete are being harvested and the probable outturn is estimated as follows:—

Hunsur	...	Ragi and til	12 annas.
Gundlupet	...	Jola	8 do.
		Til	4 do.
Krishnarajpete	...	Jola	6 do.

Castor crops in parts of Chamrajuagar are reported to have been attacked with "Kari Mari" insects.

10. Prospects of the season good. Standing crops in Mysore, Hunsur, Malvalli, Mandya, Krishnarajpete and Nagamangala Taluks are reported to be in need of rain. Food stocks are available for the present.

11. Public health generally good. Cholera still prevails in all taluks, except Yedatore, Krishnarajpete and Nagamangala.

12. Cattle are reported to be healthy. Water and fodder are generally available.

HASSAN.

8. Market fairly well supplied. Prices still high.

9. Kulthi, huchellu, black and green grams are being sown in Arkalgud Taluk. Transplantation of paddy continues in Manjarabad and Arkalgud Taluks. Dodda-ragi is being harrowed in Arsikere Taluk. Gid-ragi is being harvested in all the taluks except Arsikere. Gingelly in Arkalgud and Hole-Narsipur Taluks; jola in Channarayapatna Taluk and Sugar-cane in Hole-Narsipur Taluk, are also being harvested. Standing crops are thriving well in all the taluks. The outturn promises to be fair.

10. Prospects of the season are encouraging. Standing crops require early showers in Hole-Narsipur Taluk. Food stocks are available.

11. Public health generally good. Small-pox is still prevalent in two villages in Manjarabad Taluk.

12. Cattle are in a good condition. Water and pasture are available in all parts of the district.

SHIMOGA.

8. Market well supplied.

9. Transplanting of paddy is nearing completion in the Sagar and Nagar Taluks. Horse gram has been sown in the Shimoga Taluk, and castor and horse gram are being sown in the Shikarpur Taluk. Standing crops are in good condition. Paddy and sugar-cane in some portions of the Shikarpur and Sorab Taluks require rain.

10. Prospects of the season fair. Food stocks are somewhat insufficient in parts of Shikarpur, Sorab and Kumsi. Rice continues to be imported from the Madras Presidency into several parts of the district.

11. Public health generally good. Cholera prevails in a few villages of Honnali, Shikarpur, Tirthahalli and Kumsi; and small-pox in Shimoga, Sorab, Sagar and Kumsi.

12. Pasture and fodder available. Cattle healthy.

KADUR.

8. Market fairly well supplied, except in Chikmagalur owing to the prevalence of plague there.

9. Transplanting is still in progress in parts of Mudgere. Kulthi in parts of Tarikere and Kadur is being sown. The standing sugar-cane, paddy and gingelly crops in Chikmagalur; paddy and ragi in Mudgere; paddy, ragi, wheat and sugar-cane in Tarikere; sugar-cane, coffee, arecanut, pepper, cardamom and paddy in Koppa; and ragi, cholum, castor, ballar, black and green grams, paddy and sugar-cane in Kadur are in good condition. Gid-ragi and black gram in parts of Chikmagalur and gingelly, green gram, and coriander in parts of Kadur are being harvested.

10. Prospects of the season good. More rain is needed in parts of Mudgere. Food stocks are available and sufficient for the present.

11. Public health generally good. Small-pox is reported to prevail in parts of Kadur, Yadahalli and Koppa.

12. Cattle generally healthy. Pasture and water available. Fodder scanty.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in good condition in all the taluks. Kulthi in Challakere, Hiriya, Holalkere and Davangere; cotton and uavane in Hiriya, were sown. Mungar cholum in Hiriya and green gram in Davangere were harvested, the average yield being 8 annas.

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.

BANGALORE,
19th September 1906. }

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Depts.

1101

PROSPECTUS OF THE INDUSTRIAL AND AGRICULTURAL EXHIBITION AND CATTLE SHOW OF THE FOURTEENTH PROVINCIAL CONFERENCE, SURAT, 1906.

Since the year 1901 an Industrial Exhibition has been held in connection with the annual session of the Congress. Such Exhibitions were held at Calcutta 1901, Ahmedabad 1902, Madras 1903 and Bombay 1904; an agricultural side having been added to it at the last named place. The 5th Industrial and Agricultural Exhibition was held at Benares in December 1905. Encouraged by the great success achieved by these Exhibitions held with the annual sessions of the Indian National Congress, the organisers of the Provincial Conference venture to introduce such a feature in its programme, and it is now proposed to hold the 1st Provincial Industrial and Agricultural Exhibition and also a cattle show in connection with the 14th Provincial Conference to be held at Surat this year. The Exhibition will consist mainly of the Exhibits from the Bombay Presidency including Sind and the adjacent Native States. Exhibits from other Presidencies and Native States therein will also be received.

2. Though the Exhibition is held under the auspices of the Conference its accounts are kept separate, and any surplus from the Exhibition funds will not be devoted to the purposes of the Conference.

3. The Exhibition is intended to give an idea of the present condition of the Industries and Agriculture in the Bombay Presidency and the possibilities of their future development.

4. It is being more and more realised that agriculture and other industrial pursuits offer a wide and useful field for the exercise of brain as well as muscle, for minds of every calibre and for the application of the most advanced scientific knowledge.

5. The Exhibition will aim at bringing together various materials by which the present Indian industries and system of agriculture may be improved and new features may be introduced.

6. The Committee will be prepared to receive exhibits which will include and illustrate among others—

- (1) The natural products of India.
- (2) Indigenous industries.
- (3) Industries introduced or modified by foreign influence.
- (4) Appliances relating to Indian agriculture (including Dairy farming and manufactures), whether such appliances are made in India or imported.
- (5) Agricultural products.
- (6) Cattle.
- (7) Medical and sanitary apparatus and appliances.
- (8) Indian Art.
- (9) Educational apparatus and appliances.

7. It is hoped that the holding of such Exhibitions may encourage some of our countrymen to follow in the steps of those who have devoted capital, skill and energy to the fostering of old and the initiation of new industries.

8. The Committee attaches special importance to the popularising of a knowledge of improved agricultural implements, appliances, and methods, for it is believed that by the adoption of these India can produce far larger and better crops than are at present obtained.

9. The Committee confidently asks for generous assistance, both in the form of subscriptions to cover the heavy expenses of such an Exhibition, and in the hearty co-operation of all (especially by sending Exhibits), for there is no class or community whose interest are not likely to be promoted by the Exhibition.

On behalf of the Exhibition Committee,

THAKORRAM KAPILRAM,
Honorary Secretary.

EXHIBITION OFFICE,
Surat, July 25th, 1906.

RULES AND REGULATIONS.

1. The Exhibition will be opened some time after the Divali Holidays, on a day to be notified hereafter. The Exhibits will be arranged in different Sections. An official catalogue of all Exhibits with the names and addresses of the Exhibitors and their Agent or Agents, if any, will be published by the Exhibition Committee, before the opening of the Exhibition. A specially qualified Committee will be appointed to examine the Exhibits, determine their relative merits and decide which of them deserve special recognition. The decision of the Jurors will be final. Gold, Silver and Bronze medals and Certificates of Merit of various orders will be awarded according to their verdict. The names of the successful Exhibitors will be published together with a description of the Exhibits for which the medals or certificates have been awarded.

A Loan Section will also be attached to the Exhibition. Works of Art and articles of special merit, including those of antiquarian interest, will be thankfully received for this section. All arrangements for the display of the Exhibits lent for this section will be made by the Exhibition Authorities at their own expense.

2. Articles of indigenous Art or Manufacture, as well as natural mineral, or agricultural products will, as a rule, be accepted for the Exhibition. Implements or machines or other articles of foreign manufacture, which, in the opinion of the Exhibition Authorities, are likely to promote or develop Indian Industries and Agriculture or introduce new ones, will also be accepted. Persons sending a large variety of such articles will receive a special recognition.

3. No explosives or any substance which, in the opinion of the Exhibition Authorities, is noxious or dangerous, will be admitted.

4. Intending Exhibitors should refer to the printed list, attached herewith, of the Sections and Sub-sections into which it is intended to divide the Exhibits. The section list is meant only to serve for general guidance, and will not prevent Exhibitors from sending articles not specifically enumerated therein. Such articles will, however, be admitted at the discretion of the Exhibition Authorities.

5. Intending Exhibitors are requested to send in, to the Secretary, as soon as possible, a list of their proposed exhibits, in the printed form sent herewith. These lists should reach the Secretary, *at the latest by the 1st of September 1906.*

6. Applications for space in the Exhibition Building specifying the space that will be required, should be made in the form sent herewith and should be accompanied by a fee of Rs. 2.

7. Exhibitors are requested to mention in their application, whether they intend to practically illustrate the process of their manufacture, and if so, to describe the nature of the demonstration.

8. The Exhibition Authorities will inform the applicants whether they are registered as Exhibitors, and a number will be allotted to them under which all articles should be sent. *In all communications this number should be quoted.*

9. Each Registered Exhibitor will be allowed free of charge a covered space of 15 square feet or more, according to the nature of the Exhibit and the space available in the Exhibition Building.

Additional space (if available) beyond that allotted by the Committee may be obtained subject to a charge ranging between 2 annas and 2 rupees a square foot, according to the nature of the Exhibit.

10. The Exhibition Authorities will have absolute discretion as regards the acceptance or rejection of Exhibits, and the allotment of space covered or uncovered.

11. Exhibits must be sent so as to reach Surat not sooner than six weeks, and not later than two weeks before the opening of the Exhibition. (The exact date to be notified hereafter.) They may be sent by "Post" or by "Railway Parcel" or "Goods," or may be delivered personally between the hours of 10 A.M. and 4 P.M. at such place or places, and to such person or persons, as will be notified hereafter. Receipts will be forwarded for the articles so delivered.

12. All packages received or delivered must bear a label on the upper covering specifying the name and number of the Exhibitor, and addressed to the Secretary. They must contain inside a list in triplicate with all particulars required under Rule 19 in regard to the Exhibits in the package. This list will be compared with the Exhibits sent by the Exhibitor and a formal receipt will be forwarded in due course to the Exhibitor for the articles found in safe order.

13. Exhibitors who fail to send their goods, and appropriate the space allotted to them by the time prescribed under Rule 11 (unless with the special permission from the Exhibition Authorities), shall forfeit all rights to exhibit, and shall not receive any refund of the payments

made by them. No refund will be given for occupying less space than that applied and paid for and allotted; and the unoccupied space will be disposed of as the Exhibition Authorities deem fit.

14. Exhibitors may forward or deliver their articles personally or through authorized agents.

15. Every facility will be afforded to Exhibitors or their agents in connection with the transport, display, sale, and care of their Exhibits.

16. Exhibitors must bear all expenses incidental to the transport and the delivery of their Exhibits, as well as their removal after the Exhibition is closed. Goods or parcels sent "unpaid" will be refused. If the Exhibitors require for the display of their Exhibits any special arrangement or construction, stalls, stands, cases, tables, shelves, etc., they must carry out the same at their own cost, in accordance with plans approved by the Exhibition Authorities.

17. Assistants, servants, or other attendants, necessary to any exhibitor for service at his stalls, may be granted a free pass (not transferable) to the Exhibition at the discretion of the Secretary. All such attendants shall obey the orders of the Exhibition Authorities and the supervising staff appointed by them.

18. All reasonable precautions will be taken to guard the premises of the Exhibition, and secure the safety of the Exhibits. The Exhibition Authorities, however, do not at all hold themselves responsible for any damage or loss, howsoever occurring. Exhibitors wishing to insure their articles may apply to the Secretary, who will arrange for the same on payment of the necessary charges. All valuable Exhibits, such as jewellery, gold and silver plate, must be forwarded under the charge of an attendant.

19. Every Exhibit must bear a label showing the section, the name or description of the article, its price, the place of its production or manufacture, the names of the manufacturer and the Exhibitor, and also mentioning if it is for sale. Such labels will be supplied on the acceptance of the application.

20. Exhibits may be sold during the continuance of the Exhibition. No articles shall, however, be removed whilst the Exhibition continues, without the permission of the authorities. Exhibitors must arrange to have all their articles removed within ten days after the close of the Exhibition. If they fail to do so the Exhibits will be removed and stored at the risk and expense of the owners, and will be handed over to them on payment of all expenses incurred.

21. Exhibitors will have to pay a commission of half an anna per rupee on all articles sold by the Exhibition Committee. The net balance after deducting the commission will be remitted to them after the close of the Exhibition.

22. Exhibitors who are unable to attend personally or send agents in charge of the exhibits may make special arrangements with the Secretary for the exhibition of their goods, subject to the provisions of the foregoing rules.

23. The Exhibition Authorities reserve the right to remove the Exhibits of any person who does not conform to their Regulations.

24. No article exhibited may be copied, photographed, drawn or reproduced in any manner, without the special permission of the Exhibitor and the Exhibition Authorities. General photographs may, however, be taken with the permission of the Exhibition Authorities.

25. Persons willing to send Exhibits for the Loan Section should write, giving all the necessary particulars to the Secretary, who will inform them as to the acceptance of their offer and make with them all the necessary arrangements.

26. All persons who become Exhibitors shall, by so doing, be held to signify their assent to, and acceptance of all the foregoing Rules and Regulations, and also such other Regulations as the Exhibition Authorities may hereafter issue.

27. Sale stalls will also be opened. Persons desiring to have such Stalls may apply to the Secretary of the Exhibition for terms.

N. B.—All communications should be addressed to—

THE SECRETARY,
EXHIBITION COMMITTEE,

Surat.

Telegraphic Address—"Exhibition"—Surat.

For obtaining copies of the Prospectus, Forms of Application and all information regarding the Exhibition and for making special arrangements, intending Exhibitors may also apply to the General Secretary, Mr. Manubhai Nanabhai, B.A., LL.B., High Court, Bombay.

LIST OF GROUPS AND CLASSES OF EXHIBITS.

SECTION I. AGRICULTURE AND FORESTRY.

Group I. Machinery.

- (a) Pumps, Aerometers (wind-mills), Water-turbines, Water-wheels, Water-lifts.
- (b) Sugarcane Presses (or mills), Machines for preparing coffee, coir, cotton, wool and other fibres; Incubators.
- (c) Ploughs, Hoes, Harrows, Chaff cutters, Root cutters, Corn grinders; Cattle food cookers, Mowing machines, Reaping machines, Winnowing machines, Sugarcane juice boilers, Milk separators and other dairy machines for making butter, sterilizing and pasteurising milk; Garden Pumps and Tools and Lawn Mowers, Grinding Mills, and other agricultural implements; Bullock carts.
- (d) Not included in the above classes.

Group II. Vegetable and Animal Products.

- (a) Grains, Pulse, Fruits, Vegetables, Flowers, etc. (both Green and Dry).
- (b) Tea, Coffee, Chocolate, Cocoa, Cardamom, Ginger, Sugar (raw and refined,) etc.
- (c) Tobacco, Cigarettes, Cheroots, etc.
- (d) Barks, Gums, Resins, Fibres, Honey, Wax, Sandalwood, Grasses, Curry-stuffs, Nuts, etc.
- (e) Oil-seeds and Oils, Cocotine, Fats, etc.
- (f) Silk cocoons, Silk.
- (g) Forest produce Timbers, bamboos, canes, etc.
- (h) Not included in the above.

Group III. Prepared Articles.

- (a) Butter, Ghee, Cheese, Preserved Milk, Sterilized Milk, Humanized Milk, Condensed Milk.
- (b) Jams, Jellies, Preserved Fruits, Preserved Food and Provisions, Flours, Chutneys, Curry Powders, etc.
- (c) Confectionery, Sugar, Toys, etc.
- (d) Not included in the above.

Group IV. Manures.

Animal, vegetable, chemical, natural or artificial.

SECTION II. INDUSTRIAL.

Group I. Machinery.

- (a) Steam, Gas, Oil and Air Engines.
- (b) Hydraulic and Screw Presses, Hand Press, Oil Press, Printing Press; Colour Printing Machines, Calico Printing Machines; Ice Machines, Aerated-water Machines, Ginning Machinery.
- (c) Sawing, Planing and Drilling Machines; Lathes, Sewing Machines.
- (d) Other Machines not specified above.

Group II. Mechanical Contrivances, and Machine Accessories.

- (a) Spinning, Weaving, Bending and Doubling machines; Knitting machines; Embroidery machines; Looms, Hydro-extractors, Warping machines.
- (b) Looms—Handlooms—Power Looms.
- (c) Cranes, Pulleys, Brakes, Punkha wheels, Mills, Dices, Vices, Water-taps, Valves, Pulverizers, Drilling machines.
- (d) Lamps, Stoves, Forges, Eountains, Desiccators, Filters, Condensers, Evaporators, Centrifugal machines, Weighing machines, Automatic machines, Ventilators.
- (e) Tools and implements for Blacksmiths, Coppersmiths, Goldsmiths, Tinsmiths, and other metal workers, Carpenters, Plumbers, Turners, Stone workers, Miners, Glass workers, etc.
- (f) Belting, Ropes, Lubricants, Pipes, Hose, Sharpening stones, Polishing stones and Powders, Greases, etc.
- (g) Locks and Safes.
- (h) Not included in the above.

Group III. Electricity.

- (a) Electric engines, Dynamos, Electro-gilding, Electro-typing, Electric Lighting plant, Batteries, Magnetic Machines.
- (b) Telephones, Telegraphic Instruments, Insulated wires, Switches, Electric bells, Electric punkhas, Fans, Insulators, Automatic signals, Electric furnaces, connectors.
- (c) Not included in the above.

1117

Group IV. Instruments.

- (a) Surgical, Mathematical, Surveying and other Scientific instruments; Microscopes, Telescopes, Binoculars, Spectacles, Watches, Clocks.
- (b) Musical Instruments, Phonographs, Gramophones, Records, etc.
- (c) Not included in the above.

Group V. Materials used in Construction and Mineral Products.

- (a) Stones, both Artificial and Natural; Cements, Bricks, Tiles, Marbles, Asphalt and other flooring Materials, Slates, Granite.
- (b) Ores, Coal, Mica, Manganese, Magnesite, Asbestos, Alum Clays, Crystals, Salts, Gold-bearing quartz, Emery, Saltpetre, Borax, Soda, Plaster of Paris, Colored earths.
- (c) Not included in the above.

Group VI. Textile Fabrics.

- (a) Yarns of Cotton, Silk, Wool, Flax, Hemp, Rhea, Agave, Plantain and other fibres, white and dyed; Mercerized yarns.
- (b) Gold and Silver thread and imitation gold and silver thread.
- (c) Cotton, Silk and Woollen cloths and cloths made from other fibres; Table-cloths, Shawls, Felts.
- (d) Gold and Silver Lace Cloths.
- (e) Hosiery, Gold, Silver and Silk Embroidery; Kinkhab, Jhig work, Knitted work, Crochet work; Bead work.
- (f) Weaving, Dyeing, Calico-Printing Processes.
- (g) Coir ropes, Mats, etc., Grass Mats, Canvas and articles manufactured therefrom, Rugs, Blankets, Cumblies, Carpets, and Durries.
- (h) Not included in the above.

Group VII. Leather, Horn and Paper.

- (a) Leather Tanned, Varnished, and Chromed, etc., Tanning processes.
- (b) Leather goods, Boots, Saddles, Leather for Book-binding, etc.
- (c) Horn goods.
- (d) Paper—Paper goods, Stationery, Cardboard, Book-binding Process.
- (e) Not included in the above.

Group VIII. Pottery, Porcelain and Glass.

- (a) Enamelled and Painted Pottery, and Signboard, Porcelain, Pipes, Vessels, etc.
- (b) Plaster-work, Modelling; Figures, Casts, Vases.
- (c) Glassware, Bangles, Mirrors, Decorated Glass.
- (d) Bricks, Tiles, etc.
- (e) Not included in the above.

Group IX. Metals and Jewellery.

- (a) Castings.
- (b) Brass, Bronze, German silver, and other Alloys, Lead, Tin and Aluminium ware.
- (c) Iron ware, Cutlery, Hardware, etc.
- (d) Copper vessels, Wires.
- (e) Hinges, Nails, etc.
- (f) Turned and Engraved works, Hammered ware, inlaid work, etc.
- (g) Fancy metal goods; Enamelled ware.
- (h) Silver and Gold work, Jewellery, plain and set with Precious stones, Precious Stones, Pearls, etc.
- (i) Not included in the above.

Group X. Chemical Industries.

- (a) Attars, Perfumes, Perfumed Oils, Powders, Cosmetics, Waters.
- (b) Essences. Extracts, Syrups and Spirits.
- (c) Dyes. Vegetable, Mineral and Artificial.
- (d) Paints, Varnishes, Pastes, Glues, Enamels, Chemicals, Inks.
- (e) Candles, Soaps, Matches, Bleaching Powders, Fire Extinguishers, Freezing and Cooling Mixtures.
- (f) Not included in the above.

Group XI. Furniture and Decorations.

- (a) Furniture, Carved Wood Work, Upholstery.
- (b) Screens, Curtains, Corner pieces, Marble work, Brackets, Artificial Flowers, Boxes, Ebony work, Lacquered work.
- (c) Not included in the above.

Group XII. Fine Arts.

- (a) Paintings, Drawings, Etchings, Crayon work, Oil-work Statuary, Plaster work, Photography, Stained-glass work, and imitation of it, Crystoleum painting, Ornamental Pith work, Engravings, Wood-cuts, Ferrotypes, Zincography, Pokerwork or Pyrography, Lithography, Printing and Chromo Litho Printing.
- (b) Ornamental Carving in Ivory, Wood, Sandalwood, Stone, Glass, Coconut shell, etc.
- (c) Inlaid work in Marbles, Soapstone, Wood, etc.

Group XIII. Conveyances.

- (a) Vehicles, Carts, Carriages.
- (b) Rickshaws, Perambulators.
- (c) Bicycles, Tricycles, etc.
- (d) Motor Bicycles, Motor Tricycles, Motor Cars, and their accessories.

Group XIV. Miscellaneous.

- (a) Articles of personal wear.
- (b) Toys, Walking Sticks, Umbrellas, Parasoles, etc.
- (c) Basket-work, cane-work, Bamboo-work, grass and Leaf-work, Wax-work, Rubber goods, Shell-work.
- (d) Artificial preparations and utilization of wastes of different industries.
- (e) Rare Books, Oriental Manuscripts, Granths, Fossils, Antiquarian objects, collection of Stamps, Coins, etc.
- (f) Things not included in the above.

SECTION III. HYGIENE AND SANITATION.

Under this section will be included all Exhibits,—whether Apparatus or Appliances, Specimens or Samples, Models or Drawings—which illustrate the following or kindred subjects.

Group I. Hygiene.

- (a) Housing.
- (b) Ventilation.
- (c) Heating.
- (d) Lighting.
- (e) Physical Exercise, articles of outdoor games, Sporting goods, etc.
- (f) Bathing.
- (g) Clothing.

Group II. Food and Water.

- (a) Cooking.
- (b) Pure Food Stuffs.
- (c) Drinking Water. (Filtering and Storing.)

Group III. Sanitation.

- (a) Household Sanitary arrangements.
- (b) Disposal of sewage and refuse.
- (c) Disinfectants.

Group IV. Medicines.

- (a) Patent medicine.
- (b) Homeopathic and allopathic medicines.
- (c) Tinctures, extracts.
- (d) Medicinal drugs.
- (e) Ayurvedic medicines.

SECTION IV. EDUCATIONAL.

- (a) Globes and Maps.
- (b) Kindergarten and Object Lesson Requisites.
- (c) Blackboards and Slates.
- (d) Mathematical and other educational appliances.
- (e) Copy and Exercise Books, pencils, etc.
- (f) School Books.
- (g) General Stationery.
- (h) Not included in the above.

SECTION V. CATTLE SHOW.

Buffaloes, Cows, Oxen, Sheep, Goats, Fowls, Hens, Poultry, etc.

SECTION VI. LOAN EXHIBITION.

For information under this Section apply to the Secretary, Exhibition Committee.

*To the General Secretary, Industrial and Agricultural Exhibition and Cattle Show
of the Fourteenth Provincial Conference, Surat, 1906.*

Sir,

I wish to exhibit the articles as per particulars given in the annexed form, at the Industrial and Agricultural Exhibition and Cattle Show of the Provincial Conference, to be held at Surat.

The preliminary fee of Rs. 2 required under Rule VI is sent *

I consent to abide by the Rules and Regulations of the Exhibition Committee; and on being informed that my name has been enrolled as an Exhibitor, I shall be glad to furnish any further information required.

I beg to remain,

Sir,

Yours faithfully,

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	13 to 14	

Agricultural operation—Weeding in ragi fields.

Cattle are in good condition. Water and fodder are sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Kulthi is still being sown. Til is being harvested in Bangalore. Standing crops are in good condition. The dry crops had excess of rain.
10. Prospects of the season good. There was good rain throughout.
11. Public health generally good. Fever prevails in Doddballapur and Kankanhalli; small-pox in Doddballapur and Devanhalli and cholera in Closepet.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are reported to be in good condition. Karthika paddy is being sown in Kolar, Bowringpet and Goribidnur; and kulthi in Bagepalli, Mulbagal, Srinivasapur and Gudibanda. Samé and gid-ragi are being harvested in Mulbagal.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Nat-ragi in Maddagiri, black and green grams in parts of Chiknayakanhalli; til in Gubbi; baragu, cholum and til in Tiptur; ragi and cholum in Pavagada; baragu in Koratagere and til in Turuvekere are being harvested. Paddy in Tumkur, Tiptur and Pavagada; wild gingelly in Tiptur and kulthi in all the taluks were sown. Standing crops are in good condition. Castor crop in parts of Sira and Gubbi is being damaged by insects. Weeding is going on.
10. Prospects of the season fair. Food stocks available. Maddagiri requires some more rain.
11. Public health generally good. Fever and small-pox in parts of Tiptur and cholera in parts of Pavagada and Kunigal are still prevailing.
12. Cattle healthy. Water and fodder are available.

MYSORE.

8. Market well supplied.
9. Standing dry and wet crops are reported to be good in all the taluks. Transplanting of paddy seedlings is still being carried on in parts of Chamrajnagar, Nanjangud, Malvalli and Krishnarajpete. Horse gram in parts of Chamrajnagar, Gundlupet, Nanjangud and Krishnarajpete and black and green grams, Bengal gram and koriander in parts of Gundlupet are being sown. Jola and til in parts of Yedatore, Chamrajnagar and Gundlupet; til and ragi in parts of Hunsur and Heggaddevankote, and jola in parts of Nanjangud, T.-Narsipur and Krishnarajpete are being harvested. The probable outturn is estimated as follows:—

Hunsur	...	Ragi and til	12 annas.
Gundlupet	...	Jola	8 do.
		Til	4 do
Krishnarajpete	...	Jola	6 do.

Castor crops in parts of Chamrajnagar are reported to have been attacked with "Kari Mari" insects.

10. Prospects of the season good. Standing dry crops in parts of Hunsur and Malvalli are reported to be in need of more rain. Food stocks are available for the present.

11. Public health generally good. Cholera still prevails in all taluks, except Yedatore, Krishnarajpete, Nagamangala and Gundlupet.

12. Cattle are reported to be healthy. Water and fodder are generally available.

HASSAN.

8. Market fairly well supplied. Prices have gone down a little.

9. Kulthi in Hassan; kulthi, wild gingelly, black and green grams in Arkalgud are being sown. The harvesting of gid-ragi is nearing completion in Belur, but in Hassan, Channarayapatna, Hole-Narsipur, Arkalgud and Alur, it is still going on. Sugar-cane in Channarayapatna and Hole-Narsipur and til in Arkalgud are also being harvested. Standing crops are in good condition in all the taluks.

10. Prospects of the season are encouraging. Food stocks available.

11. Public health generally good. Small-pox and fever prevail in parts of Manjarabad.

12. Cattle are in good condition. Pasture and water are available.

SHIMOGA.

8. Market well supplied.

9. Transplanting of paddy is nearing completion in Sagar and Nagar. Horse gram is being sown in Kumsi. Standing crops are in good condition. Paddy and sugar-cane in some portions of Shikarpur and Sorab require rain. Green gram in some parts of Honnali and arecanut in some parts of Sagar are being harvested.

10. Prospects of the season fair. Food stocks are somewhat insufficient in parts of Shikarpur, Sorab and Kumsi.

11. Public health generally good. Cholera prevails in a few villages of Honnali, Shikarpur and Kumsi; and small-pox in Shimoga, Sorab, Sagar and Kumsi.

12. Pasture and fodder available. Cattle healthy. Some tanks in Honnali have received good supply of water by the recent rains and the remaining tanks have received from five to six months' supply of water.

KADUR.

8. Market fairly well supplied, except in Chikmagalur, owing to the prevalence of plague there.

9. Transplanting is still in progress in parts of Mudgere. Kulthi in parts of Tarikere and Kadur is being sown. The standing sugar-cane and paddy crops in Chikmagalur; paddy in Mudgere; paddy, wheat and sugar-cane in Tarikere; sugar-cane, coffee, arecanut, pepper, cardamom and paddy in Koppa; and ragi, cholum, ballar, togari, horse gram, paddy and sugar-cane in Kadur are in good condition. Gid-ragi in parts of Chikmagalur and gingelly, black and green grams, and coriander in parts of Kadur are being harvested.

10. Prospects of the season good. More rain is needed in parts of Mudgere. Food stocks are available and sufficient for the present.

11. Public health generally good. Small-pox is reported to prevail in parts of Kadur

12. Cattle generally healthy. Pasture and water available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in good condition except in Hiriur, Holalkere, Davangere and Hosdurga, where the castor plants are attacked by insects (*Kondli Hula*). Paddy under tanks in Hiriur and kulthi in Davangere and Holalkere were sown. Munger cholum and sessamum in Hiriur and green gram in Davangere were harvested, the yield being from 4 to 12 annas.

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.

BANGALORE,
2nd October 1906.

Note—Rice (husked)—Oryza Sativa.
Ragi—Eleusine Corocana.
Kulthi—(Horse gram) Dolichos Biflorus.

Cholum—Sorghum Vulgare
Kadale—(Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	13 to 14	

Agricultural operations—Weeding in ragi fields.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. Kulthi is sown in some parts.
10. Prospects of the season good. There has been good rain throughout the district.
11. Public health generally good. Fever is reported to prevail in Doddballapur, Kan-kanhalli and Channapatna; small-pox in Devanhalli, and cholera in Closepet.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Kartika-paddy in Kolar; kulthi in Mulbagal, Sidlaghatta, Bagepalli, Srinivasapur and Gudibanda are being sown. Same is being harvested in Mulbagal.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Nat-ragi and cholum in Maddagiri; black and green grams in parts of Chiknayakanhalli; cholum in Sira; til in Gubbi; cholum, baragu and green gram in Tiptur; ragi in Pavagada; sugar-cane in Kunigal, and cholum, black gram and green gram in Turuvekere are being harvested. Paddy in Tumkur and Tiptur; wild gingelly in Gubbi, and kulthi in all the taluks are being sown. Standing crops are in good condition. Castor is still being damaged by insects in parts of Sira and Gubbi.
10. Prospects of the season fair. Food stocks are available. More rain is required in Maddagiri.
11. Public health generally good. Cholera is still prevailing in parts of Pavagada.
12. Cattle healthy. Water and fodder are available.

MYSORE.

8. Market well supplied.
 9. Standing crops are reported to be good. Transplanting of paddy seedlings is still going on in parts of Chamrajnagar, Seringapatam, Nanjangud, Malvalli, Krishnarajpete and Nagamangala. Kulthi in parts of Chamrajnagar, Hunsur and Nanjangud; and kulthi, Bengal gram, black and green grams, coriander and tadagani in parts of Gundlupet are being sown. Cholum and til in parts of Chamrajnagar and Yedatore; ragi and til in parts of Hunsur; cholum and ragi in parts of Nanjangud, and cholum in parts of Gundlupet and T.-Narsipur are being harvested. The probable outturn is estimated as follows:—
- | | | | |
|-------------|-----|-----|------------------------|
| Hunsur | ... | ... | Ragi and til 12 annas. |
| Gundlupet | ... | ... | Cholum 8 do. |
| T.-Narsipur | ... | ... | do 12 do. |
10. Prospects of the season good. The dry crops in Hunsur are in need of rain. Food stocks are sufficient.
 11. Public health good. Cholera still prevails in parts of Mysore, Chamrajnagar, Seringapatam, Hunsur, Heggaddevankote, Nanjangud, T.-Narsipur, Malvalli and Krishnarajpete.
 12. Cattle healthy. Water and fodder generally available.

HASSAN.

8. Market fairly well supplied.

9. Transplanting of paddy is nearing completion. Wild gingelly, kulthi, black and green grams are being sown in Arkaigud. Gid-ragi is being harvested in Hassan, Channarayapatna and Alur. Sugar-cane and cholum are also being harvested in Channarayapatna. Standing crops are generally good. Castor is reported to have been attacked by insects in parts of Channarayapatna.

10. Prospects of the season encouraging. Food stocks available.

11. Public health generally good. Small-pox still prevails in a mild form in Manjarabad.

12. Cattle healthy. Pasture and water available.

SHIMOGA.

8. Market well supplied.

9. Transplanting of paddy has been completed in Sagar and Nagar. Standing crops are in good condition. Paddy and sugar-cane in some parts of Shikarpur and Sorab are in need of rain. Green gram in some parts of Honnali and arecanut in some parts of Sagar and Tirthahalli are being harvested.

10. Prospects of the season fair. Food stocks are somewhat insufficient in some parts of Shikarpur, Sorab and Kumsi.

11. Public health generally good. Cholera prevails in a few villages of Channagiri, Shikarpur and Kumsi, and small-pox in a few villages of Shimoga, Sagar and Kumsi.

12. Pasture and fodder are available. Cattle healthy.

KADUR.

8. Market fairly well supplied, but supply in Chikmagalur market is rather poor owing to the prevalence of plague.

9. Transplanting is almost over in Mudgere. Kulthi in parts of Kadur and Chikmagalur and coriander in parts of Tarikere are being sown. The standing crops of dod-ragi, paddy and sugar-cane in Chikmagalur; sugar-cane, paddy and ragi in Tarikere; paddy, ragi, ballar, cholum and sugar-cane in Kadur; paddy and ragi in Mudgere; and sugar-cane, paddy, coffee, arecanut, cardamom and pepper in Koppa are in good condition. Gid-ragi, garlic and coriander in Chikmagalur; cardamom and arecanut in parts of Koppa; cardamom in parts of Mudgere; and gingelly, black-gram and coriander in Kadur are being harvested. The arecanut crop in parts of Koppa and Sringeri are reported to have been affected by a mild form of *kole-roga*.

10. Public health good. More rain is needed in Mudgere. Food stocks are available and sufficient.

11. Public health generally good. Small-pox prevails in some parts of Kadur, Chikmagalur and Koppa and plague in Chikmagalur.

12. Cattle generally healthy. Water and pasture available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in good condition, except in Challakere, Hiriur, Holalkere and Davangere, where castor plants are reported to have been attacked by insects (*Kondli Hula*). Kulthi was sown in Challakere. Cholum in Hiriur and Hosdurga; sessamum in Davangere, Molakalmuru, Hosdurga and Harihar; and green gram in Davangere were harvested, the yield being from 8 to 12 annas.

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Fodder and water available. Cattle healthy.

DISTRICT REPORTS.

8. Markets how supplied
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	13 to 14	

Agricultural operations—Weeding in ragi and paddy fields.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices of food grains continue to be high.
9. Standing crops are in good condition. Sowings have almost been completed.
10. Prospects of the season good. There has been good rain throughout the district.
11. Public health generally good. Cholera is reported to prevail in Kankanhalli Town and a few of the surrounding villages and in Closepet, Bidadi and other villages in Closepet.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Wild gingelly in Bowringpet and Mulbagal and kulthi in Kolar, Mulbagal, Bowringpet, Bagepalli and Gudibanda are being sown. Samé is being harvested in almost all the taluks.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tumkur; kulthi in Maddagiri; cholum in Chiknayakanhalli; paddy, kulthi and baragu in Sira; paddy, kulthi and wild gingelly in Gubbi and Tiptur; and kulthi in Pavagada and Kunigal.
Crops harvested.—Sugar-cane, cholum, navane and baragu in Sira; til in Gubbi; black and green grams, cholum and baragu in Tiptur; ragi in Pavagada; sugar-cane in Kunigal; and cholum in parts of Koratagere and Turuvekere.
10. Prospects of the season good. Food stocks are available. More rain is required in Maddagiri.
11. Public health generally good. Small-pox has reappeared in one or two villages of Tiptur. Plague prevails in Chiknayakanhalli.
12. Cattle healthy. Water and fodder available.

MYSORE.

8. Market well supplied.
9. Standing crops are reported to be good. Transplanting of paddy seedlings is still going on in parts of Chamrajnagar, Malvalli and Nagamangala. Kulthi in parts of Chamrajnagar; and kulthi and coriander in parts of Hunsur are being sown. Cholum in parts of Chamrajnagar and Gundlupet; ragi and til in parts of Hunsur and Heggaddevankote; cholum and til in parts of Yedatore are being harvested. The probable outturn is estimated as follows:—

Hunsur and Heggaddevankote	...	Ragi and til	12 annas.
T.-Narsipur	...	Cholum	12 annas.

Castor crop in parts of Chamrajnagar are still being damaged by "kari mari" insects.

10. Prospects of the season good. Food stocks are available.

11. Public health good. Cholera still prevails in Chamrajnagar, Seringapatam, Hunsur, Nanjangud, T.-Narsipur and Malvalli.

12. Cattle healthy. Water and fodder available.

HASSAN.

8. Market fairly well supplied.

9. Coriander and menthya are being sown in Channarayapatna. Harvesting of gid-ragi is almost complete. Cholum and sugar-cane are being harvested in Channarayapatna. Standing crops are in good condition. Outturn promises to be good.

10. Prospects encouraging. Food stocks are available.

11. Public health generally good. Small-pox and fever are still prevalent in Manjarabad.

12. Cattle are in good condition. Water and pasture available.

SHIMOGA.

8. Market well supplied.

9. Standing crops are in good condition in all the taluks, but the wet crops in the Shikarpur and Hosur hoblis of the Shikarpur Taluk are reported to have suffered owing to insufficient rain. Green gram in Honnali, sesamum in Shimoga and Honnali, ragi in Sorab and arecanut in some parts of Sagar and Tirthahalli are being harvested.

10. Prospects of the season fair. More rain is wanted in Shikarpur and Sorab.

11. Public health generally good. Cholera prevails in a few villages of Channagiri and Kumsi, and small-pox in a few villages of Shimoga, Sagar and Kumsi.

12. Cattle healthy. Fodder and pasture available.

KADUR.

8. Market fairly well supplied, but supply in Chikmagalur and Mudgere markets is somewhat poor on account of the prevalence of plague in these places.

9. Transplanting of paddy in Mudgere is now complete. Ragi in parts of Koppa and Mudgere; hingar cholum, coriander and wheat in parts of Kadur, and coriander and kulthi in some parts of Tarikere are being sown. The mungar crop of coriander in Tarikere; cholum, sesamum, black and green grams in parts of Kadur; cardamom in Mudgere; arecanut and cardamom in Koppa and mungar crops in Chikmagalur are being harvested. The probable outturn of areca crops in Sringeri is estimated at 12 annas. Standing crops are in good condition. Slight damages to crops by insects are reported in various small areas in the district.

10. Prospects of the season good. More rain is needed in parts of Mudgere. Food stocks are available and sufficient.

11. Public health generally good. Small-pox is reported to prevail in parts of Kadur and Koppa; and plague in Chikmagalur and Mudgere towns.

12. Cattle generally healthy except in Kalasa hobli in Mudgere where *metre-roga* is reported to be slightly prevalent. Pasture and water are available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are reported to be in good condition.

Seeds sown.—White cholum in Davangere and kulthi in Moiakalmuru.

Crops harvested.—Sesamum in Challakere, Hiriur, Davangere, Molakalmuru, Hosdurga and Harihar ... yield from 4 to 12 annas.
Cholum in Challakere ... yield from 4 to 8 annas.

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.

MYSORE, THURSDAY, OCTOBER 11, 1906.

PART IV.

OFFICIAL PAPERS.

ADDRESS

OF THE

DEWAN OF MYSORE

TO THE

REPRESENTATIVE ASSEMBLY.

1st October 1906.

GENTLEMEN,

In welcoming you to this session of the Mysore Representative Assembly, and before proceeding to deliver the usual address by command of His Highness the Maharaja, allow me to take the occasion of my first meeting the members of the Assembly in the capacity of Dewan of Mysore, to say how highly I value the privilege of presiding over this gathering. You are aware that almost ever since the Assembly was started, I have been greatly interested in its growth and progress, and have watched with pleasure its development into a useful and well-recognized feature of the administration.

2. Established just twenty-five years ago, the Representative Assembly has now become a time-honoured, and one may almost say a historic, institution. That it flourishes in full vitality here, affording a model for other Native States on which to fashion their own popular assemblies; is not to be wondered at, when it is realized how well it fulfils its allotted function in the economy of the State; namely, that of enabling the Government of His Highness the Maharaja on the one hand to place before the people through representative citizens an account of the administration of the country during the past year and the measures contemplated during the coming year, and, on the other, to ascertain through the same means the wants and wishes of the people at large in regard to matters affecting the general well-being. Its own sphere of usefulness is, consequently, unaffected by any changes in the *personnel* of the Government or in the arrangements necessary for the conduct of the administration of the State.

Administrative
changes.

3. The term of the appointment of Sir P. N. Krishua Murti, K.C.I.E., as Dewan having expired in March last, His Highness the Maharaja was pleased to entrust me with the high and responsible office of the Chief Minister of the State. At the same time Mr. T. Ananda Rao, B.A., and Mr. K. P. Puttana Chetty were appointed as First and Second Councillors respectively, in the place of Rajamantrapravina Mr. C. Sreenivasiengar and Rao Bahadur Mr. C. Madiah, who retired on the expiry of the term of their office.

4. The rules of business of the Council have also since been modified so as to provide for the Councillors being invested with a certain measure of administrative responsibility, the lack of which was felt to be the chief reason why the Council of August 1902, which was a purely consultative body with powers of inspection but without any executive powers, failed to fulfil the objects with which it was constituted. Under the revised rules, the members of Council, though not possessing any executive powers as such, are empowered, in their respective departments, to pass final orders in the name of Government, instead of merely recording their opinions, on all ordinary matters which are not of sufficient importance to require reference to the Dewan or to the Council. This does not of course in any way affect the personal control of His Highness the Maharaja over all the Departments of the State, all important matters being as heretofore submitted for the orders of His Highness.

The Revenue Commissioner.

5. Another important change is that relating to the position and powers of the Revenue Commissioner. This office was first constituted in the year 1902, for the more effective supervision and control of the Revenue Department. The experience of the last four years has shown that the usefulness of the office could be considerably enhanced by a larger delegation of powers to the Revenue Commissioner. The reservation to Government of certain powers which should have been assigned to the Revenue Commissioner, when the office was first created, has had the effect of restricting the usefulness of that office and has been found prejudicial to the efficient administration of the Revenue Department. For instance, the Revenue Commissioner had no jurisdiction in matters relating to the collection of revenue and the proceedings taken for its recovery. He had no jurisdiction in deciding claims to hereditary offices and the emoluments attached thereto, thereby having no adequate control over a most important class of revenue officials. With a view to remove these defects, the Land Revenue Code has recently been

amended so as to make the Revenue Commissioner the Chief Controlling Revenue Authority subject, of course, to Government. His position now more nearly corresponds to that of a Commissioner in Bombay. His decision on appeal in matters falling under the Revenue Code is final except where a question of law or usage having the force of law is involved, in which case a further appeal to Government is allowed.

6. The Revenue Commissioner is as heretofore Director of Statistics as well. Under the revised Famine Code recently issued, he is also *ex officio* the Famine Commissioner, until a whole-time Famine Commissioner is appointed, when necessary.

7. Various other powers of Government in connection with the sanction of loans under the Land Improvement Loans Regulation and under Section 194 of the Land Revenue Code, the allotment and distribution of grants for the restoration of minor tanks, remissions of land revenue, alienations of land, and such other matters, have also been delegated to him.

8. In pursuance of the same policy of decentralisation, it is under contemplation to invest certain other Heads of Departments with enhanced powers in matters relating to their charge.

9. It is His Highness' hope that the above changes will be found to be conducive to the more speedy and efficient disposal of the business of the State.

10. I may also refer here to certain other measures adopted for securing greater efficiency in the administrative machinery.

11. The question of the recruitment of officers to the higher grades of the service has been exhaustively considered with the result that revised rules were issued in June last laying down the principles that should govern such recruitment, and defining the cadres of the various non-technical Departments of the State. Under these rules the Competitive Examination for the Mysore Civil Service, which was in abeyance for some years, has been revived, and certain modifications have been made in the original scheme. These changes, while ensuring the introduction to a limited extent of the pick of University men into the service, allow ample and assured prospects of promotion to those who, by merit or good work done in the lower ranks of the service, have established a claim to be admitted to the graded service. Under the new rules, officers of not only the

Civil Service.

Revenue and Judicial, but also of the Police, Survey, Excise and Accounts departments can now aspire to the highest positions in the State.

Amildars.

12. Revised rules have been issued for the selection of eligible candidates as Amildars and Deputy Amildars. Hitherto subordinate officers in all departments, including Public Works, Medical and other branches of the service which afford no adequate training for the responsible position of Amildar or Deputy Amildar, sought to be appointed to these offices. Under the rules as now revised, candidates for these appointments will be selected only from the Revenue, Police, Judicial, Registration, Excise, Survey and Inam Departments, and the General and Revenue Secretariat. A list of candidates eligible by character and qualifications will be maintained, and appointments of Amildars and Deputy Amildars will as a rule be made from this list.

Probationers.

13. In order to define clearly the principles that will regulate selection in future for appointment as Revenue or Judicial Probationers, it has been laid down that the appointments in question are intended solely to meet the exceptional cases of persons who, besides being in themselves duly qualified for entering the public service, are also the descendants of men that have rendered distinguished service to the State in the past, and who are therefore, in His Highness' opinion, deserving of being started in the public service otherwise than through the ministerial ranks.

Other measures.

14. Other reforms recently introduced to improve the *personnel* of the service are the following :—

Revenue Department.

(1) Revised rules have been issued to regulate the appointment and promotion of ministerial officers in the Revenue Department. The chief features of the new rules are that the qualifications required for the different kinds of appointments are definitely indicated ; that clerks in the Taluk Offices are given prospects of promotion to the office establishments of Deputy and Assistant Commissioners ; that a number of appointments of Taluk Sheristedars are reserved for qualified taluk head gumastas and shekdars ; that in giving promotions preference is accorded to those who have passed the prescribed tests ; and that Heads of offices are required to maintain registers of applications for admission to the service. Similar rules in regard to subordinate appointments in other departments are under consideration.

Shekdars.

(2) An important modification has been made in regard to the recruitment to the subordinate Revenue

Executive service, *viz.*, the grade of shekdars (corresponding to Revenue Inspectors in British India). While insisting that all candidates shall be physically fit and shall have also passed the prescribed tests before being appointed as shekdars, a relaxation has been made in regard to the general educational qualifications necessary for admission to the training school in surveying and drawing. The Matriculation examination which was prescribed as a qualification for all candidates for admission to the school having been found to be too high a standard for the educationally backward classes of Mahomedans and others, in their case a pass in the Lower Secondary examination has been declared to be sufficient for admission to the training school. A similar relaxation in the case of the Police training school when it was started in 1892, has been attended with the best possible results in the way of securing for the service a fair proportion of the classes who possess a natural aptitude for executive work. The new rules also provide for the existing shekdars qualifying for admission to the new grades.

(3) A standard of qualification, comprising certain *Shanbhogs or Village Accountants*, easy tests, has been prescribed for shanbhogs. It is hoped that this will shut out the very inefficient from this important office.

(4) Orders have recently been passed sanctioning *Travelling allowance to Taluk Officers* the grant of travelling allowance to Amildars and Deputy Amildars when touring within their taluks, which hitherto they were not receiving. This measure, it is expected, will tend to improve the efficiency of this important branch of the executive service, by inducing greater attention being paid to out-door work and by temptation for drawing supplies from the raiyats being removed.

15. I refrain from dwelling at more length upon the various measures already adopted as above set forth, since full information about their scope and the necessity for them is as a rule furnished in the explanatory orders either published in the Gazette from time to time, or placed in the newly established Press Room at Bangalore at the disposal of the Press generally.

16. Another matter which His Highness' Government have taken in hand is the effecting of all possible economies in the various Departments with a view to reducing the expenditure therein to the minimum compatible with efficiency. The whole financial position is now under careful review in connection with the disproportionate growth of expenditure in previous years, and a Committee, consisting of the two Members of Council, Retrenchments.

has been appointed to consider and suggest reductions in expenditure in consultation with the heads of departments concerned. Certain departments have already been dealt with by the committee, and their proposals in regard to them are now ripe for submission to Government; other departments will be similarly taken up; and I hope to be in a position, when we meet next year, to point to material retrenchments as the result of their recommendations.

17. I may, at the same time, add that reductions have already been effected, or virtually decided upon, in certain directions; such as the abolition of the appointment of a separate Forest Settlement Officer; and the amalgamation of the office of the Examiner of Public Works Accounts with that of the Comptroller. This last is a reform which has been advocated by such competent authorities as Messrs. Hudson, Biddulph and Kiernander, as calculated to ensure efficiency and independence of audit. The change will come into effect from the 1st January next, and a local officer is being trained in the system of Public Works Accounts to work under the orders of the Comptroller. The Archaeological Department having finished its labours, it has been found possible to effect considerable reductions in it, retaining only a small establishment absolutely necessary for present wants.

Finance.

18. I turn next to the general subject of the finances of the State, and here I shall, according to the usual practice, begin by summarising the salient features of the accounts of the year 1905-06.

19. The Budget Estimates of the year showed a total revenue of Rs. 227,43,000 and a total expenditure of Rs. 213,40,000, so as to leave a surplus of Rs. 14,03,000. The approximate accounts now made up, the usual details of which are given in the statements (Appendix A) placed in your hands, show a total revenue of Rs. 241,18,000 and a total expenditure of Rs. 231,26,000, leaving a surplus of Rs. 9,92,000. I would here explain that a change in the accounting of Railway transactions has affected the gross figures on both sides of the accounts in 1905-06. Hitherto only the net receipts from the Railways were being shown on the Revenue side of the estimates and accounts; but as this was not found to be a satisfactory way of accounting, the gross receipts and working expenses have in this year's accounts been shown as Revenue and expenditure respectively. Owing to the above change the revenue and Expenditure figures were both increased by Rs. 17,31,000. This source of difference being eliminated, the total revenue shows a falling off as

compared with the Budget Estimate, by Rs. 3,56,000 and the expenditure shows a small increase of Rs. 55,000.

20. The chief falling off in revenue has been under the head of Land Revenue, the collections being short of the original estimate by no less than Rs. 8,46,000 owing to remissions and postponements given on account of the drought and unfavourable season of last year. The loss was counterbalanced to some extent by a general improvement under other heads, notably Forests (Rs. 2,79,000), Railways (Rs. 1,59,000) and the Cauvery Power Scheme (Rs. 75,000).

21. On the expenditure side, as I have already stated, the increase on the total was Rs. 55,000. The original estimates have been generally well maintained, except that the expenses connected with the reception of Their Royal Highnesses the Prince and Princess of Wales were somewhat higher than the amount entered in the estimates. There has been some unavoidable delay in the settlement of these accounts, and the whole of the charges were not paid in 1905-06, some of them having had to be met in arrears during the current year.

22. The noticeable features in a comparison of the accounts of the two years 1904-05 and 1905-06 were as follows:—

In 1905-06 the land revenue collections were less by Rs. 5,60,000 owing to the unfavourable seasonal conditions. Excise revenue showed only a small increase of Rs. 26,000 owing to the same reason.

Stamp revenue somewhat revived, showing an increase of Rs. 73,000.

The Forest revenue was better by Rs. 1,55,000, of which about Rs. 88,000 represented the sale proceeds of elephants in the Khedda Department.

The Gold Mining receipts were higher by Rs. 87,000, this being due chiefly to adjustments of outstanding balances during the year.

In the Public Works receipts there was a substantial increase of Rs. 1,54,000 in consequence of the supply of water from the Bethamangala Tank to the Kolar Gold Fields having been for the first time given throughout the year.

There was an increase of Rs. 7,30,000 in the Cauvery Power Installation account, due partly to the recovery of arrears and partly to the income from the Bangalore Electric Lighting and Power Supply Scheme.

On the expenditure side there were important decreases of Rs. 8,53,000 on the capital account of the Cauvery Power Scheme and Rs. 2,14,000 in ordinary Public Works expenditure. Against these decreases, there was an increase of Rs. 3,06,000 in Railway Capital Account; of Rs. 3,00,000 in the expenditure of the various Civil Departments; and of Rs. 1,36,000 in the expenditure of the Forest Department, a lakh out of which was on account of Khedda operations during the Royal Visit.

On the whole the surplus realized in 1905-06 was very nearly 10 lakhs against the deficit of Rs. 92,000 in the preceding year.

Surplus.

23. The year 1905-06 opened with a balance of Rs. 43,49,000 to the credit of the Government. Adding to this the surplus of nearly 10 lakhs realized during the year, the closing balance at the end of the year was Rs. 53,41,000. This is what is usually referred to as the Government surplus on that date. This surplus does not necessarily represent the actual cash held in the treasuries or invested in securities, so as to be available to meet any emergent needs. It is simply the net result of the State's liabilities and assets, not including in the latter the very considerable amounts spent on reproductive works. The position at the commencement of the year 1905-06 may be thus stated :—

	Rs.	Rs.
ASSETS—		
1. Working cash balance ...	70,00,000	
2. Reserve cash and investments	72,01,000	
Total cash and investments ...		142,01,000
3. Loans to cultivators and others ...		27,17,000
4. Departmental deposits and advances ...		15,23,000
Total Assets ...		184,41,000
LIABILITIES—		
1. Savings Bank deposits ...	89,16,000	
2. State Life Insurance Fund ...	11,41,000	
3. Local Funds and various other		
State departmental deposits.	40,35,000	
Total Liabilities ...		140,92,000
SURPLUS		43,49,000

The position corresponding to the above at the beginning of the year 1898-99 was as follows :—

	Rs.
ASSETS—	
1. Working cash balance ...	61,33,000
2. Reserve cash and investments	129,03,000

	Rs.
Total cash and investments	190,36,000
3. Loans to cultivators and others ...	23,30,000
4. Departmental deposits and advances	76,04,000
Total Assets	289,70,000
LIABILITIES—	
1. Savings Bank deposits ...	31,06,000
2. State Life Insurance Fund ...	3,23,000
3. Local Funds and various other	
State Departmental deposits.	95,88,000
4. Mysore Railway Loan of 1882 ...	20,00,000
Total Liabilities	150,17,000
SURPLUS	139,53,000

24. It will be seen from a comparison of the figures in the above tables that what has taken place in the seven years from 1898-99 to 1904-05 is, that the State's liabilities have considerably increased under Savings Bank deposits, and perceptibly under the Insurance Fund, while simultaneously the cash and invested reserves have been considerably reduced. The former result is due to the acceptance of Savings Bank deposits without limit, and the expansion of business under the Insurance rules. The latter, that is, the depletion of the reserves, is due to the fact that in these years the Government have spent a large part of their accumulated surplus on such works as—the Cauvery Power Installation Scheme, Marikanave Reservoir, the Bethamangala Water-supply project, and the reconstruction of the Mysore Palace. The question, to what extent Savings Bank deposits should be allowed to accumulate, has been considered, and I shall presently speak of the decision come to. Meanwhile, in view chiefly of the heavy liabilities incurred since 1897-98 and the considerable reduction in the cash and invested reserves, the question of how best to build up the depleted reserve and to provide funds for productive and protective works is engaging the attention of Government.

25. This brings me to the consideration of the figures of the Budget Estimates of 1906-07. (Appendix B.) These estimates provide for a total revenue of Rs. 247,92,000 and a total expenditure of Rs. 247,72,000, closing with a small surplus of Rs. 20,000 as against the realized surplus of about 10 lakhs in the preceding year. This falling off in 1906-07 is apparent and not real, since the total expenditure of 247 lakhs odd includes a sum of Rs. 14,35,000 being the net earnings from the Cauvery Power Scheme set apart towards strengthening the cash reserve, and a further sum of 2 lakhs provided for famine relief, the seasonal conditions

Budget for 1906-07.

appearing unfavourable when the budget was framed. Thus the real surplus revenue in the estimates for 1906-07 compared with the similar figures in past years is Rs. 16,55,000. We have been able to secure this result chiefly because the Cauvery Installation revenue is now at its highest—the charge to the companies being now made at £24 and £18 respectively per Horse Power, while in another two or three years the charge will be reduced to a uniform rate of £10 per Horse Power.

26. It has been observed that to some extent the variations in the revenue surplus of Mysore from year to year are due to the mixing up of important capital transactions connected with commercial services with the regular service charges of Government. To prevent any misapprehension, I have had prepared a statement of accounts and estimates in a special form which gives the net figures of revenue and expenditure by services for the last three years and the budget estimate of the current year. (Appendix C.) The statement shows at a glance the figures under the various departments divided under the several services. For the purposes of sound financial arrangements, there should not only be an equilibrium between the ordinary revenue received from rent and taxation and the normal expenses on the Public Service departments, but there should be in the total account a substantial surplus to provide, as far as may be necessary, for interest and sinking fund on Railway debt, if any should be incurred in future, for Famine Insurance, and for the average annual liability for heavy special expenditure occurring at irregular intervals.

27. The Mysore State has a special asset in the mining revenue, and although present indications are favourable to its continuance for years to come, it is difficult to say how long this source will be available. But for purposes of a sound financial arrangement, it is desirable, if possible, not to depend upon these receipts for the normal expenses of the administration. If the item of "Mining Royalty" be removed from the category of principal heads of revenue, the charges connected with the Gold Fields should also be removed from the expenditure side, and the real position will then be clearly understood. A return of the true net income from the Gold Fields is under preparation.

28. The statement of net revenue and expenditure shows satisfactory progress in placing the finances on a sound footing. The revenue heads are expected to come

up to the estimates in the current year, while the expenditure is kept well in hand.

29. As I said before, the whole financial situation is now under careful review, and I hope next year to be able to tell you what steps have been taken or are contemplated to further strengthen our financial position.

30. Prior to the year 1899 Savings Bank deposits *Savings Banks*. were received in the Government Treasuries up to a maximum limit of Rs. 5,000 on each individual account. In August of that year it was announced that until further orders deposits would be received in the Savings Banks without any limitation as to amount. This withdrawal of all limit to the deposits led to their steady increase, and they rose from 38 lakhs on the 30th June 1899 to over 95 lakhs on the 31st December 1905. There is evidently serious risk in permitting such heavy increases in liabilities at call; and as the final outcome of the discussion on the subject, a Government Notification was recently issued on the 15th of August 1906, in which it was announced that in future a depositor should not be allowed to deposit more than Rs. 2,000 in any one financial year, and that the total amount that a depositor may have at his credit at any time must not exceed Rs. 5,000.

31. With regard to existing accounts it was also notified that with effect from 1st October 1906, amounts in deposit in excess of Rs. 5,000 should bear interest at 2 per cent, instead of $3\frac{1}{2}$ per cent as heretofore. When the above decision was arrived at, it was of course realized that Government should be prepared to meet a maximum withdrawal from the Savings Banks of all excess over Rs. 5,000 in individual accounts. The number of accounts having balances in excess of Rs. 5,000 on the 30th June 1906 was 417, and the total deposit at credit of the accounts was about 49 lakhs. Accordingly the maximum amount of withdrawals for which the Government had to be prepared was about 28 lakhs. This amount would in the ordinary course have been met by selling the Government of India Securities held by the State.

32. While this subject of alteration in the Savings Bank rules was under consideration, the question of setting up a Third Installation of the Cauvery Power Scheme came up before Government and pressed for a decision. The scheme was considered on its merits as one of productive expenditure. But in view of the heavy liabilities for Savings Bank deposits, it was not considered possible to find the money out of the rather low reserve the *The four per cent loan.*

Government had at their disposal, and it was deemed expedient to obtain the required funds by means of a loan.

33. Instead of simultaneously discharging the Savings Bank debt on the one hand by the sale of Government securities, and on the other hand calling for tenders for a new loan, it was considered expedient to offer the loan in the first instance to Savings Bank depositors, who would otherwise decide to withdraw their deposits under the new rules. Accordingly, by the Notification of 15th August 1906, option was given to Savings Bank depositors having balances in excess of Rs. 5,000 to receive Promissory Notes of the New Loan in lieu of withdrawing such excess in cash. The amount of the loan was fixed at 20 lakhs, and the tenderers were permitted to exercise the option by the 15th September.

34. Of the 417 depositors with balances in excess of Rs. 5,000 each, 185 depositors having a total deposit of Rs. 28,31,478 have exercised the option, and have applied for Rs. 21,62,200 on account of the new loan; Rs. 17,86,100 out of the tenders have been accepted, and orders will soon be passed for the issue of Promissory Notes and the necessary adjustment in the Savings Bank accounts. The remaining amounts of the tenders (*viz.*, Rs. 3,76,100) are under investigation, as the tenders are not strictly in accordance with the terms of the Government Notification, but a considerable portion of these will probably be accepted.

Ways and Means.

35. I shall close this portion of my address with a statement of the financial Ways and Means of the year. As already stated, it is expected that, when the accounts of the year 1905-06 are finally closed, the Revenue surplus realized will be found to be about Rs. 9,92,000. The Savings Banks deposits in the year increased by Rs. 6,21,832, giving a total increase in the cash balances on these two accounts of Rs. 16,13,832. The actual opening balance in the year was Rs. 77,63,259 and the closing balance Rs. 99,00,653. The balances throughout the year were much in excess of the working balances, but, owing to the high price of Government of India Securities, no investments could be made in the year. A new $3\frac{1}{2}$ per cent loan of $4\frac{1}{2}$ crores was issued by the Government of India on the 31st July 1906; the Mysore State tendered for 28 lakhs, the whole of which has been accepted at an average rate of Rs. 97-6 $\frac{1}{7}$ as. per cent. The State already holds Government of India Securities of the nominal value of Rs. 64,87,700, and of the 28 lakhs now purchased Rs. 25,12,300 will be transferred to the State account

making a total of 90 lakhs. Even after this investment, we expect to close the current year with a closing cash balance of Rs. 77,69,000 after providing for all ordinary requirements. The only requirements that have not been specially provided for in the estimates are the withdrawals in cash of Savings Bank deposits and the Expenditure on the proposed Third Installation of the Cauvery Power Scheme. This was because orders had not issued regarding the new Savings Bank rules at the time the Budget Estimates of 1906-07 were framed, and the Third Installation has not yet been formally sanctioned.

36. During the year, 1,334 proposals were dealt with, and 1,036 effective policies were issued, assuring a bonus of Rs. 4,46,493 for a monthly premium of Rs. 1,538. The balance to the credit of the fund on the 30th June 1906 was Rs. 13,69,587. It is satisfactory to note that the total mortality among the insured, which was steadily on the increase from 1898-99 when plague first appeared in the Mysore State, decreased during the year 1905-06, the number of deaths reported among the insured being only 46 as against 76 in the previous year.

State Life Insurance.

37. The year that has passed was one of considerable anxiety. The average rainfall was almost the lowest on record since 1870, being only 27½ inches against 37 inches, the average for the past 35 years. It was ill-timed and ill-distributed, so that both the south-west and the north-east monsoons practically failed. Almost everywhere the crops suffered considerably, and in some areas they completely failed. The estimated outturn of the staple food grains, paddy and ragi, for the whole State was only 8 annas and 6 annas respectively—a normal crop being taken as 16 annas. In the districts of Kolar, Tumkur and Chitaldrug, and in parts of Shimoga, where the drought was most severe, the average outturn was only about 5 annas, and in some areas it was as low as 2 annas. Following, as this did, on a year of deficient rainfall and poor harvests, there was a rapid rise in the prices of food grains. Rice of very ordinary quality was in some places sold at 7 seers a rupee, the average rate being over 10 seers. Ragi, the staple food of the ordinary raiyats and the labouring classes, was sold in some parts at 11 and 12 seers per rupee, the average rate being generally over 20 seers. What with the high prices of food grains and the want of sufficient employment, the condition of the poorer classes was such as to cause the gravest concern. The usual early rains were anxiously looked for, but they also failed and the

Seasonal conditions.

outlook became more and more gloomy. A further disquieting feature was that the supply of drinking water for men and cattle was running short. The condition of cattle was fast deteriorating for want of fodder, and the mortality increased.

38. In the meantime, the Government had taken all possible precautionary measures to be prepared to meet a period of distress. An effective system of intelligence being one of the most important preparations against famine, the Government had early in the year directed that a special inspection of the crops in all villages throughout the State should be conducted, and the results reported to Government, so that they might be in possession of accurate information as to the extent of the failure of crops in different localities. The Deputy Commissioners were required to submit special season reports every ten days, and they and their Assistants were instructed to frequently tour about in their charges and keep themselves in touch with the condition of affairs in every locality. One of the Councillors, and later the Revenue Commissioner, toured in the parts that were most affected.

Measures of Relief.

39. On the recommendations of the District Officers the following measures of relief were adopted :—

(1) To meet the scarcity of fodder for cattle, some of the State Forests and plantations and the Amrut Mahal Kavals (which are pasture lands specially set apart for Government cattle) were thrown open for free grazing of the village cattle, and grass and leaves were allowed to be cut and removed free of charge. Permission was also freely given to cut and remove leaves of date trees in Government date groves to be used for fodder.

(2) To meet the difficulty for water for men and cattle, which was keenly felt in many places, a sum of Rs. 42,000 was sanctioned for sinking wells,—Rs. 19,000 from District Funds and Rs. 23,000 from Local Funds General.

(3) With a view to afford employment to the poorer classes, a large number of ordinary public works was started in the affected parts. A sum of Rs. 14,000 was sanctioned for opening test works, Rs. 29,500 for loans to agriculturists for sinking irrigation wells, Rs. 15,500 for loans for executing other works of land improvement; and in addition to the grant of one lakh of rupees from the Public Works Budget for the restoration of minor tanks, a sum of Rs. 10,000 was sanctioned in the Kolar District for the same purpose.

(4) Under the rules in force, the raiyats have to do the earthwork necessary for the maintenance or restoration of minor tanks, the Government doing the stone and masonry work. But in the circumstances of last year, this rule was relaxed, and even the earthwork of several minor tanks was done at Government cost. In other cases, the cost of the earthwork was advanced to the raiyats to be repaid by them in easy instalments. For this purpose a sum of Rs. 13,000 was sanctioned. The concession was greatly appreciated as it not only provided timely labour for the poorer classes, but was also useful in permanently improving the condition of their tanks.

(5) The above measures, however, were not such as to reach the raiyats of small means whose resources are soon exhausted, but who cannot be expected to leave their homes and go to work for wages. The relief that people of this class require consists of help to provide fodder for their cattle, and in cases where their cattle have died money for buying new stock, loans for the purchase of seed grain, and in extreme cases money for the support of themselves and their families. A sum of Rs. 43,150 was sanctioned for the grant of loans to this class of people, for these purposes.

(6) Besides the above it was found necessary in the districts of Kolar, Tumkur, Chitaldrug and parts of Shimoga and Kadur to show substantial concessions in the matter of the payment of assessment. You are aware that the system of settlement in Mysore does not contemplate the granting of remissions for partial or total failure of crops, but the circumstances of the year were so exceptional that it was decided to remit in the areas mentioned above half the wet assessment on lands on which no crop was raised, or the crop outturn fell short of 4 annas. In these areas the grazing fees were also entirely remitted. Besides this, the Deputy Commissioners of the Tumkur, Chitaldrug, Shimoga and Kadur Districts were authorised to postpone the collection of the last two instalments of dry assessment in selected localities. Altogether a sum of Rs. 4,54,112 was wholly remitted, and the collection of another sum of Rs. 1,32,333 was ordered to be postponed.

40. But no measures of relief that might possibly be adopted by Government could, as long as the rains held off, inspire hope in the raiyat or bring much comfort to his heart. The months of May, June, and nearly the whole of July passed, and yet there was no rain worth mentioning. Meanwhile prices went up higher and higher. In the beginning of July last, the prices were higher than

at any time before during the year. There was a perceptible deepening of the distress among the poorer classes of the people. In the Nanjangud Taluk it was found actually necessary to start relief works. But at last, when anxiety had risen to the pitch of despair, the welcome rains set in and by their copiousness made up for the previous deficiency. Many of our tanks have filled to over-flowing, and in a few cases the bunds have even breached. Now all our apprehensions have been happily removed, and there is every hope that the outturn of crop will be a normal one.

Agriculture.

41. Owing to the unfavourable seasons there was a decrease of 32,592 acres in the area of land under occupancy.

42. The continued depreciation in coffee and the growing demand for rubber have induced planters and others to devote considerable attention to the cultivation of rubber in the State. On behalf of Messrs. Arbuthnot & Co., Mr. Strickland obtained about 500 acres of land for rubber cultivation in selected localities in the Shimoga and Kadur Districts in 1904, and since then he has been followed by other applicants. Nearly two thousand acres have in all been given out for rubber cultivation. The conditions imposed in these cases were only tentative, and some of them (especially that in regard to the reservation of trees to Government and the prohibition to fell them except in so far as the removal of undergrowth might be required for *bona fide* purposes of cultivation), were found by experience to be inconvenient and even irksome to planters and detrimental to the interests of Government. With a view to elicit the views of all persons interested in the rubber industry, a conference was held at Bangalore in August last, and as a result thereof the rules have been modified and the conditions better defined, so that while on the one side the action of the planter will be less hampered, on the other, Government interests will be adequately protected. The rules apply, of course, to both Native and European planters.

43. The work in connection with the Marikanave Reservoir has so far progressed that water can now be supplied for irrigation, and the Government have under consideration the best method of regulating the distribution of water and other allied questions. Messrs. Arbuthnot & Co. have already taken up 5,000 acres under the right channel for sugar-cane cultivation on improved methods. Five hundred acres have been given to Mahratta workmen to encourage the settlement of that class of labourers in

the country. In all 14,575 acres are already under occupation, and 11,923 acres more will become available for cultivation.

44. An Inspector of Cattle Diseases has been appointed, whose duties are to investigate the nature of epidemic diseases among cattle, to visit localities where such diseases are prevalent and to adopt measures for checking their ravages. He will also devote his attention to improve veterinary knowledge in rural parts by organizing and encouraging local effort, and by instructing the rural cattle-doctors and large cattle owners in a scientific diagnosis of cattle diseases and a proper application of easily available indigenous drugs. Government have also under consideration a simple and practical scheme for improving the condition of cattle generally and for affording prompt veterinary aid, particularly when epidemics prevail. *Veterinary Aid.*

45. It is under contemplation to issue a fortnightly Gazette in the vernacular, called the Revenue and Agricultural Gazette, under the immediate supervision of the Revenue Commissioner. It is intended to convey to the village officers and the people generally, information in matters relating to land revenue, appeals in revenue cases, important orders relating to communal pasture lands, the outbreak of cattle diseases and their treatment, agricultural experiments, co-operative societies, instructions on sanitary matters, and such other information as will have a value for the raiyat and the village officer. *Revenue and Agricultural Gazette.*

46. The Experimental Farm at Hebbal was kept up, and Laboratory experiments and analyses were carried on as usual, the more noteworthy of them being experiments in nitrogen-fixing Bacteria, and pot-culture tests regarding the use of bonemeal, in which, however, definite results have not as yet been obtained. *Agricultural Chemist.*

47. In 1905-06 a sum of Rs. 21,096 was advanced on account of working expenses of the estates mortgaged to the late Coffee Bank at Saklespur. The amount repaid by the several Agricultural Banks was about a lakh, and there is still a heavy balance of 13 lakhs, including interest, to be recovered. During the year the Government loan was ordered to be withdrawn from 11 banks, which were found to be badly managed and incapable of improvement. With a view to safeguard the interests of Government on the one hand, and afford the members the benefit of official guidance and support, on the other, it has been decided to entrust the supervision of the banks *Agricultural Banks.*

to the Registrar of Co-operative Societies, who has, for this purpose, been appointed Inspector of Agricultural Banks as well in subordination to the Revenue Commissioner.

48. Before I leave the question of Agricultural Banks, you will permit me to say that there is much to be learnt from the facts and figures which have just been presented to you. The history of these Banks is typical of the evils resulting from misplaced philanthropy on the one hand and the defects of national character on the other. From time to time statements have been made in the press that the Government of His Highness the Maharaja have done little or nothing to encourage local industries and commercial enterprises. These statements have apparently been made upon inadequate information and imperfect knowledge of what has been done in the past. If you turn to the Dasara Addresses of previous years you will find that almost from the time of the Rendition, encouragement in the way of subsidies and special concessions was being given to persons who wished to start iron works, cotton mills, weaving factories and so forth. One of the latest instances of the State's solicitude for promoting the welfare of the people was the advancing of very large sums of money amounting to nearly 17 lakhs for helping the agricultural industry and particularly the coffee industry carried on by Native planters. But in the present condition of Native society this form of help has not proved the blessing which it was expected to be. The advances which were so liberally made and so eagerly taken up have proved to be a source of loss to the State on the one hand, and of utter demoralisation to the people on the other, and have taken away all spirit of self-help from the Native coffee planters and made their position worse than before. The European coffee planters who have had no such adventitious help have somehow managed to hold their own in spite of adverse seasons and are now turning their attention to new planting industries. And what is the cause of this well-meant action of the Government failing to achieve the object with which it was taken? It is to my mind nothing short of the absence in us of a spirit of self-reliance, mutual trust, and co-operation for objects of common good, and until this defect is removed, Government may place the whole of their resources at the disposal of the people without its resulting in much practical and permanent good to them or benefit to the State. It is here that you, gentlemen, may bring your intelligence and public spirit to bear in seconding the efforts of Government in

promoting the well-being of the people. If this spirit of mutual trust, co-operation and self-sacrifice, which is the true cause of the success of the Agricultural Banks in European countries, had animated the leaders of the people in the rural tracts in Mysore, the history of these Banks would have been more encouraging than it has been. But we have all to learn wisdom by experience.

49. I will now turn from the subject of these Agricultural Banks to the new direction in which Government have recently moved in regard to promoting co-operative effort. The co-operative societies started on the model adopted in British India after careful consideration are still in their infancy in Mysore but promise better results than the Agricultural Banks, both as an educative agency and as promoting the material well-being of the raiyats and of the industrial classes. Co-operative societies.

50. Seven co-operative societies, all with limited liability, have so far been registered, namely, at Bangalore City, Holé-Narsipur, Mysore City, Koppa, Hiriya, Kotta (Sira Taluk) and Sira.

51. The society at Bangalore is a purely urban society, and the one at Holé-Narsipur is mainly intended for the benefit of the weavers of that Taluk. The bank at Kotta is a grain bank, in which the capital subscribed by the members and the loans issued are in the shape of grain. The society at Koppa aims at introducing improved methods of cultivation, and has shown much activity in growing sugar-cane by improved methods. The remaining societies are intended chiefly for the benefit of the agriculturists and artisans of the taluks concerned. All the societies are still in the early stages of development.

52. Re-survey operations were commenced in the State in the year 1901. Revision Settlement.

53. Revision Settlement was introduced last year into the Challakere Taluk and the late Budihal Taluk, now part of the Chiknaikanhalli Taluk. The increase in the assessment in these taluks has been extremely moderate, being only 12 per cent in the former and as low as 4 per cent in the latter. The smallness of the increase in the latter was due to the special character of the tract, in which both wet and dry cultivation, especially the former, remains more or less stationary. The tract affords special facilities for garden cultivation, but in accordance with the principles adopted in the rules of 1902 the garden assessment has generally been reduced.

54. Re-survey operations have been completed in respect of the taluks of Channagiri, Bangalore, Molakal-

muru, Sorab and the Sringeri Jahgir. In the case of Channagiri, Bangalore and Molakalmuru, Government hope to be able to announce the new rates during the ensuing cold weather.

55. As regards the Sorab Taluk and the Sringeri Jahgir, the question is more or less intimately connected with that of the abolition or retention of the *halat* or duty on areca-nut. The condition of the areca-nut garden owners is reported to have steadily declined owing to bad seasons, the spread of the disease called *kole-roga*, the heaviness of the garden assessment, and the evils incidental to a tax like the *halat*. That the garden owners stand in need of some relief is admitted on all hands, but the question is in what shape and to what extent this relief should be given. I may mention that opinion is practically unanimous about the desirability of doing away with the *halat*, and that the final settlement of the question is retarded chiefly by considerations connected with the finances of the State. Even apart from the *halat*, it is probable that the malnad raiyat needs some relief by way of reduction in the garden assessment. To investigate the matter in all its bearings, Government have decided to place Colonel Grant on special duty with effect from the beginning of January next to carefully study the condition of the malnad tract, so that before he leaves the Mysore Service in July next Government may have the benefit of his experience in the settlement of this difficult question.

Forests.

56. The area of the State Forests was increased during the year by the addition of 14 blocks with an extent of $157\frac{1}{2}$ square miles. Seven blocks with an aggregate area of about 50 square miles were newly notified for settlement, and one block with an area of a little more than 2 square miles was notified as partially reserved. Judged by its financial results, the year was a prosperous one. The revenue from timber extracted by departmental agency amounted to Rs. 3,65,805; and sandalwood contributed Rs. 12,64,790. The net revenue amounted to Rs. 13,26,639, which is the largest on record. The demand for local timber has steadily risen, timber worth Rs. 1,54,907 having been supplied to the Kolar Gold Fields alone. To meet this demand the areas that were hitherto untapped are being worked, and you may rest assured that, while on the one hand our Forest resources are being properly exploited, their scientific conservation is not neglected on the other.

57. The system of issuing licenses through middlemen to facilitate the sale and removal of forest produce, which has been tried in several parts of the State, and found to

promote both public and departmental convenience, has been introduced tentatively, for two years throughout the State.

58. In connection with the Royal Visit, Khedda operations were organized at an expenditure of Rs. 1,05,000 and resulted in the capture of 87 elephants. Of these, 58 were sold for Rs. 79,815; 21 of the value of Rs. 34,400 were otherwise disposed of; and 8 died.

59. Government have deputed two students with State scholarships for the study of Forestry at the Oxford University for a term of three years. They have also deputed five students to the Forest College at Dehra Dun.

60. The total expenditure incurred on Public Works amounted to Rs. 50,81,223, of which Rs. 15,50,984 was on Public Works. Irrigation Works; Rs. 31,64,888 on Civil Works; Rs. 20,873 on Military Works; and Rs. 3,44,478 on the Cauvery Power Scheme.

61. Good progress was made on the Marikanave project, the outlay during the year being Rs. 3,72,000. *Irrigation.* The dam was raised to the full sanctioned height, viz., R. L. 142'00. The channel on the left bank was practically completed for the first 15 miles, and the greater portion of the earthwork was completed for another seven miles. The right channel was practically completed for the first 11 miles. Water was let down the left channel up to the 7th mile on the 11th June, and down the right channel up to the 11th mile on the 30th June. Water in the Reservoir rose to a height of R. L. 86'60 during the year.

62. Good progress was also made on other irrigation works, the more important of which were—

The restoration of the Ramasagara, Mudvadi and Chendandur tanks in the Kolar District; the construction of new tanks at Kalhalli and Ranikere in the Chitaldrug District; the improvement of the Devaraya Channel in the Mysore District, and of the north channel from the Sriramadevar dam in the Hassan District.

63. Works that were practically completed during the year were—

The restoration of the Somambudhi and Chillapalli tanks in the Kolar District; and of the Agrahara tank in the Tumkur District; and the construction of a new tank at Chikmadure in the Chitaldrug District.

64. Seven projects for Famine Protective Works, estimated to cost in the aggregate Rs. 10,24,746, were sanctioned during the year. These were the construction of tanks—

- (1) on the Maralvadi stream in the Kankanhalli Taluk,
- (2) at Gabbur in the Nelamangala Taluk,
- (3) at Kamasandra in the Bowringpet Taluk,
- (4) at Rajamakalhalli, also in the Bowringpet Taluk,
- (5) at Singadahalli in the Chitaldrug Taluk,
- (6) at Donehalli in the Jagalur Taluk, and
- (7) at Vedasamudra in the Seringapatam Taluk.

The construction of a new tank at Sowlunga in the Honnali Taluk, for which an estimate of Rs. 1,14,027 was sanctioned in January 1905, was started as an ordinary work during the year by departmental agency, and fairly good progress has been made.

Minor Tanks.

65. As in the previous year, a grant of one lakh was allotted for the restoration of minor tanks under the control of the Revenue Department, and the operations during the year may be considered on the whole to have been fairly satisfactory.

Tank Maps and Registers.

66. Tank Registers were prepared in the rough for seven series, one in the Vedavati, three in the Palar and three in the Cauvery basins. Serial maps were prepared for 22 series; and an index map was prepared for the whole State. Briefly, out of the 30 series into which the State has been divided, 19 series have been dealt with more or less completely, and the mapping work was finished for the whole of the 30 series.

67. You will be interested to learn that investigations are in progress under a special establishment for the construction of a large reservoir on the Cauvery River.

Civil Works and Civil Buildings.

68. Under "Civil Buildings" the principal works in progress during the year were—improvements and additions to the Victoria Hospital; the construction of the Sir Sheshadri Iyer Memorial Hall; the new Municipal School at Bangalore; the buildings for the Experimental Agricultural Farm; the additional buildings to the Bacteriological and Agricultural Laboratories at Bangalore; the construction of the Palace; the new Hospital and Medical Officer's Quarters at the Kolar Gold Fields; and the Sandal kotis at Chikmagalur and Tarikere. The First and Second Maharaja-Kumaris' Mansions at Mysore and

the new Durbar Hall at the Fern Hill Palace at Ootacamund—which are being constructed from Palace funds—were also under progress.

69. Under “Communications,” the following works *Communications.* were in progress—the opening out of the remaining section of the Saklespur-Arehalli road in the Hassan District; the extension of the Avinhalli-Karur road in the Shimoga District; the widening of the Kotigehar-Kalasa road in the Kadur District; and improvements to the Shimoga-Mangalore road, and the Bisle ghat road.

70. The bridge over the Lokapavani river at Honnakere on the French Rocks Station-Nelligere road was completed; and the bridges over the Hemavati river at Anjur on the Saklespur-Mudgere road, and over the Bhadra river at Magundi on the Kotigehar-Balehonnur road, were nearly completed. The remaining section of the Hanbal-Devarunda road was opened out completely during the year. 1,934 miles of Provincial and 3,495 miles of District Fund roads were maintained during the year at an average mileage rate of Rs. 128.

71. Under the head “Miscellaneous Public Improve- *Miscellaneous Public* ments”, the more important works in progress were— *Improvements.* widening the main drain in the Bangalore City, and forming roads and constructing drains in its new extensions; formation of the Curzon Park at Mysore; and the Memorial works of His Highness the late Maharaja at Seringapatam and at Calcutta.

72. Under the Cauvery Power Scheme there were no *Cauvery Power* new works in hand during the year; but as I have already *Scheme.* mentioned, it is under contemplation to have a third Installation for an additional 2,000 H.P. This is intended to enable Government to have the first call on all the power required for Government purposes, such as the lighting of the Bangalore and Mysore Cities, the Belagola water-works, etc. The gross revenue realized during the year from the Cauvery Power Scheme was Rs. 16,34,572; the working expenses amounted to Rs. 2,41,289; and the net income was Rs. 13,93,283. Had it not been for the shortage of water-supply in the river during March, April, May and June 1906, a further sum of about Rs. 2,32,000 would have been realized.

73. The total net earnings on the open lines of Railway owned by the State aggregated Rs. 10,99,143 against Rs. 8,07,102 in the previous year. The capital outlay up to the end of June 1906 being Rs. 232,40,495, the percentage of net earnings to capital outlay was 4.73 against

Railways.

4.59 in 1904-05. The percentages for the several lines work out as follows:—

	1904-05.	1905-06.
Mysore-Harihar ...	3.35	4.79
Bangalore-Hindupur ...	5.75	6.70
Mysore-Nanjangud ...	2.15	3.43
Birur-Shimoga ...	1.03	1.71
Kolar Gold Fields Railway ...	6.39	6.46

The percentage of working expenses to gross earnings was 58.22 during the year as compared with 65.80 in 1904-05.

Bangalore-Chikbalapur Light Railway.

74. The question of a guarantee by the Government on the capital cost of the construction of this line was under consideration. You may remember that this is the first co-operative effort by a purely indigenous agency in embarking on a commercial undertaking on a large scale, and you will be glad to hear that a guarantee of 4 per cent has since been provisionally sanctioned.

Steam Tramway from Shimoga to Kumsi.

75. The Madras-Mysore Mining Syndicate have applied for a concession to construct and work a steam tramway to facilitate the transport of manganese ore from the mines at Kumsi to the Shimoga Railway Station. The Government have introduced a Tramways Regulation in the State, and the question of granting the concession asked for under this Regulation is now engaging their attention.

Dharmapuri-Palkodu-Bangalore Light Railway.

76. The Madras Railway Company were authorised by the Railway Board to carry out a traffic survey of this narrow gauge line, and the Government of His Highness the Maharaja have agreed to it.

Local Funds

77. The income under Local Funds consists chiefly of the one anna local cess collected on several items of revenue. Seventy-six per cent of the local cess on land revenue is credited towards the funds of the District Board of the district in which the revenue is collected, and is expended within the district, through the agency of the District and Taluk Boards and Unions. The balance of 24 per cent of the local cess on land revenue, together with 33 per cent of the local cess on Abkari and other items of revenue, goes to a fund called the Village School Fund, which is administered by the Education Department, and is spent entirely on primary education. The remaining 67 per cent of the local cess on Abkari and other items of revenue exclusive of land revenue, is credited towards what are called Local Funds General, which are administered by Government and are spent anywhere in the State, irrespective of the district from which the cess was collected. Local Funds General are spent mostly on roads, wells and

sanitary works, and grants are also made from these funds to such institutions as the Engineering School at Mysore, Industrial Schools throughout the State and the indigenous hospital at Mysore. With this explanation, you will be able better to understand the figures showing receipts and expenditure, which I now proceed to give.

78. The receipts under District Funds amounted to *District Funds*. Rs. 7,31,590; the opening balance was Rs. 4,09,892. Out of the total of Rs. 11,41,482, the expenditure under all heads amounted to Rs. 8,02,620. Of this, Rs. 6,10,837 was spent on public works, Rs. 38,118 on sanitation, Rs. 73,065 on medical aid, and Rs. 23,713 on accommodation for travellers.

79. The receipts under Local Funds General amounted to Rs. 1,64,261; the opening balance was Rs. 1,62,313. *Local Funds General*. Out of the total of Rs. 3,26,574, the actual expenditure amounted to Rs. 2,34,989. Of this, the amounts spent on public works executed by the Public Works Department, and the contributions made for sinking wells and executing sanitary works through the Revenue agency, came to Rs. 1,62,929. Of the other items of expenditure the chief were a sum of Rs. 50,518 spent on Industrial Schools; Rs. 7,572 on the Engineering School; Rs. 2,824 on the Indigenous Hospital at Mysore; and Rs. 2,482 towards the pay of Sericultural Inspectors. The figures given above include the sums of Rs. 19,000 and Rs. 23,000, respectively, to which I have already alluded as having been sanctioned from District Funds and Local Funds General, for relieving the distress that existed in several parts on account of the want of drinking water during the season of drought.

80. Under the District Boards three more Village Unions were formed during the year. The question of forming some more of the bigger villages into Unions so as to enable the District Boards to give greater attention to their sanitation, water-supply and other conveniences, is under consideration.

81. The number of Municipalities in the State was *Municipal Funds*. 87, the same as in the last year. The Draft Municipal Regulation, which has been under consideration for some time, has just been approved by the Government of India and will soon be promulgated with the sanction of His Highness the Maharaja. When the new Regulation comes into force, it may be expected that the efficiency of the Municipal Boards will be greatly increased. The opening balance at the credit of the Municipalities was Rs. 3,03,518. The receipts during the year were Rs. 8,62,599, making a

total of Rs. 11,71,117. The expenditure incurred was Rs. 7,61,948, of which Rs. 1,74,004 was on conservancy and sanitation; Rs. 12,983 on the registration of births and deaths; Rs. 56,492 on lighting; Rs. 30,841 on water-supply; Rs. 43,034 on the construction and repairs of drains; Rs. 1,58,537 on roads and other public works; Rs. 25,484 on dispensaries, Hindu and Unani Vaidyasalas, and midwives; and Rs. 36,495 on education.

Mysore City Improvements.

82. The Mysore City Improvement Trust Board expended a sum of Rs. 3,74,415 on various works of improvement. The underground drainage or pipe system for the whole town has been completed during the year. A large septic tank near the Idga Extension and a combined septic tank and intermittent streaming filter on the Doddapetta Road were constructed to purify the sewage tapped in the northern portions of the City before issuing it for cultivation. A Stoddart's Aerobic Filter was also constructed at the Jalapuri Extension to deal with the drainage of that area. The new Doddaholagere was completely formed and drained during the year, and 640 families displaced in old Doddaholagere were housed therein. People of the Jalagar, Budi Budike, and Mante Holayar castes have been located in portions of the New Idga Extension in separate blocks suitably formed and drained. An estimate for Rs. 54,490 for the further enlargement of this extension was sanctioned during the year.

Plague.

83. It is gratifying to note that the Mysore City remained practically free from plague during the year, there being only 7 attacks and 5 deaths. This satisfactory result must, to a great extent, be attributed to the sanitary improvements effected by the Trust Board. The expenditure incurred in connection with the rat killing scheme introduced in July 1905 was Rs. 2,670 approximately, the number of rats killed being 23,000. A campaign against rats, similar to that carried on in the Mysore City, has been set on foot in the Bangalore City also.

84. The total number of plague attacks and deaths throughout the State was 3,031 and 2,135 respectively, the lowest figures recorded since the first outbreak of the epidemic. The district of Shimoga suffered most, with 808 attacks and 563 deaths.

85. The total expenditure incurred in connection with plague preventive measures in the State during the year was Rs. 1,04,965 approximately.

86. Speedy evacuation of infected areas was as usual encouraged by the grant of hutting materials and advances

of pay. In the case of Government servants drawing a pay of Rs. 10 and under, free supplies of shed materials were authorised.

87. Public health was generally good, but towards the end of the year cholera broke out in several taluks. The disease first made its appearance in the Shimoga District, and wrought considerable havoc there. Since then it has spread to Chitaldrug and even to Mysore. Latterly there has been a perceptible decrease in the number of cases, and with the sanitary precautions that are being adopted, there is every hope of the disease disappearing in a short time. As the usual sources of water-supply in villages are tanks or rivers which freely admit surface drainage, it is not easy in seasons of epidemics to prevent their contamination. It is claimed that what are called Abyssinian or Norton's tube wells will in suitable localities ensure a supply of water which cannot be contaminated. These wells are cheap, and the attention of Municipal and Local Boards has been invited to their use. Some tube wells have very recently been put down in Mandya Taluk, and the results are reported to be satisfactory. *Public Health.*

88. Regarding small-pox, I am glad to say that vaccination was more largely resorted to during the last year than was the case heretofore. The number of vaccinations performed was 94,245 against 70,395 in the previous year. A Regulation enabling Government to make provision for compulsory vaccination in areas to be specified by notification was passed during the year. This has been brought into force tentatively in the Bangalore City and in the Kolar Gold Fields Sanitary Circle.

89. The heaviest mortality however is from fevers and particularly from malarial fever. To enable all villagers to readily obtain quinine, arrangements have recently been made by which patels and shanbhogs of villages more than 4 miles distant from dispensaries will be supplied with 5 grain quinine packets to be sold at 2 pies per packet.

90. The total number of patients treated in all the hospitals and dispensaries of the State was 1,249,025 against 1,165,610 during the last year. The number of hospitals and dispensaries was 135, the same as in the last year. There were 99 midwives employed, the number of labour cases attended by them being 5,901. *Hospitals and Dispensaries.*

91. The total number of births recorded during the year was 95,543 as against 79,635 in the preceding year. The number of deaths was 81,495 as against 109,025. *Vital Statistics.*

Mining.

92. The year 1905-06 was notable in the mining history of Mysore in that attention was prominently attracted to manganese, chrome and other minerals which were located in several tracts during the operations of the Geological Survey made by the officers of the State. In all 38 prospecting licenses, 11 exploring licenses and 4 mining leases were granted during the year. Of these as many as 25 prospecting licenses and 4 exploring licenses were for manganese, chrome and magnesite. It is noteworthy that 11 out of the 25 prospecting licenses were issued to Native capitalists. Active operations in connection with manganese and chrome are going on in the districts of Shimoga and Tumkur. Corundum is also being worked to some extent. A few applications for mica and asbestos were received. A prospecting license for green quartzite was also issued. In connection with licenses for manganese and chrome, it may interest you to learn that Government have, on the application of one of the companies formed by Native capitalists, lent them the services of a Geological apprentice.

Gold Mining.

93. The gold industry continues to flourish, the output during the year being 595,291 oz. of an estimated value of £ 2,274,786 as against 611,737 oz. valued at £ 2,341,869 in 1904-05. The royalty due to the Government on the year's production is estimated at £ 113,736 against the sum of £ 117,093 realized in 1904-05.

94. In order to provide for the safety and well-being of the employees of mines and for preventing theft of and illicit traffic in mining materials including gold in various stages of extraction, a Regulation had been passed in 1897 known as the Mysore Mines Regulation. Being an enabling law, its local extent was stated to comprise the whole of Mysore, but certain sections imposing special restrictions on goldsmiths, etc., were applied only to a limited tract of country round the Gold Fields in the Bowringpet Taluk. Gold Mining operations on any large scale are not carried on anywhere in India except at the Kolar Gold Fields, and the legislation that was adopted in 1897 was necessarily tentative and experimental in character. The Regulation worked satisfactorily so far as it went, but it was found to be defective in that, as soon as a gold thief converted amalgam or sponge gold into bar gold, for which great facilities exist in and around the area, the Regulation became powerless to bring him to justice. The necessity for bringing 'unwrought gold' or bar gold within the purview of the Regulation thus forced itself on the notice of Government, and last year the draft of a new Regulation was

submitted to the Government of India. The sanction of the Government of India to the Regulation was received with certain modifications. With these modifications the new Regulation was recently promulgated, and the clauses which are specially restrictive have been brought into operation in the same limited area in which the corresponding provisions of the old Regulation were in force. As just explained, the principal change introduced is, that the presumption under the old Regulation, that property of the description peculiar to the mining industry when found in the possession of individuals in the mining area was illegally come by, until the contrary was proved, has been extended to unwrought gold. This is undoubtedly a material extension of the old law; but the necessity for it was, after careful consideration, accepted by His Highness' Government when undertaking the new legislation. In other countries where similar provisions for the repression of gold thefts exist, they have not, so far as Government are aware, been found to operate prejudicially on honest and law-abiding people, and there is no reason why they should do so here. It should also be remembered that the provisions of the old Regulation were never felt to be unduly harsh by the people of the area to which it extended. The local Magistracy and the District Superintendent of Police may be relied on to see that the provisions of the new Regulation in question are worked with due discrimination and care. I may assure you, at the same time, that if in actual working the new Regulation is found to be necessarily fraught with injury to the law-abiding population, a contingency which there is every reason to hope will not arise, then His Highness' Government will not be slow to do all that is necessary to suitably amend the law as experience might dictate.

95. The discovery of the minor minerals and the large number of applications received for them have brought to notice the necessity for making some changes in the rules regarding licenses and leases. The rules of 1904, although purporting to provide for all classes of minerals, were chiefly meant for gold, which was then the only metal sought for. Some changes in the rules and conditions have been introduced, and some more are under consideration. Quite recently a conference of persons interested in manganese and chrome was held, and Government were able to ascertain their views in respect of the changes that have become necessary. Revised terms and conditions in respect of licenses for these minerals will be announced very shortly.

96. In addition to the Regulation to provide for compulsory vaccination already referred to, Regulations to

Legislation.

1164

amend the Military Regulation, the Merchandise Marks Regulation and the Land Revenue Code were passed during the last year. Since the commencement of the present official year, Regulations to amend the Excise Regulation and the Civil Procedure Code were passed, in addition to the Tramways Regulation, the Mines Regulation, and the Regulation further to amend the Land Revenue Code, to which I have already alluded. During the last year Rules under the Co-operative Societies Regulation were framed. New Rules under the Arms Regulation were also issued, under which among other things members of District Boards have been exempted from taking out licenses for the possession of fire-arms.

Judicial.

97. During the year there were several changes in regard to the jurisdiction of Courts. The Sub-Judge of Shimoga was invested with jurisdiction to try small cause suits up to Rs. 100 in value, the small cause jurisdiction of the Munsiff of Shimoga being at the same time withdrawn. The Sub-Judge was also invested with powers to dispose of applications under the Minors' Rules, applications under the Succession Certificate Regulation, and Insolvency applications under Chapter XX of the Civil Procedure Code: He was also made an Assistant Sessions Judge. The Sub-Judge of Bangalore was invested with power to dispose of applications under the Succession Certificate Regulation. The Sub-Judges of Hassan and Chikmagalur were empowered to entertain appeals direct from the decrees and orders of the Munsiff of Hole-Narsipur and Yedahalli respectively. With a view to afford relief to the District and Sessions Judge of Mysore, the Sub-Judge of Mysore was empowered to dispose of cases under the Land Acquisition Regulation and Insolvency applications. He was also made an Assistant Sessions Judge. The small cause jurisdiction of the Sub-Judge was extended to the Taluks of Yedatore and Heggaddevankote. There was a slight increase in civil litigation, the total number of original, regular and small cause suits filed being 19,408 against 18,254 during the previous year. The number of disposals was 18,716 against 18,637 in 1904-05. The total number of regular and second appeals filed was 1,199, and the number disposed of was 1,124 against 1,311 in the previous year.

Police.

98. There was an increase of 22 per cent in the number of offences reported and 12 per cent in those brought to trial.

99. The total number of cases dealt with by the Police during the year was 10,061; of these 5,655 cases were

disposed of during the year, leaving 4,406 cases pending with the Police and before the Courts. The percentage of convictions to the total number of disposals was 72·8 as against 74·3 last year. The percentage of property recovered to that lost was 35·8 as against 28·5.

100. The grades of Police Inspectors, Jamadars and Dafadars were revised during the year. The strength of the Regular Police Force on the last day of June 1906 was 888 officers and 5,116 men, being 8 officers and 8 men less than in the previous year. The decrease was due to the re-distribution and re-allocation of the Police Force in the Shimoga District, in connection with the Investigation Centre scheme introduced as a tentative measure into that District. The principal feature of this scheme is that no cases reported to the Police are to be investigated by an officer who is lower in rank than a Jamadar or draws a pay of less than Rs. 20.

101. Owing to the subsidence of plague and the consequent improvement in trade, the total number of registrations rose from 59,989 to 74,174, or by nearly 24 per cent, and the receipts of the Department rose from Rs. 1,19,731 to Rs. 1,58,317 or by more than 32 per cent. The expenditure amounted to Rs. 87,509, which was about 56 per cent of the total receipts, leaving a net balance of Rs. 70,808. Registration.

102. In the Excise Department the districts of Hassan and Chitaldrug were constituted into separate Excise Divisions under the charge of Excise Assistant Commissioners, so that now there is an Excise Assistant Commissioner for each district. The necessity for placing a check on the unrestricted sale of cocaine having been felt, this article was brought under the provisions of the Excise Regulation, and its possession and sale are now regulated by the issue of licenses. Excise.

103. Seventeen arrack shops and 153 toddy shops were closed during the year. The revenue from toddy was much higher than in the previous year, while in the case of arrack the fall in revenue was appreciable. The number of shops licensed to sell foreign liquor was also reduced from 68 to 56.

104. All the volumes of the Epigraphia Carnatica were finished, thus completing the publication of all the important inscriptions in the State. Mr. L. Rice, C.I.E., Director of Archaeological Researches, retired at the end of the year after a long service of 35 years in the State. Archaeological Department.

105. The number of educational institutions in the State increased from 3,828 at the end of 1904-05 to 4,093 Education.

at the end of 1905-06, and their strength from 111,045 to 123,057. The percentages of boys and girls at school to those of school-going age rose from 22·7 and 4·3 to 25 and 4·9 respectively. On the representation of certain Members of this Assembly, the fees for private candidates for the Lower Secondary Examination in English were reduced from Rs. 10 to Rs. 7. Pupils belonging to the depressed castes, such as Naindas, Holeyas, Korachas, etc., have been permanently exempted from payment of school fees in the Taluk Vernacular schools, Branch schools, and Hobli schools. Rules were passed for the grant of the Damodar Dass Charity Scholarships for advanced Scientific Research and Technical Education, and these scholarships will be awarded from January 1907.

106. Female education continued to make progress. You will all have heard with pleasure of the success of two Hindu lady students from the Maharani's College at the last B. A. degree examination.

107. Government have availed themselves of the opportunity of Mr. Bhabha's going to Europe on furlough to depute him to study the system of what is known as Manual training in Europe and America, with a view to its introduction in Mysore.

Technical Education.

108. Technical and Industrial education made fairly good progress during the year. Additional grants for expenditure were sanctioned for the Industrial and the Engineering Schools in Mysore and the six other quasi-Government Industrial and Weaving Schools in the State. New monthly grants were also sanctioned in aid of the private Industrial Schools at Bagepalli and Srinivasapur. A new commercial school was opened by the Wesleyan Mission at Mysore, and Government sanctioned a lump sum grant of Rs. 900 for apparatus required for the school. The students of the Mysore Engineering School were authorised to be taken out by their teachers occasionally to important Engineering works in the State with a view to give them better practical training. Fourteen technical scholarships were granted to Mysore students for undergoing training in the technical and industrial institutions of Bombay and Madras.

109. A special grant of Rs. 300 was sanctioned by Government for starting a small demonstration farm in connection with the Anglo-Vernacular School at Dodballapur for teaching practical agriculture to the students. The Mahal Garden at Chitaldrug and a plot of ground

measuring 2 acres to the east of it were permitted to be leased out to the Superintendent of the Industrial School, on condition that the land would be used as a model garden and an experimental farm.

110. The appointment of two drawing masters was sanctioned to teach drawing in the Normal and High Schools at Kolar and Shimoga.

111. The Government had under consideration the question of how best to utilize the experimental silk farm at Bangalore started by the great philanthropist, the late Mr. J. N. Tata, with a view to improving the methods of sericulture. The first idea was to purchase the farm and manage it entirely by Government agency, but on further consideration, the Government came to the conclusion that the Farm would be better conducted by the present agency and on the present lines; and in order not to impose additional burden on the proprietors, and at the same time with a view to developing its practical side and making it a training ground for selected persons interested in sericulture, an annual grant of Rs. 3,000 has been sanctioned for the institution.

112. Repairs to 64 Muzrai institutions were sanctioned at a cost of about Rs. 80,000, which included a State grant of Rs. 15,000. Annual cash grants for the support of four institutions were newly sanctioned, and the grants for four other institutions were increased, at a total cost of Rs. 1,962 per annum. Muzrai.

113. The allotment for feeding pilgrims in His Highness the Maharaja's chattram at Tirupati in the North Arcot District during certain festivals and for feeding Brahmins in His Highness' chattram at Mysore during the Dasara festival having been found insufficient, an increased grant of Rs. 1,500 per annum was sanctioned to each of these institutions.

114. The system of distributing cooked food in chattrams instead of raw rations has been revived. Certain changes were made in the location of chattrams in the Shimoga District as necessitated by the opening of the Railway, and the grants to the chattrams were revised in accordance with present requirements.

115. The succession to the High Priestships of the Sri Uttaradi and Sri Ahobala Matts was recognized by Government, and the endowments attached to the Ahobala Matt, which had been taken under Government management pending the election of a Guru, were restored to the Matt.

The Royal Visit.

116. I have reserved to the end the most important event of the year, the visit of Their Royal Highnesses the Prince and Princess of Wales to Mysore in January last. The reception of the Royal Visitors was on a scale befitting the occasion, and the Khedda operations organized in connection therewith were pronounced on all hands to have been an unqualified success. To afford Their Royal Highnesses an opportunity to see the products of the arts and industries of Mysore and its resources, an Industrial and Agricultural Exhibition was held at Mysore. Their Royal Highnesses paid a visit to the Exhibition and evinced much interest in the exhibits. Further proof of His Royal Highness' interest in the arts and industries of the country, and of his solicitude for the welfare of the artizan was afforded in the speech he made on the occasion of his laying the foundation stone of the Chamarajendra Technical Institute at Mysore, when he expressed his "delight in taking part in a ceremony which might lead to the amelioration of one of the most deserving and most important classes of the Indian people." At Bangalore the Prince unveiled the statue raised to the memory of our late beloved Queen-Empress Victoria the Good.

117. It is unnecessary for me to enter further into the details of the Royal visit. I am sure that many of you had the privilege of seeing Their Royal Highnesses either at Mysore or Bangalore, and could not but have been impressed, in common with our brethren in other parts of the Empire, with the gracious manner of our august Visitors, and the genuine sympathy and solicitude for the welfare of the people, which marked all their utterances and their actions.

118. It is a source of sincere gratification to His Highness the Maharaja that, in welcoming the Royal Visitors, there have been such spontaneous demonstrations of joy and devotion from his subjects in all parts of the State. His Highness is personally sensible of the great privilege of having been the first of his House to welcome and entertain the Heir to the great British Empire, to which both the State and the Dynasty owe so much.

V. P. MADHAVA RAO,
Deputy of Mysore.

1167

Remarks

Decrease due to remissions and postponement of collection.

Increase due to larger sales of General Stamps and Court-fee Labels.

Decrease due chiefly to less demand for this liquor in the Kolar and Shimoga Districts.
Increase was the result of high shop-rent and larger consumption.

Increase due to larger sales of sandalwood and timber and the sale of elephants.

Increase due to collection of arrears.

Increase due to the levy of a uniform rate for every 100 words and fractions thereof.
Increase due to better realization under sale of bulls.

Decrease due to the credit of only one year's interest in 1905-06 against two years in 1904-05.

Decrease was under contribution from District Funds.

Increase due to the supply of water from the Bethamangala tank throughout the year.
Increase due to the special receipt by the sale of the old Taluk Cutcherry building at Bangalore.

Gross earnings including working expenses are shown this year.
Increase due to collection of arrears, and income from the Bangalore Electric Lighting and Power Supply Scheme.

Hheads of Expenditure					Final 1964-05	Preliminary 1965-06

1169

Remarks.

Decrease due to corresponding decrease in collection.

Excess due to special expenditure on Khedda operations and increased working expenses as the result of more extensive operations of the department.

Increase due to payment of interest on larger Savings Bank deposits and Insurance Fund balances.

Increase due to expenses in connection with the visit of Their Royal Highnesses the Prince and Princess of Wales.

* Excess due chiefly to increased expenditure on Experimental Farm, the appointment of a Registrar of Co-operative Societies and to the holding of the Exhibition at Mysore.

Increase due to growth of pension charges.

Special purchase of type and press materials was the cause of the increase.

Decrease due chiefly to less special charges in the year.

Decrease mainly due to smaller grant.

* Decrease due to adjustment in the prices of...

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season; tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6 to 7	} seers per rupee.
Ragi	25 to 30	15 to 14	

Agricultural operations—Weeding in ragi fields.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied. Prices of food grains continue to be high.
9. Standing crops are in good condition, though somewhat damaged by excess of rain in certain parts. In Bangalore paddy was sown and potato harvested.
10. Prospects of the season good. There has been good rain throughout the district.
11. Public health generally good. Cholera is reported to prevail in a few villages of Kankanhalli and Closepet.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Wild gingelly in Bowringpet and kulthi in Kolar, Mulbagal, Bowringpet, Bagepalli and Srinivasapur are being sown. Samé is being harvested in almost all the taluks.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tumkur, Sira and Tiptur; weeding is going on; coriander, Bengal gram, and wild gingelly in Tiptur; and kulthi in Pavagada, Kunigal and Turuvekere.
Crops harvested.—Sugar-cane, cholum, navané and baragu in Sira; Navané and til in Gubbi; cholum and baragu in Tiptur; ragi in Pavagada; sugar-cane in Kunigal; cholum in Koratagere; and til, cholum and sugar-cane in Turuvekere.
10. Prospects of the season good. Food stocks are available. More rain is yet required in Maddagiri.
11. Public health generally good except for fever in parts of Tiptur and plague in Chik-nayakanhalli.
12. Cattle healthy. Water and fodder available.

MYSORE.

8. Market well supplied.
9. Standing crops are reported to be good. Paddy under tanks in Malvalli, Mandya and Nagamangala is being transplanted. Bengal gram, menthya and coriander are being sown in parts of Chamrajnagar. Cholum in parts of Chamrajnagar; gid ragi in parts of Hunsur and cholum and til in parts of Yedatore are being harvested. The probable outturn is estimated as follows:—

Hunsur	...	Ragi and til—12 annas.
Krishnarajpete	...	Gid ragi 8 annas.
10. Prospects of the season good. Food stocks are available.
11. Public health good. Cholera still prevails in Mysore, Seringapatam, Hunsur, Nanjangud, T.-Narsipur and Heggaddevankote.
12. Cattle healthy. Water and fodder available.

HASSAN

8. Market sufficiently well supplied.
9. Harvesting of gid ragi is almost complete in Hassan and Alur. Cholum and til are being harvested, but chillies are reported to have been damaged by excessive rain in Arsikere. Standing crops are in good condition.
10. Prospects very hopeful. Tanks are full to overflowing. Food stocks are available.
11. Public health generally good. Small-pox is still prevalent in Manjarabad in a mild form. Plague prevails in Hassan and Belur.
12. Cattle are in good condition. Water and pasture available and sufficient.

SHIMOGA.

8. Market well supplied.
9. Standing crops are in good condition in all the taluks, but the wet crops in the Shikarpur and Hosur hoblis of the Shikarpur Taluk are reported to have suffered owing to insufficient rain. Green gram in Honnali, sesamum and ragi in Honnali; ragi in Sorab; Sesamum in Shimoga, and arecanut in some parts of Sorab, Sagar and Tirthahalli are being harvested.
10. Prospects of the season fair.
11. Public health generally good. Small-pox prevails in a few villages of Shimoga and Sagar.
12. Cattle healthy. Fodder and pasture available.

KADUR.

8. Market fairly well supplied, but supply in Chikmagalur and Mudgere markets is somewhat poor on account of the prevalence of plague in those places.

9. *Crops sown.*—Coriander, wheat and kulthi in parts of Kadur.

Crops harvested.—Coriander, wheat and tadagani in parts of Kadur; coriander in parts of Tarikere; cardamom and arecanut in parts of Koppa; and cardamom in parts of Mudgere. The probable outturn is as follows:—

Mudgere	...	...	Cardamom 4 annas.
Sringeri	...	...	Arecanut 12 annas.
Standing crops are in good condition.			

10. Prospects of the season good. Food stocks are available and sufficient for the present.
11. Public health generally good. Small-pox is reported to prevail in parts of Kadur and Koppa; and plague in Chikmagalur and Mudgere towns.
12. Cattle generally healthy. Pasture and water are available.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are in good condition except in Holalkere where kulthi has been infested by insects. (*Kendli hula*).

Crops sown.—White cholum in Holalkere and Davangere; kadale in Holalkere; and kulthi in Moiakalmuru.

<i>Crops harvested.</i> —Sugar-cane in Chitaldrug	...	...	yield 4 annas
Sesamum in Challakere, Hiriyur and Davangere	...	...	yield 4 to 8 annas.
Cholum in Chitaldrug, Challakere and Hiriyur	...	...	yielding from 2 to 12 annas.

Black and green gram in Chitaldrug and Jagalur... yielding 6 to 8 as.

10. Prospects of the season good. Food stocks available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

BANGALORE,

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

Commercial Exhibitions.

Simla the 31st August 1906.

RESOLUTION.

The following papers relative to the International Maritime Exhibition, which will be held at Bordeaux in France in May 1907, are published for general information. The Exhibition, although principally maritime, will comprise all branches of industry and commerce :

CITY OF BORDEAUX.

INTERNATIONAL MARITIME EXPOSITION.

(MAY-NOVEMBER 1907).

Organized by the League Maritime Française, under the official patronage of the French Government, the General Council of the Gironde, the Municipality, the Chamber of Commerce and the Philomathic Society of Bordeaux, in Celebration of a Century of Steam Navigation.

GENERAL REGULATIONS.

GENERAL ARRANGEMENTS.

Article 1.—An International Maritime Exposition in Celebration of a Century of Steam Navigation will be opened in Bordeaux on May 1st, 1907, under the auspices of the League Maritime Française, recognized as an establishment of public utility by decree of December 17th, 1905.

Article 2.—The Exposition will be held on the great square of the Quinconces. Its duration will be about six months. Its opening and closing may be advanced or delayed without liability for indemnity.

Article 3.—The Exposition will be held under the official patronage and aid of the French Government, and the Department of the Gironde, the Municipality, the Chamber of Commerce and the Philomathic Society of Bordeaux.

Article 4.—The Exposition is opened to all countries. It will receive all industrial, agricultural or artistic products pertaining to maritime affairs. A Colonial section will be devoted to colonial products which are intimately related to the commerce of Bordeaux. Pavilions will be devoted to ocean geography, nautical automobilism and aerial navigation.

Article 5.—During the Exposition, the Commissioner-General intends to organize congresses, competitions and lectures on interesting subjects concerning maritime affairs, science, art, industry, commerce and social economy.

He will endeavour to organize also festivals of all kinds with the view of adding to the brilliancy of the Exposition. These congresses, competitions and festivals will be under special regulations.

Article 6.—The Commissioner-General and Deputy Commissioner-General have received the following powers :

Article 7.—The Commissioner-General has the direction of the Exposition. All initiative will devolve on him, and no decision will be valid without his assent. He will have special charge of relations with the appropriate ministerial departments and the Commissioners of Foreign Governments. He will have sole direction of all departments for which he will name chiefs and agents. He will direct the book-keeping. He will establish forms for receipts and will order all expenditures. All accounts must be submitted for his approval.

He will decide definitely upon the requests of exhibitors and will deliver certificates of admission.

He is vested with power to nominate juries and all committees for that portion reserved for the administration.

The general police of the Exposition will be under his supervision.

Article 8.—The Deputy Commissioner-General will assist the Commissioner-General and will act in his place during his absence.

Article 9.—Special committees of groups and of festivals will be organized later.

Article 10.—Each foreign country participating in the Exposition shall accredit to the Commissioner-General a special Commissioner to represent its exhibitors.

Article 11.—The Exposition will be constituted into a bonded warehouse, consequently, the products exhibited will be exempt from verification, custom house and octroi taxes.

CONDITIONS OF ADMISSION.

Article 12.—Exhibitors shall pay rent for the space they occupy according to the following tariff.

1st.—A fixed duty of 20 francs per exhibitor upon application for space.

2nd.—A tax proportionate to the space to be occupied is to be established according to a general tariff applied to industrial exhibitors as follows :—

Each superficial meter in principal place	...	...	60 francs.
" " on the interior wall	...	...	40 "
" " in the annexes	...	...	40 "
" " on the interior walls of same	...	...	30 "
Each meter in open air with option of construction	...	...	20 "
" " without option of construction	...	...	10 "

Plans for constructions to be erected must be submitted for the approval of the Commissioner-General.

For choice sites, show-cases and corner locations, a higher tariff will be fixed for each particular place.

Article 13.—Restaurants, shows and all specially authorized establishments, shall pay rents to be fixed by tariff.

In each special case a contract will determine the details regarding the construction and management.

Article 14.—Rent may be required from the exhibitors, concessionaries and others for poster advertisements, prospectuses, etc., in the interior of the Exposition. Authorization for said advertisements shall be given by the Commissioner-General.

Article 15.—The charges due to the Exposition are payable against a receipt signed by the Commissioner-General, in two payments to the Bank of Bordeaux; one-half within the fifteen days following the delivery of the certificate of admission, the other half on the 15th April 1907. When the total charges shall not exceed 100 francs, payment thereof shall be made within the fifteen days following the delivery of the certificate of admission.

Article 16.—Exhibitors who fail to pay the second instalment cannot recover their previous payment, which shall remain the property of the Administration without legal formality. By the very fact of non-payment, the exhibitor's privilege to exhibit will be forfeited, the administration reserving the right to dispose of the space on or after April 15th.

Article 17.—Requests for admission must be addressed to the Commissioner-General at Bordeaux, prior to February 12th, 1907, or dissatisfaction may result and requests may be refused.

Article 18.—Forms of application for admission are to be prepared by the Commissioner-General and will be at the disposal of exhibitors in Paris, Bordeaux, county-towns of the Departments and of foreign committees.

Article 19.—The questions appearing on the application for admission must be answered correctly by the exhibitors.

Article 20.—Dangerous material such as fulminates and explosives will be excluded.

Spirits and alcohol, oils, essences, corrosive materials and, generally, substances which may injure other products or cause annoyance to the public, will only be received in strong and appropriate receptacles of small dimensions. Exhibitors of such products must abide by regulations to the promulgated in the interest of public health and security. Combustible materials, shelves, curtains, etc., must be made fire-proof unless specially exempted.

Article 21.—The Commissioner-General shall have the right to exclude all harmful products or such as may not appear to be consistent with the purposes of the Exposition.

Article 22.—No object can be taken away before the close of the Exposition without special authority from the Commissioner-General. This prohibition does not apply to products that the exhibitors may be authorized to manufacture and offer for sale in public.

Article 23.—No object of art, no product exhibited in the places, parks or gardens will be permitted to be drawn, copied or produced in any form whatsoever without the consent of the exhibitor approved by the Commissioner-General. The Commissioner-General, however, may authorize the reproduction of a general view.

Article 24.—The Administration of the Exposition will only provide general buildings and constructions. Insurance is obligatory on all products exhibited from the time they are entered at the Exposition until they are removed. Said insurance must contain a formal waiver by the insured and the insurer of any claim against the administration of the Exposition. In default of the taking out of policies of insurance by the exhibitors, the same will be contracted for by the Administration of the Exposition at the exhibitor's cost, risk and peril.

Article 25.—The Administration of the Exposition will take all necessary measures for the protection of objects against damage and their general supervision, but will not be responsible for theft or damage.

Article 26.—Exhibitors must pay for all packing, freight, unpacking, care of cases, installation, re-packing and re-shipping charges.

Article 27.—Exhibitors who may require water, gas, electricity or motor power must state this fact on their application for admission, giving all necessary details as to the speed required for each of their apparatus. The price of power will be fixed at the lowest possible rate.

Article 28.—After the close of the Exposition, the exhibitors must remove the products exhibited within one month (maximum), in default of which said products will be stored in a warehouse at the expense and risk of the exhibitor, without responsibility on the part of the Commissioner-General.

JURIES. AWARDS.

Article 29.—The Examining Jury will be composed of authorized representatives of science, art and industry, either in France or abroad.

Said Jury shall be appointed, one-half by the exhibitors, the other by the Administration of the Exposition.

Article 30.—The Jury shall demand all guarantees that may seem proper for the performance of their duty. They will have the right to exclude from competition any exhibitor who may attempt to deceive them.

Article 31.—A superior Jury will be appointed to judge all claims that may be presented.

Article 32.—The awards shall consist of diplomas of honor, gold, silver and bronze medals and honorable mentions.

N. B.—The details as to the functions and duties of the Juries will be the subject of a special regulation.

GENERAL CLASSIFICATION.

GROUP I.

MARINE HISTORY AND FINE ARTS.

Class 1.—History of navigation by sail and by steam.

Retrospective exhibition of the various means of navigation, by originals, models, reproductions or prints.

Class 2.—Fine arts, ancient and modern, painting, sculpture, water colour, print, lithography, architecture and decorative art.

GROUP II.

INSTRUCTION.

Class 3.—Programmes, material for instruction, organization and statistics. Schools for young sailors and novices. Naval schools: schools for application, schools for maritime engineers. Hydrographic schools: pyrotechnic schools, schools of mechanics, schools of medicine and pharmaceutics. Commercial schools. Maritime institutes.

Class 4.—Maritime associations for diffusion of knowledge and of study. International Marine Associations. Society for Maritime and Colonial Studies. Societies of learned men. Geographical Societies. Societies of Commercial Geography. Societies of professional and technical instruction in maritime fishing. Works and publications. Reviews. Maritime journals.

Class 5.—Ocean Geography. Instruction and material. Maritime Laboratories and special ships. Ichthyological collections. Submarine Flora and Fauna.

GROUP III.

CHARTS AND INSTRUMENTS.

Class 6.—Charts and geographical and cosmographical apparatus. Geographical hydrographical charts and maps. Celestial and terrestrial globes and spheres. Tables and ephemerides for the use of astronomers and mariners.

Class 7.—Optical instruments, geometrical compasses, barometers, thermometers, field glasses, sextants, etc. Astronomical and meteorological instruments. Sounding apparatus and log-lines, etc.

Class 8.—Precise horological marine instruments.

GROUP IV.

NAVIGATION AND COMMERCE.

Class 9.—Designs and models of ships used for the maritime transportation of goods or passengers, steam packets, steamers, cargoes, etc.

Class 10.—Designs and models of ships used for coasting and navigation of rivers and lakes.

Class 11.—Designs and models of fishing craft.

Class 12.—Designs and models of yachts and pleasure boats.

Class 13.—Designs and models of sailing ships.

Class 14.—Canoes and boats for sails and oars. Disjointable and collapsable boats, for the navy and commercial marine.

GROUP V.

NAVY.

- Class 15.*—Designs and models of ships.
Class 16.—Armour and protection. Trials of armour.
Class 17.—Guns and torpedoes. Portable arms.
Class 18.—Submarine navigation.

GROUP VI.

MATERIALS FOR CONSTRUCTION.

- Class 19.*—Raw materials and materials of iron and steel specially adapted to the construction and the armament of ships, sheet iron, profiled iron, etc.
Class 20.—Brass, bronze, various alloys, etc.
Class 21.—Wood for building, masts, etc.
Class 22.—Cordage, cables, ropes, etc. Canvas awnings, tarpaulins, etc..
Class 23.—Flax, rubber, gutta-percha.
Class 24.—Submarine paints for bottoms of ships of iron, steel or wood, oils, varnishes, and essences, colors, tars, coal tar and various substances, etc.
Class 25.—Construction plants, machines and tools.
Class 26.—Small accessories for the hull: light ports, scuppers and marine hardware.

GROUP VII.

MOTOR MACHINES AND PROPELLERS.

- Class 27.*—Motor apparatus for war and commercial ships. Steam engines, with alternate movements for screws. Machines for paddle-wheels. Condensing apparatus. Auxiliary apparatus for principal motors, lubricating, rotation meters, etc. Propellers. Screws. Paddle wheels.
Class 28.—Naval boilers. Auxiliary apparatus for boilers, feed pumps, filters. Elevators for ashes and ejectors
Class 29.—Machines with interior combustion. Petroleum, essence alcohol and gas motors.
Class 30.—Steam turbine motors. Interior combustion turbines. Hydraulic turbines, etc.
Class 31.—Solid and liquid combustible matter.

GROUP VIII.

FITTINGS AND APPARATUS.

- Class 32.*—Special apparatus for the production and use of electricity, dynamos, etc.; electric signals, projectors. Wireless telegraphy. Telephones. Microphones. Electric bells, storage batteries, etc.
Class 33.—Apparatus for the manœuvring of anchors, rudders, life boats, sailing gear signals, etc. Order transmitters. Cranes and winches. Temperley apparatus, etc.
Class 34.—Anchors and cables, chains and steel hausers.
Class 35.—Steam and hand pumps for water and fire.
Class 36.—Armament of fishing boats, nets, baskets, harpoons, fishing lines, lobster traps, etc.
Class 37.—Refrigerating apparatus and congealing apparatus of divers systems.
Class 38.—Apparatus for the preservation of grain.
Class 39.—Lighting apparatus. Fixed lights and signals.
Class 40.—Heating apparatus.
Class 41.—Aerating and ventilating apparatus.

GROUP IX.

AUTOMOBILE NAVIGATION AND BOATS OF ALL TYPES.

- Class 42.*—Automobile boats for racing, service and pleasure.
Class 43.—Pleasure steamboats and others.
Class 44.—Electrical motor boats.
Class 45.—Sail and row boats. Life boats.

GROUP X.

AERONAUTICS.

- Class 46.*—Models and documents relative to the history of aerostation and flying.
Class 47.—Captive and free balloons. Military aerostation. Ascension winches. Transport carriages. Inflating apparatus.
Class 48.—Dirigible balloons, motors and propellers. Kites.
Class 49.—Flying apparatus, motors and propellers.
Class 50.—Homing pigeons.
Class 51.—Materials for the construction of balloons and flying apparatus. Tissues, varnishes, baskets, valves, nets, special cordage, stoppage apparatus, etc. Manufacture of hydrogen and light gas.

GROUP XI.

PORT AND HARBOUR WORKS.

Class 52.—Construction of harbours, piers, docks, graving docks, dry docks, locks, etc. Works for protection against river and sea water. Navigable river works.

Class 53.—Moveable bridges. Dock gear for the loading and unloading of vessels. Mechanical towage and hauling.

Class 54.—Light-houses, revolving lights, fixed lights, various buoys, luminous buoys and whistling buoys.

GROUP XII.

SEA AND RIVER FISHING.

Class 55.—Products of sea fishing. Pearls, shells, mother of pearl, coral, sponges, tortoise-shell, whale-bone, amber, fish oils, fats and glues.

Class 56.—Preservation of fish. Packed salt fish, dried, smoked, in oil, etc.

Class 57.—Transportation of fresh fish. Reservoir and cold storage cars.

Class 58.—Apparatus pertaining to the preparation and preservation of fishing products; refrigerators, fish tanks, tin-boxes and their manufacture, barrels, etc.

Class 59.—Raw materials for preserving: salt, oil, etc.

Class 60.—Pisciculture and fresh water fishing. Oyster beds.

Class 61.—Maritime hunting. Collections of amphibious birds and animals.

GROUP XIII.

HYGIENE, SALVAGE. AND SPORTS.

Class 62.—Sanitary apparatus and processes. Processes of disinfection on board vessels. Sanitary service in ports. Quarantine stations.

Class 63.—Saving of the ship-wrecked. Life-boats, apparatus for carrying moorings, rafts, buoys and life-belts and jackets, etc.

Class 64.—Material for the salvage of vessels. Salvage or destruction of wrecks.

Class 65.—Diving suits, diving bells, etc.

Class 66.—Medicines, surgery, pharmaceuticals. Medicinal products derived from fish and sea-weed.

Class 67.—Hygiene by sports. Gymnastics, natation, etc.

Class 68.—Yachting, nautical tours. Watering stations.

GROUP XIV.

SHIP'S PROVISIONS. FOOD.

Class 69.—Sea and table biscuits. Bread making, pastry, confectionery, etc.

Class 70.—Preserved foods other than fish. Dried vegetables, salt meats, etc.

Class 71.—Wines, brandies, liquors, beer, etc.

Class 72.—Apparatus for the preparation and preservation of wholesome waters. Mineral and gaseous waters.

GROUP XV.

VARIOUS INDUSTRIES.

Class 73.—Modern decorative art. Interior decoration of passenger steamers and yachts. Veneering and wall painting. Art bronzes. Silver and gold-smith's art, jewellery, etc.

Class 74.—Tissues, linen, laces, tapestries, etc.

Class 75.—Mariners' and passengers' clothing, sporting attire. Shoes. Hat making. Dress and equipment of crews.

Class 76.—Perfumery, toilet waters, tooth washes, soaps, etc.

Class 77.—Bedding materials; beds, bedding, special furniture for passenger steamers and yachts, etc.

Class 78.—Travelling articles, leather manufactures, toys and small hardware.

Class 79.—Porcelain crystal, glassware, cutlery.

Class 80.—Photographic apparatus and accessories.

Class 81.—Musical instruments.

Class 82.—Games on board of passenger steamers and yachts. Models of ships. Nautical and scientific toys.

Class 83.—Printing and books. Advertisements of navigation companies. Publications and marine libraries, illustrated posters, postal cards. Printing materials, compositors and type-writers.

GROUP XVI.

COMMERCIAL RELATIONS OF BORDEAUX WITH THE COLONIES.

Class 84.—Products of Exportation.

Class 85.—Products of Importation.

Class 86.—Colonization societies. Exploration missions.

GROUP XVII.

SOCIAL ECONOMY. WORKS OF MUTUALITY AND CHARITY.

Class 87.—Maritime and custom house statistics. Chambers of Commerce. Free ports.

Class 88.—Insurance companies; Marine registry of ships. Mutual maritime insurance societies.

Class 92.—Societies for works of the sea. Central salvage societies for the wrecked. Societies for the relief of the families of those shipwrecked. Mariner's orphan asylums. Seamen's homes. Societies, works and institutions subsidized. Invalids from the navy hospitals.

Bordeaux April 25th 1906.

The Commissioner-General:

E. BERTIN, (C.).

Member of the Institute.

Deputy Commissioner-General:

V. MORLOT.

No.....

APPLICATION FOR ADMISSION.

Group No....

Certificate sent.
the.....

Class No....

I, the undersigned.....
residing at.....
make application to exhibit the products hereunder described:.....

for which I desire a space of..... meters long by
of..... meters deep, or a space on the interior wall

The amount of Exposition dues is fixed at the sum of (to be written in full).....
which I shall pay: half in the fifteen days following the delivery of the certificate of admission, the other half on April 15th, 1907.

I submit to the decisions of the Committees and Juries. I have taken knowledge of the general rules to which I adhere without reserve.

.....the.....190 ..

Signature:

Tariff and Exposition dues.—Exhibitors shall pay rent for the space they occupy according to the following tariff: 1st.—A tax of 20 francs per exhibitor for application; 2nd.—A proportional tax per unity of surface, established according to a general tariff to be applied to industrial exhibitors, fixed as follows: The superficial meter (39½ inches, about) in the principal building 60 francs; on the interior wall 40 francs, in the annexed buildings 40 francs, on the interior walls 30 francs; in the open air with option of construction, 20 francs; without option of construction, 10 francs. For choice places, isolated glass-cases, corner places, a higher charge shall be fixed for each particular case.

N. B.—Address all applications for admission and all communications to the Commissioner-General, 26 cours du XXX Juillet, Bordeaux.

ORDERED that the foregoing papers be published in the Supplement to the *Gazette of India*, for general information, and that copies be forwarded to the Local Governments and Administrations named in the margin, for information, with the request that the papers may be published in the local Gazette.

The Secretary to the Government of Madras.	Bombay.
" " "	Bengal.
" " "	the United Provinces.
" " "	the Punjab.
" " "	Burma.
" " "	Eastern Bengal and Assam.
The Hon'ble the Chief Commissioner, Central Provinces.	
The Chief Commissioner of Coorg.	

Ordered, also, that a copy be forwarded to the Chief Commissioner of Ajmer-Merwara, and the Honourable the Agent to the Governor-General and Chief Commissioner, North-West Frontier Province, for information, and to the Foreign Department, for information and communication to Native States.

Ordered, also, that a copy be forwarded to all Chambers of Commerce, for information.

W. L. HARVEY,
Secretary to the Government of India.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	14 to 15	

Agricultural operations—Weeding in ragi fields.

The state of standing crops is fair.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. There has been neither sowing nor harvesting during the week.
10. Prospects of season good. Food stocks available in sufficient quantities. But the prices continue high.
11. Public health generally good except in some of the villages of Kankanhalli Taluk and Closepet Sub-Taluk, where cholera is reported not to have ceased and in some of the villages of Devanhalli Taluk where small-pox prevails.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Kulthi in Kolar, Mulbagal, Bowringpet, Bagepalli and Srinivasapur is being sown. Samé is being harvested in almost all the taluks.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tumkur and Tiptur; jola and kadale in parts of Sira; kulthi and kadale in Pavagada and kulthi in Kunigal.
Crops harvested.—Ragi and navané in Maddagiri; ragi, sugar-cane, jola, navane, sajje and baragu in Sira; navané and til in Gubbi; jola and baragu in Tiptur; ragi, navane, sajje and jola in Pavagada; sugar-cane in Kunigal; jola and navane in Koratagere and sugar-cane in Turuvekere. Weeding is going on.
10. Prospects of the season good. Food stocks are available. More rain is yet required in the Maddagiri Taluk, where some tanks have not yet received full supply of water.
11. Public health is generally good, except for fever in parts of Tiptur and plague in Chiknayakanhalli.
12. Cattle healthy. Water and fodder are sufficient.

MYSORE.

8. The weekly markets in all the taluks are reported to have been well supplied with grain during the week.
9. The standing dry and wet crops are reported to be good in all the taluks. Bengal gram and coriander in parts of Hunsur and Gundlupet are being sown. Paddy seedlings are being transplanted in parts of Malvalli. Ragi in parts of Hunsur; ragi and til in parts of Heggaddevankote; jola in parts of Gundlupet, are being harvested. The probable outturn is estimated as follows:—

Hunsur	...	...	Ragi and til—12 annas.
--------	-----	-----	------------------------
10. Prospects of the season good. Raiyats and merchants are reported to have sufficient stock of food grains. There has been rainfall all over the district and the crops are in good condition.
11. Public health good. But cholera still prevails in parts of Seringapatam, Hunsur, Heggaddevankote, Nanjangud, T. Narsipur, Malvalli and Mandya Taluks.
12. Cattle are reported to be healthy and in good condition. Water and fodder are available throughout.

HASSAN.

8. Market sufficiently well supplied.

9. In the Channarayapatna Taluk land is being prepared for sowing Bengal gram and coriander. Sugar-cane is being harvested in the said taluk. Standing crops are in good condition in all the taluks, except chillies in Arsikere Taluk and kulthi in Hole-Narsipur Taluk where excessive rain has damaged them to some extent.

10. Prospects are very encouraging. Food stocks are available.

11. Public health generally good. But small-pox is still prevalent in parts of Manjarabad Taluk and plague prevails in Hassan and Belur towns and in a few villages of Belur Taluk and in Chikkamattighatta, Channarayapatna Taluk.

12. Cattle are healthy. Water and pasturage are available.

SHIMOGA.

8. Market well supplied.

9. Standing crops are in good condition in all the taluks. The rainfall in the Shikarpur Taluk during the week has been beneficial to the standing crops. More rain is wanted for the wet crops in some portions of the Shikarpur and Sorab Taluks. Cholum in some portions of the Channagiri Taluk. Green gram, sessamum and ragi in the Honnali Taluk; sessamum in the Shimoga Taluk; ragi in the Sorab Taluk; and arecanut in some portions of the Sorab, Sagar and Tirthahalli Taluks are being harvested. The estimate of the paddy crop for the Tirthahalli Taluk is 12 annas.

10. Prospects of the season are fair. Food stocks are enough for the present.

11. Public health is generally good, but for the prevalence of small-pox in a few villages of the Sagar Taluk.

12. Pasture and fodder are available. Cattle are healthy.

KADUR.

8. Market fairly well supplied, except in the Chikmagalur and Mudgere markets where the supply is poor owing to plague.

9. The standing crops of paddy and ragi in Mudgere; paddy, arecanut, sugarcane, coffee, cardamom and pepper in Koppa; paddy, sugar, ragi, wheat, cholam, horse gram and castor in Tarikere; paddy, ragi, cholam, sugarcane, ballar, horsegram, wheat and castor in Kadur; sugarcane, paddy, ragi, horse gram, ballar, togari and gingelly in Chikmagalur are in good condition. Cholam in parts of Kadur; coriander and gingelly in parts of Tarikere and cardamom and ragi in parts of Mudgere are being harvested. The probable outturn of arecanut in Sringeri is 12 annas.

10. Prospects of the season good. Food stocks available and sufficient.

11. Public health generally good, except for small-pox in Koppa and plague in parts of Mudgere and Chikmagalur towns and in a few villages of the Chikmagalur Taluk.

12. Cattle generally healthy. Water and pasture available throughout.

CHITALDRUG.

8. Market well supplied.

9. Standing crops are in good condition throughout the district.

Seeds sown.—Horse gram in Challakere and Molakalmuru Taluks; Bengal gram in Holalkere and Molakalmuru Taluks; bilijola in the Holalkere, Davangere and Jagalur Taluks; cotton and wheat in Molakalmuru Taluk.

Crops harvested.—Jola in the Chitaldrug, Challakere, Hiriya, Holalkere, Jagalur and Molakalmuru Taluks (yield from 4 to 12 annas); sugarcane in the Chitaldrug Taluk (yield 4 annas); sessamum in the Chitaldrug, Challakere, Hiriya, Holalkere, Davangere, Jagalur and Molakalmuru Taluks (yield from 2 to 12 annas); black gram in the Chitaldrug Taluk (yield from 2 to 8 annas); navane in the Davangere, Jagalur and Molakalmuru Taluks (yield from 8 to 12 annas).

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Cattle healthy. Fodder and water available.

BANGALORE,
25th October 1906. }

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Depts.

THE INDUSTRIAL AND AGRICULTURAL EXHIBITION, CALCUTTA, 1906.

RULES AND REGULATIONS.

1. Articles of indigenous art or manufacture, as well as natural, mineral or agricultural products from any part of India; and adjacent British Possessions, will, as a rule, be accepted for the Exhibition. Implements or machines of foreign manufacture, which, in the opinion of the Exhibition Authorities, are likely to promote or develop Indian industries, will also be accepted.

2. No explosives or any substance which, in the opinion of the Exhibition Authorities, is noxious or dangerous, will be admitted.

3. Intending Exhibitors should refer to the printed lists, attached herewith, of the sections and divisions into which it is intended to classify the Exhibits. The classified list is meant only to serve for general guidance, and will not prevent Exhibitors from sending articles not specifically enumerated therein. Such articles will, however, be admitted at the discretion of the Exhibition Authorities.

4. Works of art and articles of special merit, including those of antiquarian interest, will be thankfully received from gentlemen who do not aim at any commercial advantage or benefit. All arrangements for the display of the exhibits lent will be made by the Exhibition Authorities at their own expense.

Gentlemen, desirous of sending Exhibits on loan should write to the effect, giving all the necessary particulars about their Exhibits, to the Secretaries, who will inform them of the acceptance of their offer and make with them all the necessary arrangements in connection with the exhibition of the offered articles.

5. Applications for space in the Exhibition *Pandal* specifying the space that will be required, should be made at once in the form annexed and should be accompanied by a fee of Rs. 5.

(It will be left to the option of the Exhibition Authorities to reduce or remit the above-mentioned fee in such cases as they think fit.)

6. Intending Exhibitors are requested to send in to the Secretaries, as soon as possible, a list of their proposed exhibits, in the printed form attached herewith. These lists should reach the Secretaries *at the latest by the 15th of October.*

7. Exhibitors are requested to mention in their application whether they intend to illustrate practically the process of their manufacture, and, if so, to describe the nature of the demonstration. Steam or any other power required may be supplied by the Exhibition Authorities, if there is sufficient demand, on such terms as may be agreed upon.

8. The Exhibition Authorities will inform the applicants whether they are registered as Exhibitors and will state the number allotted to them.

9. Each Registered Exhibitor will be allowed a covered space of 5 ft. by 5 ft. free of charge, in each section but additional covered space may be obtained, subject to a minimum charge of 8 annas per square foot.

10. Exhibitors may obtain, on such special terms as may be agreed upon, open space for the exhibition or practical demonstration of machinery, etc. They will be allowed to erect the necessary structures at their own expense but according to plans approved of by the Exhibition Authorities.

11. The Exhibition Authorities will have absolute discretion as regards the acceptance or rejection of Exhibits and the allotment of space, covered or uncovered.

12. Exhibits will be received, from the 15th of November 1906 to the 1st of December 1906. They may be sent by Railway or Steamer as "Parcel" or "Goods," or through Post, or may be delivered personally, or through agents between the hours of 10 A.M., and 4 P.M., at the above address or at the exhibition grounds and to authorised persons who will be in attendance there. Receipts will be granted for the articles so delivered. In case of goods forwarded by Railway, Steamer or Post, the freight must be prepaid and the parcels preferably insured. Exhibits forwarded "unpaid" will be refused.

13. All packages received or delivered must bear a label on the upper covering specifying the name and number of the Exhibitor, and addressed to the Honorary Secretary. They must contain inside a list in duplicate with all particulars required under Rule 19 in regard to the Exhibits in the package. This list will be compared with the previous list submitted by the Exhibitor along with his application and a formal receipt will be given to the Exhibitor for the articles found in good condition.

14. Exhibitors failing to send their goods and appropriate the space allotted to them by the 1st of December 1906, shall forfeit all right to exhibit, and shall not receive any refund of the payments made by them. No refund also will be given for occupying less space than that applied and paid for and allotted; and the unoccupied space will be disposed of as the Exhibition Authorities deem fit.

15. Every facility will be afforded to Exhibitors or their agents in connection with the transport, display, sale and care of their Exhibits.

16. Exhibitors must bear all expenses incidental to the transport and the delivery of their Exhibits, as well as their removal after the Exhibition is closed. If the Exhibitors require for the display of their Exhibits in the *Pandal* and *special* arrangement or construction, stands, cases, tables, shelves, etc., or have to mount their machinery and apparatus, they must carry out all this themselves, and at their own cost, and in accordance with plans approved by the Exhibition Authorities.

17. Such assistants, servants, or other attendants as an Exhibitor may require for service at his stalls may be allowed to enter the Exhibition *Pandal*, on obtaining a pass from the Secretaries. All such attendants shall have to obey the orders of the Exhibition Authorities and the supervising staff appointed by them.

18. All reasonable precaution will be taken to guard the premises of the Exhibition, and secure the safety of the Exhibits. The Exhibition Authorities, however, do not at all hold themselves responsible for any damage or loss, however occurring. Exhibitors wishing to insure their articles may apply to the Secretaries, who will arrange for the same on payment of the necessary charges. All valuable Exhibits, such as jewelry, gold and silver plate, must be forwarded under the charge of an attendant.

19. Every Exhibit must bear a label showing the name or description of the article, its price, the place and the date of its production or manufacture, the names of the manufacturer and the Exhibitor, and if purchased the place and the date of its purchase.

20. In the Exhibition stalls orders for articles may be registered but no ready sale will be allowed. But to suit the convenience of the visitors and the Exhibitors a portion of the Exhibition enclosure will be laid out in the form of an arcade where the Exhibitors under prescribed regulations will be allowed to stock their articles for purposes of ready sales.

21. Exhibitors who are unable to attend personally or send agents in charge of the exhibits may make special arrangements with the Secretaries for the exhibition of their goods, subject to the provisions of the foregoing rules, and on payment in advance of all estimated expenses, which may be ascertained on application.

22. The Exhibition Authorities reserve the right to remove the Exhibits of any person from the Exhibition grounds who does not conform to their rules and regulations.

23. No article exhibited may be copied, photographed, drawn, or reproduced in any manner, without the special permission of the Exhibitor and the Exhibition Authorities. General photographs of the stalls may, however, be taken with the permission of the Exhibition Authorities.

24. Arrangements with reference to machinery in motion will form the subject of special regulation.

25. A separate section will be allotted for the display of work done by ladies.

26. The Exhibition will be opened in the 1st week in December 1906, for the public and will continue for a month. An official catalogue of all Exhibits with the names and addresses of the Exhibitors and their Agent or Agents, if any, will be published by the Exhibition Committee, before the opening of the Exhibition. A Committee of specially qualified gentlemen will be appointed as Jurors, who will examine the Exhibits, determine their relative merits and decide which of them deserve special recognition. The decision of the Jurors will be final. Gold, Silver and Bronze medals will be awarded according to their verdict. Certificates of merit will also be given. The names of the successful Exhibitors will be published together with a description of the Exhibits and the medals and certificates they have respectively obtained.

27. All persons who become Exhibitors shall, by so doing, be held to signify their assent to, and acceptance of all the foregoing Rules and Regulations, and also such other Regulations as the Exhibition Authorities may hereafter issue.

N. B.—All communication should be addressed to—

THE HONORARY SECRETARY, EXHIBITION COMMITTEE,

62, Bowbazar Street, Calcutta.

PROSPECTUS.

THE INDIAN INDUSTRIAL AND AGRICULTURAL EXHIBITION, 1906.

It is proposed to hold the annual Indian Industrial and Agricultural Exhibition this year at Calcutta early next December at the site of the Old Tramway Depôt and on the extensive grounds adjoining the General Hospital which have been acquired by the Bengal Government and kindly lent for the purpose of the Exhibition.

The Indian Industrial Exhibitions held annually since 1901 have served greatly to popularise and encourage the Indian arts and industries and their usefulness has been recognised by all sections of the press and the public.

The first of these Exhibitions was organized and held in Calcutta in connection with the Indian National Congress in December 1901 and has since then been held at Ahmedabad in

1902, at Madras in 1903, at Bombay in 1904 and at Benares in 1905. The Exhibition of 1906 will be similarly held in connection with the forthcoming Calcutta Session of the Congress.

The management and organization of the Exhibition has been entrusted to a Committee representative of all sections of the community, the members of which need not in any way identify themselves with the politics of the Congress. The accounts of the Exhibition and the Congress have been kept separate since the Madras Exhibition of 1903 and this practice will be observed as regards the keeping of accounts of the forthcoming Exhibition.

The organization of the Exhibition is likely to prove costly but large guarantees have been given by many leading men of Bengal.

The Government of Bengal fully recognizing the industrial and educational value of such Exhibitions has very kindly offered to give special facilities for the Exhibition of all such articles from its Agricultural, Art, Forest, Sanitary and other departments as may prove useful or instructive to the public and also to help in other ways the organisation of the Exhibition.

However, an undertaking of this nature can only succeed with the active co-operation of all sections of the community and we hope that all will join hands to make the Exhibition a success and worthy of this great city.

Although the scope of the Exhibition is confined to articles of indigenous growth and manufacture yet arrangements will be made for the exhibit of machinery and appliances of foreign manufacture which are likely to help and develop Indian industries.

An Arcade (chowk bazar) will be a special feature of the Exhibition where Exhibitors will be allowed to keep a stock of their exhibits for ready sale.

A provisional Executive Committee of the gentlemen named below have been formed with powers to add to their number.

All communications to be addressed to the Honorary Secretary and all remittances to the Honorary Treasurer at the "Exhibition Office," 62, Bowbazar Street, Calcutta.

Patrons.

H. H. Nawab Ihtisham-ul Mulk Rais-ud Dowlah Amir-ul-Umra Sir Syed Hussanali Khan Bahadur Mahabut Jung, G.C.I.E., Murshidabad.
Col. H. H. Maharaja Sir Nripendra Narain Bhup Bahadur, G.C.I.E., C.B., Cooch-Bihar.

President.

Maharaja Sir Rameswar Sing Bahadur, K.C.I.E., Darbhanga.

Vice-Presidents.

The Hon'ble Prince Asif Kader Syed Wasif Ali Mirza Bahadur, Murshidabad.
Maharaja Manindra Chandra Nandi Bahadur, Cossimbazar.

Secretaries.

The Hon'ble Mr. J. Chaudhuri,
Rai Parbatty Sanker Chaudhuri,
Mr. B. L. Chowdhuri,
„ Abdul Halim Ghuznavi.

Assistant Secretaries.

Mr. P. K. Roy Chaudhuri,
„ K. N. Das Gupta.

Treasurer.

Mr. Provash Chandra Mitra,
Hon'ble Mr. Radha Churn Pal.

Assistant Treasurer.

Mr. Sailendra Kumar Mitra.

Executive Committee.

Mr. R. N. Mookerjee, (Chairman, Executive Committee.)
Raja Peary Mohan Mukerjee,
Mr. D. Yule,
Kumar Manmatha Nath Mitter,

INDUSTRIAL EXHIBITION, 1906.

SYNOPSIS OF CLASSIFICATION.

Group I, Industrial Products.

CLASS A.—TEXTILES.

Section (a) Cotton—

DIVISIONS.

1. Fibre.
2. Yarn and thread.
3. Mill Fabrics (plain and figured).
4. Hand-loom Fabrics (plain and figured).
5. Dhoti, Sari and Chadder.
6. Longcloth and Damask.
7. Muslins, Jamdanis, Kokti.
8. Twills and Canvas.
9. Towels, Jharans and Napkins.
10. Other non-specified fabrics.
11. Appliances and processes of cotton spinning.
12. Appliances and processes employed in the manufacture of cotton fabrics.

Section (b) Silk—

DIVISIONS.

13. Silk fibres, Mulberry, Tasar, Muga, Eri, Matkas, etc.
14. Yarns and threads.
15. Silk Fabrics, plain.
16. Tasar, Muga and Eri and other wild silk fabrics.
17. Figured and Embroidered Silks.
18. Brocades, Kinkhabs and Bafta.
19. Silk Muslin.
20. Mill Silk.
21. Appliances and processes employed in the manufacture of Silk fibres and fabrics.

Section (c) Wool and Pasham—

DIVISIONS.

22. Fibres.
23. Yarns and threads.
24. Namdas or felts and Blankets.
25. Shawl, Alwans and Louies.
26. Jamawars.
27. Woollen Mill Fabrics.
28. Flannels, Broadcloth, Cashmere, etc.

Section (d) Mixed Fabrics—

DIVISIONS.

29. Cotton and Silk.
30. Woollen and Cotton.
31. Silk and Wool.

Section (e) After-loom treatment—

DIVISIONS.

- 32. Dyeing and Calico-Printing.
- 33. Tie Dyeing.
- 34. Printing and Waxing in Calico.
- 35. Tinsel Printing.
- 36. Appliances employed in the above processes.

Section (f) (Knitting, etc.)—

DIVISIONS.

- 37. Banians, drawers and Jersey, etc.
- 38. Socks and Stockings.
- 39. Other varieties.
- 40. Knitting Machines, etc.

Section (g) Embroidery, Braiding and Lace—

DIVISIONS.

- 41. Darn satin, stem and feather stitches and Phulkari work on cotton or woollen fabrics.
- 42. Tent, cross and knotted embroidery.
- 43. Chikan work.
- 44. Net work in satin or chain stitch.
- 45. Lace—cushion, point, torchon (crochet work).
- 46. Laid and crewel embroideries in silk or lace.
- 47. Gold and Silver wire Embroidery (karchob).
- 48. Braidings and Trimmings.
- 49. Tapes and Ribbons.
- 50. Appliances and processes employed in embroidery, lacemaking, etc.

Section (h) clothing for men, women and children—

DIVISIONS.

- 51. Tailoring and Dress making.
- 52. Appliances used in sewing and making apparel.
- 53. Pagri, Hat, Caps, etc.
- 54. Various trades connected with clothing.

Section (i) Jute, Hemp and other fabrics—

DIVISIONS.

- 55. Jute, Hemp, Agave and other fibres.
- 56. Gunny, Hessian, canvas, etc.
- 57. Various fabrics.

Section (j) Carpets—

DIVISIONS.

- 58. Pile carpets (galichas).
- 59. Daris and Satranjis.
- 60. Rugs and Khilims.

Section (k) Rope and Mattresses—

DIVISIONS.

- 61. Cordage, Ropes and Mattresses.
- 62. Appliances and processes of Rope making.

CLASS B.—WARES AND UTENSILS.

Section (l) Metal Wares—

DIVISIONS.

- 63. Iron, Lead and Tin wares.
- 64. Tinned, painted and Lac coloured wares.
- 65. Enamelled and Niello wares.
- 66. Gold and Silver plates.
- 67. Damascened and encrusted wares.
- 68. Copper, Brass, Bronze and German silver wares.
- 69. Bidri wares.
- 70. Aluminium wares.
- 71. Miscellaneous wares and toys.

Section (m) Stone and Glass Wares (including inlaid stone) —

DIVISIONS.

- 72. Stone carving of all kinds.
- 73. Lapidary work.
- 74. Glass wares.
- 75. Inlaid stone work.
- 76. Other unspecified stone wares.

Section (n) Ceramic wares including pottery, clay models plaster and cement work, mosaic, etc. —

DIVISIONS.

- 77. Porcelain wares and models.
- 78. Pottery wares and models.
- 79. Unglazed or terra-cotta wares.
- 80. Other Ceramic wares.

Section (o) Wares made of vegetable and animal products —

DIVISIONS.

- 81. Vegetable pottery.
- 82. Varnished Gesso Wares.
- 83. Lac and lacquer wares.
- 84. Ware not specified as above.

CLASS C.—DECORATION AND FURNITURE.

Section (p) Wood work —

DIVISIONS.

- 85. Carving, for Architecture, Furniture and cabinet work.
- 86. Inlaying with other woods, with ivory, etc.
- 87. Sandalwood, engraved, inlaid, veneered.
- 88. Veneering, Applique, Marquetry, Lattice work (Pinjra).
- 89. Painted, Stained, Imitation inlaying.
- 90. Papier mache and imitation papier mache.
- 91. Ornaments, Toys and models.
- 92. Minor wood-work, *e. g.*, engraved fruits, pith work, etc.
- 93. Household and Art Furnitures, boxes and trunks.
- 94. Other decorative wood works.

Section (q) Bamboo, Cane and Mat work —

DIVISIONS.

- 95. Furniture.
- 96. Baskets, etc.
- 97. Mat, Pati chick, etc.
- 98. Straw braiding.

Section (r) Decoration made out of animal products —

DIVISIONS.

- 99. Ivory carvings.
- 100. Horn, Shell, Feather or Horse-hair works.
- 101. Bone works.
- 102. Leather or Skin works.

Section (s) Miscellaneous decorative and household works —

DIVISIONS.

- 103. Lamps, Stoves and accessories.
- 104. Metal Furniture, Bells, Gongs, etc.
- 105. Iron safes, etc.
- 106. Locks and keys and hinges, etc.
- 107. Pipes, Cigarholders, etc.
- 108. Unspecified articles.

CLASS D.—CHEMICAL INDUSTRIES.

Section (t) Applied Chemistry —

DIVISIONS.

- 109. Preparation of Chemicals and Pharmacy.
- 110. Coal-tar Colours.
- 111. Fats, Oils and Varnishes.

- 112. Vinegar and Wines.
- 113. Perfumery.
- 114. Soap, candle, Lubricants, etc.

Section (u) Chemical Manufactures—

DIVISIONS.

- 115. Oil colours and Printer's Ink.
- 116. Cosmetics.
- 117. Manufacture of Matches.
- 118. Do of paints and cements.
- 119. Do of paper, paste boards and straw boards.
- 120. Chrome Tanning and other processes.
- 121. Gas and acetylene lighting.
- 122. Others not specified.

CLASS E.—VARIOUS INDUSTRIES.

Section (v) Stationery—

DIVISIONS.

- 123. Writing papers and envelopes.
- 124. Letter papers.
- 125. Blotting papers.
- 126. Cards.
- 127. Inks.
- 128. Pens.
- 129. Nibs.
- 130. Pencils.
- 131. Holders.
- 132. Pins.
- 133. Sealing wax.
- 134. Gums.
- 135. Inkstands and other requisites.

Section (w) Cutlery—

DIVISIONS.

- 136. Pen-knives.
- 137. Scissors.
- 138. Knives.
- 139. Others not specified.

Section (x) Leather goods—

DIVISIONS.

- 140. Boots and Shoes.
- 141. Harness and Saddlery.
- 142. Bags and Purse.
- 143. Mill requisites.
- 144. Miscellaneous.

Section (y) Brushes—etc., etc.

DIVISIONS.

- 145. Bristles and hair.
- 146. Vegetable fibres, etc.

Section (z) Indian-Rubber Industries—

DIVISIONS.

- 147. Crude Rubber and compounding ingredients.
- 148. Rubber goods.

Section (aa) Travelling and Camp equipment—

DIVISIONS.

- 149. Tents.
- 150. Camp furnitures.
- 151. Umbrellas and Sticks.
- 152. Trunks and Travelling boxes, etc.

CLASS F.—EDUCATION, LITERATURE, SCIENCE AND ART.

DIVISIONS.

- 153. Typography.
- 154. Various Printing processes.
- 155. Books, etc., Newspapers, Posters.
- 156. Book Binding.
- 157. Maps and apparatus for Geography, etc.
- 158. Mathematical and Scientific Instruments.
- 159. Optical and Horological instruments, Astronomical Apparatus, etc.
- 160. Coins and Medals.
- 161. Medical and Surgical appliances.
- 162. Musical Instruments.
- 163. Archæological collection.
- 164. Ethnographical collections.

CLASS G.—GENERAL MACHINERY.

DIVISIONS.

- 165. Steam and other kinds of Engines.
- 166. Electric appliances and Machinery.
- 167. Machine tools.
- 168. Hand and foot-power labour-saving appliances.
- 169. Various Machines for small manufactories.

CLASS H.—APPLIANCES CONNECTED WITH SANITATION AND HYGIENE
(INCLUDING MODELS AND DESIGNS).

DIVISIONS.

- 170. Bathing requisites.
- 171. Sanitary clothing.
- 172. Toilet requisites.
- 173. Apparatus and appliances for physical exercise.
- 174. Ventilation—heating and lighting of houses, etc., Punkhahs and Mechanical Fans.
- 175. Do do do of public buildings.
- 176. Cooking Stoves, etc.
- 177. Pure Food stuffs.
- 178. Domestic Filters and Storage of water.
- 179. Household Sanitary arrangements
- 180. Disposal of sewage and refuse.
- 181. Disinfectants. Parasites. Ambulances. Collection of Poisonous Snakes, etc.

CLASS I.—PUBLIC WORKS AND COMMUNICATION.

DIVISIONS.

- 182. Bridges and Bridge materials, Culverts.
- 183. Tools and apparatus.
- 184. Rollers, wheel-barrows, water carts, etc.
- 185. Building materials (Stone under Group III).
- 186. Other connected articles, Fire escapes, etc.
- 187. Conveyances vehicles, motors, cycles, boats).

CLASS J.—FINE ARTS.

Section (bb) Statuary.

DIVISIONS.

- 188. Carved Stones, marbles, etc.
- 189. Metal works.
- 190. Terra-cotta, Porcelain, Plaster of Paris Statuettes and clay models.
- 191. Sculptures in wood.
- 192. Waste moulding.

Section (cc) Painting.

DIVISIONS.

- 193. Miniature painting.
- 194. Modern Oil colour painting.
- 195. Modern water colour painting.

Section (dd) Drawing.

DIVISIONS.

- 196. Cartoons.
- 197. Decorative designs, Nakshai, etc.
- 198. Architectural drawings.
- 199. Engraving of metals and precious stones.

Section (ee) Miscellaneous.

DIVISIONS.

- 200. Lithography.
- 201. Photographs.
- 202. Picture framing and Mouldings.
- 203. Work of Art not specified.

GROUP II. AGRICULTURAL AND FOREST PRODUCTS AND APPLIANCES.*Section (ff) Agriculture—*

DIVISIONS.

- 204. Implements and processes used in Rural Cultivation.
(Improved types of machines to be worked side by side with the native implements and machines now in use).
- 205. Appliances and Processes used in Agricultural Industries.
(Sugar, Tobacco, Tea, Indigo, etc.)
- 206. Agricultural statistics.
- 207. Vegetable Food Products.
- 208. Cattle Food and fodders.
- 209. Technical Mycology.
- 210. Non-edible Agricultural Products.
- 211. Fibres and Fibrous plants.
- 212. Oil and Oil seeds.
- 213. Food stuffs and Prepared food (Bread, Biscuit, Confectionery, etc.)
- 214. Gums and resins.
- 215. Dyes, tans, mordants and pigments.
- 216. Fruits and Fruit syrups, preserved fruits, Refrigerators.
- 217. Tea, Coffee, Cocoa, Sugar, Jams, Jellies, Chutneys, etc.
Tobacco, Spirits. Vinegar, Aerated waters, etc.
- 218. Useful insects.
- 219. Destructive insects and Parasitic Plants and their remedies.
- 220. Appliances used in Horticulture and Arboriculture.
- 221. Kitchen and garden Plants.
- 222. Greenhouse and Hothouse plants.
- 223. Nursery seeds and stock.

Section (gg) Forest—

DIVISIONS.

- 224. Appliances and Processes used in Forestry.
- 225. Timbers.
- 226. Bamboos, thatching grass and reeds.
- 227. Crude Rubber.
- 228. Crude Lac.
- 229. Honey and Bee's wax.
- 230. Destructive insects, etc.
- 231. Management and Protection of Forests.

Section (hh) Dairy—

DIVISIONS.

- 232. Appliances and processes used in Dairy.
- 233. Butter and Ghee.
- 234. Cream.
- 235. Cheese.
- 236. Skimmed milk.
- 237. Condensed milk.

GROUP III.**MINERAL PRODUCTS.**

DIVISIONS.

- 238. Important Minerals of economic value.
- 239. Representative series of rocks.
- 240. Slates.
- 241. Building Stones.
- 242. Ornamental Stones.
- 243. Corundum, Mica, Iron ores, Manganese ores, Gold, Coal.
- 244. Petroleum.
- 245. Geological, Collecting to illustrate the Geological formation of India.
- 246. Working of mines and quarries.
- 247. Metallurgy.
- 248. Metal working.
- 249. Metallic alloys.

GROUP IV. FISHERY AND SPORT.

Section (ii) Fishing—

DIVISIONS.

- 250. Fishing Appliances and Tackles, rods, wheels, etc.
- 251. Fish culture.
- 252. Dried and Preserved Fish, Refrigerators.
- 253. Fish oil and bone.
- 254. Shell fish.
- 255. Pearl fishery.
- 256. Turtles.

Section (jj) Sport—

DIVISIONS.

- 257. Hunting and Sporting Equipments.
- 258. Mounted skulls, stuffed birds, animals, etc.
- 259. Hunting appliances of the Hill tribes.

To

THE HONORARY SECRETARY, INDUSTRIAL
EXHIBITION, CALCUTTA 1906.
62, Bowbazaar Street, Calcutta.

Sir,

I wish to exhibit the articles as per particulars given in the annexed form, at the Industrial and Agricultural Exhibition of the Indian National Congress, to be held in coming December, at Calcutta.

The preliminary fee of Rs. 5 required under Rule V is sent by postal money order (if otherwise sent delete the preceding words and state how sent).

I consent to abide by the Rules and Regulations of the Exhibition Committee; and on being informed that my name has been enrolled as an Exhibitor, I shall be glad to furnish any further information required.

I beg to remain,
Sir,
Yours faithfully,

Signature of the intending Exhibitor _____

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	14 to 15	

Agricultural operation—Weeding in ragi fields.

The state of standing crops is fair.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Markets well supplied.
9. Standing crops are in good condition. Potato and ground-nut are reported to be harvested in the Devanhalli Taluk. In the Bangalore Taluk, 5 acres of potato are reported to be sown.
10. Prospects of season good. No insufficiency of rain is complained of anywhere in the district. The price of food stocks still continues high.
11. Generally good. Cholera still prevails in Kankanhalli Taluk and plague in Nela-mangala and small-pox in some parts of Devanhalli Taluk.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Kalthi in Kolar, Mulbagal and Malur is being sown. Samé is being harvested in almost all the taluks, and potatoes, garlic and onions in Chikballapur Taluk.
10. Prospects of the season good. Food stocks available.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tiptur, Pavagada and Tumkur; cholum and kadale in Sira; kulthi in Pavagada and Kunigal.
Crops harvested.—Navané, savé, ragi and cholum in Maddagiri; cholum, navane, ragi, sugar-cane, baragu and save in Sira; cholum and save in Tiptur; ragi, cholum and sajje in Pavagada; sugar-cane in Kunigal; cholum and ragi in Koratagere; and sugar-cane in Turuvekere.
10. Prospects of the season are good. Food stocks are available. More rain is yet required in parts of the Maddagiri Taluk.
11. Public health generally good, except for fever in parts of Tiptur and plague in Chiknayakanhalli.
12. Cattle healthy. Water and fodder are sufficient.

MYSORE.

8. The weekly markets in all the taluks are reported to have been well supplied with grain during the week.
9. Standing dry and wet crops are reported to be good in all the taluks. Bengal gram is being sown in parts of Gundlupet Taluk and lands in parts of Nanjangud Taluk are being ploughed for sowing Car seeds. Bengal gram and coriander are being sown in parts of Hunsur. Ragi and jola are being harvested in Gundlupet Taluk and the probable outturn is estimated as follows:—
Gundlupet ... Ragi 12 annas.
Jola 8 annas.
Hunsur ... Ragi and til—12 annas.
10. Prospects of the season good. The standing crops are in very good condition. Rai-yats and merchants are reported to have sufficient stock of food grains.
11. Public health good throughout, but cholera still prevails in parts of Heggaddevan-kote, Hunsur, Nanjangud and T.-Narsipur Taluks.
12. Cattle are reported to be healthy and in good condition. Water and fodder are available in sufficient quantities.

HASSAN.

8. Market well supplied.

9. Bengal gram is being sown in Hole-Narsipur Taluk. Onions and garlic in Hassan and sugar-cane in Channarayapatna Taluks are being harvested. Standing crops are generally in good condition. Outturn promises to be fair. Chillies are reported to have been damaged to some extent in parts of Arsikere Taluk owing to excessive rain.

10. Prospects of the season are good. Food stocks are available.

11. Public health generally good except for small-pox in Manjarabad Taluk and plague in Hassan and Belur Towns and in a few villages of the Belur Taluk and one village of Channarayapatna Taluk.

12. Cattle are healthy. Water and pasture are available.

SHIMOGA.

8. Market well supplied.

9. Standing crops such as paddy, sugar-cane, ragi, jola and horse gram are in good condition. The paddy crops in the Kasaba and in Hossur hoblis of the Shikarpur Taluk have suffered from insufficient rainfall. Ragi and cholum in some localities of the Channagiri Taluk; ragi and sessamum in Honnali and Shimoga Taluks; ragi and paddy in Sorab Taluk; arecanut in Sorab, Sagar and Tirthahalli Taluks are being harvested.

10. Prospects of the season are good. Food stocks are enough for the present.

11. Public health is generally good. There have been some cases of cholera in Shikarpur and the Tirthahalli Taluks and small-pox in some villages of the Sagar Taluk.

12. Cattle are generally healthy. Pasture and fodder are available.

KADUR.

8. Market fairly well supplied, but the supply is rather poor in the Chikmagalur and Mudgere markets, owing to plague.

9. Coriander and Bengal gram in parts of Tarikere Taluk; and coriander, Bengal gram and wheat in parts of Kadur Taluk are being sown. The standing crops of sugar-cane, ragi, paddy, togare, ballar and horse gram in Chikmagalur; sugar-cane, paddy, coffee, arecanut and cardamom in Koppa; paddy and ragi in Mudgere; paddy, ragi, cholum, horse gram, ballar, togare, wheat and castor in Kadur and paddy, sugar-cane, ragi, horse gram, ballar and castor in Tarikere are in good condition. Ragi and cardamom in parts of Mudgere; cardamom, arecanut and coffee in parts of Koppa, arecanut in parts of Yedahalli and cholum and coriander in parts of Kadur are being harvested.

10. Prospects of the season are good. Food stocks available and sufficient.

11. Public health generally good, except that small-pox prevails in parts of Koppa and plague in the towns of Mudgere and Chikmagalur and in a few villages of the Chikmagalur Taluk. It has just broken out in Kadur Town.

12. Cattle generally healthy. Water and pasture available throughout the district.

CHITALDRUG.

8. Market well supplied.

9. Condition of standing crops is good. Seeds sown:—Bile jola and kadale in the Hiriyur, Holalkere and Davangere Taluks and godhi in the Hiriyur Taluk.

Crops harvested.—Yellu and jola in the Chitaldrug, Challakere, Holalkere, Jagalur and Hosdurga Taluks (yield 8 to 12 annas). Ragi in the Hiriyur Taluk (yield 12 annas). Green and black grams in the Holalkere Taluk (yield 6 annas). Sugar-cane in the Chitaldrug Taluk (yield 4 to 12 annas). Navane in the Davangere and Molakalmuru Taluks (yield 12 annas). Sajje in Jagalur and Molakalmuru Taluks (yield 8 to 12 annas).

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.

BANGALORE,
31st October 1906. }

P. G. D'SOUZA,
for Secy. to the Govt. of H. H. the Maharaja
of Mysore, Gen. & Rev. Depts.

Notification No. G. 248—G. M. 133-06-2, dated 23rd October 1906.

The following translation of the Persian Passport Regulations which was published in Part IV of the *Mysore Gazette*, dated the 27th September 1900, is republished for general information.

2. Much trouble is frequently caused by persons proceeding to Persia without first providing themselves with passports duly visé-ed by a Persian Consular Officer. The special attention of the public is directed to the necessity for observing the Regulations in this respect.

3. The public are also warned that Mysore subjects contemplating residence in Persia should take with them documentary proof of their nationality, to enable them to be registered as such at the nearest British Consulate within one month of arrival in the country.

TRANSLATION OF THE PERSIAN PASSPORT REGULATIONS.

(HIS MAJESTY'S SIGNATURE.)

To His Excellency the Prime Minister.

Whereas matters connected with passports are not regulated by one set of rules or by proper arrangements, such as are observed in other countries, and therefore Persian passports are not recognized as formal in foreign countries; and whereas it has often come to pass that, owing to the absence of rules for matters connected with passports, subjects of this Government, who are residing in foreign countries, have lost the right of being considered as Persian subjects; and whereas (Persian) officials meet difficulties in restoring those rights to them; and whereas, in addition to the above, Persian subjects, when crossing and passing the frontiers, suffer oppression and much tyranny at the hands of petty officials, His Majesty the Shah has, in order to secure ease and repose to all the inhabitants of Persia and to regulate properly the matters connected with passports, decided that the contract system of issuing passports should be abolished, and that a principal Central Department for this work should be established at the Ministry for Foreign Affairs; and that it should be conducted according to the regulations written in this pamphlet, so that the Government passports may acquire greater importance and consideration in the eyes of foreign countries, and Persian subjects may live in ease and quietness. Strict orders should now be issued that the Ministry for Foreign Affairs should, from the beginning of the new year and in future, abolish the contract system for all passports and carefully arrange and organize the passport work and establish a principal Central Department. Dated the month of Shawal 1317.

(SIGNATURE OF HIS MAJESTY THE SHAH.)

Observations.

1stly, in regard to passport regulations and the number of Persian subjects in foreign countries;

2ndly, in regard to the establishment of the principal Central Department for passports and office arrangement.

Section 1st.—A passport is to distinguish a Persian subject; and the object in issuing it to a traveller is that, when necessary, the Persian officials should help and strongly support the holder of the passport, and protect him, as far as possible, from untoward occurrences during his travels. Every Persian subject who wishes to travel to foreign countries, or desires to reside in them, should possess a Government passport; and Persian subjects cannot leave Persian territory without providing themselves with passports.

The Persian frontier officials shall prevent every Persian subject, who does not possess a formal passport, from leaving Persian territory.

A passport shall be given only to a Persian subject. It shall not be given to a foreign subject. Any person wishing to obtain a passport can do so by applying to the principal Central Department at Tehran. This Central Department is located in one of the branches of the foreign Ministry. In other parts of Persia the applicant will be referred to the Passport Department and its branches from which passports can be obtained.

Section 2nd.—A passport will not be given at Tehran to any persons, except those who are known to the Ministry for Foreign Affairs or to persons bringing introductions from persons who are known to the Foreign Ministry. Otherwise the applicant for a passport should submit an application to the Minister for Foreign Affairs, accompanied by a certificate from the "Hakim" of the city or town where he resides, or from the head of the Police Department.

In the frontier districts and other places, where no Government official exists, any person wishing to obtain a passport for travelling to other countries should obtain a certificate from the headman of the village or from any other well known person, on whom the passport official can rely, stating that the applicant is a Persian subject and is not a thief, rogue, or fugitive from law.

Government servants should obtain a certificate of leave from the head of the department in which they are serving, permitting them to travel.

Section 3rd.—Every Persian subject residing in a foreign country should obtain a passport from the Consul-General, or the Consul, or the Vice-Consul, or the Consular Agent nearest to the place of his residence, or in whose district he may be temporarily living or travelling.

The internal Persian Passport Department has no right to grant passports outside the limits of Persia to Persian subjects who may be residing in foreign countries or travelling from place to place in those countries.

Section 4th.—The Central Department will have a special Government seal; and all the passports will bear special numbers.

This Government seal is different from the State stamp, and should be attached to each passport, and all passports should bear the mark of the principal Central Department.

Every passport of travel or residence, which does not show on it the seal, mark and number of the principal Central Department, will not be accepted and will be considered useless and void.

Section 5th.—The period for which a passport will hold good is one year and an entry is to be made on the margin of the passport that, after the period of one year is over, the passport will become void.

If a Persian subject desires to return to his native country before the expiration of the year for which the passport is granted, he should present his passport to the Consul and get it visaed. This may be done without paying any fee, and he can then return to his country.

If a Persian subject residing in a foreign country should desire to return to his native country after the lapse of the year for which he holds a passport, he must show his passport of residence to the Consul, and obtain on payment of the usual fee a new passport.

If a Persian subject wishes to reside in a foreign country, he should renew his passport of residence at the beginning of each year. The usual fee must be paid on each renewal.

If any Persian subject residing in a foreign country fails to show his passport to his Consul, or fails to renew his passport of residence every year, double the usual passport fee will be demanded from him for each of the years during which he has resided in the foreign country without renewing his passport; and on his return to Persia he will be severely dealt with.

The Persian Government will inform all neighbouring and friendly powers that if the passport of a passport-holder does not show the mark and the number of the Central Department, and does not bear the State stamp as is required in Section 4th, his passport should be considered null and void.

If a Persian subject desires to remain in a foreign country, he should present his travelling passport to the Persian Consul, who may be nearest to the place of his residence. On payment of three Krans this can be registered in the Consul's office. The travelling passport should then be retained in the traveller's possession up to the end of the period for which it is granted.

After the lapse of the period he should obtain a passport of residence and hand over the travelling passport to the Consul.

Section 6th.—The fee for a travelling passport both in Persia or other countries is as follows:—

For Hajis, merchants and other travellers, three Tomans.

For laborers and artizans, two Tomans.

For the pilgrims to Kerbela and other holy places there, one Kran.

In foreign countries these fees should be recovered in the coin of those countries according to the rate of exchange for Krans of the day.

The fees for a passport of residence are as below. They should be taken in the coin of the country in which the receive of a passport resides according to the rate of exchange for Krans:—

							Tomans.
1st class	...	...	...	...	...	...	5
2nd "	...	...	...	...	...	...	3
3rd "	...	...	...	...	...	...	2

If a passport includes the names of a whole family, consisting, for instance, of a father, mother and children, who are all Persian subjects, a single passport is sufficient to denote that they are all Persian subjects.

The head of the family need only submit in writing the names of his children and of all other members of his family. Boys who have reached the age of puberty and servants—male and female—are excepted from this rule. They must obtain separate passports for themselves.

Passports of residence, which are given by the Persian Consuls annually, should be renewed in the beginning of each year, when the fee must be paid.

Section 7th.—The fee for "visaing" a passport for a traveller is 12 "Hazars" (Kran) and for laborers and artizans 4 Krans. If foreign subjects who enter Persia have their passport

duly "visaed" by a Persian Consul or a Chancellor, the passport officials or the frontier officials are not to demand any payment from them, but if the passports of such travellers have not been "visaed," if the traveller is a Turkish subject, a double fee shall be taken by the rule of reciprocity: but if he be a subject of any other friendly power, a single fee shall be taken from him and the passport "visaed."

The officials of foreign friendly powers, such as Consuls and Members of Embassies and Consuls and Members of Consulates and Plenipotentiaries of Foreign Powers, are exempted from the above regulation. They should on no account make any payment, provided they are travelling on Government service.

If the passports of Persian subjects, who are returning to Persia from foreign countries, have been "visaed" by a Persian Consul or Chancellor, the passport officials and the frontier officials are strictly prohibited from demanding from them any payment whatever on any reason or pretext. This prohibition extends to the taking of "Salamatana" (safe journey). If any official commits any such act contrary to these regulations, he will be called to account and severely punished.

If a Persian subject returns from a foreign country, and his passport be found not to bear the "visa" of a Persian Consul, the passport officials and frontier officials will recover from him 12 Krans and 3 Abbasis as the fee for "visaing" his passport and in addition a fine of 5 "Hazars."

PASSPORT DEPARTMENT.

Section 1st.—A Central Department called the Central Passport Department of Persia will be established at Tehran and located in the Ministry for Foreign Affairs.

The head of this department will be responsible for all matters concerning the receipt of fees and issue of passports, whether in Persia or in foreign countries. That is to say, he will be responsible for all the revenue derived from this source. The head of the department will appoint and maintain officials at every city and town and in the frontier districts, wherever he considers it necessary. The officials of the department will all receive salaries from the Central Department, and also travelling and establishment expenses which will be borne by the Central Department.

The principal Central Department shall keep reliable registers in which the passports issued will be entered in serial numbers. In the same way a register will be maintained of the number of passports of residence sent to each person residing in a foreign country, together with details and other particulars. The sums of money received from the Persian officials, Consuls and Ambassadors on account of passport fees shall be entered in the accounts of the Central Department.

Section 2nd.—Chancellors of Embassies or Consuls-General should send particulars to the Central Department every six months, including the number of Persian subjects, whose names have been entered in their books, and the number of passports which have been issued, and the reports which they have received from the Consuls subordinate to them.

All the above information should be submitted with the necessary explanations.

The Central Department will publish once a year a notice, mentioning the number of Persian subjects, who are residing in foreign countries.

In the event of a Chancellor or a Consul or an official of the Central Department wishing to leave his post before he has issued all the passports, which he has received from the Central Department, he should render an account of the passports and fees received to his successor, and handing them over to him should take his receipt for them.

Every Chancellor or Consul or official of the Central Department, when transferred from his post, should hand over the passports of residence and travel which he may have in his possession, together with the record book of passports, to his successor appointed to the same office. The newly appointed officer, after having duly examined the accounts, should sign the book and give a receipt for it.

In foreign countries, where Persian Chancellors exist, the Chancellors, and where there is no Chancellor, the Persian Consul will be answerable to the Central Department concerning all questions and discussions about passports.

Passports of residence and travel will be sent from the principal Central Department. They shall all bear the mark of the above Department, and shall not be accepted without the said mark on them.

Passports of residence and travel will be sent to each place and country required in sufficient quantities from the Central Department. In Persia they will be sent to the officials of the Central Department and in foreign countries to the Consuls. The appointment of passport officials will rest with the Central Department; they can appoint any person whom they consider suitable under fixed conditions and necessary guarantees, and depute him to any place to which they may think it necessary to send him.

Dated the 20th Shawal; 1317 H. Tanguz II (the year of the pig) corresponding to 1st March 1900 A. D.

Note - Rice (husked) Orza Sativa.

Ragi - Eleusine Corocana

Kulthi - (Horse gram) Dolichos Biflorus.

Cholum - Sorghum Vulgare

Kadale - (Bengal gram) Cicer Arietinum.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	15 to 16	

Agricultural operation—Harvesting of ragi begun.

Standing crops fair.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. There has been no sowings during the week. Preparations are being made in Kankanahalli for harvesting ragi.
10. Prospects of the season good. Rainfall is reported to have been insufficient for the ragi crop in Hoskote and some parts of Closepet.
11. Public health generally good. Dysentery is reported to prevail in the Kasba hobli of Hoskote.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition. Paddy in Kolar and Gudibanda and Bagepalli, and wild gingelly, in Mulbagal are being sown. Gid-ragi in Kolar and Mulbagal; samé in Kolar, Bowringpet, Mulbagal and Chikballapur; saje in Sidlaghatta; and potato in Chikballapur are being harvested.
10. Prospects of the season good. Food stocks are available.
11. Public health generally good, except that some cholera cases are reported in a village of Srinivaspur Taluk.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tumkur, Sira, Tiptur and Pavagada; kadale and cholum in Sira and Tiptur and coriander and menthya in Tiptur.
Crops harvested.—Ragi in Tumkur, Maddagiri, Sira, Pavagada and Koratagere; paddy in Maddagiri, Sira, Koratagere and Turuvekere; navané in Maddagiri, Sira, Gubbi and Pavagada; samé in Maddagiri, Sira, Gubbi and Tiptur; cholum in Sira, Gubbi, Tiptur, Pavagada and Koratagere; sugar-cane in Sira, Kunigal and Turuvekere; baragu in Sira; and saje in Pavagada.
10. Prospects of the season good. Rainfall has been insufficient in parts of Maddagiri. Food stocks are available.
11. Public health generally good, except for fever in Tiptur and plague in Chiknayakanhalli.
12. Cattle healthy. Water and fodder sufficient.

MYSORE.

8. Market well supplied.
9. Standing dry and wet crops are reported to be good in all the taluks. Lands in parts of the Nanjangud Taluk are being ploughed for sowing Kar seeds. Paddy crops under tanks in some parts of Malvalli Taluk are reported to have been slightly attacked by insects. Ragi in parts of Chamrajnagar and T. Narsipur is being harvested. Till and navane in parts of Yedatore ragi and jola in parts of Gundlupet have been harvested.
10. Prospects of the season are good. The dry crops in parts of Mysore, Hunsur and Mandya are reported to be in need of rain. Raiyats and merchants have sufficient stock of food grains.
11. Public health good, but cholera still prevails in parts of Hunsur, Heggaddevankote, T.-Narsipur and Malvalli.
12. Cattle are reported to be healthy in all the taluks. Water and fodder are available throughout.

HASSAN

8. Market well supplied. Prices are still high.
9. Bengal gram and coriander continue to be sown in the Channarayapatna Taluk. Paddy has come to ears in Belur Taluk. Standing crops are in good condition in all parts of the district. Ragi in the Manjarabad Taluk and sugar-cane in the Channarayapatna Taluk are being harvested.
10. Prospects of the season are good. Food stocks are available.
11. Public health generally good, except that small-pox still exists in parts of Manjarabad Taluk and plague in Hassan and Belur Towns.
12. Cattle are healthy. Water and pasture are available.

SHIMOGA.

8. Market well supplied.
9. Standing crops, such as paddy, ragi, cholam, horse gram, and sugar-cane, are in good condition. Ragi and cholam in the Shimoga Taluk; ragi, cholam, and navane in the Channagiri Taluk; ragi in the Honnali and Shikarpur Taluks; ragi and paddy in the Sorab Taluk and arecanut in the Sorab, Sagar and Tirthahalli Taluks are being harvested.
10. Prospects of the season are good. Food stocks are available in sufficient quantities.
11. Public health is generally good. Small-pox prevails in portions of the Sorab and Sagar Taluks.
12. Cattle are generally healthy. Pasture and fodder are available.

KADUR.

8. Market fairly well supplied.
9. The standing crops of sugar-cane, paddy, horse gram, castor, ballar and ragi in Tarikere; paddy, sugar-cane, arecanut, coffee and cardamom in Koppa; sugar-cane, doddaragi, paddy, ballar, togari, gingelly and horse gram in Chikmagalur; paddy, ragi, ballar, wheat, cholam, Bengal gram, coriander, sugar-cane, horse gram, togari and castor in Kadur; paddy and ragi in Mudgere are in good condition. Bengal gram is being sown in parts of Tarikere; cholam in parts of Tarikere; cardamom and arecanut in parts of Koppa; ragi in parts of Kadur; ragi and cardamom in parts of Mudgere; paddy and arecanut in parts of Yedahalli are being harvested.

The probable outturn is as follows:—

Sringeri—Paddy (standing crops)	...	13 annas.
Arecanut (do)	...	12 annas.
Yedahalli—Paddy (do)	...	12 annas.
Kadur—Ragi (do)	...	16 annas.
Paddy (do)	...	14 annas.
Coriander (harvested crops)	...	6 annas.
Cholam (do)	...	16 annas.
Gingelly (do)	...	6 annas.
Tarikere—Cholam (do)	...	12 annas.
Koppa—Cardamum (do)	...	12 annas.

10. Prospects of the season good. Food stocks available and sufficient.
11. Public health generally good. Small-pox prevails in parts of Koppa and Sringeri; and plague in Kadur, Mudgere and Chikmagalur Towns and in a few villages adjoining the Chikmagalur Town. Cases of ague are also prevalent in Chikmagalur Town.
12. Cattle generally healthy. Water and pasture are ample everywhere.

CHITALDRUG.

8. Market well supplied.
9. Condition of crops—Good.
Seeds sown.—Bengal gram and bilijola in the Holalkere Taluk.
Crops harvested.—Jola in the Chitaldrug, Challakere, Holalkere, Davangere, Jagalur and Molakalmuru Taluks, yield 4 to 12 annas; ragi in the Chitaldrug, Hiriyur, Davangere and Molakalmuru Taluks, yield 4 to 16 annas; saje and navane in the Chitaldrug, Hiriyur, Davangere, Jagalur and Molakalmuru Taluks, yield 4 to 16 annas; paddy in the Davangere and Jagalur Taluks, yield 8 to 12 annas; sessamum in the Challakere and Jagalur Taluks, yield 4 to 16 annas.
10. Prospects of the season good. Food stocks available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

Cholum - *Sorghum Vulgare*.
 Kadale - (Bengal gram) *Cicer Arietinum*.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

Prices of food grains—Rice

Ragi

Normal.

Current.

... 10 to 11

6½ to 7

... 20 to 30

15 to 16

} seers per rupee.

Agricultural operation—Harvesting of ragi.

Standing crops fair.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. In Bangalore onion is reported to have been sown. Ragi is being harvested throughout.
10. Prospects of the season good.
11. Public health generally good.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops are in good condition.
- Crops sown.—Vysakhi paddy in Kolar, Mulbagal, Sidlaghatta, Bagepalli, Srinivasapur and Gudibanda; and potato in Chikballapur.
- Crops harvested.—Samé in Kolar, Sidlaghatta, Chikballapur, Bagepalli, Srinivasapur; Kartika paddy in Sidlaghatta and Gudibanda; sajje in Bagepalli and Srinivasapur; cholum in Srinivasapur; and ragi in almost all the taluks.
10. Prospects of the season good. Food stocks are available.
11. Public health generally good, except that some cholera cases are reported from a village in Mulbagal.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
- Crops sown.—Paddy in Tumkur, Maddagiri, Sira and Pavagada; kadale in Sira and Tiptur; cholum in Sira; and coriander in Tiptur.
- Crops harvested.—Ragi in all the taluks; paddy in Sira, Pavagada and Koratagere; navane in Maddagiri, Sira, Gubbi and Pavagada; save in Maddagiri, Sira, Gubbi, Tiptur and Pavagada; cholum, baragu, sugar-cane and chillies in Sira; cholum and baragu in Gubbi; sajje in Pavagada; and sugar-cane in Turuvekere.
- Sowing and harvesting are going on in parts.
10. Prospects of the season good. Rain is reported to be insufficient in Maddagiri. Food stocks are available.
11. Public health generally good, except for fever in Tiptur and plague in Chiknayakanhalli.
12. Cattle healthy. Water and fodder sufficient.

MYSORE.

8. Market well supplied.
9. Standing crops are in good condition. Lands in parts of Gundlupet are being ploughed for sowing Kar seeds. Togari, black and green grams and tadagani in parts of Nanjangud and paddy in parts of Malvalli are reported to have been slightly attacked by insects. Ragi, tadagani and chillies in parts of Mysore; ragi in parts of Chamrajnagar, T.-Narsipur and Nagamangala; til and navane in parts of Yedatore; ragi and samé in parts of Malvalli, and haraka and samé in parts of Mandya are being harvested.
10. Prospects of the season good. Food stocks sufficient for the present.
11. Public health generally good, but cholera still prevails in parts of Mysore, Chamrajnagar, Hunsur, Yedatore, Heggaddevankote, Nanjangud and T.-Narsipur.
12. Cattle healthy. Water and fodder available.

HASSAN.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Kadale and coriander in Channarayapatna.
Crops harvested.—Paddy in Belur, doddaragi in Hassan and Arsikere; and sugar-cane and doddaragi in Channarayapatna; kulthi in Hole-Narsipur, requires more rain.
10. Prospects of the season good. Food stocks available.
11. Public health generally good. Plague still prevails in Hassan and Belur Towns, and small-pox in parts of Manjarabad and Channarayapatna.
12. Cattle healthy. Water and pasture available.

SHIMOGA.

8. Market well supplied.
9. Standing crops are in good condition.
Crops harvested.—Ragi, paddy and cholum in Shimoga and Shikarpur; ragi in Channagiri; ragi, cholum, paddy and savé in Honnali; ragi and paddy in Sorab; paddy in Tirthahalli; and arecanut in Sorab, Sagar and Tirthahalli.
Estimate of crops.—Shimoga—Ragi 4 to 10 annas.
Paddy 8 to 12 annas.
10. Prospects of the season good. Food stocks are available in sufficient quantities.
11. Public health generally good. Small-pox prevails in some parts of Sorab, Sagar and Tirthahalli.
12. Cattle generally healthy, but in some parts of Sagar and Nagar, cattle are reported to be suffering from murrain. Fodder and pasture available.

KADUR.

8. Market fairly well supplied.
 9. Standing crops are reported to be in good condition.
Crops harvested.—Ragi, cholum, navane and savé in Tarikere; cardamom, arecanut and coffee in parts of Koppa; ragi, coriander, cholum and gingelly in Kadur; cardamom, ragi and coffee in parts of Mudgere; and arecanut in parts of Sringeri.
- Probable outturn of crops:—
- | | | | |
|--|-----|-----|-----------|
| Tarikere—Ragi, cholum, navane and savé | ... | ... | 12 annas. |
| Koppa—Cardamom | ... | ... | 12 annas. |
| Coffee | ... | ... | 2 annas. |
| Arecaunt | ... | ... | 8 annas. |
| Kadur—Ragi and cholum | ... | ... | 16 annas. |
| Gingelly and coriander | ... | ... | 6 annas. |
| Mudgere—Cardamom | ... | ... | 8 annas. |
| Ragi | ... | ... | 5 annas. |
| Sringeri—Arecaunt | ... | ... | 6 annas. |
10. Prospects of the season good. Food stocks available and sufficient.
 11. Public health generally good. Small-pox prevails in parts of Sringeri and Koppa and plague in Mudgere, Kadur and Chikmagalur Towns and in a few villages adjoining Chikmagalur. Ague is also prevalent in Chikmagalur Town.
 12. Cattle healthy. Water and pasture ample everywhere.

CHITALDRUG.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—White cholum, kadale and wheat in Hiriur.
Crops harvested.—Sajje and navane in Chitaldrug, Hiriur, Davangere, Holalkere and Hosdurga, yield 8 to 12 annas; paddy in Chitaldrug, Holalkere, Davangere and Jagalur, yield 8 to 12 annas; cholum and ragi in Holalkere, Davangere, Jagalur and Molakalmuru, yield 8 to 16 annas; sessamum in Challakere and Molakalmuru, yield 4 to 12 annas; castor in Molakalmuru, yield 12 annas; black and green gram in Hosdurga, yield 12 annas.
10. Prospects of the season good. Food stock available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

Note—Rice (husked) - *Oryza Sativa*.
Ragi—Eleusine Corocana.
Kulthi—(Horse gram) *Dolichos Biflorus*.

Cholum—Sorghum Vulgare.
Kadale—(Bengal gram) *Cicer Arietinum*.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity, number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	... 25 to 30	15 to 16	

Agricultural operation—Harvesting of ragi.

Standing crops fair.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition. There has been no sowing during the week. Ragi is being harvested in most parts of the district. In Bangalore 2,700 acres of ragi, one acre of ground nut and four acres of samé are reported to have been harvested during the week. The probable outturn is about 8 annas.
10. Prospects of the season generally good.
11. Public health generally good. Small-pox is reported to prevail in the Channarayana hobli of the Devanahalli Taluk.
12. Cattle are healthy. Water and fodder available throughout the district.

KOLAR.

8. Market well supplied.
9. *Crops sown.*—Vysakhi paddy in Kolar, Mulbagal, Sidlaghatta, Bagepalli and Srinivasapur Taluks and Gudibanda Sub-Taluk; and potato in Chikballapur.
Crops harvested.—Samé in Kolar, Sidlaghatta and Chikballapur Taluks; Kartika paddy in Mulbagal, Sidlaghatta, Chikballapur and Bagepalli Taluks and Gudibanda Sub-Taluk; sajjé in Bagepalli and Srinivasapur Taluks; cholum in Srinivasapur Taluk and ragi in almost all the taluks.
Standing crops are in good condition.
10. Prospects of the season are good. Food stocks are available.
11. Public health generally good, except that cholera cases are reported from a village in Mulbagal.
12. Cattle are healthy and water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tumkur, Maddagiri, Sira, Pavagada and Koratagere; kadale and cholum in Sira; and coriander in Gubbi.
Crops harvested.—Ragi in all the taluks; paddy in Tumkur, Maddagiri, Sira, Gubbi, Pavagada and Koratagere; haraka in Maddagiri and Sira; navane and savé in Chiknayakanhalli, Sira, Gubbi, Pavagada and Koratagere; baragu, sugar-cane and chillies in Sira; cholum, castor and sugar-cane in Gubbi; kulthi in Pavagada; and sugar-cane in Kunigal and Tumkur.
10. Prospects of the season good. Rain has been insufficient in the Maddagiri Taluk. Food stocks available.
11. Public health generally good, except for fever in Tiptur and plague in Chiknayakanhalli.
12. Cattle healthy. Water and fodder sufficient.

MYSORE.

8. Market well supplied.
9. The standing dry and wet crops are reported to be good in all the taluks. Lands in parts of Gundlupet and Nanjangud Taluks are being ploughed for sowing kar seeds. Ragi in parts of Chamrajnagar, T.-Narsipur, Krishnarajpete and Nagamangala Taluks; ragi, and samé in parts of Malvalli, and ragi, haraka and samé in parts of Mandya are being harvested. The probable out turn is estimated as follows:—
Krishnarajpete ... Ragi between 10 and 12 annas.
10. Prospects of the season good. Dry crops in parts of T.-Narsipur want more rain. Raiyats and merchants have sufficient stock of food grains.

11. Public health is good throughout, but cholera still prevails in Mysore town and in parts of Chamrajnagar, Hunsur, Heggaddevankote and Nanjangud Taluks.
12. Cattle are reported to be healthy. Water and fodder are available in all the Taluks.

HASSAN.

8. Market well supplied.
9. Land is being ploughed in Hassan.
- Crops sown.*—Kada'e in Channarayapatna.
- Crops harvested.*—Paddy in most of the taluks, doddaragi in Hassan, Channarayapatna and Arsikere, and sugar-cane in Channarayapatna and Hole-Narsipur; kulthi and other miscellaneous crops require more rain in Hassan and Arkalgud. Standing crops are in good condition. Outturn promises to be fair.
10. Prospects of the season good. Food stocks available.
11. Public health generally good. But plague is still prevalent in Hassan and Belur towns and small-pox in parts of Manjarabad and Channarayapatna.
12. Cattle healthy. Water and pasture available.

SHIMOGA.

8. Market well supplied.
9. Standing crops such as paddy, ragi, cholum, sugar-cane, kulthi and navané are in good condition. Paddy in all the taluks, ragi in Shimoga, Channagiri, Honnali and Sorab; cholum in Channagiri, Honnali and Shikarpur; savé in Honnali; and arecanut in Sorab, Sagar and Tirthahalli are being harvested.
10. Prospects of the season good. Food stocks are available in sufficient quantities.
11. Public health is generally good. Small-pox prevails in parts of Sorab, Sagar and Tirthahalli.
12. Fodder and pasture available. Cattle generally healthy. In some parts of Sagar and Nagar cattle are reported to be suffering from murrain.

KADUR.

8. Market fairly well supplied.
9. Standing crops are in good condition. Paddy ragi, cholum, navané in Tarikere; coffee, arecanut and cardamom in Koppa; ragi, savé and chillies in Kadur; ragi, paddy, coffee, arecanut and cardamom in Mudgere; paddy and arecanut in Yedahalli, and arecanut in Sringeri were harvested. Probable outturn is as follows:—
- | | | | | |
|--------------------|-----|-----|-----|----------------------|
| Tarikere | ... | ... | ... | from 12 to 16 annas. |
| Yedahalli—Arecanut | ... | ... | ... | 8 " |
| Paddy | ... | ... | ... | 12 " |
| Koppa—Cardamom | ... | ... | ... | 8 " |
| Coffee | ... | ... | ... | 2 " |
| Mudgere | ... | ... | ... | 8 to 12 " |
| Kadur | ... | ... | ... | 8 to 16 " |
| Sringeri—Arecanut | ... | ... | ... | 12 " |
10. Prospects of the season good. Food stocks available and sufficient.
11. Public health generally good. Small-pox prevails in parts of Mudgere and Kadur, and plague is on the increase in Mudgere, Kadur and Chikmagalur towns.
12. Cattle generally healthy. Water and fodder ample everywhere.

CHITALDRUG.

8. Market well supplied.
9. Condition of crops good.
- Seeds sown.*—Nil.
- Crops harvested.*—Ragi, cholum, navané, savé and sajje in Chitaldrug, Challakere, Hiri-yur, Holalkere, Davangere, Jagalur and Molakalmurn, yield 4 to 14 annas; paddy and chillies in Davangere, yield 8 to 14 annas; cotton, kadale, black and green grams in Molakalmurn, yield 12 annas.
10. Prospects of the season good. Food stock available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

BANGALORE, }

CLASS IV—FRUITS.

1	Best Apples, in six or more varieties	10
2	Second best do do	5
3	Third best do do	3
4	Best Peaches, in two or more varieties	6
5	Second best do do	4
6	Best Strawberries	5
7	Second best do	3
8	Best Guavas	2
9	Best Raspberries	3
10	Best Hill Gooseberry	2
11	Best Mulberries	3
12	Best Melons	2
13	Best Figs	4
14	Best Grapes, in three or more varieties	6
15	Best Pameloes do do	3
16	Best Imported Oranges	4
*17	Best Plantains (only of the finest varieties)	5
*18	Best Collection of Fruits of all kinds arranged in a basket	10
19	Second best do do do	7
20	Third best do do do	4
*21	Best Novelty in Fruit, exhibited for the first time	4
Total		95

CLASS V—VEGETABLES.

*1	Best Potatoes, in six varieties, half a maund of each	10
*2	Second best do do	6
*3	Third best do do	4
4	Best Cauliflower, not less than three	5
5	Second best do do	3
6	Best Broccoli do do	3
7	Best Cabbage, not less than three, and excluding Drumhead	5
8	Second best do do do	3
9	Best Celery	4
10	Second best do	2
11	Best Beet	3
12	Second best do	2

No.	Description	Rs.
13	Best Knol-khol	3
14	Best Turnips	4
15	Best English Radish	3
16	Best Tomato, not less than three varieties	3
17	Best Green Peas (Imported)	5
18	Second best Green Peas (Imported)	3
19	Best Parsnips	4
20	Best English Carrots	5
21	Second best do	3
22	Best Asparagus	3
23	Best Onions	4
24	Best Brussels Sprouts	4
25	Best leeks	3
26	Best Endive	2
27	Best Capsicums	3
28	Best Cho-cho	2
29	Best Brinjals	3
30	Best Lettuce (Cabbage)	3
31	Best " (Cos)	2
*32	Best Custard Marrow	4
33	Best Pumpkins	2
34	Best Collection of Sweet Herbs	3
35	Best Basket of English Vegetables	10
36	Second best do	6
37	Third best basket of English Vegetables	3
38	Best Novelty in Vegetables, exhibited for the first time	4
39	Best Bendekayi	2
40	Best Nelavarekayi	2
41	Best Gorikayi	2
42	Best Huralikayi	2
43	Best Padavalakayi	2
44	Best Budi Kumbalakayi	2
45	Best Collection of Country Vegetables in varieties other than those mentioned above.	5
Total		161
Grand Total		698

General Conditions.

1. Prizes marked by an asterisk are open to the whole Province, as also the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned four days prior to the Show, what number of pots they intend to enter, and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 p.m. on the day previous to the Show.

3. Cut flowers may be delivered up till 2 p.m. on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified. But importance will be attached to variety within the limit number.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona fide* the produce of, or have been raised by the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name may compete for ordinary prizes but not for medals.

11. Exhibitors will not be permitted to remove their exhibits until the show is closed, and gardeners and others found offering articles for sale before 6 P.M. on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show executive, subject to the approval of the same.

*The following Rules for awarding medals at the Horticultural Shows
are hereby notified to the public.*

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half-yearly Horticultural Shows, subject to the following conditions:—

- (1) The medals will consist of, a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.
- (2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.
- (3) The following exhibitors will be qualified for the award of a medal:—
 - (a) The exhibitor of the best all-round exhibit in the appropriate class or classes taking the two shows of the calendar year together.
 - (b) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.
 - (c) The exhibitor of any specially meritorious novelty.
- (4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.
- (5) No exhibitor will be qualified to receive a medal who is not the *bona fide* cultivator of his exhibit, or the actual occupant of the garden in which the exhibit was raised, *e. g.*, no contractor who has merely purchased fruit or vegetables, exhibited will be eligible.
- (6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

J. CAMERON,
Supt., Govt. Gardens.

DISTRICT REPORTS.

8. Markets how supplied.
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	15 to 16	

Agricultural operation—Harvesting of ragi.

Standing crops fair.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. Standing crops are in good condition.
Crops harvested.—Ragi throughout the district, paddy in Bangalore, ground nut in Devanahalli.
10. Prospects of the season good.
11. Public health generally good. Except for cholera in a part of Kankanahalli, small-pox in a part of Devanahalli and fever in Channapatna town and Closepet Sub-Taluk.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops good.
Crops sown.—Vysakhi paddy in Kolar, Sidlaghatta, Bagepalli, Srinivasapur and Gudibanda Sub-Taluk; and potatoes in Chikballapur.
Crops harvested.—Vysakhi paddy in Sidlaghatta and Chikballapur; Kartika paddy in Sidlaghatta, Bagepalli and Gudibanda Sub-Taluk; ground nut in Chintamani; and ragi throughout the district
10. Prospects good. Food stocks available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops are in good condition.
Crops sown.—Paddy in Tumkur, Maddagiri, Sira and Pavagada; kadale in Maddagiri and Sira; and cholum in Sira.
Crops harvested.—Ragi in all taluks; paddy in Maddagiri, Sira, Gubbi, Pavagada, Koratagere and Turuvekere; haraka in Maddagiri; savé and navane in Chiknayakanhalli, Gubbi and Pavagada; and sugar-cane in Sira, Kunigal and Turuvekere.
10. Prospects of the season good. Rain is insufficient in Maddagiri. Food stocks are available.
11. Public health generally good, except for fever in Tiptur town.
12. Cattle healthy. Water and fodder are sufficient.

MYSORE.

8. Market well supplied.
 9. Standing crops are in good condition.
Crops sown.—Nil.
Crops harvested.—Ragi in Mysore, Nagamangala, Chamrajnagar, T.-Narsipur and Mandya; paddy in Yedatore; and ragi, samé and haraka in Krishnarajpete. Lands are being ploughed in Gundlupet for sowing kar-seeds. Outturn of crops is estimated as follows :—
- | | | |
|---------------------|-----|-----------------|
| Krishnarajpete—Ragi | ... | 10 to 12 annas. |
| Malvaili—Ragi | ... | 8 to 12 " |
| Samé and haraka | ... | 6 to 12 " |
| T.-Narsipur—Paddy | ... | 8 " |
10. Prospects of the season good. Food stocks sufficient for the present.
 11. Public health generally good, except for cholera at Mysore, Chamrajnagar, Hunsur, Heggaddevankote and Nanjangud.
 12. Cattle healthy. Water and fodder available.

HASSAN.

8. Market well supplied.
9. *Crops sown*.—Bengal gram in Channarayapatna.
Crops harvested.—Paddy in all the taluks. Doddaragi in Hassan, Channarayapatna and Arsikere. Sugar-cane in Channarayapatna and Hole-Narsipur; and green and black grams in Hole-Narsipur. Standing crops good.
10. Prospects of the season good. Rainfall has been insufficient for kulthi and other crops in Hassan and Arkalgud. Food stocks are available.
11. Public health generally good, except for plague at Hassan, Belur and Channarayapatna, and small-pox at Manjarabad and Channarayapatna.
12. Cattle healthy except for mouth disease prevailing at Hassan. Water and pasture available.

SHIMOGA.

8. Market well supplied.
9. Standing crops are in good condition in all the taluks. Paddy in all the taluks, ragi in Shimoga, Channagiri, Honnali, Sorab and Sagar; cholum in Honnali and Shikarpur; samé in Honnali are being harvested. Arecanut is being picked in Sorab, Sagar, Nagar and Tirthahalli.
10. Prospects of the season good. Food stocks are available in sufficient quantity.
11. Public health generally good. Small-pox prevails in parts of Sorab, Sagar and Tirthahalli.
12. Fodder and pasture are available. Cattle generally healthy. In parts of Sagar and Nagar cattle are reported to be suffering from murrain.

KADUR.

8. Market well supplied.
9. Standing paddy crop in Koppa, Mudgere, Tarikere and Chikmagalur; ragi, in Mud- and Tarikere; sugar-cane in Koppa, Kadur, Tarikere and Chikmagalur; arecanut in Koppa, Sringeri and Mudgere; coffee in Koppa and Mudgere; cardamom in Koppa and Mudgere; jola and ballar in Kadur and Chikmagalur; castor in Kadur and Tarikere; kadale in Kadur; wheat in Kadur; coriander in Kadur; kulthi in Tarikere; and dodda ragi, togari and kulthi in Chikmagalur are reported to be in good condition.
Crops harvested.—Paddy in Chikmagalur, Yedahalli, Tarikere and Mudgere; arecanut in Yedahalli, Sringeri and Koppa; ragi in Tarikere, Kadur and Mudgere; jola, navané and samé in Tarikere and Kadur; horse-gram in Kadur and coffee and cardamom in Mudgere and Koppa.
Probable outturn is as follows:—
Koppa—Cardamom, 14 annas; coffee, 2 annas; arecanut, 8 annas.
Sringeri.—Arecanut, 12 annas.
Mudgere—Paddy from 8 to 12 annas; coffee from 4 to 6 annas and cardamom from 6 to 10 annas.
Kadur—Ragi, 12 annas; paddy, jola and sajje, 16 annas; sugar-cane, 12 annas; chillies, navané, baragu and savé, 8 annas; coriander, 6 annas and black and green grams, 4 annas.
10. Prospects good. Food stocks available.
11. Public health good, except for plague which is on the decrease in Chikmagalur, Mudgere and Kadur towns and small-pox prevailing in parts of Mudgere, Kadur, Sringeri and Koppa.
12. Cattle healthy. Water and fodder ample everywhere.

CHITALDRUG.

8. Market well supplied.
9. Condition of crops good.
Seeds sown.—Paddy in Chitaldrug, Hiriur, Holalkere and Davangere; kadale in Chellakere; and wheat in Hiriur.
Crops harvested.—Cholla and ragi in Chitaldrug, Challakere, Holalkere, Davangere, Jagalur and Hosdurga, yield 4 to 14 annas; sajje in Chitaldrug and Hosdurga, yield 4 to 10 annas.
Cotton in Chitaldrug, yield 8 annas.
Navané in Chellakere, Holalkere, Davangere and Jagalur, yield 4 to 14 annas.
Paddy in Davangere and Jagalur, yield 8 to 14 annas.
10. Prospects of the season good. Food stocks available.
11. Public health good.
12. Cattle healthy. Water and fodder available.

AGRICULTURAL AND INDUSTRIAL EXHIBITION,
CANNANORE.

PATRONS.

A. R. Knapp, Esq., I. C. S., Collector of Malabar.

E. F. Thomas, Esq., I. C. S.

W. Chamier, Esq., Superintendent, Central Jail, Cannanore.

To be held under the auspices of the Sri Narayana Dharma Paripalana Yogam and kindly promised to be opened by the Hon. Mr. A. E. Castle-Stuart Stuart, I. C. S., Member of the Board of Revenue, Madras.

Rules for the Guidance of Exhibitors and others.

1. The Exhibition will be held about the beginning of February 1907. The exact dates will be notified in due course.
2. All articles of indigenous growth or manufacture, and natural or agricultural products from all parts of India, Burma and Ceylon will ordinarily be admitted to the Exhibition. Tools, implements, and machinery of foreign manufacture, used or likely to be used for starting or developing indigenous industries will be accepted as also foreign products, that may serve as useful models of imitation. Processes of manufacture that are now, or may hereafter be, carried on in India, may also be exhibited.
3. Each intending Exhibitor is requested to forward to the General Secretary of the Exhibition Committee, not later than the 1st January 1907, a statement showing the name and nature of the Exhibits proposed to be sent by him, and the space required together with a registration fee of Rs. 2, which will not be charged, however, in the case of natives of Malabar, Cochin and Travancore. Each approved Exhibitor will be given a pass showing his register number and the space allotted to him as also as many labels as may be required to be attached to his Exhibits—*Vide* rule 8.
4. Each registered Exhibitor will be allotted a space of 9 sq. ft. free of charge. Additional space, if available, will be allotted on payment of a charge ranging from As. 2 to Rs. 2, according to the nature of the Exhibits.
5. Exhibits will be received not sooner than three weeks and not later than ten days before the opening day of the Exhibition. But in the case of perishable articles this rule may be relaxed at the discretion of the Secretaries of the Exhibition Committee.
6. The space allotted but not occupied by the latest date fixed for sending in Exhibits will be otherwise utilized by the Committee, and no refund will on any account be made on payments once made for space.
7. Exhibits should be sent well packed and carriage paid to the Secretary at Cannanore, and should be accompanied with a list thereof in duplicate with the name and address of the sender attached.
8. Each Exhibit should have attached to it a label (which will be supplied by the General Secretary) with the particulars printed thereon, duly filled in.
9. Exhibits from ladies will be displayed in a separate section.
10. The Exhibition Authorities will provide ordinary stalls for the display of Exhibits. Any special arrangements that may be required should be carried out by the Exhibitors at their own cost but in accordance with plans approved of by the Exhibition Authorities, who may undertake to carry out such arrangements provided application therefor is made in time and the estimated costs are paid in advance.
11. The Exhibition Authorities will take every precaution to preserve Exhibits from injury, and guard the premises of the Exhibition and generally afford every facility to Exhibitors or their agents for the transport, display, sale and preservation of their Exhibits. But they do not hold themselves responsible for any damage or loss arising from any cause whatsoever.
12. The Secretaries of the Exhibition Committee may, on application, grant free passes to any assistants, servants or other attendants, who, in their opinion, are necessary for attendance at the stalls of any Exhibitor permitting them to attend the Exhibition. Such attendants shall obey the orders of the Exhibition Staff.
13. Medals, money prizes and certificates of merit will be awarded for such articles as, according to the decision of the Judges to be selected for the purpose, are deserving Exhibits.

14. Exhibits may be sold during the Exhibition with the permission of the Secretaries, but shall not be removed till after the close of the Exhibition. A commission of $\frac{1}{2}$ anna per rupee will be charged on all such sales.

15. All Exhibits must be removed within three days after the close of the Exhibition, after which period they will be removed and stored at the risk and expense of the Exhibitor. Any Exhibit not claimed and removed within ten days after the close of the Exhibition will be sold by public auction of which notice will be put up in a conspicuous place in the Exhibition premises, and the proceeds, after deducting all incidental expenses, disposed of by the Exhibition Committee as they think fit. Exhibitors may, however, subject to the provisions herein contained, arrange with the Secretaries of the Committee for the return of their goods on payment, in advance, of the estimated costs.

16. Admission into the Exhibition grounds will be by tickets which will be sold at not more than 4 as. each. Arrangements may be made with the Secretaries for the issue of Season and Family tickets at concession rates. Soldiers in uniform and children under 12 years will be charged only half rates.

17. The Secretaries shall have power to cause the removal of the Exhibits of any one who does not conform to the rules.

18. The above rules do not apply to Exhibits sent by the Madras Government or any other Government in India or by Government Institutions or Local Boards or Agricultural Associations, the Committee making all the necessary arrangements in each such case.

N. B.—All correspondence to be addressed to the General Secretary, Tellicherry; all Exhibits to be forwarded direct to the Secretary at Cannanore.

Music and Acrobatic performances and other suitable amusements will enliven the occasion.

C. M. RARICHAN MOOPAN, Calicut,
—President.

K. RAMUNNI, 1st Grade Pleader, Tellicherry,
—General Secretary.

Telegraphic address—

“Exhibition—Tellicherry.”

C. KARUNAKARAN, Retired Thasildar, Cannanore,

C. KRISHNAN, B.A., B.L., Calicut,

K. KRISHNAN, B.A., B.L., Tellicherry,

—Joint Secretaries.

Tellicherry, }
November 1906. }

AGRICULTURAL AND INDUSTRIAL EXHIBITION, CANNANORE.

LIST OF GROUPS AND CLASSES OF EXHIBITS.

GROUP I.—AGRICULTURAL MACHINERY.

(a) (1) Hand pumps, (2) Garden pumps, (3) Irrigation pumps, (4) Wind-mills, (5) Water-turbines, (6) Water-lifts, and (7) Water-wheels.

(b) Sugar-cane mills and Incubators.

(c) Ploughs, Hoes, Harrows, Chaff-cutters, Root-cutters, Food-grinders. Cattle food cookers; Mowing machines, Reaping machines, Winnowing machines, Sugar-cane juice boilers, Milk separators and other dairy machines for making butter, sterilizing and pasteurising milk; Lawn mowers, Grinding wheels, and other agricultural implements, Rice-hulling machines.

(d) Miscellaneous.

GROUP II.—VEGETABLE AND ANIMAL PRODUCTS.

(a) Grains, Pulses, Fruits, Vegetables, Flowers, etc.

(b) Cardamom, Ginger, Sugar (raw and refined), etc.

(c) Tobacco, Cigarettes, Cheroots, etc.

(d) Medicinal drugs, Gums, Resins, Fibres, Honey, Wax, Sandalwood, Grasses,

- (e) Oil seeds and oils, Cocotine, Fats, Manures, etc.
- (f) Dye-stuffs, Dyes, Dyeing barks, Dye leaves, Madder root, Logwood, Cochineal.
- (g) Miscellaneous.

GROUP III.—PREPARED ARTICLES.

- (a) Butter, Ghee, Cheese, Preserved milk, Sterilized milk, Humanized milk.
- (b) Jams, Jellies, Preserved fruits, Preserved food and provisions. Flours, Chutneys, Curry powders, Pickles, etc.
- (c) Confectionery, Biscuits, Jams, Sweetmeats, etc.
- (d) Khar, Sajee khar, Turkey red oil, Emulsion oil.
- (e) Miscellaneous.

GROUP IV.—INDUSTRIAL MACHINERY.

- (a) Gas, oil and air engines.
- (b) Hydro-Extractors, Dyeing machines, Brushing machines, Washing machines, Mordaunting machines, Oiling machines, Bundling presses.
- (c) Hydraulic and Screw presses, hand press, oil press, Colour printing machines, Calico printing machines, Sugar-cane press, Machine for preparing coffee, cotton, wool and other fibres for the market, Ice machines, Aerated water machines, etc.
- (d) Sawing, planing and drilling machines, Lathes, Weaving machines, Sewing machines, Bending and Doubling machines, Warping machines, Knitting machines, Embroidery machines, Looms.
- (e) Other machines not specified above.

GROUP V.—MECHANICAL CONTRIVANCES, AND MACHINE ACCESSORIES.

Tools and implements for black-smiths, copper-smiths, gold-smiths, tin-smiths and other metal workers, Carpenters, Plumbers, Turners, Stone workers, Miners, Glass workers, etc.

GROUP VI.—TEXTILE FABRICS.

- (a) Yarns of Cotton, Silk, Wool, Flax, Hemp, Wires, Rhea, Agave, Plantain, and other fibres, white and dyed; Mercerized yarns.
- (b) Gold and silver thread and imitation Lametta, Gold and silver thread.
- (c) Cotton, Silk, and Woolen cloths made from fibres; Rugs, Blankets, Cumblies Table cloths, Carpets, Shawls, Felts.
- (d) Gold and Silver lace cloths.
- (e) Hosiery, Gold, Silver, and Silk Embroidery; Knitted work, Crochet work and Bead.
- (f) Weaving, Dyeing, Calico printing processes.
- (g) Cocoonut fibre, Coir ropes, Mats, etc.
- (h) Grass mats, Bamboo mats, Rattan mats, Cuscus mats.
- (i) Improved hand-loom and other hand weaving apparatus.

GROUP VII.—LEATHER AND HORN.

- (a) Leather, Tanned, Chromed, Varnished, etc., and tanning processes.
- (b) Leather goods, Boots, Saddles, Book-binding, etc.
- (c) Horn goods.
- (d) Miscellaneous.

GROUP VIII.—POTTERY, PORCELAIN AND GLASS

- (a) Plaster work, Modelling figures, Carts, Vases.
- (b) Glass.
- (c) Bricks, Roofing Tiles, Flooring Tiles, Glazed Tiles.
- (d) Miscellaneous.

GROUP IX.—METALWARE AND JEWELLERY.

- (a) Castings.
- (b) Brass, Bronze, German Silver, and other Alloys, lead, tin and Aluminium ware.

- (c) Iron ware, Cutlery, Hardware, etc.
- (d) Copper vessels, Wires.
- (e) Locks, Hinges, Safes, Nails, etc.
- (f) Turned and Engraved works, Hammered-ware, Inlaid work, etc.
- (g) Fancy metal goods, Enamelled ware.
- (h) Silver and Gold work, Jewellery, plain and set with precious stones, Precious stones, Pearls.
- (i) Miscellaneous.

GROUP X.—CHEMICAL INDUSTRIES.

- (a) Attars, Perfumes, Perfumed oils, Powders, Cosmetics, Waters.
- (b) Medicines, Essences.
- (c) Paints, Varnishes, Pastes, Glues, Enamels, Chemicals, Inks.
- (d) Candles, Soaps, Matches, Bleaching Powder, Fire-extinguisher, Freezing and Cooling Mixtures.
- (e) Inks (writing and printing).

GROUP XI.—FURNITURE AND DECORATION.

- (a) Furniture, Carved wood work, Upholstery.
- (b) Screws, Curtains, Corner pieces, Marble work, Brackets, Artificial flowers, Boxes, Ebony work, Lacquered work.
- (c) Decorative Art.
- (d) Miscellaneous.

GROUP XII.—FINE ARTS.

- (a) Paintings, Drawings, Etchings, Crayon work, Oil work, Statuary, Photography, Stained glass work, and imitation of it; Crystoleum, Painting, Ornamental Pith work, Engravings, Wood-cuts, Ferro-type, Zincography, Poker work, or Pyrography.
- (b) Ornamental carving in Ivory, Wood, Sandal-wood, Stone, Glass, Cocōanut-shell, Rubber Stamps, etc.
- (c) Inlaid work in Marbles, Soap-stone, Wood, etc.
- (d) Armour.

GROUP XIII.—MISCELLANEOUS.

- (a) Articles of personal wear.
- (b) Sporting goods and toys, Walking sticks.
- (c) Basket work, Cane work, Bamboo work, Grass and leaf work, Wax work, Rubber goods, Shell work.
- (d) Artificial preparation and utilization of wastes of different industries.
- (e) Mounting of birds and heads of animals, Skins of wild animals.
- (f) Vehicles, Carriages, Rickshaws, Bicycles, Motor Bicycles, Motor cars, and their accessories.
- (g) Scientific Apparatus.
- (h) "Timber and other forest produce."

N.B.—Any other classes of exhibits not mentioned above will be accepted if approved of by the Managing Committee.

44	Best Budi Kumbalakayi	2
45	Best Collection of Country Vegetables in varieties other than those mentioned above.	5
Total		161
Grand Total		698

General Conditions

1. Prizes marked by an asterisk are open to the whole Province, as also the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned four days prior to the Show, what number of pots they intend to enter, and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 P.M. on the day previous to the Show.

3. Cut flowers may be delivered up till 2 P.M. on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prizes if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified. But importance will be attached to variety within the limit number.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona fide* the produce of, or have been raised by the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name may compete for ordinary prizes but not for medals.

11. Exhibitors will not be permitted to remove their exhibits until the show is closed, and gardeners and others found offering articles for sale before 6 P.M. on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show executive, subject to the approval of the same.

*The following Rules for awarding medals at the Horticultural Shows
are hereby notified to the public.*

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half-yearly Horticultural Shows; subject to the following conditions:—

- (1) The medals will consist of, a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.
- (2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.
- (3) The following exhibitors will be qualified for the award of a medal:—
 - (a) The exhibitor of the best all-round exhibit in the appropriate class or classes taking the two shows of the calendar year together.
 - (b) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.
 - (c) The exhibitor of any specially meritorious novelty.
- (4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.
- (5) No exhibitor will be qualified to receive a medal who is not the *bona fide* cultivator of his exhibit, or the actual occupant of the garden in which the exhibit was raised; i.e., no contractor who has merely purchased fruit or vegetables, exhibited, shall be eligible.
- (6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

J. CAMERON,
Supt., Govt. Gardens.

10. Prospects of the season good. Food stocks available.
 11. Public health generally good.
 12. Cattle healthy. Water and fodder sufficient.

No. 8073-8087-18.

GOVERNMENT OF INDIA.

DEPARTMENT OF COMMERCE AND INDUSTRY.

EMIGRATION.

RESOLUTION.

Simla, the 12th October 1906.

The Government of India have received from His Majesty's Secretary of State for India a copy of an Act passed by the Parliament of the Commonwealth of Australia to amend the Immigration Restriction Act of 1901, extracts from which were published in the Supplement to the *Gazette of India*, dated 10th May 1902, with Resolution No. 13-38-2, dated the 9th May 1902. The more important provisions of this law, which is entitled "The Immigration Restriction Amendment Act, 1905," are noted below for general information.

2. The portion of section 3 of the Principal Act which relates to the dictation test is as follows:—

"The immigration into the Commonwealth of the persons described in any of the following paragraphs of this section (hereinafter called "prohibited immigrants") is prohibited, namely:—

(a) Any person who when asked to do so by an officer fails to write out at dictation and sign in the presence of the officer a passage of fifty words in length in an European language directed by the officer."

This section has now been amended by section 4 of the new Act, the material provisions of which are as follows:—

"4. Section 3 of the Principal Act is amended—

(a) by omitting the whole of paragraph (a), and inserting in lieu thereof the following paragraph:—

"(a) Any person who fails to pass the dictation test: that is to say, who, when an officer dictates to him not less than 50 words in any prescribed language, fails to write them out in that language, in the presence of the officer.

No regulation prescribing any language or languages shall have any force until it has been laid before both Houses of the Parliament for thirty days and, before or after the expiration of such thirty days, both Houses of the Parliament by a resolution, of which notice has been given, have agreed to such regulation."

3. A section has been enacted which makes intermediate provision for the application of section 3, as amended, as follows:—

"5. Until a regulation prescribing any language or languages under section 3 of the Principal Act as amended by this Act shall come into force, any language authorized by section 3 of the Principal Act before the commencement of this Act shall be deemed to be a prescribed language within the meaning of that section as so amended."

4. The following new section has been inserted:—

"4-B. (1) Any person who has resided in Australia for a period or periods in the aggregate of not less than five years, and who is about to depart from the Commonwealth, may in manner prescribed apply to an officer authorized in that behalf for a certificate in the prescribed form excepting him, if he returns to the Commonwealth within the period limited in the certificate, from the provisions of paragraph (a) of section 3 of this Act.

"(2) The officer may in his discretion give the certificate on payment of the prescribed fee, or, without assigning any reason, withhold it.

"(3) Where the Minister is satisfied that a certificate given under this section has been obtained by any untrue statement of fact or intention, the Minister may revoke the certificate, which shall thereupon be taken to be of no effect and shall on demand be delivered up to the Minister.

"(4) A person to whom a certificate under this section has been issued (which certificate has not been revoked) shall not, on his return to the Commonwealth within the time limited by the certificate, if he produces and delivers the certificate to an officer, be required to pass the dictation test."

5. Section 5 of the Principal Act has been amended, and now reads thus:—

"(1) Any immigrant who evades an officer or who enters the Commonwealth at any place where no officer is stationed may if at any time thereafter he is found within the Commonwealth be required to pass the dictation test, and shall if he fails to do so be deemed to be a prohibited immigrant offending against this Act.

“(2) Any immigrant may at any time within one year after he has entered the Commonwealth be *required to pass the dictation test*, and shall if he fails to do so be deemed to be a prohibited immigrant offending against this Act.

The following sub-section has also been added:—

“(3) In any prosecution under the last preceding sub-section, the averment of the prosecutor contained in the information that the defendant has entered the Commonwealth within one year before his failing to pass the dictation test shall be deemed to be proved in the absence of proof to the contrary.”

6. Section 6 of the Principal Act has been amended, and now stands as follows:—

“Any prohibited immigrant within the meaning of paragraph (a) only of section 3 may if thought fit by an officer be allowed to enter the Commonwealth or to remain within the Commonwealth upon the following conditions:—

- (a) He shall on entering the Commonwealth or on failing to *pass the dictation test* deposit with an officer the sum of one hundred pounds.
- (b) He shall within thirty days after depositing such sum obtain from the Minister a certificate of exemption in the form of the Schedule or depart from the Commonwealth, and thereupon the deposit shall be returned; but otherwise the deposit or any part thereof may be forfeited and he *shall be deemed to be* a prohibited immigrant offending against this Act.”

7. It will be observed that the most important change effected by the Amending Act is the substitution of “any prescribed language” for “an European language” in the case of the dictation test. The languages will be prescribed by the Regulations which will be framed under the Act. The Governor-General in Council requests all Local Governments to take such measures as seem to them best calculated to make the provisions of the Act generally known to natives of India, more especially in places from which emigration to the Australian Colonies is believed to be most common. Intending emigrants should be warned at the ports of embarkation of the difficulties they may encounter in proceeding to these Colonies.

ORDERED that a copy of the above Resolution be forwarded, for information and guidance,

The Secretary to the Government of Madras.

“ “ “ “ Bombay.

“ “ “ “ Bengal.

“ “ “ “ the United Provinces.

“ “ “ “ the Punjab.

“ “ “ “ Burma.

“ “ “ “ Eastern Bengal and Assam.

“ Hon’ble the Chief Commissioner of the Central Provinces.

“ Chief Commissioner of Coorg.

“ “ “ of Ajmer-Merwara.

“ Hon’ble the Chief Commissioner of the North-West Frontier Province.

“ “ “ Agent to the Governor-General, Baluchistan.

to the Local Governments and Administrations noted in the margin and to the Home and Foreign Departments for information.

ORDERED also, that a copy be published in the Supplement to the *Gazette of India* for general information.

W. L. HARVEY,
Secretary to the Government of India.

LIST OF PRIZES TO BE AWARDED AT THE HORTICULTURAL SHOW
TO BE HELD AT THE LAL-BAGH ON 31ST JANUARY 1907.

CLASS I—PERENNIAL FLOWERS IN POTS.

No.	Description	Rs.
1	Best Standard Roses, in six varieties and six pots	8
2	Second best do do	5
3	Best Dwarf Roses do do	6
4	Second best do do	4
5	Best General Collection of Roses not including the above ; not less than twelve pots and not exceeding twenty	15
6	Second best do do do	10
7	Third best do do do	5
8	Best New Roses, exhibited for the first time	8
9	Best Double Geraniums, in six or more varieties, not exceeding 25 pots	6
10	Second best do do	4
11	Best New Geraniums, exhibited for the first time, one pot of each	6
12	Best Single Geraniums, in eight or more varieties, not exceeding 25 pots	6
13	Second best do do do	4
14	Best Ivy-leaved Geraniums, double or single, not exceeding 25 pots	5
15	Second best do do do	3
16	Best Pansies, in eight or more varieties, but not exceeding 25 pots	5
17	Second best do do do	3
18	Best Double Petunias, in four or more varieties	5
19	Second best do do do	3
20	Best Verbenas, in six or more varieties, but not exceeding 15 pots	5
21	Second best do do do	3
22	Best New Dracaenas, one plant of each variety	6
23	Best Anthuriums do do	6
24	Best Violets	4
25	Best Amaryllis	5
26	Best Cyclamens	4
27	Best collection Orchids in bloom	6
28	Best New Crotons, exhibited for the first time, one of each variety	6
29	Best Cannas, in twelve or more varieties	6
30	Second best do do	4
31	Best Lobelia	4
32	Best Carnations, in three or more varieties	5
33	Second best do do	3
*34	Best collection of Perennial Plants in flower, not less than twelve pots and not exceeding twenty	10
*35	Best Novelties in Perennials, exhibited for the first time, one plant of each	5
*36	Best New Foliage Plants of different species, exhibited for the first time, one plant of each species or variety	10
37	Best General Collection of Panax and Aralia, one plant of each variety	8
38	Best General Collection of Foliage Plants, without duplicates	20
39	Second best do do do	12
40	Best General Collection of Ferns, without duplicates	20
41	Second best do do do	12
42	Best General Collection of Palms, one plant of each	15
43	Second best do do do	10
Total		300

CLASS II—ANNUAL FLOWERS IN POTS.

1	Best Nasturtiums, in six or more varieties	4
2	Second best do do	2
3	Best Single Petunias, in six or more varieties	5
4	Second best do do	3
5	Best Antirrhinums, in six or more varieties	4
6	Best Phlox Drummondii, in ten or more varieties, limited to 50 pots	4
7	Second best do do do	2
8	Best Pinks, in six or more varieties, limited to 50 pots	4
9	Second best do do do	2
10	Best Asters, in six or more varieties	4
11	Second best do do	2
12	Best General Collection of Annuals in Flower	6
13	Second best do do	4

No.	Description	Rs.
14	Best Novelties in Annuals, exhibited for the first time, one of each	5
15	Best Stocks	4
16	Second best	2
17	Best Salpiglossis	4
18	Best Scabious	4
19	Best Cineraria	4
20	Best Primulas	4
21	Second best	2
22	Best Cockscomb	4
		79

CLASS III—CUT FLOWERS.

1	Best Cut Roses, not less than twelve varieties to be exhibited singly on Exhibition desks	6
2	Second best do do do	4
3	Best Hand-Bouquet	6

Total		161
Grand Total		698

General Conditions

1. Prizes marked by an asterisk are open to the whole Province, as also the Presidency of Madras.

2. In view to arrangements being made for staging plants, it is requested that exhibitors will notify to the undersigned four days prior to the Show, what number of pots they intend to enter, and for what prize they intend to compete. Plants intended for competition should be delivered in the Conservatory before 4 p.m. on the day previous to the Show.

3. Cut flowers may be delivered up till 2 p.m. on the day of the Show, but not later if intended for competition.

4. No prize shall be awarded unless there are at least two competitors for it, except in cases of rare excellence, when the Judges will use their own discretion.

The number of exhibits in all classes and sections should exceed the number of prizes offered, otherwise the Judges will be authorised to reduce the full value of such prizes.

5. It shall also be competent for the Judges to reduce the amount of prize if, in their opinion, the articles exhibited do not merit the full sums.

6. Obtrusive staging, overcrowding, packing to conceal blemishes and artificial support to blooms, etc., will be judged as defects to an exhibit, preference being given to natural growth and artistic arrangement.

7. Where a number limit is laid down, any exhibit exceeding that number shall be disqualified. But importance will be attached to variety within the limit number.

8. Where one plant of each species or variety is specified as a condition, any exhibit containing duplicates shall be disqualified.

9. If funds are available, the Judges may award special extra prizes in cases of exceptional merit.

10. All exhibits sent for competition must be *bona fide* the produce of, or have been raised by the exhibitors; and unless otherwise specified, must have been grown in Bangalore.

The Judges may withhold any prize until proof of these conditions be produced. Contractors bringing up fruit and vegetables for competition in their own name may compete for ordinary prizes but not for medals.

11. Exhibitors will not be permitted to remove their exhibits until the show is closed, and gardeners and others found offering articles for sale before 6 P.M. on the day of the Show shall be summarily ejected.

12. The names of exhibitors can only be attached to exhibits when the judging has been completed. Plant labels will be supplied by the Show executive, subject to the approval of the same.

*The following Rules for awarding medals at the Horticultural Shows
are hereby notified to the public.*

The Government of His Highness the Maharaja have sanctioned the grant of medals in addition to the usual money prizes offered at the half-yearly Horticultural Shows, subject to the following conditions:—

- (1) The medals will consist of, a gold medal for classes I and II, a silver medal for class IV and a bronze medal for class V.
- (2) These medals will be awarded by the Judges, at their discretion, at the Summer Show held in July or August in each year.
- (3) The following exhibitors will be qualified for the award of a medal:—
 - (a) The exhibitor of the best all-round exhibit in the appropriate class or classes taking the two shows of the calendar year together.
 - (b) The exhibitor of an exhibit of more than ordinary excellence in any sub-class.
 - (c) The exhibitor of any specially meritorious novelty.
- (4) No exhibitor who has been awarded a medal in any class will be qualified to receive another medal in that class during the three calendar years succeeding that in which he has received the medal.
- (5) No exhibitor will be qualified to receive a medal who is not the *bona fide* cultivator of his exhibit, or the actual occupant of the garden in which the exhibit was raised, *e. g.*, no contractor who has merely purchased fruit or vegetables, exhibited will be eligible.
- (6) It will be open to the Judges to withhold any or all the medals in any year on the ground of deficiency of merit in the exhibits.

DISTRICT REPORTS.

8. Markets how supplied
9. Progress of agricultural operations, state of standing crops, prospects and probable outturn of harvests, serious damage done to crops by insects or other natural calamities.
10. Prospects of season, tracts in which the rainfall has been insufficient, areas affected by scarcity number of people under relief, and state of food stocks.
11. Public health.
12. Remarks as to the condition of agricultural stock, failure of pasturage of fodder, etc.

BANGALORE CIVIL AND MILITARY STATION.

	Normal.	Current.	
Prices of food grains—Rice	... 10 to 11	6½ to 7	} seers per rupee.
Ragi	25 to 30	15 to 16	

Agricultural operation.—Ragi harvested.

Standing crops fair.

Probable outturn of harvests about 7 to 8 annas.

Cattle are in good condition. Water and fodder sufficient.

BANGALORE CITY AND TALUKS.

8. Market well supplied.
9. *Standing crops.*—Sugar-cane, haraka, paddy and grams are in good condition.
Crops sown.—Potatoes sown in the Devanahalli Taluk
Crops harvested.—Ragi throughout the district.
10. Prospects of the season good.
11. Public health generally good except for fever in parts of Kankanahalli, Channapatna and Closepet; and small-pox in the Channarayapatna hobli of the Devanahalli Taluk.
12. Cattle healthy. Water and fodder available.

KOLAR.

8. Market well supplied.
9. Standing crops in good condition.
Crops sown.—Vysakhi paddy in Kolar, Bowringpet, Sidlaghatta, Chikballapur, Bagepalli and Gudibanda.
Crops harvested.—Karthika paddy in Kolar, Bowringpet, Chintamani, Mulbagal, Sidlaghatta, Chikballapur, Bagepalli, Srinivaspur and Gudibanda; ragi throughout the district.
10. Prospects of the season good. Food stocks available.
11. Except for one plague case at the Kolar Gold Fields, public health generally good.
12. Cattle healthy. Water and fodder available.

TUMKUR.

8. Market well supplied.
9. Standing crops in good condition.
Crops sown.—Paddy in Tumkur, Maddagiri, Sira, Gubbi, Tiptur, and Koratagere; and kadale and coriander in Tiptur.
Crops harvested.—Ragi in Tumkur, Maddagiri, Chiknayakanhalli, Gubbi, Tiptur, Koratagere and Turuvekere; kulthi in Maddagiri and Sira; haraka in Chiknayakanhalli and Tiptur; navane and savé in Chiknayakanhalli, Gubbi, Tiptur and Turuvekere; paddy in Tumkur, Maddagiri, Sira, Gubbi, Tiptur and Koratagere; castor in Maddagiri and Sira; sugar-cane in Sira, Kunigal and Turuvekere; togari, chillies and wild gingelly in Sira; jola and ground-nut in Gubbi; and baragu and saje in Tiptur.

Agricultural operations.—Harvesting, ploughing and sowing Vysakhi paddy.

10. Prospects of the season good. Food stocks available
11. Except for fever in Tiptur, public health generally good.
12. Cattle healthy. Water and fodder sufficient.

MYSORE.

8. Market well supplied.
9. *Agricultural operations.*—In parts of Gundlupet lands are being ploughed for sowing kar seeds

Standing crops.—Dry and wet crops reported to be good in the district.

Crops harvested.—Paddy in parts of Mysore, Nanjangud, Seringapatam, Yedatore and T.-Narsipur; ragi in parts of Seringapatam, T.-Narsipur, Mandya and Krishnarajpete; horse gram in parts of Seringapatam, Yedatore and Krishnarajpete; castor in parts of Seringapatam; black gram in parts of Yedatore; and samé and haraka in parts of Krishnarajpete.

Estimated outturn is as follows:—

Seringapatam—Paddy and ragi	...	12 annas.
Horse gram	...	8 "
T.-Narsipur—Ragi	...	8 "
Malvalli—Harvested ragi	...	4 to 12 "
Krishnarajpete—Ragi	...	10 to 12 "
Samé and Haraka	...	6 to 12 "
Horse gram	...	8 to 12 "

10. Prospects of the season good. Food stocks available.
11. Except for fever and cholera in some parts, public health generally good.
12. Cattle healthy. Water and fodder available.

HASSAN.

8. Market fairly well supplied.

9. *Standing crops*.—In good condition.

Crops harvested.—Paddy in all taluks; dodragi and chillies in the Channarayapatna Taluk; kuithi in Channarayapatna, Arkalgud and Hassan Taluks; sugar-cane in Channarayapatna, Hole-Narsipur and Hassan Taluks; and huchella (wild gingelly) in Channarayapatna and Hassan Taluks.

Estimated outturn of crops is as follows:—

Paddy from ... 8 to 16 annas.

10. Prospects of the season good. Food stocks available.

11. Public health generally good, except for plague in Hassan and Hole-Narsipur towns, and in some villages of the Hassan, Belur and Channarayapatna Taluks; small-pox and fever in parts of the Hassan Taluk; and cholera in three villages in the Arkalgud Taluk.

12. Cattle healthy. Water and fodder available.

SHIMOGA.

8. Market well supplied.

9. *Standing crops*.—Ragi, paddy, cholum, horse gram and sugar-cane in good condition.

Crops harvested.—Paddy in the Shimoga, Channagiri, Shikarपुर, Sagar, Nagar and Tirthahalli Taluks; harvesting paddy is nearing completion in the Honnali and Sorab Taluks, and the Kumsi Sub-Taluk; ragi in the Shimoga, Channagiri, Honnali and Sagar Taluks; harvesting of ragi is nearing completion in the Sorab Taluk; cholum in the Channagiri, Honnali and Shikarपुर Taluks; horse gram in the Honnali and Sorab Taluks, and chillies in the Sorab Taluk. Arecanut is being picked in the Sorab, Sagar, Nagar and Tirthahalli Taluks.

10. Prospects of the season good. Food stocks available.

11. Except for small-pox in portions of the Sorab, Sagar, Nagar and Tirthahalli Taluks, public health is generally good.

12. Cattle healthy. Water and fodder available.

KADUR.

8. Market fairly well supplied.

9. *Agricultural operations*.—In the Malnad portions of the district, ploughing of wet lands completed.

Standing crops.—Paddy, ragi, horse gram, ballar and castor in Tarikere; sugar-cane, arecanut, coffee, pepper and paddy in Koppa; sugar-cane, Bengal gram and menthya in Chikmagalur; ragi, jola, horse gram, ballar, togari, paddy, sugar-cane, chillies, Bengal gram, wheat, menthya and coriander in Kadur; paddy, ragi, coffee, cardamom and arecanut in Mudgere, are reported to be in good condition.

Crops harvested.—Paddy, jola, ragi and navane in parts of Tarikere; arecanut, paddy, coffee and cardamom in Koppa; paddy and ragi in Chikmagalur; ragi, jola, baragu, navane, paddy, chillies and horse gram in Kadur; paddy, arecanut and coffee in Yedahalli; arecanut and paddy in Sringeri; paddy, coffee, cardamom, ragi and arecanut in parts of Mudgere are being harvested.

Probable outturn of crops is estimated as follows:—

Tarikere—Paddy, jola, ragi and navane 12 annas.

Koppa—Arecanut, paddy and coffee 12 annas; cardamom 6 annas.

Chikmagalur.—Paddy 12 annas; ragi 8 annas.

Kadur.—Ragi, paddy, jola and sajje 16 annas; sugar-cane 12 annas; black gram and green gram 4 annas; samé and chillies 8 annas and coriander 6 annas.

Yedahalli.—Paddy 12 annas.

Sringeri.—Arecanut 12 annas; paddy 13 annas.

Mudgere—Paddy 12 annas; coffee from 4 to 6 annas; cardamom from 8 to 10 annas; ragi 4 annas and arecanut 12 annas.

10. Prospects of the season good.

11. Public health generally good, except for plague still in Kadur and Mudgere, fever in Chikmagalur and small-pox in parts of Sringeri and Mudgere.

12. Cattle healthy. Water and fodder available.

CHITALDRUG.

8. Market well supplied.

9. *State of crops*.—Good.

Crops sown.—Paddy in the Hiriyur and Holalkere Taluks.

Crops harvested.—Ragi, jola and navane in the Challakere, Hiriyur, Jagalur, Hosdurga and Harihar Sub-Taluks.

Their outturn is 4 to 14 annas.

Estimated outturn:—

Paddy in the Hiriyur and Davangere Taluks 8 to 14 annas; horse gram in the Davangere, Jagalur and Harihar Sub-Taluks 4 to 14 annas; cotton in the Chitaldrug Taluk 4 annas.

10. Prospects of the season good. Food stocks available.

11. Public health good.

12. Cattle healthy. Water and fodder available.
